American Railroad Journal.

Saturday, April 18, 1868.

Stock Exchange and Money Market.

Money has suddenly become quite brisk and close again. Lenders have been restricting their advances to street borrowers, for use at the Stock and Gold Boards, while the demand from speculative sources has been more urgent, for temporary aid. Wednesday of the current week was the most stringent of all the days of the week under review. Several city banks on that day called in loans on stocks, leading to increased activity in the hunting up of relief through private channels, and failing of this, forcing realizations on the speculative favorites of the railway and miscellaneous list. The governing rates at the close were from 7 per cent. in currency to the same price in gold, on call. The pressure in the money line adversely influenced the public funds as well as railway and miscellaneous share property. The depression was most severely felt in Express Stocks, which broke down badly, and closed irregularly. The discount business has been on a limited scale within a range of from 7 @10 per cent. per annum for all current grades of mercantile paper. The violent fall in Atlantic Mail shares late last week, and the consequent embarrassments of certain prominent operators were the immediate cause of the renewed disturbance of confidence. The continuous marketing of gold on account of the Government, and the resulting drain of currency into the Treasury have tended to aggravate the stringency, and distrust in ruling financial and commercial values. The Sub-Treasury cash balances have been augmented nearly three millions, during the week, while the city banks have again reported a loss of deposits and specie, and a reduction of loans and circulation. The city banks now hold a specie reserve of only $16,343,150, against $25,106,800 on the 25th of January. Their deposits are now down to $179,851,880, against $217,844,548 on the 8th of February, showing a loss of some thirty-eight millions, in this line exclusively, in ten weeks, or an average of nearly four millions a week. Their loans have been reduced about 18 millions in nine weeks, or to 253 millions, from 271 millions on the 15th of February. Their legal tender reserve was increased last week, over a quarter of a million, it stood on Saturday last at 52 millions, against a little over 67 millions on the 25th of January.

The specie reserve of the city banks is now $16,343,150, against $8,856,229 same time last year. The city bank deposits are now $179,851,889, against $182,861,236 week ending April 13, 1867. The legal tender reserve amounts to $51,982,609, against $60,202,515 same time last year. The circulation now stands at $34,194,272, against $33,702,047 same time last year. The loans are now $252,936,725, against $250,102,178 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $82,062,000 a day, against a daily average of $94,630,523 the preceding week, and $92,974,000 the week ending with Mar. 28, 1868. The current week's exchanges average about $104,360,495 a day. The city banks, last week, gained $272,903 of legal tender, while they lost $1,104,966 in the deposit line, and $754,149 of their specie reserve. They reduced their loans, $1,351,166; and their circulation, $32,836.

The New York Gold Exchange Bank reports for the week ending Saturday, the 11th day of April, 1868, the average amount of loans and discounts as $1,655,200 00; average amount of specie, $98,804 26; average amount of deposits, $2,073,103 27.

The Philadelphia Bank movement the past week shows an increase in loans of $47,715; an increase of $84,405 in specie; an increase in legal tenders of $985,761; an increase of $977,552 in deposits; and a decrease of $1,747 in circulation. The Bank Clearings show a decrease of $1,235,546, and the balances, a decrease of $665,201.

National Bank notes to the amount of $75,670 were issued last week, making the total issue to 1,673 banks thus far, $307,215,601, against $282,555,440 at the close of the fiscal year ending

June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $7,451,682, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,845,790,) an actual circulation at this date, of $299,763,919. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,643,400; and for the public deposits, $38,177,950—making a total of $379,821,350. The Treasury Department last week redeemed and destroyed $337,000 of worn and mutilated fractional currency, and issued $597,335 of new. The outstanding amount of fractional currency on the 1st inst. was $32,588,690, against $32,307,947 on the 1st of March, and $32,246,439 on the 1st of Feb. 1868.

The U. S. Assistant Treasurer at this port officially notifies the public that, in accordance with the instructions of the Secretary of the Treasury, the interest on the three per cent. certificates will be paid annually from the date of their issue, and when presented for the collection of interest, new certificates will be issued, instead of stamping them as heretofore.

The U. S. Sub-Treasury receipts, week ending with April 11, were $20,191,305, including $2,227,469 from customs duties; payments, $17,365,821, including $66,000 of coin interest; balance at the close of the week, $100,760,036, against $97,934,551, at the close of the preceding week, showing an increase of $2,825,484. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $3,369,697 including $387,915 from customs; and payments, $2,437,598; on Tuesday, receipts, $1,746,867 including $443,678 from customs, and payments, $869,766. The balance at the close of business on Tuesday stood at $102,569,236, against $100,082,930 a week previous; and $98,161,867 on March 29, 1868.

Of the cash in the Treasury on the 1st inst., amounting to $122,509,645, the Sub-Treasury office in this city held $98,161,876.

The aggregate issue of coin certificates by the U.S. Sub-Treasury, in this city, up to date of latest published local report was $245,369,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740. The latest report from the national capital made the outstanding amount of coin certificates on the 1st of April $17,742,060 against $25,699,360, on the 1st of March, and $29,619,280 on the 1st of February, 1868. The Sub-Treasury issued $3,124,020 of coin certificates in March. It reported an issue, last week, of $2,036.000 of these certificates. It received $2,112,468 of coin certificates, in payment of duties at the Custom House, during the week.

The Government revenues yielded less satisfactorily last week, especially the excises, which fell 50 per cent. below the officially estimated weekly average for the current fiscal year, which latter is equal to precisely four millions per week. The excises, last week, yielded only $2,057,000 against $5,858,705 the preceding week; customs at the port of New York, $2,227,469 and at the outports, about $750,000 (in coin) more, making the grand total income for the week equal to about $6,151,750 in currency. The total receipts of the National Treasury, from excises, thus far in the new fiscal year, which began on the 1st of July, have been about $152,000,000. It has been stated that the estimated receipts from internal revenue for the fiscal year ending June 30 next is $208,000,000. There have already been received over $151,000,000, leaving a balance of nearly $57,000,000 to be collected during the next seventy-nine days in order to reach the estimated receipts from this source by the last of June. Secretary McCulloch and Commissioner Rollins are both satisfied the amount that will be collected by the last named date will be fully up to the required $57,000,000. A large portion of it will be derived from the income tax in June. The coin on hand on the 1st inst. was over $99,000,000, as shown by the public debt statement. The Secretary estimates as receipts of coin in April, May and June, $36,000,000 more. Meantime, there is to be paid of coin $28,000,000 on the 1st of May upon Five-twenties, and there is no more to pay during the present fiscal year, thus leaving coin balance on the 30th of June about $8,000,000 greater than was on hand on the 1st of April.

Government received from customs, through the port of San Francisco, from Jan. 1, to March 15, 1868, $1,728,595, against $1,374,638 same time last year.

Gold has been quite freely offered, largely on Government account, and has been depressed in price. The Money pressure has checked speculative operations. There has not been much inquiry from either shippers or importers. The range of the price, during the week, has been from 138@139, and the latest quotation on Wednesday was 138⅛. The Government sales of gold have been about equal to the Treasury receipts from customs. The export drain, thus far, this week, has been light, including $167,000 by the *Saxonia* on Tuesday, and $344,163 by *Australasian* on Wednesday.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $1,945,275, against $477,340 same time last year. The customs demand for Gold last week, averaged $371,244 a day; thus far, this week, it has been equal to $415,796 a day, or equal to a weekly aggregate of $2,494,776. The arrivals of specie from Europe, Havana and other foreign ports, during the week were unimportant, and from California, $1,177,812. The total customs revenue of the Government, in coin, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $88,882,202, against $100,083,132 same time in the preceding fiscal year. The total receipts of California gold at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $26,784,299, against $32,197,065 same time in the preceding fiscal year, showing a decrease of $5,412,766 in 1867–'68. The exports of specie from this port, last week, were $891,807, against $145,763 same week last year. The exports of specie, hence, since July 1, 1867, have been $44,449,687, against $23,984,297 same time in 1866–'7. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $66,000, and since July 1, 1867, $54,517,162, against $36,558,964 same time in 1866–'7. The specie exports from San Francisco, from Jan. 1, to March 15, 1868, were $8,884,128, against $7,758,542 same time last year.

Foreign exchange has been less plenty, since our last; and as the demand for prime bills has been somewhat brisker, prices have been quoted firmer. Bankers' prime sixty day bills on London closed on Wednesday at 109¼@109⅞, and on Paris to 5.17½c.@5.12½; sight bills on London to 110⅛@110⅜, and on Paris to 5.12½c.@5.10. The offering of produce bills have been less extensive this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,013,393, against $4,458,700 same week last year; total, since July 1, 1867, $141,350,912, against $154,624,494 same time in 1866–'67.

Government securities have been less freely dealt in. The money pressure has impeded operations on the part of most of the prominent local dealers. The investment call has been fair, but not active; and has been met without difficulty, at the going prices, which show a decline, for the week, of 1@1¼ per cent. A few large operators are said to have availed themselves of the pinch in Money to *bear* the market for the public funds, so as to enable themselves to "load up," with the national interesting bearing obligations at the lowest figures, in anticipation of an early rally in values. On Wednesday, the dealings were quite moderate, and prices were weak and irregular; but the latest sales indicated more steadiness, with rather more disposition to purchase.

U. S. sixes of 1881 closed here on Wednesday at 111¾@112; U. S. Five-twenties of 1862, 110¾@110⅞; U. S. Five twenties of 1864 at 108¾@108⅞; U. S. Five-twenties of 1865 at 109@109⅛; U. S. Five-twenties of 1865, consolidated, 107¼@107⅜; U. S. Five-twenties of 1867, 107⅜@107⅝; U. S. Ten-forties at 101⅝@102¾, and U. S. Seven-thirties at 105⅞@106. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	118½	September, 1865	117
August, 1865	117½	October, 1865	116½
U. S. three per cent. certificates			100¼

Government paid off $474,550 of the matured loan of 1847–'67, in March.

Railway and miscellaneous stocks have been unusually heavy, under forced realizations, partly because of the stringency in Money, of which the *bear* operators have availed themselves to further seriously depress values. The speculative demand has been much less determined. The railway favorites have suffered far less severely than the miscellaneous share property, particularly Atlantic Mail, and the several Express stocks.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 1.	April 8.	Apri 15.
Consols	93⅛	93⅜	93½
U. S. 5-20's of 1862	72⅛	72¾	73
Erie	48⅝	48½	46½
Ill. Central	89½	95	94

In the way of general business, we have to note less activity in cotton, owing partly to a further sharp advance in prices. Breadstuffs have been more freely purchased at rising figures. Provisions opened briskly and buoyantly: but closed in favor of buyers, on a less active inquiry. Middling upland cotton closed tamely at 31½ cts., per lb. The stock of cotton now here is estimated at about 85,000 bales. The receipts at the port this week, have averaged about 2,300

bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 1,997,000 bales, against 1,607,000 bales same time last year; exports, same time 1,371,000 bales, against 1,081,000 bales same time last year; stock on hand at latest dates, 253,000 bales, against 465,000 bales same date last year. At the Live Stock markets this week, Beeves have been in fair demand at from 14@20c. per lb.; week's receipts, 5,304. Veal calves, active at from 8½@12c. per lb.; receipts, 2 271. Sheep and lambs dull and heavy, at from 6½@10c. per lb.; receipts, 17,287. Swine in good request at from 9½@10c. per lb., all live weight; receipts, 12,490. General merchandise has attracted more attention, especially Groceries and Metals which have been more firmly held. Business in Dry Goods, has been devoid of spirit since our last. The demand has been quite moderate, comparatively, checked in part by the advanced prices claimed for domestic Cottons. Domestic Woolens have not varied essentially in value, though in most instances buyers have had any existing advantage as regards price. Foreign fabrics have been irregular and generally rather weak in price. The total imports of foreign dry goods, last week, were $1,283,873, and the total amount marketed $1,590,147. The value of foreign merchandise imported last week, was $3,238,364—making the grand total specie value of last week's imports of dry goods and merchandise, equal to the unusually large sum of $4,522,237, against $6,467,267, same week last year; total since July 1, 1867, $185,443,008, against $213,751,819 same time in 1866–'67. The ocean freight market has been less active and irregular, since our last. For Liverpool we quote flour at 1s. 9d.@2s. by sail, and 2s. 6d.@3s. by steamer, per bbl.; grain at 3d.@3¾d. by sail, and 6d.@6½d. by steamer, per bushel; cotton at 5/16@⅜ by sail, and ⅜@½ by steamer, per lb.; and heavy goods at 20s.@35s. by sail, and 25s.@40s. by steamer, per ton. Total number of vessels in port on Wednesday 548.

The New York exports, exclusive of specie, for the week ending April 14, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$4,458,700	$3,013,393
Prev. reported.....	55,474,157	47,194,634
Since January 1.....	$59,932,857	$50,208,027

The balance in the Sub-Treasury on Wednesday was $103,759,665 54.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

American Central Railway.

At a meeting of the directors of the Iowa, Illinois, and Indiana divisions of this road at Fort Wayne, on the 5th inst., arrangements were consummated for the consolidation of the three divisions of the road through the above named States into one organization, to be called the "American Central Railway." The following is the list of Directors of the consolidated line: Geo. M. Braggiotti and John E. Cowles, of New York; G. W. Cass and Springer Harbaugh, of Pennsylvania; Lot S. Bayliss, Pliny Hoagland and Jesse L. Williams, of Indiana; W. F. Thomas, James S. Thompson and John S. Thompson, of Illinois; W. T. Smith and John Bird, Iowa; Henry Folsch, Marseilles, France.

☞ The Flint and Pere Marquette Railway Company have rented the Flint and Holly Railroad for one month, until the consent of the stockholders can be obtained to sell. G. C. Kimball superintends the whole.

Railroad Earnings.--Weekly.

The earnings of the Atlantic and Great Western Railway for the first week in April, 1868, were $104,318 00
Corresponding week previous year... 97,749 00

Increase $6,569 00

The earnings of the Chicago and Alton Railroad for the first week in April, 1868. $60,768 70
Corresponding period previous year .. 63,365 62

Decrease $2,596 92

The earnings of the Detroit and Milwaukee Railroad for the first week in April 1868, were $33,466 36
Corresponding week of 1867 ..... 30,127 19

Increase $3,339 17

The earnings of the Toledo, Wabash and Western Railroad for the first week of April, 1868, were $67,666 64
Same week in 1867..... 67,013 51

Increase $653 13

The earnings of the Michigan Central Railroad for the first week in April, 1868, were. $87,047 61
Corresponding week of previous year.. 81,628 16

Increase..... $5,419 45

The earnings of the Chicago and Northwestern Railroad for 1st week in April, 1868. $225,429 17
Corresponding week previous year .. 187,355 62

Increase $38,073 55

The earnings of the Chicago and Rock Island Railroad for the first week in April, 1868, were $78,900 00
Corresponding week of previous year.. 75,705 00

Increase $3,195 00

The earnings of the Marietta and Cincinnati Railroad the 1st week in April, 1868.. $24,286 00
Corresponding week previous year.... 20,080 00

Increase $4,206 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 1st week in April, 1868, were..... $107,190 01
Corresponding week of 1867 ..... 81,454 92

Increase..... $25,735 09

The earnings of the Western Union Railroad for the week ending April 7, 1868.... $9,603 37
Corresponding week previous year.... 8,249 83

Increase..... $1,353 54

☞ The Lafayette (Ind.) *Courier* announces that the northern end of the Louisville, New Albany and Chicago Railroad, between Lafayette and Michigan City, has been transferred to the control of the Indianapolis, Cincinnati and Lafayette Railroad Company. This will give the latter road complete connections from Cincinnati to Chicago.

☞ At a recent meeting of the stockholders of the Cincinnati, Richmond and Chicago Railroad at Richmond, Indiana, a full board of directors was elected with Wm. Perry as President. The greater portion of the grading on the section of this road between Richmond and Fort Wayne has already been done, and indications are that the end of the road will be speedily completed.

☞ The Paducah, Ky., *Herald* says that the Mississippi Central Railroad has been purchased or leased by a company of New York capitalists, with the condition that the Paducuh and New Orleans air line road is to be built within the next two years.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of March, were:

ENTERED FOR CONSUMPTION.

Permanent-Way Construction.

TO THE EDITOR OF ENGINEERING.

SIR.—Good permanent way is the cheapest. By this I mean that it is not only the cheapest as to its effect upon rolling stock, but that it is cheapest in the abstract, in respect to its own maintenance, renewal, and repairs.

Long experience has convinced me of this fact, that the cheapest permanent-way is that in which the materials are of the best description, laid down with the greatest care, and when so laid is never allowed to get out of repair by neglect or from a mistaken policy of false economy. I will explain what I mean by good permanent-way. If any think I place the standard too high, I reply that it is at present placed far too low, and that I believe the highest standard of excellence should be aimed at, and every effort made towards its attainment. I was to-day looking over an old specification of contract for permanent-way maintenance, wherein the contractor binds himself to keep the way in perfect line, level, and gauge. Now, taking the word perfect in its restricting sense, I believe a permanent-way may be kept in such condition as to deserve that expression, but to this end it is necessary that no requisite expense and care be spared in its construction.

In stating what I believe that construction should be, I beg to assure you that I ask no credit more than any man deserves who endeavors to apply the practical teaching of years to the removal of defects that experience has shown him to exist.

Commencing at the base I will separately examine the several parts that go to build up what is commonly known as permanent-way. These are: 1st, the foundation which includes the excavating of the formation and the ballasting; 2nd, the sleeper; 3rd, the chair and its fastenings; and 4th, the rail and its fastenings. Leaving the first for the present, as being of so much importance that it deserves a fuller communication than I could give it within the limits of this letter, I come to the 2nd, the sleeper. Of this the first consideration is that it be of sound timber, and next, that it be of sufficient dimensions. The ordinary 9 ft.×10 in.×5 in. oblong sectioned sleeper answers all those conditions very well. The sawn part should be placed downwards, for nothing is more in its way than to have a sleeper with a round or uneven bottom, although I have known whole lines so laid down. The half round sleeper should be rejected, because it does not afford sufficient base for the chair. Creosoting is advantageous, if well done; but, like everything else, if scamped, is best left alone.

I find that a leading engineer, from a report recently in *Engineering*, fixes the life of a sleeper at ten years. If my memory serve me right, this is but half the time given by Captain Huish some years since. Twenty years seem a long time for a sleeper to last, yet, if it does not become unserviceable through rot—and I believe it will not do so if of good sound timber, well creosoted and laid in gravel—then I see no reason to doubt that a sleeper will last to the full time named. Of this, however, I am confident, that natural decay should be the only limit to its durability. That ten years, or even less, on lines of heavy traffic, may now be the extent of the sleeper's effective service, I will not dispute; but this premature destruction is produced by causes that admit of removal, and should no longer be allowed to exist. The principal of these are the imperfection of the chair and its fastenings. Taking the chair first, the duty of the chair is to form a firm support to the rail, and to so connect it with the sleeper that all three—sleeper, chair, and rail—firmly hold together. How to produce this result is undoubtedly the most difficult in permanent-way construction. That the manner in which this is now attempted is a failure cannot be doubted. What, then, can be done to solve the difficulty?

I think that the defects in the present chair will show us the direction in which we are to look for an answer. The chair is too small, and is crushed into the sleeper; therefore the base should be

made larger. The fastenings, have not sufficient holding power to effectually secure the chair to the sleeper; therefore fastenings of the most powerful kind attainable should replace them. The chair in my opinion, should be at least 8 in. wide by 15 in. in length. These dimensions give an area of 120 square inches, which, I think, would be sufficient to resist the heaviest traffic, if used with 3 ft. bearings. The chair should also support the rail over its whole width; this would materially strengthen the rail and lessen its deflection, besides another great advantage which I will name hereafter.

I now come to the important question of the fastenings. The strain upon these fastenings is great and peculiar, and may be described as of two kinds, vertical and lateral. The first is by far the most difficult to deal with, the second being comparatively slight, except on heavy curves, and even in these cases there is no difficulty in dealing with them. The vertical strain is caused by the deflection of the rail beneath the pressure of the trains. When an engine passes over a permanent-way, a wave-like motion of the rail is produced, the greatest depression takes place in the central point between the bearings; depression on this point causes the rail to lift beyond the next bearing.

The rail may thus be considered to form a succession of levers. The engine forming the weight, and the next sleeper the fulcrum, to lift the bearings beyond. Thus a continuous succession of down-pressing and up-lifting takes place until the engine stops. When we add to this strain the effect of the constant jar and vibration that is caused by every passing train, we may form an estimate of the work the fastenings have to do, and how wholly inefficient the spike and treenail must prove to sustain it. Indeed, it is hardly possible to conceive anything more deficient in holding power than the spike.

If I wish to fasten a piece of iron to a board, and do so by driving blunt-ended nails into the timber, I find that a small force is sufficient to separate them; but if, instead of nails, I use wood screws for the purpose, I find it impossible to separate the iron from the wood, unless I use great force, and then only by tearing away the wood that surrounds the screws. Now, the chain spike is nothing bu. a large blunt-ended nail, and, consequently, most unfitting for the purpose it is applied to. On lines of even light traffic, when driven into new timber in relaying, it may be seen by the close observer to have given way within a few days of its being used. There are other reasons against the use of the spike; one I will mention. It often happens that from carelessness, or, from the tendency many men have of scamping their work, that the spike is driven without first boring the timber, and this results in either splitting the sleeper or knocking a piece out of the bottom of it. In the first case the sleeper is useless; in the second, it is greatly damaged. An attempt has been made to improve the spike, by giving the shank (made of square iron) a twist, but this has proved a failure. Some years since the wood treenail was introduced, and was for a short time thought much of; but, as the material of which it is made is perishable and incapable of bearing heavy work, it has proved inferior even to the spike in such cases. Fang bolts I put on one side at once as being the very worst fastening, at least, for cross sleepers; for if all other conditions were favorable, the fact that the platelayer has to grope underneath the sleeper to fix the nut is sufficient to condemn it. On account of this trouble the nut is often left unfixed; or, if on the other hand, the platelayer is bent upon honestly fixing them, he has to first disturb the bed of the sleeper before he can do so. But, even when the nut and bolt are properly fixed, the bolt will turn out of the nut, or it will break in tightening; in short, the fang bolt is not in any view of it a good fastening.

Having examined and seen tested every description of chair fastening that has been used to any extent, I was led some time since to try the efficiency of wood screws; for this purpose, and from the experience I have had, I feel justified in saying that if they were adopted they would prove excellent substitutes for the present imperfect fastenings. The screws should have a deep thread. There is a kind called the coachmaker's screw which answer admirably; its grip on the wood is so great, that I am convinced that a chair fastened to the sleeper with a sufficient number of these screws would bear almost any amount of strain before the chair could be wrenched from the sleeper. I understand that provisional protection has been obtained for the application of wood screw bolts to railway chairs. The great wonder is that no attempt has been made to apply so obvious an improvement before this, let the cause of this be what it may. I think I may safely prophesy that wood screws will prove the fastening of the future; and I would strongly advise makers of railway bolts to turn their attention towards the improvement of this article; its general introduction is only a question of time. Theory and practice will both combine to recommend its adoption. Besides its great holding power, it has another important advantage over the spike. If the head is properly formed, the bolt cannot be driven by hammer without immediate detection, and therefore it must be *screwed* home, nor can the sleeper be split or otherwise damaged by the work, as is so often the case when spikes are used. These are great advantages, and if they can, as I believe, be realised, I think we may fairly look forward to the sleeper living its full time, instead of dying a violent death by the destructive treatment it is now generally subjected to in consequence of bad management.

Of the rail I have little to say. As to its form I have no hesitation in choosing the double-topped section. It is much easier to work with, easier to curve, and easier to exchange. The one drawback is that the bottom of the chair wears into it, so that when turned it presents a series of hollows over the chairs; this makes the trains run *rough*, and tends to much shorten the durability of the rail. This is a serious drawback, I know; but I have faith that a remedy will be found for this, the only defect in this kind of rail. One step in that direction will result from what I have herein proposed, viz., increasing the width of the chair, and giving the rail a bearing to the full extent of it; let this be done, and the chair also be firmly fixed to the sleeper, and I am convinced much of the defect named will be removed.

The evidence is so clearly in favor of steel rails that nothing that can be said by me can strengthen. Yet I will observe that they ought to be adopted, for the good reason that they make a better because a more permanent road. I have heard it suggested that as steel was stronger than iron, the steel rail might be made lighter than the iron one; but in my opinion nothing could be worse than to act upon such a proposition; if we do err let it be on the side of strength, if that be possible. I therefore think the rail should be at least 80 lb. to the yard.

Many attempts have been made to dispense with the wooden key, but hitherto without success. It would be an easy matter to fasten the rail without this old servant, if the rail was a fixture; but to do so, and provide for the easy exchanging or turning of the rail with despatch, and without the necessity of drawing the fastenings of the chair and interfering with the gauge, is amongst the inventions of the future. Yet the thing is of such importance that the solution of the problem is sure to be found. Until then we must use the wooden key; and I have nothing to say about it, but that it should be made of the best dry oak, and kept dry until wanted for use; and, when in use, kept damp by brimming the ballast against it, and, I will add, the sooner it can be done without the better.

There still remains the fish-plate to treat of before I complete my remarks upon the materials of permanent-way construction, and this I will, with your permission, defer until another opportunity.

I remain Sir, yours truly,

AN OLD PLATELAYER.

February 25, 1868.

Pittsburg, Ft. Wayne & Chicago Railway.

The following is a statement of the approximate earnings and expenses of this company during the month of March, as compared with the same period of the year 1867:

	1868.	1867.

Expenses	407,682 77	419,800 76
Net earnings	$276,506 92	$208,159 11

This shows an increase in earnings of $56,229 82; with a decrease in expenses of $12,117 99—making the increase in net earnings, $68,347 81.

The earnings and expenses from January 1 to March 31, compare as follows:

	1868.	1867.
Earnings	$1,793,470 56	$1,695,873 22
Expenses	1,205,227 82	1,229,143 05
Net earnings	$588,242 74	$466,730 17

This shows an increase in earnings of $97,597 34; with a decrease in expenses of $23,915 23—making the increase in net earnings, $121,512 57.

☞ The Little Rock (Ark.) *Gazette* announces the completion of the Memphis and Little Rock Railroad, under the Denmead contract, to Madison on the 31st of March. The road is now completed only to the extent in which the second year of the war found it. Twelve miles beyond Madison have been graded under the Forrest contract.

☞ The Smyrna *Times* says that the parties who are now building the Junction and Breakwater Railroad, in order to secure the whole valuable trade of the lower part of the peninsula, contemplate building a branch road from Georgetown to Seaford, Delaware, and an air line road from Lewes *via* Hillsboro', Berlin and Snow Hill, Md., and Drummondtown and Eastville, Va., to Cape Charles.

☞ The amount of gold received for duties at the Boston Custom House during the first three months of 1867 and 1868, has been as follows:

	1867.	1868.
January	$980,906 79	$946,375 61
February	1,538,631 40	1,200,683 99
March	1,646,994 66	1,413,536 01
	$4,166,532 85	$3,560,595 61

☞ After the first day of June next, unless the time should be extended by Congress, every applicant for the benefit of the Bankrupt act, must show that he has property sufficient to pay fifty cents on the dollar or that he has obtained release from enough of his creditors to pay fifty cents on the dollar to the remainder.

☞ The Seventh Dividend of the Bay de Noquet and Marquette Railroad Company is now payable by J. F. Greenough, Treasurer, 13 Exchange st., Boston, Mass.

☞ The contract for building the Kalamazoo and Allegan Railroad has been awarded to Messrs. May & Warren, of Chicago, and Gen. Goss of Kalamazoo.

☞ The Milwaukee City Railway Co. proposes to lay a second track through East Water street to accommodate its increasing business.

PROPOSALS.

NOTICE TO RAILROAD CONTRACTORS.

OFFICE OF THE NEW YORK AND OSWEGO MIDLAND RAILROAD COMPANY, ONEIDA, N. Y., Feb. 10, 1868.

SEALED PROPOSALS WILL BE RECEIVED AT the Office of the Company, until the 15th day of April, 1868, at noon, for the GRADING, MASONRY, and BRIDGING of that portion of the NEW YORK AND OSWEGO MIDLAND RAILROAD, extending from the CITY OF OSWEGO to the VILLAGE OF SIDNEY PLAINS, a distance of ONE HUNDRED AND TWENTY MILES, and passing through the Towns of VOLNEY, HASTINGS, WEST MONROE, CONSTANTIA, VIENNA, LENOX, STOCKBRIDGE, EATON, LEBANON, SMYRNA, NORTH NORWICH, NORWICH, OXFORD AND GUILFORD, and that portion known as the Branch, from at or near EAST GUILFORD, in the town of GUILFORD, to MT. UPTON, in the same town.

The line will be divided into Sections of about One Mile each, and proposals may be made for separate Sections or for the Entire Work. The Company will entertain separate proposals for Bridging only.

The line passes through a desirable section of country of Central New York, and the work will be worthy of the attention of Contractors.

Plans, Profiles and Specifications will be ready for examination at the Office of the Chief Engineer, in Oneida, N. Y., where all necessary information may be obtained, on and after the 6th day of April.

D. C. LITTLEJOHN, President.
W. B. GILBERT, Chief Engineer.

POSTPONEMENT.

In consequence of the unfavorable weather for field work for the past three weeks, the above Letting will be Postponed until THE FIRST DAY OF MAY, AT NOON. Plans, Profiles and Specifications will be ready for examination as above noticed, on and after the 22d day of April.

Dated Oneida, March 20th, 1868.

D. C. LITTLEJOHN, President.
4t14 W. B. GILBERT, Chief Engineer.

Notice to Contractors.

PROPOSALS FOR THE GRADUATION AND MASONRY of the Nineteen Miles of the Knoxville and Kentucky Railroad not yet under contract, extending from a point two miles south of Elk Gap to the Kentucky line near the town of Boston will be received until the 24th of April next.

The profile and specifications for this section, which includes four Tunnels, varying from two hundred and fifty to seventeen hundred and fifty feet in length, with other heavy work, can be seen at the ENGINEER'S OFFICE, in Knoxville, after the 14th of April. The Company reserve the right to reject all bids. For further particulars address—

ADRIAN TERRY, Chief Engineer, &c.
Knoxville, Tenn., March 26, 1868.

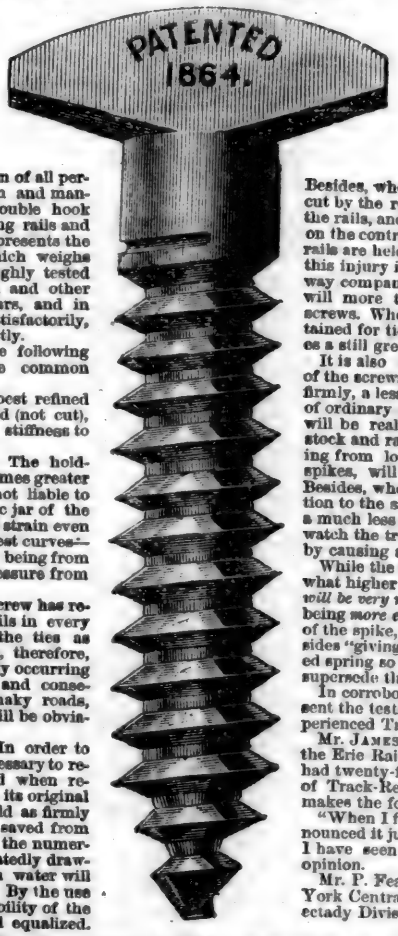
U. S. RAILROAD SCREW SPIKE COMPANY,



NO. 45 CLIFF STREET, NEW YORK,

MANUFACTURERS OF MONTIGNANI'S PATENT

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary.

Works at

OSSINING,

Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERGNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

WATCHES.

TIFFANY & CO.,

550 and 552 Broadway,

Solicit attention to their Timing Watches, known as the "TIFFANY & Co., TIMERS."

These watches, for Railroad, Engineering, Racing, Gunnery, and Scientific purposes, are superior to any yet offered, as the arrangement of the stop is such as to note time to the nicety of one-fourth or one-fifth of a second, in such manner as to prevent the possibility of error in the calculation.

The following named gentlemen, having bought "Timers" and found them to be perfectly satisfactory, have kindly allowed Tiffany & Co. to refer to them:

Amasa Sprague,	Joseph McPherson,	August Belmont,
Frank Squire,	Geo. G. Haven,	B. W. Gibbs,
J. C. Griswold,	B. H. Bixby,	O. N. Cutler,
Leon. W. Jerome,	George Osgood,	S. D. Bradford,
Wm. M. Rysdyk,	W. M. Tilden,	J. V. Brokaw,
Wm. F. Sherley,	A. P. Spencer, and others.	C. A. Grymes,

Tiffany & Co., have also a full assortment of watches of all desirable sizes and styles, of the same quality and finish as the first mentioned, in addition to their usual stock of Brodsham's and Jurgensen's.

Particular care and attention given to the repairing and adjusting of fine watches.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the ***MAIN TRACK IS NEVER BROKEN,*** and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns ***The Life and Limb of all Travelers upon Railroads.***

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

New York, Saturday, April 25, 1868.

The Union Pacific Railroad.

The telegraph informs us that the Union Pacific Railroad is now finished over the highest point of the Rocky Mountains which is to be traversed anywhere along the line of 1,721 miles between Omaha and San Francisco. As most of our readers know, this Grand Pacific Railroad Line is being built by two powerful companies, THE UNION PACIFIC, beginning at Omaha, building west; and the Central Pacific of California, beginning at Sacramento, building east, until the two roads shall meet. The amount of Government aid given to each is dependent upon the length of road each shall build; and therefore both companies are prompted to great efforts to secure the construction and control of what, when completed, will be ONE AND THE ONLY GRAND RAILROAD LINE CONNECTING THE ATLANTIC AND PACIFIC COASTS.

Both companies have prosecuted the work with great vigor, the Union Pacific having already expended over THIRTY MILLION DOLLARS, and the Central over *Twenty Millions*, upon their respective parts of the undertaking. THE UNION PACIFIC HAVE COMPLETED 550 miles of their work; have iron and other materials for 200 miles more upon the ground, and 100 additional miles are ready for the track. They will have a much larger force employed this year than ever before, and it is expected that between 800 and 900 miles will be in operation during 1868. There seems to be no reasonable doubt that the distance between Omaha and Sacramento will be traversed by rail in 1870.

The means for building the Union Pacific are ample.

First: THE U. S. GOVERNMENT GRANTS THE RIGHT OF WAY, and all necessary timber and stone, from the public domain.

Second: IT MAKES A DONATION of 12,800 acres of land to the mile, amounting to over twenty million acres, to be selected along the line of the road.

Third: IT GRANTS U. S. BONDS to an average amount of $28,000 per mile; for which it takes a second lien, thus pledging this sum to the company's first mortgage bondholders as additional security.

Fourth: THE COMPANY ARE PERMITTED TO ISSUE their own FIRST MORTGAGE BONDS to the same amount as they receive from the United States, and no more.

Fifth: THE AUTHORIZED CAPITAL STOCK of the Union Pacific Company is One Hundred Million Dollars, of which over eight and one-half millions have been paid upon the work already done. Additional capital will be paid in as the wants of the company demand, although it is not expected that more than twenty-five millions in all will be required.

The supposed great difficulties in the way of building the Pacific Railroad have diminished as they have been encountered. Contracts for the construction of 914 miles west from Omaha, comprising much of the most difficult mountain work, have been made with responsible parties (who have already finished 550 miles) at the average rate of sixty-eight thousand and fifty-eight dollars ($68,058) per mile. This price includes all necessary car-shops, depots, stations, and all other incidental buildings, and also locomotives, passenger, baggage, and freight cars, and other requisite rolling-stock, to an amount that shall not be less than $7,500 per mile. Allowing the cost of the remaining 168 of the 1,100 miles assumed to be built by the Union Pacific Company to be $90,000 per mile,

THE TOTAL COST OF ELEVEN HUNDRED MILES AND EQUIPMENT WILL BE AS FOLLOWS:

914 miles at $68,058	$62,205,012
186 miles at $90,000	16,740,000
Add interest and miscellaneous expenses, surveys, etc.	3,500,000
Amount	$82,445,012

AVAILABLE CASH RESOURCES FOR BUILDING ELEVEN HUNDRED MILES.

U. S. Bonds	$29,328,000
First Mortgage Bonds	29,328,000
Capital Stock paid in on the work now done	8,950,000
Land Grant, 14,080,000 acres, at $1 50 per acre	21,120,000
Total	$88,726,000

The full value of the lands cannot be realized at present; but the company have ample facilities for supplying any deficiency that may arise in means for construction. This may be done wholly or in part by additional subscriptions to the stock, for the capital which was refused at the beginning of the enterprise is now freely and abundantly offered as its security and profit are demonstrated.

No one has ever expressed a doubt that, as soon as the road is completed, its through business will be abundantly profitable. Until recently the road has run through a wilderness for almost its entire length; but, as every year brings an influx of population, its local traffic will have a steadily increasing value. At present, its transportation for the Government and for the mining regions is the chief source of its already large revenue. As these mining regions are penetrated, the earnings will be greatly increased, and the various branch lines that will soon be constructed will be most valuable feeders of the main trunk.

The road was run by the contractors until April, 1867, but its earnings from May 1, 1867, to December 31, 1867, a period of eight months, are officially reported as follows:

From Passengers	$523,779 22
From Freight	1,912,028 49
From Express	17,886 05
Mails	32,273 28
Miscellaneous	7,223 29
Total	$2,496,190 34

EXPENSES FROM MAY 1, 1867, TO DECEMBER 31, 1867.

Conducting Transportation	$282,022 22
Motive Power, Engines, &c.	567,356 45
Maintenance of Way	430,641 16
Maintenance of Cars	91,208 80
General Expenses	55,827 10
	$1,427,054 26
Net Earnings to balance	1,069,136 08
Total	$2,496,190 34

The average length of the road in operation for the eight months, from May 1 to December 31, was 386 miles.

The amount of first mortgage bonds the company can issue on 386 miles of road, at $16,000 per mile, is $6,176,000.

Gold interest for eight months at the rate of 6 p. ct.	$247,040
Add 40 per cent. premium for gold	98,816
Total	$345,856
Surplus after paying interest on first mort. bonds	$723,280

It will be seen that the net earnings have already been *more than three times this interest.*

We will now add to the account the interest on the United States Second Mortgage Bonds, and it will stand as follows:

Net earnings for eight months		$1,069,136 08
Interest on first mort. bonds, reduced to currency	$345,856	
Interest on second mortgage bonds in currency	247,040	
		592,896 00
Surplus after paying all interests		$476,240 08

The amount paid by the Government for the transportation of troops, munitions, stores, and mails, has been, and doubtless will continue to be, much more than the interest on the United States Second Mortgage bonds. If it is not, the charter provides that, after the road is completed, and until said bonds and interest are paid, at least five per cent. of the net earnings of the road shall be applied to such payment. At the time the act of incorporation was passed, it was expected that the earnings of the road would be very large, and the Government reserved the right to reduce the company's charges whenever the profit on the cost of the completed line should be more than 10 per cent. per annum. (Sec. 18, Act of 1862.)

ARE THE BONDS SECURE?—Congress has taken an especial care that the interests of the bondholders of the road shall be secured that has never yet been shown toward a similar enterprise. The mortgage is made to the Hon. E. D. Morgan, U.S. Senator from New York, and the Hon. Oakes Ames, Member of U. S. House of Representatives from Massachusetts, who alone can deliver the bonds to the company, and who are responsible for their delivery in strict accordance with the terms of the law.

The President of the United States appoints five Government Directors, who cannot be stockholders, who take part in the direction of all its affairs, and one of whom is to be on every committee of the company. It is the duty of these Directors to see that all the business of the company is properly managed.

The President of the United States also appoints three Commissioners to inspect the work as it progresses, in sections of twenty miles, to see that it is in all respects a first-class road, and that it is suitably provided with depots, stations, etc., and all the rolling-stock necessary for its business. The United States bonds are issued to the company only as each section of twenty miles is accepted by the United States Commissioners, and the trustees of the First Mortgage bondholders deliver the company's own First Mortgage bonds to the company *only on the same conditions,* except that the company are permitted to issue their bonds for one hundred miles in advance of the completed line, to cover a part of the cost of grading, &c.

It will be noticed that the Union Pacific Railroad is, in fact, a Government work, built under the supervision of Government officers, and to a large extent with Government money. *It may be said, without danger of contradiction, that no bonds issued by any other company in this country, or, so far as we know in the world, are made so secure by a responsible Government as the First Mortgage Bonds of the Union Pacific Railroad Company.* They are not only a first mortgage upon a property that costs three times their amount, but upon a property of daily-increasing value, whose income is already more than three times their interest. There are many persons who now prefer them to those of any State or nation, because they are secured upon a great and tangible *reality* which can be in no way affected by political action.

WHAT ARE THE BONDS WORTH AS AN INVESTMENT?—*Ans.*—Other conditions being the same, securities are valuable *according to their rate of interest.* The recent average quotations for U.S. 10-40 bonds, bearing only 5 per cent. gold interest, redeemable by the Government in six years, have been 101 to 101½; and the U. S. 5-20s of '67, gold six per cents, which may be redeemed in five years have been at from 107 to 108. The best first mortgage six per cent. railroad *currency* bonds range at about par, and the seven per cents run to a considerable premium; while the Union Pacific Mortgage Bonds are sure to pay six per cent. in gold, which, with the premium at 40 (where it has stood upon the average for about three years), pay 8 3-5 per cent.

Another and very important consideration in determining the value of these bonds is *the length of time they have to run.*

It is well known that a long bond always commands a much higher price than a short one. With the U. S. 5-20s of '67, having five years to run, at from 7 to 8 per cent. premium, the 6s of '81, running thirteen years before maturity, bring 4 to 5 per cent. more. It is safe to assume that during the next thirty years the rate of interest in the United States will decline, as it has done in the old countries of Europe, and we have a right to expect that such six per cent. securities as these will be held at as high a premium as those of the Government, which in 1857 were bought in at from 20 to 28 per cent. above par.

The Union Pacific bonds are for $1,000 each, and have coupons attached. They have 30 years to run, and bear annual interest, payable on the first days of January and July, at the company's office in the city of New York, at the rate of six per cent. in gold. The principal is payable in gold at maturity.

At the present rate of gold these bonds pay an annual income on their cost of nearly nine per cent. and it is believed that they will soon be at a premium. The Company have but a very limited supply of their bonds remaining on hand; but it is expected that the first installment of the new bonds, to be issued on that portion of the road to be completed this year, will be ready in May.

Any subscriptions accepted to a greater amount than can be filled from bonds now in the company's possession will be supplied from the new bonds in the order in which they are received.

The company reserve the right to advance the price of their bonds to a rate above par at any time, and will not fill any orders or receive any subscriptions on which the money has not been actually paid at the company's office before the time of such advance.

Parties subscribing will remit the par value of the Bonds and the accrued interest in currency, at the rate of six per cent. per annum, from the date on which the last coupon was paid. Subscriptions will be received in New York, at the COMPANY'S OFFICE, No. 20 NASSAU-ST., and by JOHN J. CISCO, & SON, BANKERS, No. 59 WALL ST., and by the company's authorized agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents will look to them for their safe delivery.

A pamphlet and map for 1868 has just been published by the company, giving fuller information than is possible in an advertisement respecting the progress of the work, the resources of the country traversed by the road, the means for construction, and the value of the bonds, which will be sent free on application to the company's offices, or to any of the advertised agents.

Columbus, Chicago and Indiana Central Railway Company.

The "Columbus, Chicago and Indiana Central Railway Company" was incorporated and organized on the 12th of February, 1868, under the laws of the States of Ohio, Indiana and Illinois, by the consolidation of the Columbus and Indiana Central Railway and the Chicago and Great Eastern Railway Companies into one corporation, and possesses all the franchises, powers, rights and privileges contained in the charters of the original companies, and such others as are conferred by the general consolidation laws of these several States.

The capital of the company amounts to twenty-eight millions eight hundred and eighty-six thousand dollars, as follows:

Consolidated first mortgage sinking fund bonds	$15,000,000
Second mortgage bonds of the Columbus and Indianapolis Central Railroad Company	816,000
Income bonds, not secured by mort..	1,650,000
Capital stock, 114,200 shares of $100 each	11,420,000
Total	$28,886,000

The roads of the consolidated company extend from Columbus, the capital of Ohio, westerly in a direct line to Indianapolis, the capital of Indiana; also, from Union Junction, (a point 83 miles west of Columbus,) in a northwesterly direction, *via* Logansport, to Chicago, Illinois; also, from Richmond, Indiana, (a point 119 miles west of Columbus,) northwesterly to Logansport, and thence in a direct air line westerly to the State line of Illinois, and from Cambridge, Indiana, (185 miles west of Columbus,) southwesterly to a point midway between the last named city and Rushville, Ind., embracing in all about 600 miles of road.

At Chicago, connections are made with all the roads diverging from that city to the northwest, west and southwest. At the State line of Illinois, the terminus of the line leading due west from Logansport, connection is made with the Toledo, Peoria and Warsaw Railroad, already completed and in operation to Peoria, and which is being rapidly extended to Warsaw and Keokuk, on the Mississippi River, 57 miles of the westerly end of this extension (the entire length being 119 miles) having been already completed, and the remainder being under contract to be finished by the 1st of September next.

At Indianapolis, connecting with existing lines, extending through Central and Southern Indiana and Illinois to St. Louis, Missouri, and other western cities, and by the branch between Cambridge and Rushville, forming a new route to Louisville, Kentucky, and the southwest.

The Columbus, Chicago and Indiana Central

Railway possesses, with connecting roads which are completed and now in operation, the shortest route (with only one exception) between Chicago and New York, Philadelphia, Baltimore and Washington; and with existing roads likewise in operation, either from St. Louis, Louisville, Indianapolis, or Peoria, it has the shortest lines between these points and the principal Atlantic cities.

Connecting at St. Louis with the Missouri roads, and through them with the Kansas branch of the Union Pacific, and by similar connections with roads leading west from Chicago with the Omaha branch of the same great thorough-fare, a large and permanently valuable traffic from those lines will unquestionably be secured.

By a contract recently entered into between the Indianapolis, Cincinnati and Lafayette Railroad Company, the Cincinnati and Indiana Railroad Company, the White Water Valley Railroad Company and the Columbus, Chicago and Indiana Central Railway Company, the traffic between Cincinnati and Chicago, which has heretofore been divided at competing rates between the roads owned by these companies, and other connections, will hereafter be done wholly over the Columbus, Chicago and Indiana Central Road, from Chicago to Hagerstown, and thence over the White Water Valley Road to Cincinnati, forming a line 44 miles shorter than any other, and one which cannot fail to control substantially the whole business between those two cities.

It also possesses, with lines now in operation, the shortest routes between Chicago and Indianapolis and Louisville. And *via* the new link between Rushville and Cambridge City, the shortest line between Louisville, Columbus, Pittsburg and the East.

At the date of the consolidation referred to, the outstanding first mortgage bonds, secured by liens upon the different roads owned by the respective companies, amounted to $11,500,000, namely:

Columbus and Indianapolis Central Railroad Company	$3,200,000
Toledo, Logansport and Burlington Railroad Company	800,000
Union and Logansport Railroad Company	2,000,000
Chicago and Great Eastern Railroad Company	5,500,000
	$11,500,000

which it is desirable to consolidate into one single issue, secured by a first mortgage upon the entire road, property and franchises of the company. To accomplish this object, and to provide the means that are necessary to more fully equip its roads and perfect the property in all its parts, the company has executed a deed of trust to James A. Roosevelt and William R. Fosdick, of the City of New York, Trustees, to secure an aggregate issue of fifteen millions of dollars of "Consolidated First Mortgage Sinking Fund Bonds," maturing in forty years, (A. D. 1908,) bearing seven per cent. interest, payable semi-annually, on the first days of April and October in each year, principal and interest payable in the City of New York, a sinking fund being provided sufficient for their redemption before maturity.

Of these bonds, *eleven and one-half millions* are to be expressly reserved and deposited with a special bond commissioner, to be issued only to redeem and retire all the existing first mortgage bonds secured by liens upon the different divisions of the company's roads; the remainder, three and one-half millions, the company propose to negotiate for the purposes before stated.

The length of the roads of the original companies *in operation previous to the recent consolidation* was 474 miles, the net earnings of which, in 1867, were $939,391 52. The completion of the new division between Union Junction and Logansport, (113 miles,) built and owned by this company, perfects the new short lines to Chicago and Peoria and points beyond; and the new link between Cambridge and Rushville (23 miles, one half of which was built by this company) perfects the new short route between Louisville and the East. Neither of these important lines have yet been in operation, but they will both be opened for through and local traffic as soon as thoroughly ballasted, (probably within the next sixty days,) and must very largely increase the aggregate earnings of the company, and make them fully equal per mile to those of any of the great trunk lines of the Western States.

The annual interest at seven per cent. upon the $15,000,000 of consolidated first mortgage bonds is	$1,050,000
Annual appropriation to sinking fund..	75,000
Total required for interest and sinking fund	$1,125,000

Estimating the gross earnings of the company's roads at only $5,000,000, (or $8,333 per mile, *which is much less than the present earnings per mile of competing lines,*) and estimating the operating expenses at 65 per cent., the net revenue of the company would be $1,750,000, or more than 50 per cent. in excess of the sum required to meet these payments.

That the company's traffic will be largely in excess of this estimate, and that its net revenues will provide for the interest on its bonded debt, the annual appropriation to the sinking fund, and liberal dividends upon its common stock, the Board of Directors entertain no doubt whatever.

By order of the Board,
B. E. Smith, *President.*
New York, March 30th, 1868.

Cincinnati, Hamilton and Dayton R. R.

This company has declared a dividend of eight per cent., payable in stock at the American Exchange National Bank, this city, on the 1st of May. Fractions to be payable in cash at six per cent. This will be the last stock dividend to be made by this company, as the amount now divided will use up the fraction of its unissued capital, which properly belongs to the stockholders, to represent a much larger amount of net earnings used in construction.

The following is a statement of the earnings and expenses of this road for the year ending March 31, 1868:

Gross earnings		$1,327,839 05
Operating expenses		747,682 82
Net earnings		$580,156 27
Applied as follows:		
Interest on bonds	$128,175 38	
General interest	27,770 23	
State taxes	35,096 09	
National taxes	12,997 74	
Insurance, &c	5,000 00	
Sundries, profit and loss.	3,120 48	
		212,139 92
Balance		$368,016 35
Deduct Government tax on net earnings		18,400 81
Balance		$349,615 54
Equal to 10 per cent. on capital stock		326,080 00
Leaving a surplus of		$23,535 59

It will be seen that the working expenses are about 57 per cent. of the gross earnings, and are ten per cent. less than the average of first class roads.

This is certainly a very favorable result of the year's working, and one that will doubtless prove satisfactory to the stockholders. The company is now practically out of debt, having assets which at their present market value, more than equal their liabilities. Contrasted with the previous year, the earnings show an increase, with a diminution of working expenses.

This company has heretofore aided many of its connecting roads by subscriptions to stock and the use of its credit. This was necessary both to increase and *secure* business; and although the stocks which they have subscribed for may not have returned dividends, the increase of business from the roads aided, gives a large and satisfactory return, fully indicating the policy heretofore pursued with regard to these roads.

No further liabilities on account of connecting roads will be incurred by this company in future. With a road located through the most densely populated and richest section of country in the West, two important connections at Hamilton and four at Dayton, leading to most of the important cities of the country, it would hardly seem necessary for the company to expend anything more except for extending their double track and furnishing additional facilities of sidings and depots as they may be required.

The company has maintained a first class financial credit from its earliest history. It has never failed to meet all its liabilities, both large and small, even through the trying periods of 1854–'55, the almost universal failures of 1857, and the financial reverses of later periods. Beside paying promptly its bonded interest, without a single failure, it has, on the average, from the time the first subscription of stock was paid, made a fair return to its stockholders; and especially so in view of the fact that during the long period it has had to make large expenditures to keep pace with the growth and security of business.

For the past year it has paid its dividends in stock, its net earnings being required for construction. The amount expended for construction and equipment largely exceeds the amount of stock paid out in dividends.

Before another dividend day, it is believed the securities held by the company can be disposed of and the balance of floating debt discharged, so that cash dividends may be resumed in October next.

Toledo, Peoria and Warsaw Railway.

At a meeting of the bondholders and shareholders of this company on the 1st of March, at Peoria, Illinois, for the election of Directors for the ensuing year, the following persons were elected: Charles L. Frost, Zeno Secor, James W. Smith, Courtland Palmer, New York; J. B. Brown, Portland, Maine; Henry Hill, Warsaw; Illinois; Wm. T. Bryan, Wm. H. Cruger, Henry F. Clark, Peoria, Ills. At a subsequent meeting of the directors, Charles L. Frost was elected President, Wm. H. Cruger, Vice President, and Theodore Higbie, Secretary and Treasurer. The road is being extended to Warsaw, Keokuk and Burlington, and will be opened for through business the coming Fall.

Cedar Falls and Minnesota Railroad.

At a meeting of stockholders of this company, held at Dubuque, Iowa, on the 13th inst., the following gentlemen were elected Directors for the ensuing year: John S. Kennedy, Charles L. Frost, D. Willis James, New York; Wm. B. Allison, Dubuque, Iowa; John Crerar, Chicago, Ill The road is being extended to Charles City, Iowa and will be opened for business to that point on 1st September next.

Illinois Central Railroad.

The receipts from operations of this road for the years ending December 31, 1866 and 1867, were as follows:

	1866.	1867.
Freight	$3,945,865 20	$4,490,520 93
Passengers	1,987,705 62	1,653,882 25
Extra baggage	3,805 94	2,357 64
Mails	74,392 48	76,300 00
Express	150,471 25	210,739 78
Rent of property	79,768 59	101,971 79
Rent of cars		19,318 52
Dockage	11,437 34	12,055 96
	$6,253,446 42	$6,567,146 87
Earnings over other lines	293,295 05	593,844 96
Totals	$6,546,741 47	$7,160,991 83
Less operation expenses:		
Salaries	$100,667 40	$133,646 96
General expenses	166,432 68	173,530 90
Legal expenses	9,233 54	17,246 34
Claims and damages	72,799 30	109,846 28
Station expenses	513,936 22	555,361 93
Train service	343,780 31	404,805 03
Fuel and preparing	276,157 94	272,039 74
Oil and waste	62,940 22	43,014 81
Other supplies	46,844 38	40,534 84
Repairs of engines	514,653 08	510,196 42

" tools, etc.	52,034 02	51,069 60
Cleaning engines and cars	48,466 77	52,113 83
Equipment expenses	41,609 59	40,590 83
Repairs of road	1,195,218 77	1,179,994 71
" bridges	61,744 39	86,826 52
" fencing	43,003 98	39,174 36
Operating St. Charles Air Line	3,559 74	3,382 32
Insurance	34,133 07	40,961 58
Loss by fire	47 55	874 00
Exchange		575 75
Totals	$3,944,218 34	$4,236,416 37
Leaving net earnings	$2,602,523 13	$2,924,575 46
Deduct charter tax	427,075 75	444,007 74
	$2,175,447 38	$2,480,567 72
Add am't applicable to interest fund as per land office report	423,349 16	494,935 49
Add am't applicable to free land fund, as per land office report	242,500 41	536,862 53
Net amount as shown in General Balance Sheet	$2,841,296 95	$3,512,365 74

Compared with 1866, the gross receipts from operations of the road in 1867, show an increase of $614,250 36; with an increase in operation expenses of $292,198 03—making the increase in net receipts, $322,052 33. Deducting the charter tax, the gain is $305,120 34. The President in his report says:

Since my last report, the earnings of this railway have been $6,967,028 15, exclusive of the Dubuque and Sioux City line, leased in October last. The gross traffic for the year 1867 was $420,286 68 in excess of 1866. Our operation expenditures, were $4,125,257 32; and the proportion of expenses to earnings, inclusive of State tax, was 66.6 per cent. against 66.7 per cent. last year. The only item of traffic which shows any material reduction is that of passengers, which fell off $333,823 37, while freight, express, and other items, show an aggregate increase of $754,110 05. The decrease in passenger receipts may be attributed to the continued depression in the Southern States. The terminal and junction stations show a reduction from that source equal to about two-thirds of the entire decrease. The tonnage hauled in 1867 was 1,300,835 tons, against 1,153,175 tons in 1866; the average distance each ton was hauled being 131 miles in 1867, against 117 miles in 1866.

This year, we placed in the track 7,890 tons of new and re-rolled iron, at a cost of $360,550, which was charged to repairs of road, against about 6,000 tons, at a cost of $351,560, in 1866. The total quantity of iron placed in the track and charged to repairs, in the years 1865, 1866 and 1867, inclusive, was 20,465 tons, equal to about two hundred and seventeen miles of new road. Our operation expenditures show an increase in 1867 of $100,112 in repairs of machinery; $24,000 in repairs of buildings, and $55,926 98 in other items. This, with a reduction of fifteen per cent. in the cost of material, and a slight reduction in the cost of labor, shows that the property has not been allowed to deteriorate. The road bed, rolling stock, and motive power have not been in better condition since I took charge of the road. The equipment has been increased by the addition of fifty new freight cars, at a cost, with some slight additions to shop machinery and tools, of $60,427. The construction account has been increased $305,600 for new piers, wharves, basins and extension of station grounds at Chicago, and other improvements of a permanent character. The expenditures at Chicago were deemed necessary to accommodate our increasing business. The grounds at this point included formerly about thirty acres, and the extension made during the past year makes an addition of about twenty acres, including a basin 1,300 feet in length by 150 feet wide, with a dock of the same length by 250 feet wide. These works have required about 2,860 feet of crib work in the lake.

During the past year we leased the Dubuque and Sioux City Railroad, paying thirty-five per cent. of the gross earnings for the first ten years, and thirty-six per cent. for the balance of the term of twenty years—securing in the lease an option to make the same perpetual at the latter rate, if at any time during the term we elect to do so. No liability or guarantee is assumed. The risk is simply one of profit or loss by working the line at 65 per cent. In this we are safe, while the profit on our own line growing out of increased mileage is considerably augmented. The further extension of the Dubuque and Sioux City line by that company is a matter of great interest to us; it is a direct feeder to our business, and will, doubtless, be built. We assume no liability for its construction. The operations of this lease so far have been very satisfactory, leaving a net profit of $81,804 63. The gross earnings for the three months ending December 31st, were $303,720 85; rent, $109,757 17, and working expenses, $112,159 05.

A company has been formed to construct a bridge across the Mississippi River, between Dunleith and Dubuque. This bridge, with its approaches, will cost nearly one million dollars. Our company has subscribed $300,000 to the stock. The contracts for construction are let, and the bridge will probably be completed this year. This will lessen the expense of crossing the river and place us in easier and more available working relations with the line west.

The amount paid for dividends this year, including Government tax, was $2,460,731 58, being at the rate of ten per cent. on the capital stock; $859,277 63 for interest on funded debt and Sterling Exchange, and $444,007 74 for State tax, leaving a balance of $1,776,608 02, in cash assets, January 1st, out of which we have since paid a dividend of five per cent. We also reduced our funded debt $1,599,500, leaving it $10,544,500, against $12,144,000 at the date of my last report. It is intended to submit to the stockholders, at the next annual meeting, a proposition to distribute unissued shares of the capital stock, equal to eight per cent. of the present share capital. If this proposition is accepted the distribution will be made in August next.

After deducting working expenses and State tax, our net earnings are $2,480,667 72, against $2,175,447 38 in 1866, showing a gain of about 14 per cent. This gain was entirely from local sources, and I think will continue. The outlays on capital account have been limited solely to the growing wants of our business. Our shareholders will bear in mind that this railway was built in advance of the cultivation of the land. The demand for an efficient and well appointed line is more urgent as population increases, and, if prudently met, is the best index of our prosperity.

The operations of the year are shown more in detail in the following general statement, condensed from the various reports:

General Statement of Accounts.

Balance of net cash assets as shown in last Annual Report		$2,029,319 67
Gross earnings in 1867	$6,967,028 15

Balance, consisting of net cash assets in New York and Chicago, and exclusive of the working stock of supplies		1,775,608 02
		$12,195,757 61

The collections of the Land Department were $3,166,264 37, which, after deducting expenses, and the payment to the Operative Department for

lots and lands sold, left $1,936,049 72 applicable to the cancellation of construction bonds, and $1,031,798 02 applicable to the payment of interest and dividends. The collections derived from Construction Lands canceled $1,683,500 of bonds. The amount of bonds now in the hands of the Trustees, applicable to the issue of deeds, is $3,222,913, of which $1,808,500 are in advance of collections. The prosperity of the farmers encourages us to hope that our collections for the present year will exceed those of the past. The shipments of cereals over this line in 1867 amounted to 19,309,620 bushels. The sales were 203,532 acres, to 2,633 purchasers, or an average of about 80 acres to each purchaser, for $2,172,059 25, being at an average of $10.67 per acre. It will be observed, by reference to this and previous reports, that the lands sold for several years have averaged less than 80 acres to each purchaser, each of whom being an actual settler, the lands are rapidly brought under cultivation. This fact, in connection with the large shipments of lumber, which this year exceed those of last about twenty-five per cent., is indicative of the continued growth and prosperity of the State, and gives promise of increased local traffic in the future. The total amount owing for lands sold up to the 1st of January, 1868, was $7,143,515 01, which bears six per cent. interest until paid. The number of acres of land unsold January 1st, 1868, was 710,453, of which 649,060 acres were Construction Lands. The lands in the more settled districts are so much more valuable that we can now sell in less favored localities, and hence we look for a better demand for those south of the Ohio and Mississippi Railroad, which comprise about fifty per cent. of the whole.

The annual meeting of the shareholders will be held in Chicago on Wednesday, the 27th day of May next. The term of service of three directors will expire at that date.

General Balance Sheet.

Permanent expenditures		$31,328,472 61

The motive power and rolling stock have been thoroughly repaired, and their efficiency in all respects maintained.

The number of engines owned by the company at the close of the year was 167—an increase of 17, acquired by the lease of the Dubuque and Sioux City Railroad; of these, 29 are on passenger, 88 on freight, and 41 on other trains; 9 are undergoing repair. During the year 57 engines have received general repairs; 27 thorough repairs, of which 14 have been rebuilt. One engine has been altered to burn coal, leaving 20 wood burners on the road.

The number of miles run by engines with passenger trains during the year was 996,807; with freight trains, 2,284,077; with construction trains, 89,182; switching, 395,150—total, 3,765,216, an increase over the previous year of 161,354. Cost of repairs, $544,007 18. Cost of repairs per mile, 14.45 cents. The total cost per mile, including oil, waste, fuel, wages of enginemen and firemen, repairing and cleaning engines, has been 29.62 cents, against 32.67 in 1866, and 37.44 in 1865—the total cost being $1,116,102 66, against $1,177,708 23 in 1866, and $1,313,337 26 in 1865. The cost of oil, waste and tallow per mile has been 0.71 cents; of wood, coal and coke, 7.13 cents. Average miles run to a pint of oil, 14.76; to a ton of coal, 34.98.

The company have 85 passenger, 39 baggage, mail and express, 7 sleeping, 1 officers', 1 pay, 2,254 grain, 50 Blue Line, 220 stock, 460 flat, 728 coal, 2 powder, 4 derrick, 3 tool and 2 tank cars, and 4 large and 10 small snow plows. There have been added to the rolling stock 50 new house freight cars; and acquired by lease of the D. & S. C. R. R., 9 passenger, 3 baggage, 2 mail and express, 20 stock, 148 house and 38 flat cars. The cost of repairing passenger cars was 2.75 cents, and of freight cars, 1.01 cents per mile run.

The expenditures in road department were for operation, $1,408,220 83; and for permanent, $299,077 69. There were used in repairs of road, 297,579 cross ties; 564,873 lbs. spike; 29,797 common chairs; 60,909 fish plates and bolts; 8,825 bars of new iron; 25,287 bars of re rolled iron; 28,662 bars of repaired iron; 14,157 bars of old iron replaced in track; and 7,890 tons of new and re rolled iron. The cost of repairing iron was 73.72 cents per bar—a decrease of 7.11 cents per bar from the cost of 1866.

The total number of passengers carried was 1,077,550—an increase over the previous year of 43,020. Number carried one mile, 42,492,795—a decrease of 14,320,141. Av. number of miles traveled by each passenger, 39.43—a decrease of 15.49. Av. rate received per mile per passenger, 3.89 cents. Av. fare of each passenger, $1 53.49.

Tons of freight transported, 1,330,836—an increase of 147,661. Tons carried one mile, 171,206,986—an increase of 35,978,203. Tons of local freight, 1,162,912. Tons of through freight, 137,924. Av. distance each ton was carried, 131 miles—an increase of 14. Revenue per ton per mile, 2.90 cents—a decrease of 0.29 cents. Av. revenue per ton, $3 81.70.

President.—John M. Douglass.

Directors.—His Excellency Richard J. Oglesby, Governor of Illinois. *Ex-Officio.* Abram S. Hewitt, William Tracy, W. H. Osborn, until May, 1868; Henry Chauncey, Leroy M. Wiley, John M. Douglass, until May, 1869; Thomas E. Walker, Wilson G. Hunt, A. E. Burnside, until May, 1870; R. Daniel Wolterbeek, Cunningham Borthwick, H. H. Hunnewell, until May, 1871.

Gen'l Superintendent.—Marvin Hughitt.

Treasurer.—Thomas E. Walker.

Land Commissioner.—John B. Calhoun.

Quincy and Warsaw Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: J. D. Morgan, Edward Wells, John Wood, O. C. Skinner, R. S. Benneson, C. A. Savage, Robert Tillson, of Quincy, Ills., B. E. Smith, of Columbus, Ohio, and C. E. Frost of New York. President Edward Wells; Secretary, C. A. Savage; Treasurer, J. D. Morgan. With this road built, and with a small gap filled from Peoria to Bushnell, Quincy will have a continuous through line of rail to New York and other Eastern cities.

Iowa Central Railroad.

We learn that 75 miles of grading has been done on the line of this road. Between Cedar Falls and Toledo, a distance of 39 miles, the whole is under contract and three-fourths done. Between Oscaloosa and the Missouri State Line, a distance of 60 miles, the grading is nearly completed. By this line, when completed, the distance by rail from St. Louis to St. Paul will be reduced to 575 miles. Hon. Peter Melendy is President of the company.

American Railroad Journal.

Saturday, April 25, 1868.

Stock Exchange and Money Market.

Money has been working steadily in favor of borrowers during the past week, under augmenting supplies available both on call, and for mercantile purposes, while there has been a much less urgent pressure for accommodation. The city banks, which opened the week with a diminishing legal tender reserve, owing mainly to the drain into the Treasury, in payment for gold marketed on account of the Government; are now gaining in this line, chiefly from the influx of lawful money, as well as national bank currency from the country. The cessation of Government gold sales tends to strengthen their position in this respect, and they are more liberal of aid to responsible applicants. Call loans close easy at 6@7 per cent., and prime to good discounts at 7@9 per cent. per annum. The Sub-Treasury added some four millions to its cash reserve last week, and thus far in the current week, it has not materially lessened the aggregate, though it has been a purchaser of maturing Seven Thirties, to a moderate amount. The last weekly bank statement indicated an increase of $1,884,261 in loans and discounts, $433,492 in specie, $24,309 in circulation, and $1,980,643 in net deposits with a decrease of $1,148,949 in legal tenders.

The specie reserve of the city banks is now $16,776,642, against $7,622,535 same time last year. The city bank deposits are now $181,882,523, against $184,060,256 week ending April 20, 1867. The legal tender reserve amounts to $50,833,660, against $64,696,913 same time last year. The circulation now stands at $34,218,581, against $33,648,571 same time last year. The loans are now $254,817,986, against $247,561,781 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $103,952,322 a day, against a daily average of $82,062,000 the preceding week, and $94,630,528 the week ending with April 4, 1868. The current week's exchanges average about $103,307,123 a day. The city banks, last week, lost $1,148,949 of legal tender, while they gained $1,980,643 in the deposit line, and $433,492 of their specie reserve. They reduced their loans, $1,881,261; and their circulation, $24,309.

The New York Gold Exchange Bank reports for the week ending Saturday, the 18th day of April, 1868, the average amount of loans and discounts as $1,757,647; average amount of specie, $1,220,331; average amount of deposits, $2,410,678.

The Philadelphia Bank movement the past week shows an increase in loans of [$732,831; a decrease of $28,011 in specie; an increase in legal tenders of $298,901; an increase of $1,695,281 in deposits; and a decrease of $444 in circulation. The Bank Clearings show an increase of $983,192, and the balances, an increase of $915,460.

National Bank notes to the amount of $70,700 were issued last week, making the total issue to 1,678 banks thus far, $307,292,301, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $7,582,861, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,845,790,) an actual circulation at this date, of $299,759,440. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,651,409; and for the public deposits, $38,277,950—making a total of $379,929,359. The Treasury Department last week redeemed and destroyed $369,100 of worn and mutilated fractional currency, and issued $942,225 of new. The outstanding amount of fractional currency on the 1st inst. was $32,588,690, against $32,307,947 on the 1st of March, and $32,246,439 on the 1st of Feb. 1868.

The U. S. Sub-Treasury receipts, week ending with April 18, were $13,397,798, including $2,527,388 from customs duties; payments, $9,402,955, including $55,000 of coin interest; balance at the close of the week, $104,754,879, against $100,760,036, at the close of the preceding week, showing an increase of $3,994,844. The business

of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,873,852 including $345,247 from customs; and payments, $3,115,678; on Tuesday, receipts, $803,760 including $397,193 from customs, and payments, $428,733. The balance at the close of business on Tuesday stood at $104,888,081, against $102,569,236 a week previous; and $100,082,930 on April 7, 1868.

Of the cash in the Treasury on the 1st inst., amounting to $122,509,645, the Sub-Treasury office in this city held $98,161,876.

The aggregate issue of coin certificates by the U.S. Sub-Treasury, in this city, up to date of latest published local report was $245,369,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740. The latest report from the national capital made the outstanding amount of coin certificates on the 1st of April $17,742,060 against $25,699,360, on the 1st of March, and $29,619,280 on the 1st of February, 1868. The Sub-Treasury issued $3,124,020 of coin certificates in March. It reported an issue, last week, of $1,698,000 of these certificates. It received $2,424,388 of coin certificates, in payment of duties at the Custom House, during the week.

Moderate receipts from excises, and a liberal customs yield, have been reported by the Treasury Department, during the week. The excises, last week, yielded only about three millions against $2,057,000 the preceding week; customs at the port of New York, $2,527,388 and at the outports, about $830,000 (in coin) more, making the grand total income for the week equal to about $7,690,000 in currency. The total receipts of the National Treasury, from excises, thus far in the new fiscal year, which began on the 1st of July, have been about $155,000,000 or equal to about 3¾ millions a week, of the current fiscal year, equal to a yearly aggregate of about 195 millions. The are becoming more prolific as the spring advances.

Government received from customs, through the port of San Francisco, from Jan. 1, to March 30, 1868, $1,974,071, against $1,510,000 same time last year.

Gold has been in more active speculative and export demand, and has advanced to 139⅞@140, the latest figures on Wednesday. The growing ease in money facilitates speculative operations. The floating supply is more controlable, because of the retirement of the Government, as a seller of coin. The export and customs drain is increasing. The shipments on Tuesday and Wednesday of the current week, reached $590,000. The *Arizona* arrived here on Wednesday, with a treasure freight of $948,020 from California.

It was recently offensively asserted in Congress by the opposition to the present administration, that since the 20th of February "ten millions of gold had been sold at from one and a half to two per cent. below the market rates." We have carefully examined the official tables of the highest and lowest quotations of gold on each day during this period, in connection with the prices at which the Treasury sold, and we have found that the rates obtained by the Government were in every case fully up to, and in most instances slightly above, the average price in the market. We cannot find room for the details required for the proof of this statement; but any one can satisfy himself of the fact by an inspection of the tables published by the local press on Saturday and Sunday last. When we consider the prompt effect generally produced on the market by the knowledge of the fact that Government is a seller of gold, and the difficulty, if not impossibility, of keeping this circumstance entirely secret, it is really a matter of surprise that such rates were in each case realized. Nothing in fact could better illustrate the rare tact with which the delicate operations of the Sub-Treasury office are managed by the Assistant Treasurer at this port, Hon. Henry H. Van Dyck.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $2,738,414, against $665,578 same time last year. The customs demand for Gold last week, averaged $421,231 a day; thus far, this week, it has been equal to $371,224 a day, or equal to a weekly aggregate of $2,227,344. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $49,143, and from California, $1,288,020. The total customs revenue of the Government, in coin, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $91,437,202, against $102,208,132 same time in the preceding fiscal year. The total receipts of California gold at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $28,072,319, against $33,343,649 same time in the preceding fiscal year, showing a decrease of $5,271,330 in 1867–'68. The exports of specie from this port, last week, were $1,625,498, against $880,223 same week last year. The exports of specie, hence, since July 1, 1867, have been $46,075,185, against $24,984,520 same time in 1866–'7. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $55,000, and since July 1, 1867, $54,572,162, against $36,607,764 same time in 1866–'7. The specie exports from San Francisco, from Jan. 1, to March 30, 1868, were $8,592,887, against $8,982,835 same time last year.

A further slight rise has been noted in prices of foreign exchange, on, however, a very modebusiness, both for Saturday's and for Wednesday's steamers. The market closed firm but comparatively dull. Bankers' prime sixty day bills on London closed on Wednesday at 110@110¼, and on Paris to 5.16¼c.@5.12½; sight bills on London to 110⅜@110⅝, and on Paris to 5.11¼c.@5.10. The offering of produce bills have been more liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,111,405, against $4,473,844 same week last year; total, since July 1, 1867, $145,462,317, against $159,098,338 same time in 1866–'67.

A decidedly livelier investment inquiry has been experienced for the public funds, since our last; and prices have advanced fully 1@1½ per cent., the market closing quite strong and buoyant, on much reduced offerings.

U. S. sixes of 1881 closed here on Wednesday at 112¾@112; U. S. Five-twenties of 1862, 112@112¼; U. S. Five-twenties of 1864 at 110@110¼; U. S. Five-twenties of 1865 at 110¼@110⅜; U. S. Five-twenties of 1865, consolidated, 108¼@108½; U. S. Five-twenties of 1867, 108¼@108¾; U. S. Ten-forties at 102¾@103, and U. S. Seven-thirties at 106⅞@107. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865 .....118½	September, 1865..117
August, 1865....117⅛	October, 1865 ....116¾
U. S. three per cent. certificates 100¼	

Government paid off $474,550 of the matured loan of 1847–'67, in March.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 8.	April 15.	April 22.
Consols..... .....93⅜		93½	93⅜
U. S. 5-20's of 1862....72¾		73	*70¼
Erie..... .....48½		46½	46½
Ill. Central..... 95		94	93½

* Ex May coupon.

There has been increased activity in the railway and miscellaneous share market, and prices have rallied sharply. The probable adjustment of the Erie conflict on equitable terms for all parties in interest, and the relaxation in money have tended to strengthen the confidence of operators for a rise.

A fairly active week's business has been reported in domestic produce at generally buoyant prices. Middling upland cotton closed buoyantly on Wednesday at 31½ cents, per lb. The stock of cotton now here is estimated at about 97,500 bales. The receipts at the port this week, have averaged about 2,000 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,021,000 bales, against 1,623,000 bales same time last year; exports, same time 1,413,000 bales, against 1,128,000 bales same time last year; stock on hand at latest dates, 265,000 bales, against 435,000 bales same date last year. At the Live Stock markets this week, Beeves have been in less demand at from 14@19¾c. per lb.; week's receipts, 5,487. Veal calves, salable at from 8@12c. per lb.; receipts, 2,521. Sheep and lambs heavy and drooping, at from 6½@9½c. per lb.; receipts, 17,837. Swine in active request at from 8½@10½c. per lb., all live weight; receipts, 13,534. General merchandise has been attracting more attention. Groceries have been quite freely purchased at very full rates. Dry goods have been in quite moderate request; seasonable fabrics have been held firmly. The total imports of foreign dry goods, last week, were $1,261,409, and the total amount marketed $1,599,269. The value of foreign merchandise imported last week, was $3,399,049—making the grand total specie value of last week's imports of dry goods and merchandise, equal to the unusually large sum of $4,660,458, against $5,102,880, same week last year; total since July 1, 1867, $190,103,457, against $218,854,729 same time in 1866–'67. The ocean freight market has been moderately active and firmer, since our last. For Liverpool we quote flour at 1s. 9d.@2s. by sail, and 2s. 6d. by steamer, per bbl.; grain at 4d.@4½d. by sail, and 6d.@6½d. by steamer, per bushel; cotton at $\frac{5}{32}$@$\frac{3}{16}$ by sail, and $\frac{3}{16}$@¼ by steamer, per lb.; and heavy goods at 15s.@35s. by sail, and 25s.@40s. by steamer, per ton. Total number of vessels in port on Wednesday 571.

The New York exports, exclusive of specie, for the week ending April 21, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$4,473,844	$4,111,405
Prev. reported.....	59,932,857	50,208,027
Since January 1.....	$64,406,701	$54,319,432

The imports for the week ending April 18th, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,236,966	$1,261,409
Gen. merchandise.....	3,865,914	3,399,049
Total for the week.....	$5,102,880	$4,660,458
Previously reported....	74,341,038	65,850,660
Since January 1.....	$79,443,918	$70,511,118

The balance in the Sub-Treasury on Wednesday was $105,567,410 43.

The Credit of Massachusetts.

Under authority of an act recently passed by the Legislature of this State, providing for the funding of the debt created in the construction of the Troy and Greenfield Railroad and Hoosac Tunnel, the executive department of the State, through the Treasurer, sent recently circulars to prominent banking houses for a loan of $3,000,000. The circulars called for a sterling loan of £610,000, for which the State propose to give scrip running 20 years, bearing interest at four per cent., and payable either in London or Amsterdam, but allowing a commission of only one-half of one per cent. Four different proposals were received, but the Executive Council have finally decided in favor of Baring Brothers. The negotiations have been completed with the agents of that house, Messrs. S. G. & G. C. Ward, they paying $563 for scrip representing £100, dated April 1, 1868, and also accrued interest up to the time of actual payment. Proposals were received from parties to take the scrip for sale in foreign markets on commission, but in view of the events which might occur to depreciate its value, it was thought better to accept Baring Brothers' proposal.

The amount realized by the premium at which the scrip has been disposed of goes to the formation of a sinking fund for the redemption of scrip heretofore issued in the construction of the Troy and Greenfield Railroad, &c., and of that now issued for this loan.

Dorchester and Delaware Railroad.

Workmen are now busily engaged constructing the bridge over the river at Federalsburg, Md. It is to be 400 ft. long and 14 ft. wide. A large force is also at work grading between Federalsburg and New Market. Track laying commenced at Seaford, Del., on the 11th inst.

☞ The Canal Board announces that the New York State canals will be opened on the 4th May, with the exception of two sections of the Genesee Valley Canal.

Railroad Earnings.—Weekly.

The earnings of the Atlantic and Great Western Railway for the second week in April, 1868, were $107,667 00
Corresponding week previous year ... 111,848 00

Decrease $4,181 00

The earnings of the Chicago and Alton Railroad for the 2d week in April, 1868.. $74,001 34
Corresponding period previous year .. 72,361 33

Increase $3,640 01

The earnings of the Detroit and Milwaukee Railroad for the second week in April 1868, were $34,115 86
Corresponding week of 1867 ..... 32,236 11

Increase $1,879 75

The earnings of the Toledo, Wabash and Western Railroad for the second week of April, 1868, were $68,556 35
Same week in 1867 ..... 68,881 40

Decrease $325 04

The earnings of the Michigan Central Railroad for the 2d week in April, 1868, were... $88,498 83

Increase $2,211 20

Brockville and Ottawa Railway.

A meeting of the directors of this company was held at Brockville, Ca., on the 31st ult., when possession of the road was restored by the "Trustee of the Preferential Extension Bondholders" to the company, in accordance with the recent act of re-organization passed by the Legislature of Ontario. Some changes took place in the Board of Directors, which is now constituted as follows: John G. Richardson, President; H. Abbott, Vice President and Managing Director; R. F. Cooke, J. B. Rivert, A. B. Dana, A. M'Arthur, and B. Rosamond, Directors; William R. Worsley, Secretary and Treasurer.

☞ The Committee on Railways of the Boards of Trade lately convened at Ottawa, Canada, have granted the application for a charter to enable certain parties to build a foot passenger and carriage bridge over Niagara river two miles below the present Suspension bridge.

☞ Sam Tate has been appointed Government Receiver of the Meridan and Selma Road.

Journal of Railroad Law.

CATTLE PITS—CONVENIENT DISTANCE FROM HIGHWAY—NEGLIGENCE OF COMPANY.

The facts in the late case of The Indianapolis, Pittsburg and Cleveland R. R. Co. *vs.* Irish, (26 Ind., 268,) sufficiently appear in the following opinion:

RAY, J.—This was an action against the appellant for killing a horse while he was running at large along the line of the road. The animal was struck by a locomotive of the appellant on a point of the road a short distance from a public highway, which crossed the railroad track obliquely. A cattle guard was placed near the crossing. It seems from the diagram introduced in evidence, and the testimony on the trial, that it would have been possible for the appellant to have constructed a cattle guard immediately along the line of the highway, and crossing the road bed at the same angle, and to have made a fence therefrom between the railroad and the highway. But the construction of such a cattle guard would have been unusual, and would have involved a considerable expense, and caused great inconvenience to the company in the repair of its road, requiring, perhaps, at that point, the removal of the iron rail in order to withdraw defective cross ties and substitute new ones, because the fence, which would be required to separate the public road from the track would not leave sufficient space for the withdrawal of the timbers at the side. Nor would there be a sufficient space remaining along the line of the road bed for the deposit of materials required in the repair of the track. The requirement that cattle guards shall be placed near public crossings, where a fence cannot be erected, is derived by construction from the words "securely fenced," used in the statute, and the expense in which railroad companies are required to involve themselves in the construction of such pits should bear some reasonable proportion to the fencing required by the act.

We think from the evidence before us, that the company has brought itself within the requirements of the statute, having constructed such a cattle guard as is common, as near to the highway as could conveniently be done. The special statement made by the judge who tried the case below, as the result of his personal examination of the premises, cannot be considered, as it is no part of the finding, but was made after the overruling of a motion for a new trial, and is not included in the bill of exceptions. It is not properly in the record.

The judgment is reversed with costs, and the cause remanded for a new trial.

Union Pacific Railroad.

The Union Pacific Railroad reached the highest point of the Rocky Mountains on the 16th inst. The rails on the summit were laid by T. C. Durant, Vice President; Sidney Dillon, Director; General Dodge, Chief Engineer; Colonel Seymour, Consulting Engineer; Webster Snyder, General Superinteudent; S. B. Reed, Superintendent of Construction, assisted by a large number of United States army officers.

☞ The New York Legislature has passed a bill empowering railroad conductors to make arrests, and giving them the authority of special policemen, the better to preserve order on their railway trains.

Commerce of the United States.

We have received from Hon. Alexander Delmar, Director of the Bureau of Statistics, his monthly report of the returns embraced within his department up to the close of February. We could wish that these were in such a shape that they could be used without the laborious compilation necessary to make the report intelligible, but we have been at some pains to bring the figures into shape, and now present the result. We have been obliged to make corrections in nearly all the monthly totals as heretofore published by the same authority, but this, we are told, is not the fault of the Director, but of the Custom House officials who forward him the returns.

The following will show the result of our labor in a comparison of the total imports and exports for the first eight months of the current fiscal year:

IMPORTS INTO THE UNITED STATES.

1867–'8.	Dutiable Goods.	Free Goods.	Total.
July	$31,936,990	$2,453,786	$34,390,776
August..	31,905,788	2,595,507	34,501,295
Sept.....	29,098,714	2,673,127	31,771,841
Oct.....	27,986,396	2,652,820	30,639,216
Nov.....	24,022,927	1,792,029	25,814,956
Dec.	19,198,397	2,166,799	21,365,196
Jan..	20,216,690	1,795,636	22,012,326
Feb.	24,888,193	1,494,200	26,382,393
8 mos..	$209,254,095	$17,623,904	$226,877,999

EXPORTS FROM UNITED STATES TO FOREIGN PORTS

1867–'8.	Domestic.	Foreign.	Total.
July	$42,147,004	$2,469,355	$44,616,359
August..	24,894,948	1,715,131	26,610,079
Sept.....	23,624,058	2,328,877	25,952,935
Oct.....	31,643,223	1,598,296	33,241,519
Nov.....	37,425,707	1,344,030	38,769,737
Dec.	44,025,495	1,586,391	45,611,886
Jan.	39,419,265	1,779,735	41,199,000
Feb.	34,148,558	1,034,294	85,182,852
8 mos..	$277,328,258	$13,856,109	$291,184,367

The above includes the specie imported and exported. The imports are all given at their foreign gold cost, freight and duty unpaid. The exports of produce and merchandise are given chiefly at their currency valuation, and we have reduced those to gold at the rate of 140. This may seem too great a reduction in view of the supposition that some of the California shipments may be reckoned in gold, but as it is the rate heretofore adopted, we let it stand. The shipments of this class amounting in currency to $238,152,684 would thus be reduced to $170,036,202, and the whole account would stand as follows:

Imports eight months.		$226,877,999
Exports mdse., net	$170,036,202	
" domestic specie	47,071,618	
" foreign specie..	5,960,065	
Specie value exports		223,067,885
Excess of imports		$3,810,114

It is not unfair to reckon the returns as about even up to the first of March. That month at this port left an unfavorable balance, but the returns for the whole country may improve upon that exhibit. These figures are quite valuable to all engaged in mercantile or banking transactions, and should be carefully preserved.—*Journal of Commerce.*

☞ The contract for the Kent County road has been signed, and the work will be commenced immediately. It will probably run by Sassafras and Warwick to Middletown, thus securing, in connection with the roads to be built, a through route to New York.

☞ A company has been chartered by the New Jersey Legislature to build a railroad from Camden to Medford, in Burlington county.

The Baltimore Route to Europe.

The establishment of a new steamship line between Baltimore and Europe is not only a matter of importance bearing on the welfare of that city, but also upon the fortunes of inland cities, and the interests of a large agricultural region at the West, penetrated by the Baltimore and Ohio Railroad. The commercial metropolis of Ohio, Cincinnati, is especially interested, and is making large calculations of the increase of traffic which this new line is to create for her. When the bridge over the Ohio river is completed freight will be taken from Cincinnati, without change of cars, directly to the wharf of these steamers at Baltimore. The same will be done with goods imported from Europe. They will be laid down at Cincinnati without breaking bulk, and entered at the Custom House there.

This route to the seaboard is much nearer than that to New York, and the saving of time and expense is obvious. For a large part of Ohio, Indiana, Illinois, Kentucky and Tennessee, this will be the shortest and cheapest route, and therefore Cincinnati will become the centre of a large trade in breadstuffs and provisions that now seek other avenues to the seaboard and European markets, while foreign merchandise will naturally seek Cincinnati preparatory to being distributed over the same region. And if freights can be made lower by this route than by the more northern roads (and it is said they are already so), then the prolific regions of the Northwest will pour their wealth into the lap of Cincinnati and draw thence their supplies of foreign merchandise. The Cincinnati *Gazette* estimates that when the Baltimore and Ohio Railroad connections are perfected to that city, corn may be shipped to Baltimore at about 40 cents per 100 pounds. It now costs 60 cents per 100 pounds to ship from Toledo on the Northern route. If these anticipations are realized, and there seems to be a substantial basis for them, Cincinnati has a great and prosperous future before her.

Erie Railway.

The following is a copy of the Erie Railway Bill which passed the State Senate on the 18th inst., the Assembly on the 20th, and which was signed by the Governor on the 21st:

SECTION 1. It shall not be lawful for the Erie Railway Company to use any money realized from the convertible bonds issued by said company on the 19th day of February, 1868, and on the 3d day of March, 1868, the said bonds amounting in all to $10,000,000, except for the purpose of completing, furthering and operating its railroad, and for no other purpose. Nothing in this section contained shall affect any right of action of any person against any officers or agents of the Erie Railway Company, nor shall it affect any action or proceeding now pending, save as herein provided; nor shall anything herein contained be held or construed to affect any liability, civil or criminal, of any officer or agent of the said Erie Railway Company or of any other person. The use of the moneys in this section mentioned by any officer or agent of said Railway Company for any other purpose than is herein mentioned, shall be a felony, punishable, upon conviction thereof, by imprisonment in a State-Prison for not less than two nor more than five years.

SEC. 2. The future guaranteeing by the Erie Railway Company of any other railroad corporation necessary and proper to secure a connection of said Erie Railway with other railroads so as to form a continued line of communication between New York and Chicago, for the purpose of securing better facilities for the traffic of said Erie Railway Company, and contracts hereafter made for that purpose, shall be deemed and taken to be within the power of said Erie Railway Company. Nor shall any stockholder, director, officer or agent of the Hudson River, Harlem or New York Central Railroad Company enter into any agreement with any stockholder, director officer or agent of the Erie Railway Company to fix the price for carrying freight or passengers through, or to or from any point in this State. Any stockholder, director, officer or agent, or other person authorizing, aiding or consenting to such an agreement shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by fine or imprisonment, or both, in the discretion of the Court.

SEC. 3. No stockholder, director or officer in either the New York Central Railroad Company, the Hudson River Railroad Company or Harlem Railroad Company, shall be a director or officer of the Erie Railway Company; and no stockholder, director or officer of the latter company shall be a director or officer of either of the three first-named companies.

SEC. 4. It shall not be lawful for the Erie Railway Company to consolidate its stock, or any part thereof, to divide its earnings, or any part thereof, with the New York Central Railroad Company, or with the Hudson River or Harlem Railroad Companies; and any contract made between the Erie Railway Company and either of the above companies for such consolidation or division shall be void.

SEC. 5. This act shall take effect immediately.

Illinois and Michigan Canal.

The Canal Commissioners held a meeting with the Board of Public Works at Chicago, Ills., on the 15th inst., for the purpose of considering the proposals made in accordance with the advertisement for bids for the performance of such of the work of excavating the Illinois and Michigan Canal, from Chicago to Lockport, a distance comprising sixty-five sections, and about twenty-nine miles. Of this great work, which is so full of importance to the welfare and prosperity of Chicago, after the forfeiture of the contracts under which the improvement was originally begun, sections 1 to 16 inclusive, were re-let, and since that time the work of excavation has progressed rapidly and steadily to the present. Not long since the contracts for the performance of the work of removing the rock, which extends at intervals along the line of the canal from section 45 to section 64, were also let. This left the distance included between sections 17 and 44 to be let, and for the fulfillment of this portion of the work proposals were received, and awards made as follows:

Contractors.	Sections.	Total Amount.
Ball & Hill	17–21	$224,815
Manning & Co	22–23	108,726
Manning & Co	24–25	
Fox, Howard & Walker	26–32	234,230
Carkin & Kimball	33–36	205,923
H. T. Stock	37–41	309,845
Fox, Howard & Walker	42–44	168,800
Total		$1,241,339
Amou't of contracts for excavation from Section 1 to Section 16, inclusive		482,680
Amount of contract for rock work from Section 45 to Section 64, inclusive		538,597
Total cost of improvement		$2,262,616

The total number of yards of earth work is 1,484,800; and of rock work 99,000.

The contractors are all engaged to complete their work within three years from the time of commencement.

The removal of the rock will, of necessity, be suspended during the season of navigation. The contractors, however, have all made extensive preparations for pushing the earthwork with despatch. A large force of men have been engaged, and by the help of dredges, the improvement, it is expected, will be far advanced by the close of the present summer.

American Industrial League.

A Conference of the friends of American Industry, convened by PETER COOPER, Esq., President of the American Industrial League, for the purpose of taking counsel as to the present industrial and financial condition of the country, and of promoting the objects of the League, will be held at the Metropolitan Hotel, New York, on Tuesday, April 28, 1868, at 12 o'clock.

The object contemplated by this association, as defined in the second article of its constitution, is as follows, viz: "To promote, protect and encourage the interests of American labor—to stimulate and render profitable domestic production, whether agricultural, mining, or manufacturing; to keep faithful watch over all questions affecting the industrial or financial condition of the country, and thus to secure the industrial independence and prosperity of the United States."

This is a national organization, recognizing the unity and the harmony of all our industrial interests, and maintaining that the entire country sympathizes with, and is affected by, the prosperity or adversity of any of its parts. Vindicating the great truth that *all production is one*, it does not seek to promote the prosperity of any one department of the National Industry, nor to advance the interests of any one section of the country, before or at the cost of any other. It is not a selfish device for promoting the objects of any special class, but rests upon a basis as broad as the entire industry—agricultural, mining, and manufacturing—of the land; appealing for sympathy and support not only to the patriotism but to the interest of every American citizen.

It is hoped that the call of the venerable President will meet with a hearty and general response, and that the meeting on the 28th inst., will be attended largely by warm and sympathizing friends of the cause of home industry.

☞ The Lafayette (Ind.) *Courier* says it is proposed to extend the Evansville and Crawfordsville Railroad from Rockville, Indiana, to Attica, and thence by air line *via* Oxford, Benton County, to Crown Point, where it will intersect the Great Eastern Railroad, forty-one miles from Chicago.

☞ The directors of the Queen Anne's Railroad Company have decided to connect their road with the Delaware Railroad at or near Massey's Cross roads.

☞ HOLDERS OF THE CENTRAL PACIFIC RAILROAD Bonds are joint investors with the United States Government in the Grand Continental Pacific Railroad Line, having the prior claim thereon. These securities are highly commended to persons desiring good, safe, steady investments. They are for sale, for the present, at par and accrued interest in *currency*—the interest and principal being repayable in GOLD—and now yield nearly nine per cent. upon the outlay. All information, &c., furnished on application by

FISK & HATCH,

JERSEY CITY

LOCOMOTIVE WORKS FOR SALE.

THE WELL KNOWN LOCOMOTIVE WORKS AT Jersey City, known as the Jersey City Locomotive Works, comprising 24 full lots of lands, with substantial and well arranged buildings thereon, together with the machinery and tools, which are in excellent order, and of the best description, and capable of turning out 6 to 8 first class locomotives per month.

The character of the work turned out of the shops of this company is well known, and has a high reputation on most of the leading railroads in the United States. Adjoining and connected with these works are also offered for sale, 26 lots of ground with the buildings thereon, and which, added to the property of the Jersey City Locomotive Works, make the whole one of the most desirable establishments for the manufacture of locomotive engines and other machinery in the country. The price and terms will be made highly favorable, as the parties interested are solicitous to close up the concern. Apply to

CHARLES KNEELAND, 49 William street.
W. G. HAMILTON, 21 Broadway.
McANDREW & WANN, 12 Pine street.

FOR SALE.

PROPOSALS.

NOTICE TO RAILROAD CONTRACTORS.

OFFICE OF THE NEW YORK AND OSWEGO MIDLAND RAILROAD COMPANY,
ONEIDA, N. Y., Feb. 10, 1868.

SEALED PROPOSALS WILL BE RECEIVED AT the Office of the Company, until the 15th day of April, 1868, at noon, for the GRADING, MASONRY, and BRIDGING of that portion of the NEW YORK AND OSWEGO MIDLAND RAILROAD, extending from the CITY OF OSWEGO to the VILLAGE OF SIDNEY PLAINS, a distance of ONE HUNDRED AND TWENTY MILES, and passing through the Towns of VOLNEY, HASTINGS, WEST MONROE, CONSTANTIA, VIENNA, LENOX, STOCKBRIDGE, EATON, LEBANON, SMYRNA, NORTH NORWICH, NORWICH, OXFORD AND GUILFORD, and that portion known as the Branch, from at or near EAST GUILFORD, in the town of GUILFORD, to MT. UPTON, in the same town.

The line will be divided into Sections of about One Mile each, and proposals may be made for separate Sections or for the Entire Work. The Company will entertain separate proposals for Bridging only.

The line passes through a desirable section of country of Central New York, and the work will be worthy of the attention of Contractors.

Plans, Profiles and Specifications will be ready for examination at the Office of the Chief Engineer, in Oneida, N. Y., where all necessary information may be obtained, on and after the 6th day of April.

D. C. LITTLEJOHN, President.
W. B. GILBERT, Chief Engineer.

POSTPONEMENT.

In consequence of the unfavorable weather for field work for the past three weeks, the above Letting will be Postponed until THE FIRST DAY OF MAY, AT NOON. Plans, Profiles and Specifications will be ready for examination as above noticed, on and after the 22d day of April.

Dated Oneida, March 20th, 1868.

D. C. LITTLEJOHN, President.
4t14 W. B. GILBERT, Chief Engineer.

C. F. I. & C. For COST, FREIGHT, INSURANCE, and COMMISSION, any production of Great Britain can be procured at the lowest market rates, through Messrs. BELDING, KEITH & Co., American Bankers and Merchants, 80, Lombard Street, London. Orders by Cable promply executed. Circulars issued weekly on application.

Portable Railroad.

THE ADVANTAGES OF THE PATENTED PORTable Railroad are manifold. It saves time and money; is particularly adapted for excavating, filling, constructing railroad beds, milldams, levees, etc.: working in mines, quarries, brick yards, and peat bogs. Sold or rented in 20-foot sections, from one to a thousand. Also, Cars suitable for the work to be done. Contracts for excavations, etc., promptly attended to. For particulars or pamphlet, address

A. PETELER & CO.,
New Brighton, Richmond Co., N. Y.

IMPROVED DOUBLE-ACTION PUMPS, SUITABLE for deep mines, railroad water stations, ships, breweries, distilleries, mills, factories, etc. Send for circular. Manufactured by G. MARSHALL,

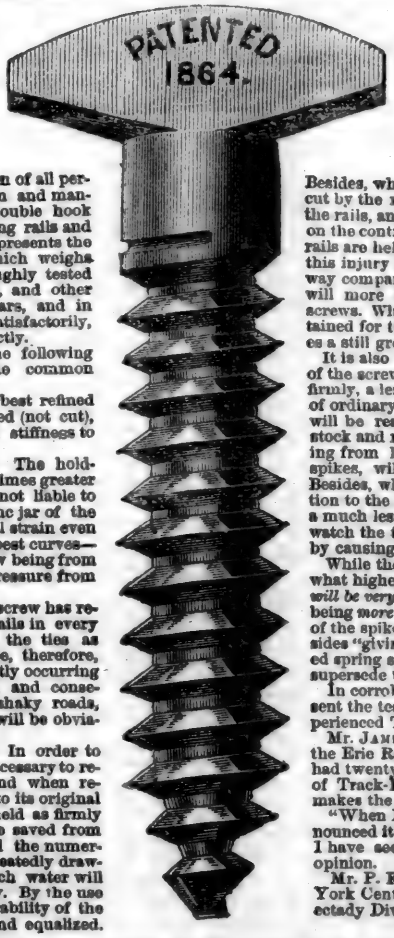
U. S. RAILROAD SCREW SPIKE COMPANY,



NO. 45 CLIFF STREET, NEW YORK,

MANUFACTURERS OF MONTIGNANI'S PATENT

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary.

Works at

OSSINING,

Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERGNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

MERRICK & SONS,

SOUTHWARK FOUNDRY,

430 WASHINGTON AV.,

PHILADELPHIA,

MANUFACTURE

Steam Engines—High and low pressure, for land, river, and marine service; Horizontal, Beam, and Vertical. Patterns on hand for 8x10, 14x12, 18x12, Oscillating; compact and cheap.

SOLE MANUFACTURERS IN PHILADELPHIA AND CHESTER OF WILLIAM WRIGHT'S PATENT VARIABLE CUT-OFF STEAM-ENGINES.

Boilers—Plain cylinder, flue, and tubular.

Steam-Hammers, of Nasmyth & Davy patterns, with all the recent improvements.

Strahan's Drill Grinding Rest and Twist Drill-Holder.

Castings—Loam, dry, and green sand, brass, &c.

Roofs—Iron frames for covering with slate or iron—neat, durable, and economical.

Gas-Holders of every description. *Builders of Holders for the Philadelphia Gas-Works of 100 and 160 feet diameter.*

Tanks of every form, for sugar estates, refineries, oil, &c.

Gas Machinery of every description, including Retorts, Bench-castings, Holders and Frames, Purifiers, Coke and Charcoal Barrows, Gas-Valves, Governors, Hoisting Machines, &c.

Manufacturers for the American Meter Company of their Patent Dry Center Valve for changing Purifiers.

Bartol's Patent Wrought Iron Retort-lid, durable, light and cheap.

Sugar Machinery, such as Vacuum Pans and Pumps, Defecators, Bone-Black and Bag Filters, Bone-Black Burners, Washers, and Elevators, Hydraulic Elevators, Sugar and Bone-black Cars, Strike Heaters, Open Steam Trains, &c.

Sole Assignees and Manufacturers in the United States of

Weston's Patent Self-centering Self-balancing Centrifugal Sugar-Draining Machine.

Glass & Bartol's improvement on Aspinwall & Woolsey's Centrifugal Sugar-Draining Machines.

N. Rillieux's Patent Sugar-Boiling Apparatus, applicable to Beet-Root and Cane Sugar.

Having had twenty years' experience in the manufacture of Sugar Machinery for Cuba, South America, and the United States, they are prepared to contract for the design and erection of apparatus for making Sugar from Beet-Root or Cane, and for Refineries for either Sugar or Molasses.

They are also in possession of plans of the most recent improvements in machinery used in France and Germany in the manufacture of Beet-Root Sugar.

WATCHES.

TIFFANY & CO.,

550 and 552 Broadway,

Solicit attention to their Timing Watches, known as the "TIFFANY & Co., TIMERS."

These watches, for Railroad, Engineering, Racing, Gunnery, and Scientific purposes, are superior to any yet offered, as the arrangement of the stop is such as to note time to the nicety of one-fourth or one-fifth of a second, in such manner as to prevent the possibility of error in the calculation.

The following named gentlemen, having bought "Timers" and found them to be perfectly satisfactory, have kindly allowed Tiffany & Co. to refer to them:

Amasa Sprague,	Joseph McPherson,	August Belmont,
Frank Squire,	Geo. G. Haven,	B. W. Gibbs,
J. C. Griswold,	B. H. Bixby,	O. N. Cutler,
Leon. W. Jerome,	George Osgood,	S. D. Bradford,
Wm. M. Rysdyk,	W. M. Tilden,	J. V. Brokaw,
Wm. F. Sherley,	A. P. Spencer, and others.	C. A. Grymes,

Tiffany & Co., have also a full assortment of watches of all desirable sizes and styles, of the same quality and finish as the first mentioned, in addition to their usual stock of Frodsham's and Jurgensen's.

Particular care and attention given to the repairing and adjusting of fine watches.

TIFFANY & Co., 550 and 552 Broadway. House in Paris, TIFFANY, REED & Co.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the ***MAIN TRACK IS NEVER BROKEN,*** and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns ***The Life and Limb of all Travelers upon Railroads.***

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

New York, Saturday, May 2, 1868.

Memphis and Little Rock Railroad.

The Little Rock *Gazette* says that the completion of the unfinished portion of the Memphis and Little Rock Railroad within the time specified in the contracts—January 1st, 1869—is probable.

There are two contracts in process of completion at the present time: one, with Mr. Edward Denmead, entered into in July last, for the completion and thorough repair of the first and third divisions, comprising the sections between Memphis and Madison on the east, and Little Rock and Devalls Bluff on the west; the other, with Willis Gaylord, Esq., of New York, for building the middle division, or that portion lying between Madison and Devalls Bluff, and for its complete equipment. By the terms of the first, Mr. Denmead undertook to complete the work by the 1st of January last, at an estimated cost, originally, for the eastern division of $71,280, and for the western, $34,550, to be paid for mainly out of the net earnings of the road. Sickness and high water delayed the work somewhat, but it is now about finished.

The contract with Mr. Gaylord is of a more important character. By its terms the company are to give $2,200,000 of its capital stock, to be issued monthly as the work progresses, and furthermore, to loan to Mr. Gaylord the present and prospective assets of the road, comprising the first mortgage bonds, and the bonds authorized by our legislature at its last session, the payment of this loan to be secured on the stock issued to the contractor. The cost of the work is estimated at $1,450,424, taking the present cash prices of material and labor.

The progress made thus far in pushing forward the work under these contracts is as satisfactory as could be expected. Under Mr. Denmead's contract the western division has been put in thorough repair by the construction of new bridges throughout, and the supplying of new ties, and iron where it was necessary. The eastern division is also in running order, and trains are daily passing over it.

The construction of the middle division was advanced considerably by the work done under the Forrest and McCreanor contract, which terminated about the time the Gaylord contract was entered into. It now stands thus: Stone for White river bridge, cut and ready to be laid; twelve miles of grading beyond Madison and ready for the track; twenty miles of ties prepared, and one thousand tons of iron purchased and on the way to its destination. Also, nearly the entire route cut out. The deep cut through Crowley's ridge is nearly completed and the only serious impediment that remains to delay a rapid progress is a bridge over Cache river of 360 feet and trestle work for a distance of about 1,200 feet.

The exact distances taken from the engineer's report are as follows:

	Miles.
Eastern Division	38.56
Middle "	45.80
Western "	46.76
Total	131.12

It will thus be seen that only about 33 miles remain to be built, over which a mail route is to be established until the road is finished.

☞ Governor Evans, President of the Denver Pacific Railroad, reports that the contracts for completing the entire road from Cheyenne to Denver were let on the 27th ult.

Union Pacific Railroad.

Another section of twenty miles of the Union Pacific Railroad has been completed, and the line now extends five hundred and fifty miles west of Omaha. Trains are now running over the highest point of the Rocky Mountains that will be traversed by the line, and it is expected that before the close of the year more than eight hundred and fifty miles of road will be in actual operation, while it is estimated that the entire line between Omaha and Sacramento, a distance of 1,721 miles, will be in operation in 1870. The Central Pacific Company is advancing from the California side and the Union Pacific Company from the Atlantic terminus.

Central Pacific Railroad.

The CENTRAL PACIFIC RAILROAD has now an important and valuable traffic on both slopes of the Sierra Nevada range, and will command the through overland business. The Company offer their First Mortgage Six Per Cent. Bonds (to the same amount only as the United States Subsidy Bonds granted them) at their par value and accrued interest in currency, both interest and principal payable in gold coin.

Pamphlets, &c., giving a full account of the property pledged, furnished by

FISK & HATCH,

Bankers and Dealers in Government Securities, and Financial Agents of the Central Pacific Railroad Company, No. 5 Nassau street, New York.

Boston, Hartford and Erie Railroad.

The Hartford *Times* says that this road is being pushed along as fast as possible. Fifty large dump-cars, to be drawn by locomotives, are being put upon the road, and two locomotives will soon be put upon a temporary track. These arrangements will insure the rapid progress of the work of excavating and filling, of which there is a large amount to be done in the Valley of the Natchaug, as well as at other points. Workmen are at work digging the foundations for the abutments of the bridge across the Natchaug, and laying a temporary track for the conveyance of the stone from the quarry a short distance up the stream. They have there large quantities of the finest stone for the purpose. It is expected that the road will be finished to Willimantic by the close of 1869.

Union Pacific Railroad, Eastern Division.

The Secretary of the Interior has submitted to the President the report of the commissioners appointed to examine the fourteenth section of twenty-five miles of the Union Pacific Railroad, Eastern Division, representing that the said fourteenth section is ready for present service, and completed and equipped as a first-class railroad; and that the telegraph line is completed for the same distance, which commences on the three hundred and thirty-fifth, and terminates on the three hundred and sixtieth mile post on the Missouri river at the state line.

The Secretary recommends the acceptance of the report, and the issue to the company of bonds and patents for the lands on account of the section which has been approved by the President, and the Secretaries of the Treasury and the Interior are directed to carry it into effect.

Boston and Worcester Railroad.

The gross income from operations of this road for the years ending November 30, 1866 and 1867, was as follows:

	1866.	1867.
From passengers	$1,028,695 85	$1,003,725 27
" freight	772,534 15	739,184 45

Rent of Agricultural Branch	21,695 23	9,039 67
Salaries, law exp., etc.	47,724 51	50,331 00
Additional expenditures charged operating account	.....	27,853 50
Totals	$1,424,528 21	$1,161,080 46
Net earnings	$490,201 33	$781,421 14
Dividends, 10 per ct., and U. S. tax	473,684 20	499,999 99
Surplus	$16,517 13	$281,421 15

Expenditures were made for additions and improvements in 1867, as follows:

For lands	$193,600 64
New buildings	157,403 55
New rolling stock	135,396 40
New bridges	21,051 41
Additional track for freight purposes	20,401 50
Total	$527,853 50
Deduct for construction	500,000 00
Balance to operating account as above	$27,853 50

The total income per mile of road in 1867 was $28,152 20; total expenses, $16,827 25, and the net income, $11,324 95. In 1866 the total income per mile of road was $27,749 70; the expenses, $20,645 39, and the net income, $7,134 31. The report says:

The Grand Junction Wharf property in East Boston was conveyed to this Corporation by order of the Court, upon our bid of $521,500, by deed bearing date March 6, 1867. Since that date the storage room has been increased by 300,000 cubic feet; some of the docks dredged, and a sea wall rebuilt, at total cost to $53,182 71.

Five thousand shares of new stock were issued to the old stockholders July 1st, at its par value, one hundred dollars per share.

At your last meeting the directors were authorized to increase the construction account. A thorough revision of that account since 1850, would require additions which they have not deemed it advisable to make at present—and they have modified it only by adding the items which appear in the report to the Legislature, all incurred during the past year. The addition of these items makes the construction account equal to the present capital stock, viz.: $5,000,000.

The road, road bed, bridges and rolling stock are in excellent condition.

We have put down 300 tons steel rails; 890 tons new iron; also 420 tons repaired rails; and have on hand 27 tons steel; 129 tons new iron, and 835 tons second-hand rails for future use.

We have used 47,248 chestnut sleepers, and have on hand 31,529.

We have used 5,977 cords of wood, and 11,906 tons of coal; and have on hand 4,303 cords of wood, and 5,983 tons of coal.

The charter of the Boston and Worcester Railroad corporation was approved on the 23d of June, 1831. Among the persons named in the act, are George Bond, Henry Williams, Eliphalet Williams, George Morey and Nathaniel Hammond, who were subsequently directors.

The corporation was organized on the 25th day of July, 1831, and Nathan Hale, David Henshaw, George Bond, Thomas Motley, Daniel Denny, Joshua Clapp, and Henry Williams, were chosen as its first board of directors. Nathan Hale was chosen President, and George Morey Clerk and Treasurer; John M. Fessenden, Esq. was appointed Engineer. The construction of the road was commenced in July 1832. It was opened for travel to Newton on the 16th day of April, 1834; to Needham, on the 3d day of July; to Hopkinton (now Ashland), on the 20th day of September; to Westboro', on the 15th day of November, 1834; and to Worcester, on the 3d of July, 1835.

A railroad from Boston to Albany was contemplated at an early period. Under the administration of Gov. Lincoln, in 1826, a committee of the Legislature, one of whom is still a member of this board, investigated the subject and reported in favor "not only of the practicability, but of the expediency of building a railway from Boston to the Hudson." An able board of commissioners examined the various routes, and gave a preference to that upon which, with variations, the Worcester and Western Roads were subsequently constructed.

The Commonwealth, however, did not pursue the enterprise, and the charter of this corporation was granted, as before stated, to private individuals. But it was the purpose and desire of those who engaged in this enterprise that the road should be extended to the State of New York. In the first annual report, the directors remark:—"It is, however, hardly reasonable to suppose that after the proofs which will be given of the advantages of the railroad, both to the public and to the stockholders, it will fail to be continued in a very few years to the Connecticut River, and thence to Albany, in pursuance of the projects which have been long before the public." And in their next report we find the statement that a "petition was presented to the Legislature of this Commonwealth, at their last session, praying for the incorporation of a company with the necessary powers for extending the railroad from Worcester to the western boundary of the State towards Albany."

The charter of the *Western Railroad Corporation* was granted March 15th, 1833, to the individuals who then composed the board of directors of the Boston and Worcester Railroad Corporation. That Corporation was organized January 4th, 1836. The road was opened from Worcester to Springfield October 1st, 1839, and to Albany December 21st, 1841. Since that time various efforts have been made to effect a consolidation of the two roads, until under the act of 1867, a copy of which is appended, this corporation, on the 19th day of June last, passed the following vote:

Voted, That the stockholders of this corporation agree to unite and consolidate the same with the Western Railroad Corporation, in accordance with the act passed by the General Court of the Commonwealth of Massachusetts, entitled, "An act to authorize the extension of the Western Railroad to the City of Boston, and for other purposes," approved May 24, 1867.

Voted, That the directors be authorized and requested to endeavor to ascertain upon what terms such consolidation can be effected, and either to report the same, if ascertained, to the stockholders of this corporation at a special meeting to be called for that purpose, or, if said directors shall deem it expedient, to petition the Supreme Judicial Court for the appointment of commissioners, when and as provided by said act, and to take such measures as they shall deem expedient to protect the interest of said stockholders and corporation in reference to such consolidation.

On the 4th day of September following, the Western Railroad Corporation concurred in this action by a similar vote, and after various meetings of the boards and committees it was agreed that the stock in the two corporations should be equalized by the payment of ten dollars on each share in this corporation to its stockholders.

These terms were approved and ratified at your meeting on the 16th day of December current.

Thus has been finally effected a consolidation of the two roads forming the line from Boston to Albany, and the purpose of the first board of directors of this corporation has been carried out.

The separate existence of the Boston and Worcester Railroad Corporation has thus terminated. The report ends the record of thirty-six years, and the Boston and Albany Railroad Company has taken the place of the Boston and Worcester, and Western Railroad Corporations.

Some, whose names were placed upon your subscription list when it was first presented, amid doubts and fears and urgent appeals to a capital city of about sixty thousand inhabitants, and a Commonwealth counting some ten times that number, that lived to see the former more than trebled, and the latter doubled in population. They have lived to see the United States bound together by the creation of a network of thirty-eight thousand eight hundred and fifty-one miles of completed railroads, representing one thousand six hundred and fifty-five million, four hundred and eighty-three thousand, eight hundred and twenty dollars (1,655,483,820.) However barren the record, year by year presented to the changing body which has constituted this artificial person, may seem to be of anything calculated to awaken emotion, it is impossible for those to whom it represents so long a period of life and labor, to close it without feeling.

The success of the undertaking has demonstrated the sagacity of those who conceived and commenced it. Of those who have recently managed and developed it, it is not for us to speak.

For an unbroken period of thirty-three years, with unvarying regularity, the stock has yielded its annual product. A large debt has been paid from its earnings. The property has vastly increased in value, and passes into the hands of its new holders without incumbrance and in an admirable condition.

These results may be stated in a few words, but it is not easy to describe the toils, labors and

anxieties which they suggest, and the accumulated mental and physical exertions by which they have been accomplished. Massachusetts may well be proud of its railway operatives—men upon whose watchfulness and fidelity the lives of millions daily depend—whose duty is discharged without the stimulus of praise, and often under unjust and indiscrimate censure. Among those whose task, less physically laborious, it has been to watch and direct these labors, we may recall with honor the names of some of the dead:—and even this brief sketch of the origin and history of the corporation may not be without interest.

The list of the officers of the corporation appended to this report, furnishes ample evidence of the care with which your predecessors selected their representatives, as well as of the public interest and importance attached to the road.

Nathan Hale was intimately associated with other public enterprises, and for a long period of years enjoyed in the highest degree the respect and confidence of the community, justly yielded to his wisdom, integrity and public spirit.

Thomas Hopkinson, after acquiring a high reputation at the bar, left the bench to give the last years of the prime of his life to the management of your interests—during which he retained and increased the confidence and respect of the community already given him.

George Morey, although less known as the incumbent of official station, was a man of marked ability, and exercised a great influence in the management of public affairs, as well as of those of this corporation. Among their associates on the board of directors, the names of David Henshaw, George Bond, William Jackson, William Sturgis, Addison Gilmore, Israel Lombard and others, cannot but be familiar to those who best know the history of our city and State, and the public and private enterprises which have promoted the prosperity of both.

Two persons have been connected with the corporation for an unusual period. Daniel Denny was a member of the first board of directors, and has given to the corporation for more than thirty-six successive years the benefit of his sound judgment and his accumulated experience.

Horace Williams closes with the current year a long, faithful and honorable service, commenced in March, 1833, as a clerk of the corporation, of which he became the Treasurer in 1837—an instance not often paralleled.

But we should go too far were we to mention all those who have deserved an acknowledgment of their capacity, fidelity and useful services.

Nor do we feel at liberty to delay you longer with these reminiscences, but with our congratulations on the gratifying success of the undertaking and on the prosperous condition in which it passes ito other hands, we close an official connection which leaves with all of us agreeable memories—for some associated with the recollections of many years—and present to you the last annual report of the Directors of the Boston and Worcester Railroad Corporation.

Not one of the 2,887,244 passengers transported during the year, has been injured in the cars.

We repeat our comment made in the last annual report, thus confirmed by this continual evidence of its justice, that "this is the best testimonial that could be given of the care and fidelity with which the employes concerned in the management of the trains have performed their duty."

The company have 40 locomotives, 62 eight wheel and 1 four wheel passenger cars, also 2-5ths of 6 on steamboat train, and 44-234ths of 32 on land route; 11 eight wheel baggage cars, and 2-5ths of 2 on steamboat train, and 44-234ths of 15 on land route train; 408 eight wheel and 4 four wheel freight cars, also 44-234ths of 13 on land route train; 25 four wheel gravel cars.

Miles run by passenger trains, 459,364; by freight trains, 304,714; by other trains, 19,588—total, 783,666, an increase over the previous year of 54,196.

Number of passengers carried in the cars, 2,887,244; do., carried one mile, 44,117,876. Tons of merchandise carried, 597,400; do., carried one mile, 21,976,025. Increase in passengers carried, 223,419; increase in passengers carried one mile, 2,108,551, increase in tons of merchandise carried, 28,081; increase in tons carried one mile, 712,064.

Estimated weight in tons of passenger cars (not including passengers) hauled one mile, 22,871,310; do., freight cars (not including freight), 30,329,026.

Length of main line 44⅝ miles. Length of double track, 44⅝ miles. Length of branches, 24 miles. Length of sidings and other track, 22 miles.

STATEMENT OF ACCOUNTS, NOV. 30.

President.—GINERY TWITCHELL.

Directors.—Ginery Twitchell, Daniel Denny, Nath'l Hammond, Benj. F. White, Emory Washburn, Peter T. Homer, D. Waldo Lincoln, William Claflin and George P. Upham.

Vice President.—D. WALDO LINCOLN.

Superintendent.—ABRAHAM FIRTH.

Treasurer.—HORACE WILLIAMS.

Michigan Southern and Northern Indiana Railroad.

At the annual meeting of the stockholders of this company at Toledo, on the 22d ult., the following gentlemen were unanimously elected directors for the ensuing year: E. B. Phillips and Albert Keep, of Chicago; Philo Morehous, of Elkhart, Ind.; J. S. Barry, of Constantine, Mich.; T. H. Hoag, of Toledo; Wm. Williams, of Buffalo; N. Beardsley, of Auburn, N. Y.; LeGrand Lockwood, Henry Keep, Jesse Hoyt, J. P. Acker, A. Havemeyer, and D. N. Barney, of New York. At a subsequent meeting of the board, E. B. Phillips was re-elected President; LeGrand Lockwood, Treasurer; and D. P. Barhydt, Secretary.

☞ The Governor of New York has signed the bill authorizing the erection of the proposed new Railroad Bridge across the Hudson River at Albany. After its completion the old bridge is to be removed.

☞ A company has been formed to build a branch line from the Norwich and Worcester Railroad, at Jewett City, 23 miles from Norwich, to the Rhode Island State line at Voluntown, in Windham Co., Conn.

Woodstock Railroad.

Ground was broken on the 22d ult., at Shallie's Hill, Vt., by P. T. Washburn, Esq., President of the company, in presence of the directors, engineers, contractors, and others. Five hundred laborers are called for, and it is stated that a thousand will be required, as it is the intention of the contractors to push on the work with energy. Engineers are now surveying the route from Woodstock to Rurland, and expect to commence work on that part of the route in the fall.

☞ The Pittsburg and Temperanceville Horse Railroad was organized at Pittsburg on the 25th ult., by the election of the following board of directors: B. H. Painter, J. K. Morange, N. Ballentine, C. H. Love, and Thomas Hershberger. W. R. Brown was elected President; Samuel H. French, Secretary; and J. K. Morange, Treasurer. The act authorizing the construction of this road was approved on the 7th of March last. The road will be about three miles in length, and should the stock be taken as rapidly as is expected, it will be constructed during the present season.

☞ The "Camden and Mt. Clair Cut-off" of the Baltimore and Ohio Railroad has been completed. It is one mile, seventeen hundred and twenty feet in length, and saves about one mile and three-quarters of road. Its junction with the main road at Clare street is called Carroll Switch, and at its other terminus as Camden Junction. The cut-off is double track, the same as the main road. The fastest trains will, hereafter, run the distance from Baltimore to Washington in one hour and fifteen minutes.

☞ The stockholders of the Bellefontaine Railway will meet at Galion, Ohio, on the second Wednesday of May, to vote upon a consolidation with the Cleveland, Columbus and Cincinnati road. The basis is that the Bellefontaine stock shall go into the consolidation, dollar for dollar, but the Cleveland, Columbus and Cincinnati road shall receive a dollar and twenty cents of the consolidated stock.

☞ Work upon the Montpelier and Wells River Railroad was commenced at Montpelier, Vt., on the 27th ult. The contractors will endeavor to have it completed within the present year. The books for subscription will be opened on the 6th inst.

☞ The Appleton (Wis.) *Crescent* says that "Winneconne has put 'the finishing stroke' on the extension of the St. Paul Railway from Omro to that point, by giving nearly a unanimous vote for a tax of $4,000 for that purpose. The right of way is now secured not only to but through the village of Winneconne, pointing straight toward Appleton."

☞ The town of Thorndike has voted to subscribe ten thousand dollars to the stock of the Belfast and Moosehead Railroad Company, by a vote of 118 yeas to 53 nays.

☞ Contracts have been made for the construction of the Lebanon and Pine Grove Railroad.

☞ H. C. Moore, Esq., has been appointed Superintendent of the Pacific Railroad of Missouri, vice T. McKissock, Esq., resigned.

Illinois Central Railroad.

The statement of this Company for the month ending March 31, 1868, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	17,306.28 for	$167,980 62
Acres Int. Fund Lands sold	120.00 for	1,680 00
Acres Free Lands sold	3,636.16 for	50,096 91
Total sales during month of March, 1868	21,062.44 for	$228,610 36
To which add Town Lot Sales		915 00
Total of all	21,062.44 for	$229,525 36
Cash collected in March		$219,701 17

TRAFFIC DEPARTMENT.

Receipts from Freight		$205,526 00
do.	Passengers	123,764 49
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	70,000 00
Total Receipts in March, 1868		$409,648 82
Total Receipts in March, 1867		$417,070 90
Estimated earnings in the month of March on the D. & S. C. R. R., not included above		$52,668 40

English Railway Law.

An important question with reference to the practice of stock brokers has been decided in England by Vice-Chancellor Malins, in the case of "Langton *vs.* Waite & Co." The plaintiff borrowed £6,000 for three months, and deposited £22,000 stock in the Grand Trunk Railway of Canada, which, as a collateral security, was transferred to Mr. Waite. On repayment of the loan the same stock was not restored, but other stock of the value of £22,000; and, plaintiff finding defendants had sold the deposited shares at a high price, and bought again at a much lower when they had to re-transfer, making a profit of £3,000 by the transaction, brought an action to recover that sum, his contention being that the profit belonged to him. The Vice-Chancellor, in giving judgment, said that in the absence of an express contract to the contrary, a pawnee could not sell the pawned property until the debt became payable, and if he did so, the owner was entitled to any profit which the pawnee made by the sale. The Court, therefore, decided in plaintiff's favor, giving the costs of the suit also against defendants.

New Free Railroad Law of Pennsylvania.

An act to authorize the formation of Railroad Corporations.

SECTION 1. *Be it enacted*, That any number of citizens of Pennsylvania, not less than nine, may form a company for the purpose of constructing, maintaining and operating a railroad for public use in the conveyance of persons and property, or for the purpose of maintaining and operating any incorporated railroad already constructed for the like public use, and for that purpose may make and sign articles of association, in which shall be stated the name of the company, the number of years the same is to continue, the places from and to which the road is to be constructed or maintained and operated, the length of such road, or as near as may be, and the name of each county in the State through, or into which it is made, or intended to be made, the amount of capital stock of the company, which shall not be less than ten thousand dollars for every mile of road constructed, or proposed to be constructed, and the number of shares of which said capital stock shall consist, and the names and places of residence of a President, and not less than six or more than twelve of the Directors of the company, who shall manage its affairs for the first year and until others are chosen in their places; each subscriber to such articles of association shall subscribe thereto his name, place of residence, and the number of shares of stock he agrees to take in said company; on compliance with the provisions of the second section of this supplement, such articles of association shall be acknowledged by at least three of the directors, before some officer competent to take acknowledgement of deeds in the county where the principal office is designed to be located, and may be filed in the office of the Secretary of the Commonwealth, who shall indorse thereon the day they were filed, and record the same in a book to be provided by him for that purpose; and thereupon the said articles of association shall become and be a charter for the said company, and the persons who have so subscribed such articles of association, and all persons who shall become stockholders in such company shall be a corporation by the name specified in such articles of association or charter, and shall possess the powers and privileges following, to wit:

First. To have succession by its corporate name, or the period limited in its articles of association.

Second. To sue and be sued, complain and defend, in any court of law or equity.

Third. To make and use a common seal and alter the same at pleasure.

Fourth. To hold, purchase and convey such real and personal estate as the purposes of the corporation shall require, not exceeding the amount limited in the articles of association.

Fifth. To appoint subordinate officers and agents as the business of the corporation shall require, and to allow them a suitable compensation.

Sixth. To make by-laws not inconsistent with any existing law for the management of its property and regulation of its affairs and for the transfer of its stock.

SEC. 2. Such articles of association shall not be filed and recorded in the office of the Secretary of the Commonwealth until at least nine thousand dollars of stock for every mile of railroad proposed to be made is subscribed thereto, and ten per centum paid thereon in good faith, and in cash to the directors named in said articles of association, nor until there is indorsed thereon or annexed thereto an affidavit made by at least three of the directors named in said articles that the amount of stock required by this section has been in good faith subscribed, and ten per centum paid in cash thereon, as aforesaid, and that it is intended in good faith to construct or to maintain and operate the road mentioned in such articles of association, which affidavit shall be recorded with the articles of association, as aforesaid.

SEC. 3. A copy of any article of association filed and recorded in pursuance of this act, or of the record thereof with a copy of the affidavit aforesaid indorsed thereon, or annexed thereto, and certified to be a copy by the Secretary of the Commonwealth, or his deputy, shall be evidence of the incorporation of such company, and of the facts therein stated.

SEC. 4. When such articles of association and affidavit are filed and recorded in the office of the Secretary of the Commonwealth, the directors named in said articles of association shall, in case the whole of the capital stock is not before subscribed, keep open books of subscription at their general office, and at such other places as they may deem expedient, to fill up the capital stock of the company, giving such notice as they may deem expedient, and shall continue to receive subscriptions until the whole capital stock is subscribed; at the time of subscribing every subscriber shall pay to the directors ten per centum of the amount subscribed by him in money, and no subscription shall be received or taken without such payment.

SEC. 5. Whenever the foregoing provisions have been complied with, the persons named as corporators in such articles of association are fully authorized to carry into effect the objects named therein, as fully as any corporation heretofore created under any special act of the Legislature, and said corporation thus created shall be entitled to exercise all the rights, powers and privileges, and be subject to all the restrictions and liabilities of the act regulating railroad companies, approved the 19th day of February, 1849, and the several supplements thereto as fully and effectually as if said powers were specially incorporated in said charter; and the company shall commence their proposed railroad, if not more than fifty miles in length, with at least one track, within two years from their organization, as aforesaid, and prosecute the same work with due diligence, and complete and open the same within five years, and shall have an additional six months to complete their road for each twenty-five miles more than the fifty miles aforesaid; *Provided*, that the road shall be opened for use, in all cases, when fifty miles in length in track are laid.

SEC. 6. Whenever any railroad company created or incorporated under the provisions of this act, shall, in the opinion of the directors thereof, require an increased amount of capital stock in order to complete and equip their road, and carry out the full intent and meaning of their charter, they shall, if authorized by a majority of the stockholders, at a meeting called for that purpose, file with the Secretary of the Commonwealth a certificate setting forth the amount of such desired increase, and thereafter such company shall be entitled to have such increased capital as is fixed by said certificate. *Provided*, That the original amount of stock and increased capital shall in no case exceed the sum of sixty thousand dollars per mile.

SEC. 7. That the number of *managers* of any company incorporated in pursuance of this act shall be a president and not less than six nor more than twelve directors, as shall be fixed by the corporators thereof, at their first meeting to choose directors of said company, a majority of whom shall be citizens of this Commonwealth.

SEC. 8. The president and directors of any railroad company created under this act shall have power to borrow money not exceeding the amount of capital stock subscribed, and issue the bonds of the company therefor, in such amounts as shall not exceed double the amount actually paid up of the capital stock subscribed, the proceeds whereof shall be actually expended in the construction and equipment of their road, these bonds to be payable at such time not exceeding fifty years after the date thereof, and at such place and at such rate of interest not exceeding 7 per centum as said directors may deem best, and may secure the payment of said bonds and interest by a mortgage on the said road and franchises.

SEC. 9. Any company incorporated under this act shall have authority to construct such branches from its main line as it may deem necessary to increase its business and accommodate the trade and travel of the public.

SEC. 10. Companies formed under the provisions of this act, or chartered under the laws of this Commonwealth, shall have the right to construct their roads so as to cross, at grade, the track, or tracks, of any other railroad in this Commonwealth. *Provided, however*, That the cost of making and keeping such crossing in repair shall be borne by the company whose road crosses the track, or tracks, of any other; *And provided further*, That the company whose road crosses the track, or tracks, of another shall keep at such crossing as many persons as may be requisite, to give the necessary signals to prevent accidents.

SEC. 11. That companies whose roads shall be constructed under the provisions of this act shall have the right to connect their roads with roads of a similar character within this Commonwealth, or at the line thereof, upon such terms as may be agreed upon by those who have the management of said roads; and in case of failure of an agreement on the part of those having the man-

agement of said roads, then and in that case either of said parties may apply to the Court of Common Pleas within the jurisdiction in which said connection is proposed to be made, whose duty it shall be to appoint a jury of three men, who shall determine and fix said terms, which, when approved by said Court, shall be conclusive.

SEC. 12. This act shall not be so construed as to authorize the formation of street passenger railway companies to construct passenger railways under, or by virtue of its provisions, in any city of this Commonwealth, nor to authorize any corporation formed under this act to enter upon, and occupy any street, lane or alley in any incorporated city in this Commonwealth, without the consent of such city being first obtained.

SEC. 13. All acts or parts of acts inconsistent herewith, are hereby repealed, so far as they may affect any corporation that may be organized under this act; and the Legislature hereby reserves the right to alter, amend or repeal this act at any time, in such manner, however, as to do no injustice to the corporators.

Approved the 4th day of April, 1868.

JOHN W. GEARY.

Cleveland, Columbus and Cincinnati R. R.

The earnings of this road for the years ending December 31, 1866 and 1867, were as follows:

	1866.	1867.

	$157,777 37	$120,497 11
Net earnings	$521,905 64	$554,507 09
Dividends, 8 per cent.	479,748 00	479,816 00
Balance	$42,157 64	$74,691 09
Add balance from previous year	39,200 10	81,357 74
Surplus as in General Balance Sheet	$81,357 74	$156,048 83

Compared with the previous year there has been a decrease in gross earnings and receipts, of $30,261 41; with a decrease in operating expenses of $25,582 60. The entire expenditure shows a decrease of $62,862 86, and the net earnings an increase of $32,601 45. Upon the gross earnings, the operating expense was 64.5 per cent., and the total expenditure 70.8 per cent.—being a reduction of 3.8 per cent. from the previous year. There has been a decrease in passenger earnings of $103,192 34; and an increase in earnings from freight and other sources of $72,930 93. In the freight and transportation service there is a decrease in the expenses for the year of $17,400 22, and in other operating expenses a decrease of $8,182 38. The increase in the total quantity of freight transported was 52,902 tons; and in the quantity of freight transported one mile, 6,128,767 tons. The decrease in the number of passengers carried was 64,225; and in the number carried one mile, 3,865,795.

The repairs and maintenance of the track has been fully kept up during the year, and it is safe to say that at no time in the history of the road has the permanent way been in better condition than at the close of the year. There was expended in addition to labor, &c., during the year, for materials, as follows:

51,018 cross ties	$25,729 75
3,511 $\frac{97}{100}$ tons re-rolled rails	139,843 65
6,611 repaired rails	5,627 54
9,190 joint chairs	4,204 58
219,658 lbs. iron joint splices	10,699 00
86,900 lbs. bolts and nuts	6,999 00
114,260 lbs. R. R. spikes	6,407 21
Frogs and switches	5,383 49

834 perches of masonry were put in cattle guards and culverts on the main line, at a cost of $9,761 97, and 150 perches for bridge foundations on the branch, costing $750. The side track extensions were 9,534 feet. About 17 miles of track were thoroughly ballasted with gravel, and stone ballast was distributed and put under about 8½ miles.

The number of engines in service at the close of the year was 47. Three new freight engines were purchased, and five rebuilt during the year in addition to general repairs. The renewals of tires were extensive, mostly of Steel, which have thus far proved of superior durability. The mileage service was as follows: passenger, 342,478; freight, 501,069; fuel, 31,002; track repairs, etc., 49,214; switching, 199,987—total, 1,123,750, an increase over the previous year of 68,158. The cost for repairs per mile run was 13.2 cents.

There were added to the rolling stock during the year 2 new first class coaches, 1 new baggage car, 21 stock cars, 52 platform cars, and a sleeping car for the wood train service; 8 house, 21 stock and 12 platform cars were broken up. The company now have 22 first class and 4 second class passenger coaches, 6 baggage, 4 mail, 109 stock, 460 house, 202 platform and 9 caboose cars.

The number of passengers carried, (including 3,008 soldiers and 1,396 excursionists,) was 334,336, of which 285,221 were way, and 49,115 through. Number of passengers carried one mile, 18,477,257. Average rate received per mile, 2.841 cents. Tons of freight transported, 570,101. Tons carried one mile, 51,281,857. Average rate per ton per mile, 2.158 cents.

During the year, $25,000 of the bonded debt has been paid, leaving $425,000 yet due, which matures at the rate of $25,000 per year until the whole sum is paid.

The assets and liabilities of the company, as appears on its books, are as follows:

ASSETS.	
Cost of roads and depots	$4,047,509 37
Cost of equipment	843,350 00
Bellefontaine Railway Co. stock	1,131,750 00

Directors.—David Dows, New York City; Erastus S. Prosser, Buffalo, N. Y., Amasa Stone, Jr., Stillman Witt, Martin B. Scott, Sam'l Williamson, Joseph Perkins, Solomon D. McMillan, Leander M. Hubby, Cleveland, Ohio; Hosea Williams, Delaware, Ohio; John Miller, Columbus, Ohio.

Vice President.—S. WITT.

Superintendent.—E. S. FLINT.

Secretary & Treasurer.—GEO. H. RUSSELL.

Little Schuylkill Railroad.

This company has disposed of its coal lands for about the amount of its debt, and as those funds added nothing to the company's revenues, the net profits of the concern will necessarily go to the shareholders in the shape of dividends.

The following figures, from a reliable source will show the receipts and expenses of the company:

Receipts:		
Average from Reading Railroad		$220,000 00
Interest on stock held by the Co.		9,494 00
Interest on East Mahanoy stock held by company		2,895 60
		$232,389 60
Expenses:		
Capital stock, $2,646,100, at 6 per cent	$158,766 00	
Taxes on same	16,712 21	
Interest on East Mahanoy R. R. stock	25,000 00	
Interest on $67,500 bonds, 7 per cent.	4,725 00	
Contingent expenses and office	3,000 00	
		208 203 21
Balance		$24,186 39

The average receipts from the Reading Railroad Company for the last four years have been $227,500.

☞ An election will be held in Frederick City, Md., on the 4th inst., to take the sense of the voters of that municipality in reference to the proposition to subscribe to the capital stock of the Frederick and Pennsylvania Line Railroad.

☞ L. CARPER, Esq., of Burlington, Ills., has been appointed Superintendent of the Chicago, Burlington and Quincy Railroad, and will enter upon his duties the 15th of May.

☞ Books of subscription to the capital stock of the Paterson and Passaic Horse Railroad were opened in Paterson on the 28th ult.

American Railroad Journal.

Saturday, May 2, 1868.

Stock Exchange and Money Market.

Money has been decidedly easier in price, this week, under much more liberal offerings both from bank and on private account, closing with call loans at 6@7, and prime discounts at 7@7½ per cent. per annum. The demand for accommodation has not been very urgent. It has been mainly speculative, and for use at the Stock and Gold Boards. The mercantile inquiry has increased, but is yet up to no more than a moderately fair average for the season. The produce houses are asking for more aid, in view of the opening of inland navigation, and the consequent revival in the produce business. The dry goods and grocery firms are also making more numerous applications. The flow of currency from the interior, however, in favor of this centre is more decided; and the banks are augmenting their cash reserve. Last week, they added $3,033,097 to their available hoard of legal tender notes, which was a very encouraging gain, in this important item. The bank deposits, however, fell off about a million and a half; and the specie average showed a decrease of over 1¾ millions. The loans were reduced 1½ millions. A small increase was noted in the item of circulation. The U. S. Sub-Treasury balance was enlarged a little over 2 millions during the week, or from $104,754,879 on the 18th, to $106,848,823 on the 25th of April. A further addition to the cash reserve of the office on Monday and Tuesday of the current week. The Sub-Treasurer has been selling Gold, and buying in Seven-thirties in a moderate way. His orders on Wednesday, from Secretary McCulloch, were to commence immediately the disbursement of coin, on account of the May interest on the Five-twenties. Much of the apparent increase in the cash balance of the office, within the past ten days, is ascribed to the retirement of Seven-thirties, the recent accumulations of which have not yet been sent forward to Washington, and credited to local agency. About the 1st of May, the balance will doubtless be cut down very notably, by the impending interest payments, as well as by the marking off the books of the office, of the retired Seven-Thirties and Compound Interest Notes.

The specie reserve of the city banks is now $14,934,547, against $7,404,304 same time last year. The city bank deposits are now $180,307,489, against $187,674,341 week ending April 27, 1867. The legal tender reserve amounts to $53,886,757, against $67,920,351 same time last year. The circulation now stands at $34,227,624, against $33,601,285 same time last year. The loans are now $253,314,617, against $247,737,381 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $100,464,000 a day, against a daily average of $103,952,822 the preceding week, and $82,062,000 the week ending with April 11, 1868. The current week's exchanges average about $101,644,349 a day. The city banks, last week, gained $3,033,097 of legal tender, while they lost $1,525,034 in the deposit line, and $1,842,095 of their specie reserve. They reduced their loans, $2,503,369; and increased their their circulation, $9,043.

The New York Gold Exchange Bank reports for the week ending Saturday, the 25th day of April, 1868, the average amount of loans and discounts as $1,507,412; average amount of specie, $1,948,157; average amount of deposits, $1,645,883.

The Philadelphia Bank movement the past week shows a decrease in loans of $177,157; a decrease of $17,530 in specie; an increase in legal tenders of $457,819; an increase of $816,338 in deposits; and a decrease of $167 in circulation. The Bank Clearings show an increase of $417,004, and the balances, a decrease of $659,363.

National Bank notes to the amount of $120,930 were issued last week, making the total issue to 1,673 banks thus far, $307,418,231, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $7,645,631, leaving, with the existing 1,639 banks, (having an aggregate capital

of $419,845,790,) an actual circulation at this date of $299,767,600. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,913,400; and for the public deposits, $38,277,950—making a total of $380,191,350. The Treasury Department last week redeemed and destroyed $539,400 of worn and mutilated fractional currency, and issued $944,088 of new. The outstanding amount of fractional currency on the 1st inst. was $32,588,690, against $32,307,947 on the 1st of March, and $32,246,439 on the 1st of Feb. 1868.

The U. S. Sub-Treasury receipts, week ending with April 25, were $10,595,993, including $2,256,729 from customs duties; payments, $8,502,050, including $46,000 of coin interest; balance at the close of the week, $106,848,823, against $104,754,879, at the close of the preceding week, showing an increase of $2,093,944. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $3,789,905 including $460,038 from customs; and payments, $2,368,896; on Tuesday, receipts, $3,381,541 including $382,825 from customs, and payments, $3,467,134. The balance at the close of business on Tuesday stood at $108,184,237, against $104,888,081 a week previous; and $102,569,236 on April 14, 1868.

Government revenues have been on a moderate scale, since our last, from all sources of National income. The excises, last week, yielded about four millions, against three millions the preceding week; customs at the port of New York, $2,256,729 and at the outports, about $750,000 (in coin) more, making the grand total income for the week equal to about $7,210,000 in currency. The total receipts of the National Treasury, from excises, thus far in the new fiscal year, which began on the 1st of July, have been about $159,000,000. The excises are yielding more satisfactorily as the spring advances.

Government received from customs, through the port of San Francisco, from Jan. 1, to April 1, 1868, $2,128,862, against $1,815,411 same time last year.

Gold has been more confidently dealt in, since our last, at a higher range of prices. The speculative and export demand has been more active, while there has also been a fair customs call. Government which was out of the market, as a seller, early in the week, has been disposing of amounts about equal to its daily customs income, since the opening of the current week, thereby influencing the premium rather adversely for the speculative element of the Gold Exchange. The range of the price, during the week under review, was from 138⅝@140⅜, and the latest quotations on Wednesday were 139@139⅛. The shipments on Tuesday and Wednesday of the current week, reached $412,000. The *Henry Chauncey* arrived here on Tuesday, with a treasure freight of $466,909 from California.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $2,782,351, against $674,748 same time last year. The customs demand for Gold last week, averaged $376,121 a day; thus far, this week, it has been equal to $421,603 a day, or equal to a weekly aggregate of 2,529,618. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $43,937, and from California, $466,909. The total customs revenue of the Government, in coin, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $93,751,202, against $104,178,132 same time in the preceding fiscal year. The total receipts of California gold at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $28,539,228, against $34,461,567 same time in the preceding fiscal year, showing a decrease of $5,922,339 in 1867–'68. The exports of specie from this port, last week, were $1,867,291, against $710,397 same week last year. The exports of specie, hence, since July 1, 1867, have been $47,945,476, against $25,694,917 same time in 1866–'7. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $46,000, and since July 1, 1867, $54,618,162, against $36,657,764 same time in 1866–'7. The specie exports from San Francisco, from Jan. 1, to April, 1868, were $10,540,413, against $9,839,647 same time last year.

There has been a more liberal supply of foreign exchange available, since our last, and as the demand has been comparatively moderate, prices of sterling have declined a fraction, closing steadily, though without activity at our quotations. Bankers' prime sixty day bills on London closed on Wednesday at 109¾@110, and on Paris to 5.16¼c.@5.12½; sight bills on London to 110¼@110½, and on Paris to 5.11¼c.@5.10. The offering of produce bills have been quite liberal again this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,170,473, against $3,314,702 same week last year; total, since July 1, 1867, $149,632,790, against $162,413,040 same time in 1866–'67.

A further improvement has been noted in the public funds, the offerings of which have been quite moderate, since our last, while the demand has been growing steadily, chiefly from buyers, both home and foreign, for investment purposes. The exportable bonds have been attracting more attention from the foreign houses. The home inquiry has been mainly for the later issues of the Five-Twenty six per cent. coin bearing bonds, especially the issue of 1867, which of all the 5-20s have the longest time to run, before the privilege of the Government to redeem them shall have matured, and which are therefore regarded by home purchasers as all the more desirable for permanent investment. A new Five-twenty Bond is in course of preparation, dated July 1, 1868, intended for the conversion of the outstanding balance of Seven-thirty Notes. The bond, however, is not likely to be offered for exchange before the maturity of the notes.

U. S. sixes of 1881 closed here on Wednesday at 113@113¼; U. S. Five-twenties of 1862, 112@112¼; U. S. Five-twenties of 1864 at 110½@110⅝; U. S. Five-twenties of 1865 at 110¾@110⅞; U. S. Five-twenties of 1865, consolidated, 108¾@108⅞; U. S. Five-twenties of 1867, 109⅛@109¼; U. S. Ten-forties at 102⅝@103¾, and U. S. Seven-thirties at 107⅜@107½. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865 ..... 118¾	September, 1865.. 117¼
August, 1865.... 117¾	October, 1865.... 117
U. S. three per cent. certificates 100¼	

Government paid off $474,550 of the matured loan of 1847–'67, in March.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 15.	April 22.	April 29.
Consols	93½	93⅝	94
U. S. 5-20's of 1862....	73	*70¼	70¼
Erie	46½	46¼	46⅛
Ill. Central.....	94	93⅛	95

* Ex May coupon.

Railway and miscellaneous stocks have been in moderately active demand, all the week, chiefly on speculative account, at advanced, though variable prices, Wednesday's dealings indicated some hesitancy in the speculative movement, the market closed tamely, without any decided tendency either way.

The movements in produce have been rather extensive, since our last. Prices of Breadstuffs have declined. Provisions close more firmly. Cotton leaves off spiritlessly the demand having diminished. Middling upland cotton closed quite dull and heavy on Wednesday at 32@32½ cents, per lb. The stock of cotton now here is estimated at about 85,000 bales. The receipts at the port this week, have averaged about 900 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,055,000 bales, against 1,658,000 bales same time last year; exports, same time 1,465,000 bales, against 1,181,000 bales same time last year; stock on hand at latest dates, 250,000 bales, against 420,000 bales same date last year. At the Live Stock markets this week, Beeves have been in better supply and less demand at the reduced figures of from 14@19c. per lb.; week's receipts, 5,993. Veal calves in fair request, but at easier prices, ranging from 6@12c. per lb.; receipts, 2,558. Sheep and lambs in good demand, and generally steady at from 6@9c. per lb.; receipts, 15,975. Swine active, at from 9@10½c. per lb., all live weight; receipts, 19,140. At the month sale of Scranton Coal on Wednesday, 75,000 tons were disposed of at rather easier prices, ranging from 3.70 to 4.72½ per ton of 2,240 lbs., deliverable at Elizabethport, N. J. The dealings in general merchandise have been fair in amount; and prices of desirable articles have been quoted firm and buoyant, as a rule. The total imports of foreign dry goods, last week, were $1,137,196, and the total amount marketed $1,467,432. The value of foreign merchandise imported last week, was $4,419,368—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $5,556,564, against $6,540,820, same week last year; total since July 1, 1867, $195,660,021, against $225,895,349 same time in 1866–'67. The ocean freight market has been less active and rather depressed, since our last. It closed more firmly, though without any quotable improvement. For Liverpool we quote flour at 1s. 9d.@2s. by sail, and 2s. 8d.@2s. 6d. by steamer, per bbl.; grain at 4d.@5d. by sail, and 6d.@6½d. by steamer, per bushel; cotton at $\frac{1}{16}$@$\frac{3}{16}$ by sail, and $\frac{1}{8}$@$\frac{3}{16}$ by steamer, per lb.; and heavy goods at 15s.@35s. by sail, and 25s.@40s. by steamer, per ton. Total number of vessels in port on Wednesday 519.

The New York exports, exclusive of specie, for

the week ending April 28, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$3,314,702	$4,170,478
Prev. reported.....	64,406,701	54,319,432
Since January 1.....	$67,721,403	$58,489,905

The imports for the week ending April 28th, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,336,866	$1,137,196
Gen. merchandise.....	5,203,954	4,419,368
Total for the week.....	$6,540,820	$5,556,564
Previously reported....	79,443,918	70,511,118
Since January 1.....	$85,984,738	$76,067,682

The balance in the Sub-Treasury on Wednesday was $109,295,086 45.

Lubricating Oils.

We are pleased to note the success achieved by the American National Lubricating Oils in this country. These oils fill the desideratum long sought by railroad men. An article uniform and reliable in addition to saving in cost over the old standard Lubricators of fully 50 per cent. in accomplishing the same results.

The *Crude* Lubricating Oils of West Virginia have been long known to possess valuable qualities, but owing to grit and other impurities, could not be used on better classes of machinery. Mr. St. John the Agent of the Volcanic Oil and Coal Co., invented and patented a filter which completely removes, by strictly mechanical process all objectionable features of the crude oil, leaving the oil perfectly pure, and without doubt the best lubricator in market. So largely has the demand for the oils increased of late, that Mr. St. John the General Agent has opened a branch house at No. 13 South Water street, Chicago, to meet more readily the demand for his Western customers. Its endorsement and adoption by the principal Western roads, lake steamers and machinists generally, is the best proof of its excellence.

☞ We invite attention to the Advertisemen of the Lawrence Cement Co., in another column. The Hoffman Rosendale Cement is the standard Cement used at the Brooklyn Navy Yard, and is made and sold by this company at 68 William st., N. Y. Address M. W. Woodward, Esq., Secretary.

☞ The Governor has approved the bill authorizing the construction of the Hudson River Highland Suspension Bridge. The proposed bridge is to be located at or near Fort Montgomery in the Highlands, and is on the line of the Erie and New England Railroad, to be constructed from Turner's on the Erie Railway, to Derby in the state of Connecticut.

Railroad Earnings.--Weekly.

The earnings of the Michigan Central Railroad for the 3d week in April, 1868, were... $92,633 21
Corresponding week of previous year.. 77,060 47

Increase..... $15,572 74

The earnings of the Chicago and Northwestern Railroad for the 3d week in April, 1868. $281,860 44
Corresponding week previous year .. 164,737 88

Increase $67,122 56

The earnings of the Marietta and Cincinnati Railroad the 3d week in April, 1868... $25,983 00
Corresponding week previous year.... 20,644 00

Increase $5,339 00

The earnings of the Chicago and Rock Island Railroad for the third week in April, 1868, were..... $78,400 00
Corresponding week of previous year.. 78,370 00

Increase $30 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week in April, 1868, were..... $97,809 00
Corresponding week of 1867..... 97,583 00

Increase $226 00

The earnings of the Western Union Railroad for the week ending April 21, 1868.... $10,697 46
Corresponding week previous year..... 9,817 53

Increase..... $879 93

The earnings of the Chicago and Alton Railroad for the 3d week in April, 1868.. $70,611 42
Corresponding period previous year .. 75,624 03

Decrease $5,012 61

The earnings of the Detroit and Milwaukee Railroad for the third week in April 1868, were $35,757 88
Corresponding week of 1867..... 39,165 63

Decrease $3,407 75

The earnings of the Toledo, Wabash and Western Railroad for the third week of April, 1868, were..... $68,421 35
Same week in 1867..... 72,414 03

Decrease $3,992 68

The earnings of the Atlantic and Great Western Railway for the third week in April, 1868, were..... $112,216 00
Corresponding week previous year... 117,467 00

Decrease $5,251 00

☞ The Pittsburg *Chronicle* says the Indianapolis and Crawfordsville Railroad has been mortgaged to the Pennsylvania Railroad Company for a million and a half dollars, with which the construction of the line is to be pushed rapidly forward. The contractors advertise for 500 more laborers, and hope to complete the road this season.

☞ Over forty thousand dollars have been subscribed by the citizens of Wanesboro', Pa., for the building of a branch railroad from some point on the Cumberland Valley Railroad to that place.

☞ Work upon the European and North Railroad is being rapidly pushed forward. It is expected that the road will be completed as far as Lincoln this season.

☞ The proposed railroad from Saugatuck to Brookfield is being surveyed, and the engineers are as far as Weston.

☞ The first train of cars over the Hanover Branch ran as far as East Abington last week.

Journal of Railroad Law.

TRESPASS—INJURY TO ANIMALS BY RAILROADS—MUTUAL NEGLIGENCE—EXCEPTION TO GENERAL RULE.

The following able opinion was delivered in the case of the Indianapolis and Cincinnati Railroad Co. *vs.* McClure, (26 Ind., 370):

GREGORY, C. J.—McClure sued the railroad company before a justice for killing stock.

The 1st paragraph of the complaint charges the killing of a heifer by the locomotive and train at a point where the track was not securely fenced.

The 2nd paragraph charges that the defendant, by its locomotive and train of cars, on the road, at the &c., &c., ran over and killed the plaintiff's cow, of the value of $50, that the cow was killed in the city of Greensburg, at a place where a street crosses the railroad, that by the negligence and carelessness of the defendant, the crossing at the street was so bad and out of repair, that the cow could not readily get over the same, and in consequence thereof was caught by the locomotive, thrown off and killed; that at the time, the locomotive and train were carelessly and negligently run by the servants of the defendant, at a high rate of speed, so as thereby to endanger the lives and property of the citizens of the city of Greensburg, and in consequence thereof, and because of the bad crossing aforesaid, the cow was killed.

The 3d paragraph charges that the defendant, by its locomotive and train of cars, on the road where it passes through Decatur County, about 2 miles east of Greensburg, carelessly and negligently ran over a "heifer belonging to the plaintiff, of the value of $40, and then and there so injured and crippled the heifer as that she became and was of no value and died."

Separate demurrers were filed to each of these paragraphs. The demurrers were overruled by the court below, and this is assigned for error. Trial by jury, verdict for the plaintiff, motion for a new trial overruled. The evidence is in the record.

The cow and heifer, at the time they were killed, were running at large. The crossing where the cow was killed was somewhat out of repair, and the train was running at the rate of from ten to fifteen miles an hour. The engineer sounded the whistle at the distance of 100 yards or more, and checked up the train. Brunetta Bankley heard the sound of the whistle, and went to the door to look after her cow; she saw McClure's cow and 2 others come up the Michigan road to the crossing, the other two passed over, and McClure's cow ran up the track, west; the whistle was sounding at the old grave-yard; she and her son tried to scare the cow off the track, but could not succeed. The heifer was killed at the lane crossing at Parker's school house, about 2 miles east of Greensburg. There are cattle guards at the crossing, but it does not appear that this lane is a public highway. The appellant claims that it is, in argument, but the appellee denies it. McClure resided in Greensburg at the time the cow and heifer were killed.

The Railroad Company were under no obligation to fence where the cow was killed. The common law imposes on the owner of domestic animals the duty of keeping them on his own land, or within inclosures, and he becomes a wrong doer, if any of them escape or stray off upon the lands of another person, and this, as a general rule, is the law in this State. The Lafayette and Indianapolis Railroad Company *vs.* Shriner 6 Ind. 141.

The appellant is not liable for killing the cow, unless she was killed by the gross negligence or willful misconduct of the company's agents.

Was running at the rate of from 10 to 15 miles an hour through the streets of a city, of itself, such gross negligence as will render the defendant liable?

Waite *vs.* The Eastern Railway Co. 96 Eng. Com. Law 719, was a suit by a child 5 years of age, for injuries sustained. The grandmother, with this child, procured tickets at a railroad station for the defendant's road. The platform from which the cars were entered, was on the opposite side of the track from the ticket office. While the grandmother, with the child, was crossing the track to go to the platform, a goods train, with a tender before the engine, passed the station at its usual rate, about 20 miles an hour, struck the grandmother and child, killed the grandmother and injured the child. In answer to the question put to them, the jury "found that the defendant was guilty of negligence, which contributed to the accident." Verdict for the plaintiff. The court set aside the verdict, because as was said by Lord Campbell, C. J. "Notwithstanding the negligence of the defendant, if she, the grandmother, had acted on this occasion with ordinary caution and prudence, neither she herself or the infant, would have suffered. Under such circumstances, had she survived, she could not have maintained any action against the company, and we think that the infant is so identified with her that the action in his name cannot be maintained."

In Woolf *vs.* Beard, 34 Eng. Com. Law 787, suit was brought for an injury occuring in High street, Aldgate, London, Coleridge, J., in summing up, said "The cabriolet, it is said, was coming at the rate of 9 or 10 miles an hour, which was a most improper pace at such an hour and in such a place. Even a much less pace would be too fast at that time of the evening, in such a place as High street, Aldgate. If the plaintiff took reasonable and proper care, and it was on account of the extraordinary speed of the cabriolet, that she could not save herself, and she thus met with the accident, she is entitled to your verdict; but if she by her own negligence, and want of care, contributed to the accident, she cannot recover in this action, even though you should think the driver of the cabriolet was driving too fast and was therefore guilty of negligence as well as the plaintiff."

In Hawkins *vs.* Cooper 34 Eng. Com. Law, 842, the plaintiff was crossing Westminister road near Marsh Gate, London, when a cart and horse, driven by the defendant's servant, ran against her. The horse was going at the rate of about 12 miles an hour. Tindal, C. J. told the Jury: You will take the case into your consideration and determine for yourselves, whether the injury was attributable to negligence, carelessness, and improper mode of driving of the defendant's servant. If you think it was attributable to that and to that alone, you will find your verdict for the plaintiff, and give such damage as you think proper under the circumstances. But if you think it was occasioned in any degree by the improper conduct of

the plaintiff herself, in crossing in so incautious and improper a manner, in such case the defendant will be entitled to your verdict."

The exception to the rule that a plaintiff cannot recover, if his own negligence contributed to the injury, seems to be correctly stated by Redfield as follows: "If the wrong on the part of the defendant is so wanton and gross as to imply a willingness to inflict the injury, the plaintiff may recover, notwithstanding his own ordinary neglect. And this is always to be attributed to the defendant, if he might have avoided injuring the plaintiff, notwithstanding his own negligence."

In the case in judgment, the train was passing about 5 o'clock in the afternoon, through a part of the city of Greensburg, not shown to be crowded; indeed it does not appear that there was any one about but Mrs. Bankley and her son, who were trying to drive the cow from the track. The train was checked, as soon as the cow showed a determination to disregard the alarm whistle. Under such circumstances we think that although the rate of speed at which the train was running constituted carelessness, yet it was not so gross, in view of the authorities, as would bring the case at bar within the exception to the general rule.

A lane is not necessarily a public highway. If the heifer was on the crossing of a public highway when she was killed, there is nothing in the record to charge the appellant with her loss; but if the railroad track could be fenced at the place at which she was killed, then there is a liability.

The judgment is reversed with costs, and the cause remanded with directions to sustain the demurrers to the 2d and 3d paragraphs of the complaint and for further proceedings.

☞ The Middlesex Horse Railroad Company have recently placed on their line six new cars of beautiful design and pattern, from the manufactory of STEVENSON & Co., New York. They are painted red and white, are light in construction, and exceedingly roomy. The wheels and gearing are all of a new and improved pattern, differing greatly from any other on the road. The inside arrangements are very tasty. The cushions are of silk plush, with trimmings to correspond. The ventilation which is excellent, is from side jets at the top of the car. These cars are a great addition to the stock of the road.

☞ The Brooklyn Board of Aldermen have adopted a resolution authorizing the South Side Railroad Company of Long Island to operate all their cars by horse power on single tracks through Bushwick avenue, from and across Johnson street to Boerum street, and through Boerum street and Broadway (already granted to said company), instead of Montrose avenue from Bushwick avenue to Union avenue.

☞ The directors of the Knox and Lincoln Railroad Company have cosen Otis Kimball, esq., treasurer. An assessment upon the stock was voted, and the engineer instructed to locate the road at once.

☞ Henry county, Va., has voted a subscription of 500 shares to the stock of the Chesapeake and Ohio Railroad.

☞ Active preparations are now being made for the rebuilding of the bridge between Wrightsville and Columbia, Pa.

Hazleton, and Lehigh Luzerne R. R., Co's.

The Philadelphia *Ledger* says that the merger of these companies into the Lehigh Valley Railroad Company will be effected by the issue of the stock of the latter company to an amount slightly exceeding the combined capital stock of the two former companies and by the purchase (also for stock, at par,) of the equipment and shops, including eighteen locomotives, and nearly two thousand coal cars, belonging to the lessees of the Hazleton Company. The whole transaction will amount to a little over $3,300,000 of Lehigh Valley stock, which will take the place of other stock now outstanding, and probably be held to a great extent by the same parties. An increased business having been thus secured without any new expenditure, the efficiency of working, and general strength of the consolidated line will be greatly promoted by the arrangement, which includes, of course, the coal lands and all other property of the Hazleton Company. The bonds of that company amounting to $150,000, will be assumed by the Lehigh Valley Railroad. The exact figures are:

Stock of the Hazleton Railroad Co....	$1,850 000
Bonds of " "	150,000
Stock of Lehigh Luzerne Railroad	750,000
To the present lesses of the road for the rolling stock, etc.....	750,000
Making a total of.....	$3,350,000

For this amount the Lehigh Valley acquires sixty-five miles of track, with the requisite appurtenances above stated, and an estimated annual coal tonnage of 1,250,000 tons.

Charters Valley Railroad.

A meeting of persons interested in the completion of this road was held at Cannonsburgh, Pa., on the 18th ult., and a committee appointed to visit Philadelphia and ascertain if possible what the owners of the road require in the way of assistance from those living upon the line of the road, the committee to report to another meeting at their earliest convenience. It is believed by many that there is a prospect of the early completion of the road.

☞ The transfer of passengers at Benwood, between the Baltimore and Ohio and the Central Ohio Railroads is now effected by means of a barge. The barge which carries the cars connects with the track by means of an inclined plane made in hinged sections, which can easily be lengthened or shortened to suit any stage of water. The transfer is made quickly, safely and pleasantly—the quickest trip having been made in twenty-three minutes from the time the cars were cut loose on one side and coupled on the other.

☞ The Emperor of Russia has given orders for commencing the works of the railway from Moscow to Smolensko.

☞ The Dexter and Newport Railroad will be opened for travel on the 4th of July.

ESTABLISHED IN 1836.
GEO. G. LOBDELL, Pres't. WM. W. LOBDELL, Sec.
P. N. BRENNAN, Treas.
THE LOBDELL
Car Wheel, Tire & Machine Co.
Wilmington, Del.

THE
UNION PACIFIC
RAILROAD COMPANY
OFFER A LIMITED AMOUNT OF THEIR
First Mortgage Bonds
AT PAR,
PRINCIPAL AND INTEREST
PAYABLE IN GOLD.

The Great Pacific Railroad Line, extending 1721 miles from Omaha, on the Missouri River, to the tide waters of the Pacific Ocean, is being built by two powerful Companies—THE UNION PACIFIC, beginning at Omaha, building West, and the Central Pacific of California, beginning at Sacramento, building East, until the two roads shall meet.

Both Companies have prosecuted the work with great vigor, the Union Pacific having already expended over
THIRTY MILLION DOLLARS,
and the Central over *Twenty Millions*, upon their respective parts of the undertaking. THE UNION PACIFIC HAVE COMPLETED 550 MILES—have iron and other materials for two hundred miles more upon the ground, and one hundred additional miles are ready for the track. They will have a much larger force employed this year than ever before, and it is expected that between
800 and 900 MILES
will be in operation during 1868. There seems to be no reasonable doubt that the distance between Omaha and Sacramento will be traversed by rail in 1870.

The GOVERNMENT GRANTS 12,800 acres of land, and its Bonds to the average amount of $28,000 per mile to aid in the construction of the line, and authorizes the issue of the First Mortgage Bonds now offered for sale, to the same amount and no more. The Government takes a *second* lien, and gives to the First Mortgage Bondholders a prior lien for their security, to which a large paid-up capital is added. The Bonds cannot be issued except as each section of twenty miles is accepted by Government commission, so that they always represent a real property.

It is universally admitted that on the completion of the Union Pacific Railroad, its through business will make it one of the most profitable in the world—but its way or *local* business is already several times the interest on its bonds; so that, if not another mile were built, they would be a secure investment.

THE NET EARNINGS for eight months of last year on an average of 386 miles are officially reported at $1,069,136, while the interest on all the bonds it could issue on that length of road for that time, reduced to currency, was only $345,856.

The Union Pacific Bonds are for $1,000 each, and have coupons attached. They have thirty years to run, and bear annual interest, payable on the first days of January and July at the Company's Office in the City of New York, at the rate of six per cent. in gold. The Principa is payable in gold at maturity. At the present rate of gold, these bonds pay an annual income on their cost of
NEARLY NINE PER CENT.,
AND IT IS BELIEVED THAT THEY WILL SOON BE AT A PREMIUM.

The Company reserve the right to advance the price of their bonds to a rate above par at any time, and will not fill any orders or receive any subscriptions on which the money has not been actually paid at the Company's Office before the time of such advance.

Subscriptions will be received in New York
At the Company's Office, No. 20 Nassau St.,
AND AT
John J. Cisco & Son, Bankers, No. 59 Wall St.,
And by the Company's advertised agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.

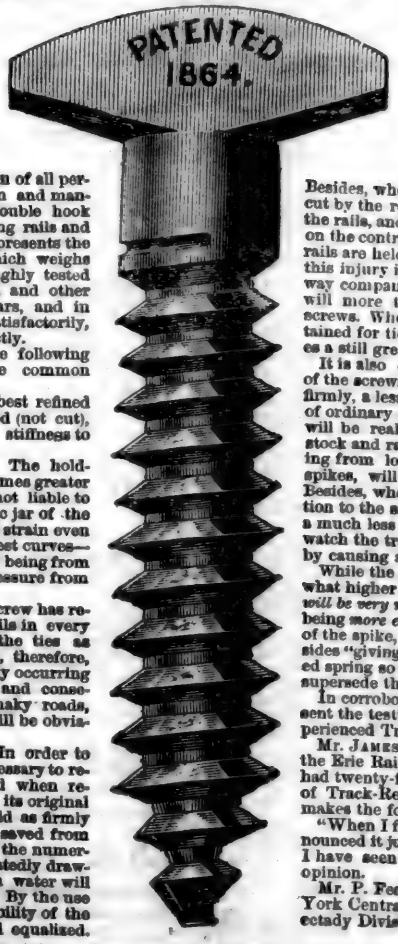
U. S. RAILROAD SCREW SPIKE COMPANY,



NO. 45 CLIFF STREET, NEW YORK,

MANUFACTURERS OF MONTIGNANI'S PATENT

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary.

Works at
OSSINING,
Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

MR. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Feathetly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

MR. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

MR. E. H. DE VERONE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

MR. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

MR. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

MERRICK & SONS,

SOUTHWARK FOUNDRY,

430 WASHINGTON AV.,

PHILADELPHIA,

MANUFACTURE

Steam Engines—High and low pressure, for land, river, and marine service; Horizontal, Beam, and Vertical. Patterns on hand for 8x10, 14x12, 16x12, Oscillating; compact and cheap.

SOLE MANUFACTURERS IN PHILADELPHIA AND CHESTER OF WILLIAM WRIGHT'S PATENT VARIABLE CUT-OFF STEAM-ENGINES.

Boilers—Plain cylinder, flue, and tubular.

Steam-Hammers, of Nasmyth & Davy patterns, with all the recent improvements.

Strahan's Drill Grinding Rest and Twist Drill-Holder.

Castings—Loam, dry, and green sand, brass, &c.

Roofs—Iron frames for covering with slate or iron—neat, durable, and economical.

Gas-Holders of every description. *Builders of Holders for the Philadelphia Gas-Works of 100 and 160 feet diameter.*

Tanks of every form, for sugar estates, refineries, oil, &c.

Gas Machinery of every description, including Retorts, Bench-castings, Holders and Frames, Purifiers, Coke and Charcoal Barrows, Gas-Valves, Governors, Hoisting Machines, &c.

Manufacturers for the American Meter Company of their Patent Dry Center Valve for changing Purifiers.

Bartol's Patent Wrought Iron Retort-lid, durable, light and cheap.

Sugar Machinery, such as Vacuum Pans and Pumps, Defecators, Bone-Black and Bag Filters, Bone-Black Burners, Washers, and Elevators, Hydraulic Elevators, Sugar and Bone-black Cars, Strike Heaters, Open Steam Trains, &c.

Sole Assignees and Manufacturers in the United States of

Weston's Patent Self-centering Self-balancing Centrifugal Sugar-Draining Machine.

Glass & Bartol's improvement on Aspinwall & Woolsey's Centrifugal Sugar-Draining Machines.

N. Rillieux's Patent Sugar-Boiling Apparatus, applicable to Beet-Root and Cane Sugar.

Having had twenty years' experience in the manufacture of Sugar Machinery for Cuba, South America, and the United States, they are prepared to contract for the design and erection of apparatus for making Sugar from Beet-Root or Cane, and for Refineries for either Sugar or Molasses.

They are also in possession of plans of the most recent improvements in machinery used in France and Germany in the manufacture of Beet-Root Sugar.

WATCHES.

TIFFANY & CO.,

550 and 552 Broadway,

Solicit attention to their Timing Watches, known as the "TIFFANY & Co., TIMERS."

These watches, for Railroad, Engineering, Racing, Gunnery, and Scientific purposes, are superior to any yet offered, as the arrangement of the stop is such as to note time to the nicety of one-fourth or one-fifth of a second, in such manner as to prevent the possibility of error in the calculation.

The following named gentlemen, having bought "Timers" and found them to be perfectly satisfactory, have kindly allowed Tiffany & Co. to refer to them:

Amasa Sprague,	Joseph McPherson,	August Belmont,
Frank Squire,	Geo. G. Haven,	B. W. Gibbs,
J. C. Griswold,	B. H. Bixby,	O. N. Cutler,
Leon. W. Jerome,	George Osgood,	S. D. Bradford,
Wm. M. Ryadyk,	W. M. Tilden,	J. V. Brokaw,
Wm. F. Sherley,	A. P. Spencer,	C. A. Grymes,
	and others.	

Tiffany & Co., have also a full assortment of watches of all desirable sizes and styles, of the same quality and finish as the first mentioned, in addition to their usual stock of Frodsham's and Jurgensen's.

Particular care and attention given to the repairing and adjusting of fine watches.

TIFFANY & Co., 550 and 552 Broadway. House in Paris, TIFFANY, REED & Co.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the ***MAIN TRACK IS NEVER BROKEN,*** and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns ***The Life and Limb of all Travelers upon Railroads.***

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

WM. WHARTON, Jr., Patentee,

Box No. 2745 Philadelphia, Pa,

Office, No. 28 S. Third street Philada. Factory, Walnut street, above Thirty-first street, Philadelphia.

New York, Saturday, May 9, 1868.

Hte. Petin Gaudet & Cie.

When we see the fears expressed by the English manufacturers at the sudden and astonishing progress made in iron and steel manufactures on the continent of Europe, and particularly in France, we think we may interest our readers by giving a short account of one of the principal works of that country.

We refer to the large works of Messrs. HTE. PETIN GAUDET & CIE. These works are divided among nine different establishments, each having its own specialty and employing in the aggregate a steam power equal to that of 6,000 horses, and a working population of 7,000 men. Messrs. Petin Gaudet & Cie., do not pursue any isolated branch of manufacture, but represent them all, and in each have accomplished the most remarkable results. In the casting of steel they have produced the largest masses, viz: a cannon of 33 tons weight—those of as large dimensions of other manufacturers being composed of several parts. Besides their own country, they have supplied with Steel Cannon and Trunnion Rings, Italy, Spain, England, Denmark, Russia, Turkey and Norway, and the trials to which these cannon have been put plainly demonstrate the perfect confidence which may be placed in the resistive power of the steel.

They are also engaged in the manufacture of Cast Steel Railway Tyres, having supplied over 600,000 to French and Foreign Railways, which fact is of itself sufficient testimony as to the quality of their work.

They are now, in addition to the above and other work, delivering 40,000 gun barrels monthly to the French Government.

They have made for more than 42 vessels, on orders given by the Italian, Spanish, English, Prussian and South American Governments, sheets of steel 90 feet in length, armor plates of 10 inches in thickness, and shafts of 25 tons weight.

In the rolling of iron beams for bridge and building purposes, they have attained results which are considered by the English manufacturers as *toure de force*, having made beams of 125 feet in length and 40 inches in height, and among others cross beams of 20 inches in thickness, which will be called upon to play an important part in the building of piers for bridges and railway viaducts.

They are able to produce all their fabrics of a superior quality, and at less price than other makers, by having under their own control every detail of the manufactures from the first extraction of the ore from their famous mines in Sardinia, to the delivery of the finished work, and at the same time by their system of estabishing at each manufactory, aid-funds to which the company adds an equivalent sum to that contributed by the workmen, gratuitous medical attendance, free practical schools for the children of workmen, small and comfortable houses, and stores from which provisions and clothing are distributed at cost prices, showing that though they may not receive higher wages, yet the workmen of this company are in the best condition and interested in the progress of the works of which they may be considered partners.

Probably no more successful or extensive works can be found in any department of manufacture in the world than those of Hte. Petin Gaudet & Cie.

Central Pacific Railroad.

The attention of capitalists and investors is called to the foundation and merits of the CENTRAL PACIFIC RAILROAD FIRST MORTGAGE BONDS, believed to be among the most perfect and reliable corporate obligations ever offered in this country. It is well known that this part of the National Pacific Railroad Line receives, beside a valuable grant of lands, the United States Subsidy Loan, averaging $35,000 per mile; and that an equal amount of private capital has been invested in the enterprise, over all of which the First Mortgage Bonds have precedence. The most expensive and difficult portion of the Road is now in successful operation, with a large, increasing, and profitable business thereon.

The Bonds, of $1,000 each, bear six per cent. per annum—both principal and interest repayable "IN GOLD COIN"—and are offered, to a limited amount, at par and accrued interest, in currency. At the present time they yield, therefore, nearly nine per cent. upon the outlay.

Documents, showing the Organization, Progress and Business of the Company, furnished on application, by

No. 5 Nassau st., New York.

Kent County (Md.) Railroad.

The Chestertown *Transcript* says that the directors have completed a contract with Messrs. A. F. Sears, Peter Sandford and Rodman Backus, of Newark, New Jersey, for the construction of 32.09 miles of this road, extending from near Massey's Crossroads, *via* Kennedyville, and stations near I. U. Crossroads, Chestertown, Belair and Rees' Corner, to the terminus, on Swan creek, with all the side tracks, a wharf, turn-table, engine-house, water stations, all the depot buildings and platforms, for the sum of $548,000. The work is to be commenced within thirty days, and the sections from Massey's Crossroads to Chestertown, with all the sidings and buildings connected therewith, are to be completed by the first of January next; and the other sections, in like manner, in 1869. Of the whole amount contracted to be paid, the sum of $169,332 is to be paid in cash, $98,640

in Kent county bonds at par, and the balance, $280,038, in the bonds of the company.

Little Miami and Columbus and Xenia Railroads.

The earnings of the Little Miami, Columbus and Xenia and Dayton and Xenia Railroads for the fiscal year ending November 30, 1867, were:

From passengers		$741,886 13
" freight		951,822 97
" mail and express		141,157 41
" rent of track and depots		3,072 61
" mileage of cars		8,470 04
" gross earnings D. & W. R. R.		139,354 79
		$1,985,768 95
Expenses, viz.:		
Repairs of road	$274,663 39	
" bridges	10,542 07	
" depots, etc.	40,754 71	
" locomotives	85,025 93	
" cars	148,542 71	
Passenger expenses	183,080 49	
Freight "	248,127 88	
Fuel	161,844 56	
Oil, waste, etc.	38,773 74	
Rents	6,892 22	
General expenses	60,309 45	
Loss and damage	28,156 23	
		1,281,713 38
Earnings less working expenses		$704,050 57
Interest	$94,579 44	
Taxes	74,412 92	
Working expenses D. & W. road	117,967 53	
Taxes and rent of do	58,231 27	
		345,191 16
Net earnings		$358,859 41
Received from C. & I. C. R. R. Co., on division of earnings		17,923 21
Received from C., C. & C. R. R. Co. on division of earnings		7,407 22
Balance		$384,189 84
Add balance from previous year		510,625 61
Dividends from stocks, etc		4,456 12
Total		$899,271 57
Used by L. M. & C. & X. Co's. for construction		$97,960 80
Dividends June 1867		203,031 58
" Dec. 1867		201,901 00
Undivided surplus Nov. 30, 1867		396,378 19
Total, as above		$899,271 57

The gross earnings, after divisions under contracts with other companies, were $1,871,739 59, against $1,953,356 91 in 1866—a decrease of $81,617 32. The expenses for the year, including taxes, were $1,356,126 30, a decrease as compared with the previous year, of $95,453 04. The net earnings are therefore $13,835 72 more than in 1866. This is exclusive of the earnings and expenses of the Dayton and Western Railroad, which is leased and operated by these companies. It will be observed that the net earnings of that road for the year have not been sufficient to provide in full for the interest on the bonds. The necessity for rebuilding the bridge over the Miami river at Dayton will impose such a burden upon the expenditures of the Dayton and Western Railroad for the ensuing year that no essential improvement on the results of the past year can be expected. The directors in their report say:

The companies expended during the year on real estate, superstructure and bridges, and on new depots and new improvements connected with the depots, $93,770 86, and $83,628 49 upon new engines, cars, and shop machinery; and these additions to the extent of their cost, are an increase to the value of the property owned by the companies.

These expenditures, and some others not directly connected with the current expenses of the companies, rendered it inexpedient for a cash dividend to be made on the 1st of December, and instead, there was declared a dividend of four per cent., payable in the bonds of the Little Miami Railroad Company at par.

The companies owe on bills which mainly fall due before April 1st about $180,000, and it may be found desirable to apply the net earnings of the half of the coming year to the payment of these bills, and make no dividend next June.

In reference to a detailed statement of the expenditures creating this indebtedness, and the means of the companies to meet them without applying net earnings to that purpose, the committee of stockholders usually appointed at the annual meeting to report on the condition of the roads will be charged with the duty of making a full statement of the condition of the finances of the companies, and report concerning the same to the directors and to the stockholders. The bonds and stocks owned by the companies are abundantly sufficient to discharge this current indebtedness, but could not be disposed of at this time for their value, and the committee may not deem it advisable to sell them. The recommendations however of the committee will no doubt, influence and, perhaps, determine the course to be pursued by the directors in providing for the above-named indebtedness.

There has been a very satisfactory reduction in the items of transportation expense and general expense, as compared with the previous year.

The condition of the roads generally has been fully maintained. The expenditure upon repairs of the roads has been larger than will be required during the coming year.

It is probable that the expenses of the several departments of the roads can be somewhat reduced; those of the Dayton and Western Branch will be materially reduced.

It is the desire of the officers of your companies to reduce the operating expenses of the roads to the lowest point consistent with a proper maintenance of the property in their charge.

The assets and liabilities of the Little Miami and Columbus and Xenia Railroad Companies are as follows:

The account with the stockholders is as follows:

Surplus November 30, 1866	$53,192 73
Amount drawn on surplus joint acc't	32,653 60
	$85,846 33

The companies have 45 locomotives, 38 first-class and 2 second-class passenger cars, 24 baggage, mail and express cars, 423 box, 141 stock, 107 platform, 11 coal, 18 lime and 13 caboose cars.

The number of miles run by locomotives has been: with passenger trains, 448,317; with freight trains, 507,594; with other trains, 54,144—total 1,110,055, at a cost for repairs per mile run of 7.44 cents. The mileage of passenger cars was 2,585,045; cost per mile, 2 cents. Mileage of freight cars, 7,662,553; cost per mile, 1.2 cents.

The total number of passengers transported on the roads during the year, exclusive of commutors, has been 463,736, of whom 136,786 were through and 326,950 were local. Number of passengers carried one mile, 29,979,605.

The tonnage of the year, exclusive of mails and express matter, amounts to 435,977 tons, of which 253,583 tons were through freights, and 182,394 local, and shows an increase over last year of 26,967 tons.

Elizabeth and Paducah Railroad.

An election was held in Louisville, Ky., on the 2d inst., to decide whether the sum of $1,000,000 should be subscribed to aid in the construction of the Elizabeth and Paducah Railroad. The subscription was voted for by a large majority, and it is expected that the work will be commenced immediately. The country through which the road is to run is very rich and abounds in minerals.

Ohio and Mississippi Railway.

The following is a statement of the earnings and expenses of this road for the years ending December 31, 1866 and 1867:

Earnings:	1866.	1867.
Passengers	$1,615 596 43	$1,429,210 56
Freight	1,581,476 10	1,872,428 25
Miscellaneous	183,510 97	157,680 46
	$3,380,583 50	$4,459,319 27
Expenses, viz:		
Maintenance of way and structures	$1,045,586 64	$718,869 93
Motive power & cars	466,780 18	433,941 85
Transportation exp.	1,138,928 87	1,011,168 23

Miami Bridge	.....	236,754 44
Ind. and Cin. R.R. Co., use of 3d rail	.....	90,017 41
	$349,286 03	$777,073 07

The receipts and disbursements in 1866 and 1867, were as follows:

Receipts:	1866.	1867.
From earnings	$3,285,457 32	$3,331,258 07
Less paid on account of expenses	2,607,309 25	2,115,297 92
	$678,148 07	$1,215,960 15
Revenue of previous years	41,580 37	97,924 07
Chairman of Trustees, on account	98,104 58	14,675 46
Other sources	119,826 87	115,999 88
Materials used	233,620 75	113,803 49
Cash on hand Jan. 1	262,077 81	225,148 46
Total	$1,433,358 45	$1,783,511 51
Disbursements:		
Ballasting road bed, etc.	$139,497 73	$193,896 06
New cars and engines.	129,968 51	192,869 93
Ind. and Cin. R. R. Co., use of 3d rail while rebuilding the Miami Bridge	29,162 66	90,017 41
Rebuilding Miami Br., on account	8,348 31	325,692 93
Rent of rolling power	45,220 00	33,915 00
Real estate, on acco'nt	4,700 00	16,627 00
Pay rolls & arrearages	74,335 73	113,144 17
Sundry accounts	272,439 45	261,084 07
Materials on hand	113,803 49	114,198 46
Interest coupons on mortgages	390,734 11	287,860 99
Cash balance, Dec. 31.	225,148 66	154,205 50
Total, as above.	$1,433,358 45	$1,783,511 51

The equipment of the road January 1, 1868, was as follows: 79 locomotives, 27 first class and 3 second class passenger coaches, 4 night cars, 2 paymasters', 4 mail, 9 baggage, 6 Adams' Express, 1 express stock, 28 caboose, 84 Diamond Line, 420 box, 40 box stock, 84 rack stock, 220 high flat, 93 low flat, 220 coal and 4 tool and wrecking cars.

The Trustees of Creditors and Stockholders of the Ohio and Mississippi Railroad Co., (E. D.,) having, at a sale made on the 9th of January, 1867, under a decree of the U. S. Circuit Court, upon foreclosure of the second mortgage, purchased the property of the Ohio and Mississippi Railroad Co., extending from Cincinnati to Vincennes, 192 miles, a new company was organized on the 18th of November, 1867, under the corporate name of the Ohio and Mississippi Railway Co. of Ohio and Indiana, and the said Trustees having previously purchased the property of the Ohio and Mississippi Railway Co. of Illinois, extending from Vincennes to East St. Louis, 148 miles, the two divisions were re-organized and consolidated on the 18th of December, 1867, under the corporate name of the "Ohio and Mississippi Railway Company," extending from Cincinnati to East St. Louis, a distance of 340 miles. The basis of re-organization and consolidation of these companies, is as follows:

Capital stock—common	$20,000,000
" preferred 7 per cent.	3,500,000
Total	$23,500,000
Consolidated mortgage bonds, 7 per cent., due January 1, 1898	6,000,000
Total stock and bonds	$29,500,000

It will be seen by reference to the annexed statement, that the Trustees' common certificates, to be converted into common capital stock, exceed the required amount by $226,604 44; while the preferred certificates, to be converted into preferred capital stock, is less by $145,875 38 than the amount authorized. The net excess to be provided for therefore outside of capital stock is only $80,729 06. It is also stated that $4,000,000 of the consolidated mortgage bonds are to be reserved in trust for the redemption of the old mortgages, while the remaining $2,000,000 are to be used for improvements, etc.

The financial condition of the consolidated company, January 1, 1868, is exhibited in the annexed:

BALANCE SHEET.

Construction		$24,086,919 77
Machinery and tools		141,740 93
Personal property, real estate, &c.		1,686,632 18
Telegraph line		25,042 59
Equipment		1,707,000 00
		$27,647,335 47
In hands of Treasurer, &c.	$154,205 50	
Materials at shops	114,198 46

Bills payable		41,405 42
Due on pay rolls, purchases and other accounts		476,558 78
Net earnings since November 1st, 1867, the time the consolidated company assumed the business, &c., of the old organizations		122,225 26
		$28,108,918 47

The officers of the Ohio and Mississippi Railway Company for 1867-'68, are as follows:

President.—WILLIAM D. GRISWOLD.

Vice President.—ALEXANDER H. LEWIS.

Directors.—Joseph W. Alsop, Wm. H. Aspinwall, Wm. Whitewright, Jr., Sam'l U. F. Odell, Allen Campbell, Fred'k Schuchardt, New York; Wm. D. Griswold, Larz Anderson, W. W. Scarborough, Alex. H. Lewis, Cincinnati; John Ross, Vincennes; Lewis B. Parsons, Samuel Gaty, St. Louis.

Gen'l Superintendent.—JOHN W. CONLOGUE.

Treasurer.—CHARLES S. CONE.

Auditor.—PETER VAN DEURSEN.

Secretary.—EDSON D. HAMMOND.

☞ The South-Side Railroad Company have commenced running their trains to Islip.

Ohio and Mississippi Railroad.

The St. Louis *Democrat* says that orders have been given at the machine shop of the company in that city to "commence work on all engines now undergoing repair to fit them for a narrower gauge. New cylinders suited for a narrow gauge, are to be put in engines Nos. 4 and 33. A third rail has been added, to be put down in accordance with the contemplated change, so as to correspond with other Western railroads, and to be used until such time as all the present rolling stock can be altered, when the outside rail will be removed. They have made three new engines in the Ohio and Mississippi machine shops during the past year, and more will be commenced immediately, suited to the change of gauge. This will give employment to a large additional force of mechanics."

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JANUARY 31, 1868.

The receipts on capital account during the half year amounted to £4,421 8s. 3d., and the total receipts to the 31st January, 1868, to £5,260,508 0s. 7d. The aggregate expenditure to the same period amounted to £5,363,772 15s. 4d. From this amount has been deducted £1,864 2s. 2d., being the remainder of the amount due from the American lines as contribution to the narrow gauge system, and also £103 1s. 3d., being proceeds of sale of portion of old materials of the steamer "Transit," making the actual charge to capital account on January 31, 1868, £5,361,805 11s. 11d., and leaving a balance to the debit of capital account of £101,297 11s. 4d. The outlay on capital account during the half year has been £28,240 17s. 5d.

This expenditure includes completion of works on car ferry boat "Great Western;" additional signals and sidings for narrow gauge or Blue Line accommodation; additions to rolling stock for the same; further expenditure for rebuilding in stone the bridge over Twenty Mile Creek at Jordan; cost of raising chimneys for the improvement of furnace blasts of rolling mill; sundry additions to stations and platforms; completion of buildings and platforms at Petrolia station, and the erection of tanks at London and Suspension Bridge to improve the supply of water for the locomotive service.

The receipts and expenditure on revenue account were as follows:

Gross receipts	£400,813
Working expenses, including renewals	193,667
	£207,146
From which there has to be deducted—	
Interest on bonds, &c.	£50,911
Loss on conversion of American funds	66,612
Amount charged on account of Detroit fire claims	4,110
Erie and Niagara Railway, deficiency in working	1,258
	122,891
Profit on half year's operations	£84,255
Add surplus from last half year	1,681
Available for dividend	£85,937

From this amount the Directors recommend a dividend at the rate of 4½ per cent. per annum, free of income tax, which will absorb £80,211 5s. 5d., and leave a surplus of £5,725 6s. 5d. The Directors propose to set apart a further sum of £3,000 as a reserve for the renewal of the ferry steamers out of the above surplus, leaving a balance of £2,725 6s. 5d., to be carried to the credit of the current half year. This renewal fund will then stand at £5,000.

The loss on the conversion of American funds for the half year amounts to £66,611 16s. 9d. as compared with £48,228 11s. 5d. for the corresponding half year of 1867. The average rate of conversions made during the half year was 140⅝, the average of price of gold for the same period having been 140⅛. The price of gold was much higher during the first quarter, within which period the largest proportion of the gold purchases was made.

The following table exhibits the receipts and expenses for the last six corresponding half years:

	Receipts.				Expenses.	
Half year. Jan.	Pass., mails, and sundries. £	Freight and live stock. £	Rents. £	Total. £	Including renewals. £	Per cent. of gross rcpts.
1863.	122,627	186,099	579	309,305	172,568	55.79
1864.	129,684	171,329	621	301,634	171,336	56.80
1865.	154,125	157,874	730	312,730	168,577	53.91
1866.	205,131	181,171	837	387,039	170,003	43.93
1867.	168,986	161,254	1,273	331,513	166,632	50.26
1868.	186,537	213,476	800	401,813	193,667	48.31

The total traffic receipts show an increase of £69,772 14s. 6d. over the corresponding period of 1867. Of this increase £18,814 3s. is for through passenger traffic; £45,402 12s. 10d. is for through freight and live stock traffic; and £6,819 2s. 10d. is for local freight and live stock. The increase in mails and sundries, which includes express freight, is £4,435 5s. 6d., of which £442 10s. 1d. is local, and £3,992 15s. 5d. is through traffic. There is a decrease of £5,698 9s. 8d. in the local passenger traffic.

The working expenses, including renewals, are at the rate of 48.31 per cent. of the receipts, against 50.26 for the corresponding half year.

The cost of maintenance and renewals is £48,589 11s. 8d., against £39,682 7s. 3d. for the corresponding period, being an increase of £3,907 4s. 5d.

As explained in the engineer's report hereto annexed, the establishment of the narrow gauge route over the entire main line of 229 miles, from Suspension Bridge to Windsor, involves the maintenance and renewal of three rails instead of two rails, as in the corresponding half year. There are also 25 miles of narrow gauge sidings in addition to those previously existing, with necessary switches and signals—equal in point of fact to an addition of 127 miles of single track.

Last year's harvest turned out much less than was expected. Both in Canada and the United States the actual result, though partially favorable, was on the whole disappointing.

To meet the increased requirements of the narrow gauge traffic 50 Blue Line freight cars have been placed on the line since the issue of last half year's report, and four first class passenger cars (making six in all) have been converted from broad to narrow gauge. It will be seen in the Mechanical Superintendent's report that three new freight engines have been constructed out of revenue, and set to work during the half year, to replace the same number of an inferior class of passenger engines, and two others are in a forward state.

The Finance Minister of the Government of Canada has lately brought to the notice of the Directors the position of the provincial aid afforded by the late Province of Canada to this company. In 1861, a petition, approved by the shareholders, was presented to the Legislature of the Province of Canada praying for the relief to be granted to the Great Western that had been conceded to the other Canadian Companies; and the directors feel they are justified in expecting that the Government will give the whole subject their favorable consideration, and with this conviction they are now in communication with the Finance Minister.

At the last half yearly meeting, on October 9th, 1867, the traffic agreement with the Grand Trunk Company, dated June 12th, 1867, was approved by resolution of the proprietors. It is now proposed to modify the agreement to this extent, that by six months' notice, mutually operative, either party may absolutely determine and put an end to the same. A resolution with this intention will be submitted to the general meeting, on April 8th next.

The gross earnings of the Detroit and Milwaukee for the year ending December 31, 1867, were £361,912 12s. 7d., and the working expenses amounted to £203,942 5s. 7d., leaving a net revenue £157,970 7s., which is applicable to interest on bonds, capital expenditure, Detroit fire claims, and other items.

THOMAS DAKIN, President.

Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF-YEAR ENDING DECEMBER 31, 1867.

The gross receipts upon the whole undertaking, including the Buffalo and Champlain, have been 704,879*l.*; deduct the ordinary working expenses (being at the rate of 63.50 per cent.), 447,306*l.*; the renewals of the permanent way and works in the half-year debited to revenue, 85,819*l.*; amounts paid on account for loss by fires at Sarnia and Toronto, 6,164*l.*; debit balance from last half-year, 17,677*l.* (together 556,966*l.*); and there remains an available net balance of 147,413*l.* From this amount has to be deducted the loss on American currency, say 39,385*l.* leaving a cash balance of 108,028*l.* From this again has to be deducted —for amount of postal and military revenue for half-year due to the holders of the postal and military bonds, 19,253*l.*; leaving the balance of 88,775*l.* applicable for the following payments, viz.: —Interest, &c., paid on lands, 1,695*l.*; ditto on mortgage to Bank of Upper Canada, 4,423*l.*; ditto on loans, bankers' balances, promissory notes, European exchange, &c., 2,533*l.*; ditto on British American Land Company's debentures, 616*l.*; ditto on Montreal Seminary debentures, 616*l.*; ditto on Island Pond debentures, 2,700*l.*; half-yearly instalment on Portland sinking fund, 2,811*l.*; Atlantic and St. Lawrence lease (in full), 32,786*l.*; Detroit lease (in full), 11,250*l.*; Montreal and Champlain, 6,777*l.*; Buffalo and Lake Huron, 12,284*l.*; equipment bond interest, 10,779*l.*; total, 88,775*l.*

Comparing the results of the half-year's working with the corresponding period of 1866, there is a falling off in the gross receipts of 14,991*l.* (in the through or foreign passenger receipts), and there is an increase in the expenditures of 33,698*l.*

During the past year the effects of the abrogation of the Reciprocity Treaty were felt as regards the amount of products interchanged between the United States and Canada, and although the trade with the lower provinces is gradually increasing, yet this traffic is of a much less important character than that which formerly entered the United States under the treaty. One unexpected result has been an actual loss on the working of the Buffalo and Lake Huron section during the half-year.

The net revenue balance is 85,957*l.* less than for the corresponding period of 1866, and the decrease is thus explained. In the gross receipts as already mentioned, there is a falling off of 14,991*l.* In the working expenses there is an increase of 33,698*l.* In the renewals there is an additional expenditure, charged against revenue, of 13,427*l.* A further sum of 6,164*l.* has been paid on account of the losses occasioned by the Toronto and Sarnia fires; and the debit balance against revenue account from the last half-year amounted to 17,677*l.* These added together make the difference of 85,957*l.*

The ordinary expenses during the half-year amounted to 447,306*l.*, being 63½ per cent. of the receipts. In the corresponding period of 1866 they were 413,608*l.*, or 57½ per cent. of the receipts, showing an increase over 1866 of 33,698*l.* The fuel consumed during the half-year cost 19,667*l.* more than in the half-year ended December 1866; and the extra wages paid, in the engineering department, for increased renewals amount to about 10,000*l.* The loss by discount on American currency shows an important decrease, being 39,384*l.* against 61,828*l.*

Gold fluctuated during the half-year from 146 per cent. on 12th of September, which, was the highest, to 133 per cent. on 22d December, which was the lowest quotation of the year. These rates were a little lower than those for the corresponding period of 1866; but in the last half-year $770,000 only of American paper were converted into gold, against $859,000 in the half year ended December 1866. The total direct loss sustained by the company from 1862 to December 1867 amounted to the enormous sum of 351,321*l.*

To this unforeseen and uncontrollable loss, augmented as it has been by the increased cost of materials and higher wages, the directors must again point as one cause of the present unsatisfactory position of the company's revenue accounts.

The accounts now presented exhibit a state of depression in a great degree exceptional. In point of fact the line suffered in 1867 from an extraordinary accumulation of unfavorable circumstances—bad trade and commercial distress on the one hand having been combined with high wages and high prices of materials on the other.

A decrease in the gross traffic simultaneously with an increase in the working expenses is thus shown, although up to the close of 1866 the gross revenue of the company had increased year by year, and the working expenses (exclusive of renewals) had correspondingly decreased.

In 1861 the gross traffic of the line was 920,579*l.*, whilst in 1866, on the same mileage, it was 1,356,795*l.*, or an increase of 47½ per cent. During the same period the ordinary working expenses were gradually reduced from 79 per cent. of the receipts to 60 per cent., and this, too, for a period when wages and materials had increased in price. Important reductions are now being made in the rate of wages, and the prices of materials are falling. The wages paid to laborers on the sections of the line in the United States have indeed already been reduced from $1 50c. per diem, the rate of last year, to $1 25c., and the wages of mechanics have been reduced by 10 per cent. throughout the line. Fuel is being charged, also, at an important reduction upon the standard prices of 1867.

The amount charged to capital is 392,128*l.*; but of this sum 366,340*l.* is the capitalised interest for the whole year on the preference bonds and stocks.

In the absence of any new provision of capital the charges for heavier rails, &c., must unavoidably be hereafter repaid out of net revenue. Certificates for the arrears of interest to be capitalised will, under the terms of the Arrangements act of 1862, be issued shortly after the half-yearly meeting. The directors regret that even the first preference holders cannot be paid in cash.

The bill referred to in the last report, authorising the raising of further capital, not exceeding 500,000*l.*, by the issue of second equipment bonds (but which do not in any way interfere with the priorities and rights of the existing equipment bonds), and also enabling certain alterations in the existing agreements with the Buffalo and Lake Huron, and Montreal and Champlain, was passed during the last session of the Canadian Parliament, but the power sought to alter, and to extend the period of, the agreement with the Buffalo and Lake Huron, with the consent of both parties, was not obtained in the terms intended.

It will be remembered that at the December meeting the question of the Great Western agreement was postponed until the forthcoming meeting, with a view to a further discussion in the meantime between the two companies as to the notice clause. The agreement, as amended, will be submitted to the proprietors at the present half-yearly meetings of both companies. The directors have had the pleasure of meeting such of those gentlemen appointed to confer with them at the last meeting—viz., Messrs. Cazenove, Greene, Legg, Mercer, Paine, Ritter, and Smith, as were able to attend, and of discussing with them various questions of interest in connection with the undertaking. The present report has also been submitted for their approval.

The directors and the committee have jointly considered the question of the issue of further capital, and they propose to communicate at the proper time with the Government of Canada in reference to raising the funds necessary to fully equip the line, to build the bridge at Buffalo, and to complete the other works essential to the proper development of the undertaking and the trade of the country.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States April 1, and May 1, 1868:

	April 1, 1868.	May 1, 1868.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$214,464,450.00	$215,947,400.00
Six per cent. bonds of 1867 and 1868	8,903,641.80	8,688,241.80
Six per cent. bonds of 1881	283,677,150.00	283,677,200.00
Six per cent. Five-twenty bonds	1,424,405,600.00	1,442,065,450.00
Navy pension fund	13,000,000.00	13,000,000.00
Total	$1,944,440,841.80	$1,963,378,291.80
DEBT BEARING CURRENCY INTEREST.		
Six per cent. bonds	$23,582,000.00	$23,982,000.00
Three-year compound interest notes	46,010,530.00	44,573,680.00
Three-year seven-thirty notes	185,884,100.00	163,490,250.00
Three per cent. certificates	26,290,000.00	28,330,000.00
Total	$281,766,630.00	$260,375,930.00
MATURED DEBT NOT PRESENTED FOR PAYMENT.		
Three years Seven-thirty notes, due Aug. 15, 1867	$1,303,550.00	$1,075,950.00
Compound interest notes matured June 10th, July 15, Aug. 15, Oct. 15, and Dec. 15, 1867	5,393,030.00	4,745,280.00
Bonds of Texas indemnity	256,000.00	256,000.00
Treasury notes, acts July 17, 1861, and prior thereto	158,611.64	155,461.64
Bonds, April 15, 1842	6,000.00	6,000.00
Treasury notes, March 3, 1863	616,192.00	616,192.00
Temporary loan	1,284,000.00	1,032,400.00
Certificates of indebtedness	19,000.00	18,000.00
Total	$9,036,383.64	$7,905,283.64
DEBT BEARING NO INTEREST.		
United States notes	$356,144,727.00	$356,144,727.00
Fractional currency	32,588,689.94	32,450,489.94
Gold certificates of deposit	17,742,060.00	19,357,900.00
Total	$406,475,476.94	$407,953,116.94
Total debt	$2,641,719,332.38	$2 639,612,622.38
AMOUNT IN THE TREASURY.		
Coin	$99,279,617.68	$106,909,658.00
Currency	23,230,027.34	32,174,136.82
Total	$122,509,645.02	$139,083,794.82
Amount of debt less cash in the Treasury	$2,519,209,687.39	$2,500,528,827.56

By comparing this with the statement of April 1, it is shown that the debt bearing coin interest has increased $18,937,450; the debt bearing currency interest has decreased $21,390,700; the matured debt not presented for payment has decreased $1,131,100; and the debt bearing no interest has increased $1,477,640—making the decrease in the total debt since April 1, 1868, $2,106,710. The amount of coin in the Treasury during the same period has increased $7,630,040 32, and the amount of currency has increased $8,944,109 48—leaving the amount of debt less cash in the Treasury May 1, $18,680,859 83 less than on April 1st.

Notices to Contractors.

Contractors will find Notices of interest to them in our Advertising columns, viz: The grading of about eight miles of the railroad of the Squankum and Freehold Marl Co., from Farmingdale to Freehold, N. J., of which I. S. Buckelew, Esq., is Engineer. The re-construction of the Manassas Railroad, including the laying of 14 miles of track, the supplying of 30,000 cross ties, the building of about 1,000 feet of trestle bridging, and the excavation of from 2,000 to 5,000 yards of solid rock, etc.; H. W. Vandegraft, Esq., Chief Engineer. The grading, bridging, masonry, track laying, etc., of about 40 miles of the Bangor and Piscataquis Railroad, extending from its junction with the E. & N. R. R. at Oldtown, or Milford, to Dover and Foxcroft, in Piscataquis Co., Me.; A. W. Wildes, Esq., Chief Engineer. Sub-contracts will be let on the 13th of May for grading the Kent County Railroad of Maryland. The line is divided into sections of one and two miles in length, and is very easily worked. The contractors are Peter Sanford, Alfred S. Sears, and Rodman Backus, Chestertown, Md.

St. Petersburg and Moscow Railway.

It appears that there are four competitors for the acquisition of the St. Petersburg and Moscow line—viz., the Great Russian, what is known as the Poliakow Company, a Moscow society of capitalists, and an American company headed by M. Wynans. The proposals will be shortly taken into definitive consideration by a commission presided over by Count Strogonoff. The Wynans interest and the Great Russian appear likely to prove in the end the actual competitors. The Great Russian has commenced the payment of its half-yearly obligation interest.

Russian-American Company.

Prior to the sale of Alaska by the government of Russia the stock of the Russian-American Company was quoted in Moscow at 80, although the par value is 150. On the day after information arrived of the treaty having been made the stock went up to 150 and has continued to advance until it is now selling at 330. These facts have been furnished to the State Department by our Consul at Moscow.

☞ The managers of the Ohio and Mississippi Railroad have decided upon altering the gauge of their road from the broad to the narrow one. This measure is taken for the purpose of obtaining a close connection with the greater number of the Eastern roads, and it is expected that the new track will be completed by the 1st of December next.

☞ The Pittsburg *Chronicle* says that the directors of the Pittsburg and Connellsville Railroad are determined to push forward that great enterprise with all possible vigor; and that early the present month contracts will be made with energetic and responsible parties for the speediest construction of the work from Connellsville, the present terminus of the road, to the city of Baltimore.

☞ A meeting of the Cleveland, Columbus and Cincinnati Railroad Company will be held in Cleveland, Ohio on the 14th inst., to take into consideration and vote upon the consolidation of the stock, property and effects of this company, with that of the Bellefontaine Railway Company, and any other business pertaining thereto.

American Railroad Journal.

Saturday, May 9, 1868.

Stock Exchange and Money Market.

The Money Market has estimated more firmness since our last, on an exhibited demand, chiefly from speculative sources. The offerings of capital have been on a less liberal scale, especially for Stock and Gold Board purposes. More disposition has been evinced, as well by the banks, as by private lenders, to make advances on prime mercantile paper, with a view to fostering the spring business. Call loans have been quoted at from 6@7, closing generally at 7 per cent.; choice to good discounts at from 6½@8 per cent. per annum. The banks made a very heavy gain in their cash balances, last week, an unprecedentedly large increase having been shown in the deposit line. The actual increase in the deposit averages was $10,898,646; in the legal tender reserve, $3,996,842; and in the specie hoard, $1,232,326. The loan averages were augmented full $5,314,655; while the circulation was reduced, $112,781. The U. S. Sub Treasury cash reserve was diminished, last week, $5,640,601, chiefly by the interest disbursements. The Sub-Treasurer was a buyer of Seven-Thirties and a seller of Gold, to a moderate extent during the week. The interest payments of the office, in April, were only $357,176. The interest disbursements, thus far, in May, have exceeded eleven millions in coin. The aggregate cash reserve of the Treasury Department on the 1st inst. was $139,083,794, (including $106,909,658 in coin, and $32,174,136 in currency) against $122,509,645 (including $99,279,617 in coin, and $23,230,027 in currency) on the 1st of April. Of the cash reserve on Tuesday last, the U. S. Sub-Treasury in this city held $102,495,374, including $10,601,297 to the credit of disbursement accounts.

The specie reserve of the city banks is now $16,166,873, against $9,902,177 same time last year. The city bank deposits are now $191,206,135, against $195,729,072 week ending May 4, 1867. The legal tender reserve amounts to $57,863,599, against $70,587,407 same time last year. The circulation now stands at $134,814,843, against $38,571,747 same time last year. The loans are now $257,628,672, against $250,877,558 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $92,119,650 a day, against a daily average of $100,464,000 the preceding week, and $103,952,322 the week ending with April 18, 1868. The current week's exchanges average about $97,163,983 a day. The city banks, last week, gained $3,996,842 of legal tender $10,898,646 in the deposit line, and $1,232,326 of their specie reserve. They increased their loans, $5,314,055; and reduced their circulation $112,781.

The New York Gold Exchange Bank reports for the week ending Saturday, the 2d day of May, 1868, the average amount of loans and discounts as $1,657,297; average amount of specie, $1,182,980; average amount of deposits, $1,953,975.

The Philadelphia Bank movement the past week shows an increase in loans of $521,117 an increase of $109,667 in specie; an increase in legal tenders of $39,726; an increase of $342,647 in deposits; and a decrease of $9,268 in circulation. The Bank Clearings show a decrease of $28,398, and the balances, a decrease of $176,047

National Bank notes to the amount of $115,490 were issued last week, making the total issue to 1,673 banks thus far, $307,528,721, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $7,773,096, leaving, with the existing 1,639 banks, (having an aggregate capital of $420,221,210,) an actual circulation at this date, of $299,755,625. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,925,000; and for the public deposits, $38,349,950—making a total of $380,274,950. The Treasury Department last week redeemed and destroyed $438,200 of worn and mutilated fractional currency, and issued $118,859 of new. The outstanding amount of fractional currency on the 1st

inst. was $32,450,489, against $32,588,690 on the 1st of April, and $32,307,947 on the 1st of March 1868.

The U. S. Sub-Treasury receipts, week ending with May 2, were $22,172,526, including $2,131,-831 from customs duties; payments, $27,813,127, including $7,032,000 of coin interest; balance at the close of the week, $101,208,222, against $106,848,823, at the close of the preceding week, showing a decrease of $5,640,601. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $3,645,378 including $366,562 from customs; and payments, $3,287,446; on Tuesday, receipts, $1,133,761 including $393,040 from customs, and payments, $2,833,288. The balance at the close of business on Tuesday stood at $99,866,825, against $108,184,237 a week previous; and $104,-898,081 on April 21, 1868. The aggregate receipts of the office in April were $70,048,524; aggregate disbursements, $64,715,017.

The Sub-Treasury balance at the close of April was $102,495,374, against $98,161,867 at the close of March. The office issued $10,309,121 of coin certificates, in April. The aggregate amount of the certificates outstanding on the 1st inst. was $19,357,900, against $17,742,060 on the 1st of April.

Government revenues were on a moderate scale, last week. The excises, last week, yielded about three millions, against four millions the preceding week; customs at the port of New York, $2,131,-831 and at the outports, about $700,000 (in coin) more, making the grand total income for the week equal to about $6,990,000 in currency. The total receipts of the National Treasury, from excises, thus far in the new fiscal year, which began on the 1st of July, have been about $162,500,000.

Government received from customs, through the port of San Francisco, from Jan. 1, to April 1, 1868, $2,128,862, against $1,815,411 same time last year.

The fluctuations in Gold, since our last, have been unimportant, the price having ranged from 139 to 139½, closing on Wednesday at 139⅜. The demand has been fair for export; but has been moderate for speculative and custom house purposes. The exports on Tuesday and Wednesday, of the current week, amount to $1,585,000. The coin reserve of the Treasury Department on the 1st inst., reached $106,909,658, including $19,-357,900 of private deposits. Since the 1st inst., there have been over fifteen millions disbursed on interest account, including over eleven millions through the local office. The city banks held specie to the amount of $16,166,873 on Saturday last; against $9,902,177 same date last year.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $2,792,000, against $687,500 same time last year. The customs demand for Gold last week, averaged $355,302 a day; thus far, this week, it has been equal to $391,-000 a day, or equal to a weekly aggregate of $2,346,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $9,800 and from California, $727,849. The total customs revenue of the Government, in coin, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $95,977,621, against $106,493,216 same time in the preceding fiscal year. The total receipts of California gold at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $29,267,077, against $34,-667,781 same time in the preceding fiscal year, showing a decrease of $5,400,704 in 1867–'68. The exports of specie from this port, last week, were $2,431,891, against $713,657 same week last year. The exports of specie, hence, since July 1, 1867, have been $49,377,367, against $26,408,574 same time in 1866–'7. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $7,032,000, and since July 1, 1867, $61,684,261, against $45,535,392 same time in 1866–'7. The specie exports from San Francisco, from Jan. 1, to April, 1868, were $10,540,413, against $9,839,647 same time last year.

Foreign exchange has been a trifle firmer, since our last, but the transactions in all classes of bills have been light, and the market closes tamely. Bankers' prime sixty day bills on London closed on Wednesday at 110@110¼, and on Paris to 5.16¼c.@5.12½; sight bills on London to 110⅜@110⅝, and on Paris to 5.11¼c.@5.10. The offering of produce bills has been less extensive this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,188,021, against $4,198,819 same week last year; total, since July 1, 1867, $152,820 811, against $166,-611,859 same time in 1866–'67.

Government securities have been remarkably steady, since our last, on a fairly active investment and speculative demand. Six per cents of 1881 have been scarce, and wanted by home and foreign buyers. The amount outstanding on the 1st inst., was $283,677,200, against $283,677,150 a month previously. Five twenties of all issues have been in good request at full rates. During April, $17,669,800 of these bonds were issued by the Department, augmenting the outstanding aggregate to $1,442,065,450, against $1,424,405,-600 on the 1st of April. Ten-forties to the amount of $1,483,000 were marketed, during the the past month, chiefly through the loan agency of Messrs. Jay Cooke & Co., leaving an unissued balance of only some four millions, of the authorized aggregate of 200 millions. Seven-thirties have been going into the Treasury, by conversions or direct purchases, at a respectable rate. The amount of these notes outstanding on the 1st inst., was $163,490,250, or full $22,393,850 less than on the 1st of April. The original aggregate of the loan was 830 millions. Thus, 666½ millions have been redeemed and funded, before more than 300 millions of the loan matured. Compound Interest Notes have been in some request for banking purposes. There are now outstanding only $44,573,650 of these notes, showing a reduction of $1,436,850 within a month. Little movement has been noted in the new Three per cent. certificates, of which $2,040,000 were issued in April.

U. S. sixes of 1881 closed here on Wednesday at 113@113¼; U. S. Five-twenties of 1862, 108¼@108⅜; U. S. Five twenties of 1864 at 106⅝@106¾; U. S. Five-twenties of 1865 at 106¾@107; U. S. Five-twenties of 1865, consolidated, 109@109⅛; U. S. Five-twenties of 1867, 109⅜@109½; U. S. Ten-forties at 103@103⅛, and U. S. Seven-thirties at 107⅜@107½. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	119	September, 1865	117½
August, 1865	118	October, 1865	117

U. S. three per cent. certificates 100¼

Government paid off $215,400 of the matured loan of 1847–'67, in April.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 22.	April 29.	May 6.
Consols	93⅜	94	94⅛
U. S. 5-20's of 1862	*70¼	70¼	70⅝
Erie	46½	46½	46
Ill. Central	93½	95	95¼

* Ex May coupon.

Railway and miscellaneous share property has been rather more confidently dealt in, since our last, closing strong and buoyant in price.

General business has been fairly active in the produce lines. Flour, wheat, and pork have declined. Corn, oats, and lard have advanced. Cotton leaves off heavily the demand having been limited. Middling upland cotton closed languidly on Wednesday at 32@32½ cents, per lb. The stock of cotton now here is estimated at about 80,000 bales. The receipts at the port this week, have averaged only about 950 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,071,000 bales, against 1,678,000 bales same time last year; exports, same time 1,501,000 bales, against 1,227,000 bales same time last year; stock on hand at latest dates, 240,000 bales, against 385,000 bales same date last year. At the Live Stock markets this week, Beeves have been in moderately inquired at from 13@19c. per lb.; week's receipts, 5,517. Veal calves have been less active and heavy at 6@11½c. per lb.; receipts, 2,831. Sheep and lambs have been more sought after at from 5@9c. per lb.; receipts, 13,627. Swine in good demand at from 9@10½c. per lb., all live weight; receipts, 17,045. Foreign merchandise has exhibited more animation, and prices have been generally quite firm. The total imports of foreign dry goods, last week, were $1,-143,940, and the total amount marketed $1,277,-325 The value of foreign merchandise imported last week, was $4,251,875—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $5,395,815, against $4,292,967, same week last year; total since July 1, 1867, $201,055,836, against $229,-688,516 same time in 1866–'67. The ocean freight market has been moderately active, opening with a downward tendency, but closing more firmly. For Liverpool we quote flour at 1s. 6d.@1s. 9d. by sail, and 1s. 9d.@2s. by steamer, per bbl.; grain at 4½d.@5d. by sail, and 5½d.@6d. by steamer, per bushel; cotton at ⅛d. by sail, and ⅛@$\frac{3}{16}$ by steamer, per lb.; and heavy goods at 15s.@35s. by sail, and 20s.@40s. by steamer, per ton. Total number of vessels in port on Wednesday 511.

The New York exports, exclusive of specie, for the week ending May 5th, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$4,198,819	$3,188,021
Prev. reported	67,721,403	58,489,905
Since January 1	$71,920,222	$61,677,926

The balance in the Sub-Treasury on Wednesday was $100,100,615 64.

☞ The Wicomico and Pocomoke Railroad, between Salisbury and Berlin, Maryland, was formally opened last week.

Delaware and Hudson Canal Co.

This company proposes to double its capital stock, making it $20,000,000. A special meeting has been called for May 12, to obtain the consent of the shareholders. If the authority be given, 50,000 shares, or one share for every two now held by the stockholders, will be issued immediately, on which 60 per cent. will be called for in installments during the present year, and the remaining 40 per cent., or $2,000,000, will be credited as paid to represent that amount of undivided earnings expended in improvements, purchases of lands, and in providing a necessary increase of working capital. The amount to be called in ($3,000,000) is required to pay for recent large purchases of coal property in the neighborhood of Wilkesbarre. These purchases will lay a solid basis for an important and needed extension of the company's operations, and the Board feel the strongest confidence that they will contribute largely to the future prosperity of the company. The remaining 50,000 shares, if the issue be authorized, will be disposed of hereafter, from time to time, as in the judgment of the Board, the interests of the company, and the attainment of the objects of its charter may require.

Portland and Ogdensburg Railroad.

The Albany *Journal* says that a Vermont gentleman has offered to build the Portland and Ogdensburg Railroad from seven miles above Portland to Dalton on the Connecticut River, and furnish all but machinery or rolling stock, for $29,000 per mile. A Massachusetts party, representing several millions capital, proposed to build the entire road to the western terminus in Vermont at $35,000, including rolling stock to the value of $4,000 per mile. No action has yet been taken on these offers.

Mississippi Central Railroad.

This road has been leased to a company of eastern capitalists, of which H. S. McCombs, of Wilmington, Del., is the head, for 16 years. The lessees assume entire indebtedness of the road, except the debt to the State of Tennessee. The road is to be returned to the stockholders at the expiration of the lease in the same condition as it is delivered. Arrangements are being made for its extension to Louisville.

Denver, South Park and Rio Grande R. R.

A company with the above title was recently organized at Denver. The officers are: H. M. Porter, President: Ansel Bates, Vice President; J. S. Brown, Treasurer; and D. A. Cheever, Secretary. The route is to be through the Poncha Pass to the southern boundary of the Territory.

☞ The remaining sections of the Knoxville and Kentucky Railroad, extending from Knoxville to the Kentucky line, have been put under contract to the following parties: Ed. McLovern, J. T. Offutt & Co., B. F. Vaughn, H. Y. Bibb & Co., Thomas Rosser, J. B. Neely & Co., Frank Shoffen, bridge masonry; Gardner & Martin, bridge masonry. This secures the completion of the road.

☞ The Dubuque *Times* says that the contractors on the Dubuque and Sioux City Railroad have sub-let the work of grading between Iowa Falls and Fort Dodge, and an increased force of men will soon be put on the work and the enterprise pushed forward with energy and dispatch.

Railroad Earnings.—Weekly.

The earnings of the Michigan Central Railroad for the 4th week in April, 1868, were. $147,579 00
Corresponding week of previous year. 119,888 00

Increase. $27,691 00

The earnings of the Chicago and Alton Railroad for the 4th week in April, 1868.. $65,004 17
Corresponding period previous year .. 72,813 91

Decrease $7,809 74

The earnings of the Detroit and Milwaukee Railroad for the fourth week in April 1868, were $36,047 54
Corresponding week of 1867 38,920 34

Decrease $2,872 80

The earnings of the Chicago and Rock Island Railroad for the fourth week in April, 1868, were $67,900 00
Corresponding week of previous year.. 54,802 00

Increase $13,098 00

The earnings of the Chicago and Northwestern Railroad for the 4th week in April, 1868, $352,934 89
Corresponding week previous year .. 243,889 13

Increase $109,045 76

☞ A mortgage for $1,000,000, has lately been recorded in the office of the Register of Deeds for Winona Co., Min., by the Winona Eastern Connection Railroad Company—the mortgagee being Henry J. Tilden, of New York. This fact, says the Winona *Republican*, is construed by some of our citizens to foreshadow the immediate purchase of the iron and the laying of the same on the road from this city eastward. Whether the surmise is a correct one, or not, will very soon be made manifest.

☞ The charter of the South Mountain Railroad has been renewed. The road is to be commenced in five and to be completed in ten years. It will start at Harrisburg and run through Linglestown, Grantville, Jonestown, Fredericksburg, Millersburg, Straustown and Shartlesville, to Hamburg, Berks county.

☞ The Winona, (Min.) *Republican* says that the Northwestern Company have fully determined to extend the Winona and St. Peter Railroad westward to the Minnesota river this year.

☞ Col. Franchot, Chief Engineer of the Schenectady and Ogdensburg Railroad, writes to the Hon. Benjamin Squire, of Canton, that he has been instructed to make the *locating survey*, and expects to complete it this season.

☞ The Milford *Journal* reports that the railroad from that place to Woonsocket is fast approaching completion, and there is little doubt that the trains will be running over it by the first of June.

☞ All the stock in the Bangor and Piscataquis Railroad having been taken, the road will be put under contract immediately. Propósals are advertised for now. The road is to connect Dover and Foxcroft with the European and North American Railroad.

☞ The Burlington and Missouri River Railroad is now finished to Afton, within a hundred miles of Omaha. Contracts will soon be taken for the construction of the road to that point, to be completed by the first of July, 1869.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of April, were:

ENTERED FOR CONSUMPTION.

	1867.	1868.
Manufactures of wool	$626,505	$776,306
" cotton	804,902	694,385

Little Miami and Columbus & Xenia R. R. Companies.

To the Stockholders:

The Committee appointed by the stockholders at their last regular meeting in January, 1868, reported the following statement of the financial condition of the companies, December 1, 1867:

The combined assets and liabilities of the L. M. and the C. & X. R. R. Co.'s joint and several, are as follows:

ASSETS.

Construction and real estate—		
Little Miami Company	$3,775,757 40	
Columbus and Xenia Company	1,482,840 46	
	$5,258,597 86	
Rolling stock and shop machinery.		1,012,564 55
Bills receivable—		
Joint Company	$1,881 42	
Columbus and Xenia Co.	18,890 35	
		20,771 77
Due from agents		68,916 12
Due from United States		17,056 58
Cash in hands of Treasurer		112,551 01
Cash in hands of Assistant Treasurer		16,707 32
Cash and cash items, paymaster		81,689 86
Street connection track		170,046 02
Materials on hand		203,427 46
Pittsburg and Steubenville bonds		200,000 00
Street connection bonds		60,000 00
Central Ohio Railroad stock		33,314 68
Miscellaneous bonds and stocks		30,385 65
Dayton and Xenia Railroad		411,823 82
Wharf boat		4,399 60
		$7,707,252 30

LIABILITIES.

Capital stock—		
L. M. R. R. Co.	$3,572,400	
C. & X. R. R. Co	1,786,200	
		$5,358,600 00
Less C. & X. stock owned by		
L. M. R. R. Co	$425,650	
C. & X. R. R. Co	17,050	
Jointly	93,900	
		536,609 00
		$4,822,000 00
Bonds—		
L. M. R. R. 1st mortgage.	$1,489,000	
L. M. R. R. City loan	100,000	
C. & X. R. R. 1st mort.	248,000	
	$1,837,000	
Less held jointly—		
L. M. R. R. 1st mortgage.	197,000	
		1,640,000 00
Bills payable		79,426 16
Due to transportation companies		57,349 29
Due to individuals		181,114 02
Unpaid dividends		212,587 98
Surplus		764,774 85
		$7,707,252 30
From the apparent joint surplus		$764,774 85
Should be deducted—		
Depreciation of street connection bonds	$12,000 00	
Interest charged to expense of street connection	12,000 00	
Hillsboro and Cincinnati Railroad stock	9,262 83	
Other stock considered worthless	4,290 00	
Depreciation of Central Ohio Railroad stock	14,000 00	
Floating debt for rails, locomotives, bridges, &c.	105,025 00	
		156,577 83
		$608,197 02

The surplus must be charged with any ultimate loss which may be incurred on the expenditure for the elevator over and above the $33,000, which the Little Miami stockholders authorized to be subscribed. The expenditure amounts to $65,449 72, and the whole matter has been referred to a Committee of the Board, and it is hoped the same will be satisfactorily adjusted.

A floating debt of about two hundred thousand dollars, growing out of the above expenditure, the purchase of additional engines, real estate, superstructure, &c., has been incurred. It may be stated thus:

Money borrowed	$93,000
For building one-half Dayton Bridge	30,000
Iron and steel rails	38,863
Baggage burnt at Xenia	19,650
New locomotives	15,225
	$196,738

The companies must either carry these debts or apply current earnings to their payment, their surplus assets not being in a shape to use at this time for that purpose.

There has been paid to the City of Cincinnati $27,000 from the current earnings, under a contract between the city and the Little Miami Company, for laying Nicholson pavement on that portion of Front street occupied by the track of the Little Miami Company, $4,000 of which is a contribution by the railroad company, and the balance a loan for one year. The Boards of Directors, also, deem it best to apply the current earnings to the payment of the above floating debt, and this will so far affect the income of the companies as to require the Boards to pass the June dividend.

E. W. WOODWARD, *President L. M. R. R. Co.*
JOS. R. SWAN, *President C. & X. R. R. Co.*
CINCINNATI, March 28, 1868.

Hudson River Railroad Bridge.

The following is a copy of the act passed by the Legislature of New York on the 28th of April, 1868, authorizing the construction of a new railroad bridge across the Hudson River at Albany:

SEC. 1. The Hudson River Bridge Company at Albany, is hereby authorized, in lieu of its present bridge crossing the Hudson River at Albany, to construct a bridge across the Hudson River from a point at or near the foot of Exchange street, in the city of Albany, to some suitable point on the eastern bank of said river, to be selected by said Hudson River Bridge Company at Albany; said new bridge to be constructed, maintained, used and enjoyed in all respects, as provided by the act entitled "An act authorizing the construction of a bridge across the Hudson River at Albany," passed April 9th, eighteen hundred and fifty-six, and the several acts amending the same, subject to the limitations and conditions therein contained, except in so far as they are modified and amended by this act.

SEC. 2. As soon as said new bridge shall be so far completed that trains of cars are or can be passed over it, the said Hudson River Bridge Company at Albany shall immediately disuse, demolish and entirely remove its present bridge crossing the Hudson River at Albany, including every part thereof, both above and below the surface of the water, and the franchise and easement of said present bridge shall wholly cease and determine.

SEC. 3. If the said Hudson River Bridge Company at Albany, fail to disuse, demolish and entirely remove its present bridge, as provided and required in the foregoing section, without delay, the common council of the city of Albany, or the common council of the city of Troy, shall cause the said bridge to be so disused, demolished and removed immediately, at the cost of the said Hudson River Bridge Company at Albany; and for the amount of the cost of such compelled disuse, demolition and removal of said present bridge, judgment shall be entered in the Supreme Court of this State, in the office of the County Clerk of the County of Albany, or in favor of the Mayor, Aldermen and commonalty of the city of Troy, as the case may be, and in the offices of the clerks of either counties, in favor of the Mayor, Aldermen and commonalty of the city of Albany, and against the said Hudson River Bridge Company at Albany, and may be enforced as such, and shall be deemed and treated in all respects, as a judgment of the Supreme Court. But before commencing the erection of the bridge authorized by this act, The Hudson River Bridge Company, The New York Central Railroad Company, The Hudson River Railroad Company and The Boston and Albany Railroad Company, stockholders in the said Hudson River Bridge Company shall jointly and severally execute and deliver a bond to the Mayor, Aldermen and commonalty of the city of Troy and the Mayor, Aldermen and commonalty of the city of Albany, as obligees therein, either of said obligees to prosecute the same in case of breach, in the penalty of at least six hundred thousand dollars, conditioned for the removal of the present bridge and the piers thereof from the foundation of the same, so as to completely restore the navigation of the river at that point within nine months after the use of, or the crossing of the first train of cars over the bridge authorized to be built under this act, which bond shall be subject to the approval (as to its form and manner of execution,) of the Attorney General of the State.

SEC. 4. This act shall take effect immediately, but the authority herein given to the said Hudson River Bridge Company at Albany shall cease and determine at the end of three years from the date of its passage, unless the said Hudson River Bridge Company at Albany shall avail itself of and comply with its provisions within that period.

SEC. 5. This act shall take effect immediately.

Chicago, Rock Island and Pacific Railroad.

Since the re-organization of this company work has been vigorously prosecuted west of Des Moines. Fifty miles of the hundred and thirty between Des Moines and Council Bluffs are nearly graded, and the president and directors hope to have the line nearly completed and ready for the next spring's business. Most of the iron is purchased, and the entire work is progressing as prosperously as could be expected.

☞ A meeting of the directors of the proposed railroad from Reading to Treverton, *via* Bernville, Rehrersburg, and Tremont, Schuylkill County, was to have been held in Reading on the 5th inst., to take measures to put the road under way.

☞ Contracts have been let for the construction of the Hunter's Point, Ravenswood and Astoria Horse Railroad. The work is to begin at once, and the road will be finished by October 1st.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS FOR GRADING the Railroad of the Squankum and Freehold Marl Company from Farmingdale to Freehold, about eight miles in length, will be received at the Office of the Company at FREEHOLD, N. J., until the 28th of May, 1868.

Profile and specifications may be seen, and all necessary information obtained at the Office on and after May 19th.

I. S. BUCKELEW,
Engineer.

NOTICE TO CONTRACTORS.

OFFICE ORANGE, ALEXANDRIA AND MANASSAS RAILROAD COMPANY, ALEXANDRIA, VA., April 27, 1868.

PROPOSALS will be received at the office of the company until the 14th of MAY, for the RECONSTRUCTION OF THE MANASSAS ROAD, between Timberville and Harrisonburg, in the county of Rockingham, Va. There are 14 miles of track to lay, 30,000 cross ties to be furnished, about 1,000 lineal feet of trestle bridging, and excavation to the extent of from 3,000 to 5,000 yards of solid rock, and some embankments to be made.

H. W. VANDEGRIFT.
Chief Engineer and General Sup't.

NOTICE TO R. R. CONTRACTORS.

PROPOSALS will be received until the thirtieth day of May, for the grading, masonry, bridging, ballasting and track-laying on the Bangor and Piscataquis Railroad, extending from its junction with the European and North American Railway at Oldtown, or Milford, to Dover and Foxcroft, in Piscataquis county—about forty (40) miles.

Said road will be divided into four divisions, and proposals will be received for a part or the whole of the work.

The Company reserve the right to reject any and all proposals not deemed for their interest to accept.

Profiles, Plans and Specifications may be seen previous to the day advertised for letting, by application to the President of said Railroad, at the office of Charles Hamlin, Esq., in the City of Bangor.

THE

UNION PACIFIC

RAILROAD COMPANY

OFFER A LIMITED AMOUNT OF THEIR

First Mortgage Bonds

AT PAR,

PRINCIPAL AND INTEREST

PAYABLE IN GOLD.

The Great Pacific Railroad Line, extending 1721 miles from Omaha, on the Missouri River, to the tide waters of the Pacific Ocean, is being built by two powerful Companies—THE UNION PACIFIC, beginning at Omaha, building West, and the Central Pacific of California, beginning at Sacramento, building East, until the two roads shall meet.

Both Companies have prosecuted the work with great vigor, the Union Pacific having already expended over

THIRTY MILLION DOLLARS,

and the Central over *Twenty Millions*, upon their respective parts of the undertaking. THE UNION PACIFIC HAVE COMPLETED 550 MILES—have iron and other materials for two hundred miles more upon the ground, and one hundred additional miles are ready for the track. They will have a much larger force employed this year than ever before, and it is expected that between

800 and 900 MILES

will be in operation during 1868. There seems to be no reasonable doubt that the distance between Omaha and Sacramento will be traversed by rail in 1870.

The GOVERNMENT GRANTS 12,800 acres of land, and its Bonds to the average amount of $28,000 per mile to aid in the construction of the line, and authorizes the issue of the First Mortgage Bonds now offered for sale, to the same amount and no more. The Government takes a *second* lien, and gives to the First Mortgage Bondholders a prior lien for their security, to which a large paid-up capital is added. The Bonds cannot be issued except as each section of twenty miles is accepted by Government commission, so that they always represent a real property.

It is universally admitted that on the completion of the Union Pacific Railroad, its through business will make it one of the most profitable in the world—but its way or *local* business is already several times the interest on its bonds; so that, if not another mile were built, they would be a secure investment.

THE NET EARNINGS for eight months of last year on an average of 386 miles are officially reported at **$1,069,136**, while the interest on all the bonds it could issue on that length of road for that time, reduced to currency, was only $345,856.

The Union Pacific Bonds are for $1,000 each, and have coupons attached. They have thirty years to run, and bear annual interest, payable on the first days of January and July at the Company's Office in the City of New York, at the rate of six per cent. in gold. The Principal is payable in gold at maturity. At the present rate of gold, these bonds pay an annual income on their cost of

NEARLY NINE PER CENT.,

AND IT IS BELIEVED THAT THEY WILL SOON BE AT A PREMIUM.

The Company reserve the right to advance the price of their bonds to a rate above par at any time, and will not fill any orders or receive any subscriptions on which the money has not been actually paid at the Company's Office before the time of such advance.

Subscriptions will be received in New York

At the Company's Office, No. 30 Nassau St.,

AND BY

John J. Cisco & Son, Bankers, No. 59 Wall St.,

And by the Company's advertised agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised agents.

Works at

OSSINING,

Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented, Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

MR. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERGNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

MERRICK & SONS,

SOUTHWARK FOUNDRY,

430 WASHINGTON AV.,

PHILADELPHIA,

MANUFACTURE

Steam Engines—High and low pressure, for land, river, and marine service; Horizontal, Beam, and Vertical. Patterns on hand for 8x10, 14x12, 18x13, Oscillating; compact and cheap.

SOLE MANUFACTURERS IN PHILADELPHIA AND CHESTER OF WILLIAM WRIGHT'S PATENT VARIABLE CUT-OFF STEAM-ENGINES.

Boilers—Plain cylinder, flue, and tubular.

Steam-Hammers, of Nasmyth & Davy patterns, with all the recent improvements.

Strahan's Drill Grinding Rest and Twist Drill-Holder.

Castings—Loam, dry, and green sand, brass, &c.

Roofs—Iron frames for covering with slate or iron—neat, durable, and economical.

Gas-Holders of every description. *Builders of Holders for the Philadelphia Gas-Works of 100 and 160 feet diameter.*

Tanks of every form, for sugar estates, refineries, oil, &c.

Gas Machinery of every description, including Retorts, Bench-castings, Holders and Frames, Purifiers, Coke and Charcoal Barrows, Gas-Valves, Governors, Hoisting Machines, &c.

Manufacturers for the American Meter Company of their Patent Dry Center Valve for changing Purifiers.

Bartol's Patent Wrought Iron Retort-lid, durable, light and cheap.

Sugar Machinery, such as Vacuum Pans and Pumps, Defecators, Bone-Black and Bag Filters, Bone-Black Burners, Washers, and Elevators, Hydraulic Elevators, Sugar and Bone-black Cars, Strike Heaters, Open Steam Trains, &c.

Sole Assignees and Manufacturers in the United States of

Weston's Patent Self-centering Self-balancing Centrifugal Sugar-Draining Machine.

Glass & Bartol's Improvement on Aspinwall & Woolsey's Centrifugal Sugar-Draining Machines.

N. Rillieux's Patent Sugar-Boiling Apparatus, applicable to Beet-Root and Cane Sugar.

Having had twenty years' experience in the manufacture of Sugar Machinery for Cuba, South America, and the United States, they are prepared to contract for the design and erection of apparatus for making Sugar from Beet-Root or Cane, and for Refineries for either Sugar or Molasses

They are also in possession of plans of the most recent improvements in machinery used in France and Germany in the manufacture of Beet-Root Sugar.

WATCHES.

TIFFANY & CO.,

550 and 552 Broadway,

Solicit attention to their Timing Watches, known as the "TIFFANY & Co., TIMERS."

These watches, for Railroad, Engineering, Racing, Gunnery, and Scientific purposes, are superior to any yet offered, as the arrangement of the stop is such as to note time to the nicety of one-fourth or one-fifth of a second, in such manner as to prevent the possibility of error in the calculation.

The following named gentlemen, having bought "Timers" and found them to be perfectly satisfactory, have kindly allowed Tiffany & Co. to refer to them:

Amasa Sprague,	Joseph McPherson,	August Belmont,
Frank Squire,	Geo. G. Haven,	B. W. Gibbs,
J. C. Griswold,	B. H. Bixby,	O. N. Cutler,
Leon. W. Jerome,	George Osgood,	S. D. Bradford,
Wm. M. Rysdyk,	W. M. Tilden,	J. V. Brokaw,
Wm. F. Sherley,	A. P. Spencer,	C. A. Grymes,
	and others.	

Tiffany & Co., have also a full assortment of watches of all desirable sizes and styles, of the same quality and finish as the first mentioned, in addition to their usual stock of Frodsham's and Jurgensen's.

Particular care and attention given to the repairing and adjusting of fine watches.

TIFFANY & Co., 550 and 552 Broadway. House in Paris, TIFFANY, REED & Co.

American Railroad Journal.

New York, Saturday, May 16, 1868.

Oroville and Virginia City Railroad.

We learn from San Francisco that a corps of engineers have just completed a survey across the Sierras for the "Oroville and Virginia City Railroad." The route is from Oroville, through American Valley, Long Valley, Mohawk Valley, Beckworth Valley and Pass, and the survey shows it to be remarkably easy. The highest altitude is 4,150 feet, and the steepest grade 67 feet. On this route there is said to be no snow to impede travel even in the severest winters. It is announced that the company will begin grading in June, and will forward the work with all possible dispatch. From Oroville it is proposed to continue the road to Sacramento, where connection will be made with the Sacramento and Vallejo road, the iron on which, we believe, is now being laid. At Vallejo the Terminal Central Pacific road commences, and crossing at the Straits of Carquinez, will be continued to the tide lands north of Goat Island, granted to this company by the last Legislature, where it is proposed to locate the terminus. The San Francisco and Humboldt Bay Railroad Company, it is said, have purchased a large amount of land at Sancelito, where they intend to make their depot, and have bought Meigg's wharf for a landing. Their intention is to build a branch to Vallego, to connect with the Sacramento road. In the mean time, work on the Western Pacific is being pushed ahead, and before the close of the year, it is thought that San Francisco will be in communication, by this route, with Stockton and Sacramento.

Pittsburg, Ft. Wayne & Chicago Railway.

The following is a statement of the approximate earnings and expenses of this company during the month of April, as compared with the same period of the year 1867:

	1868.	1867.
From freight	$527,422 42	$345,360 29
" passengers	222,465 44	219,904 36
" express matter	8,307 00	8,307 00
" mail	7,825 00	7,825 00
" rent of railway	7,083 33	7,083 33
" miscellaneous	1,000 00	2,076 84
Total	$774,103 19	$590,556 82
Expenses	416,554 96	371,990 09
Net earnings	$357,548 23	$218,566 73

This shows an increase in earnings of $183,546 37; with an increase in expenses of $44,564 87—making the increase in net earnings, $138,981 50.

The earnings and expenses, from January 1 to April 30, compare as follows:

	1868.	1867.
Earnings	$2,569,091 69	$2,286,430 04
Expenses	1,603,359 37	1,601,133 14
Net earnings	$965,732 32	$685,296 90

This shows an increase in earnings of $282,661 65; with an increase in expenses of $2,226 23—making the increase in net earnings, $280,435 42.

Ohio and Mississippi Railroad.

The Cincinnati *Enquirer* says that a large force is engaged at all the shops of the Ohio and Mississippi Railroad, changing the trucks, &c., of the locomotives and cars, preparatory to the inauguration of the narrow gauge. The company has also purchased fifty new locomotives. When the work begins of drawing in the rails, trains will be entirely suspended for only four days, in which time it is estimated the gigantic job can be completed along the whole line. After the change, passengers will be transported from New York to the other side of the Rocky Mountains without change of cars.

Union Pacific Railroad.

The President of this road has summitted an affidavit to the Secretary of the Interior, showing the completion of an additional section of 20 miles of the road, from the 560th to the 580th mile-post, and the Government Commissioners have been instructed to examine into and report upon said section. The work of construction upon this road is being energetically prosecuted, and it is confidently predicted that by the close of the current calendar year the company will have over 800 miles of the road in full operation. Contracts for the construction of 914 miles west from Omaha, comprising much of the most difficult mountain work, have been made with responsible parties at the average rate of $68,058 per mile. This price includes all necessary car shops, depots, stations, and all other incidental buildings, and also locomotives, passenger, baggage and freight cars, and other requisite rolling stock, to an amount that shall not be less than $7,500 per mile.

Erie and Niagara Railway.

A suit has recently been decided in the Court of Chancery, at Hamilton, Canada, in which the Erie and Niagara Railway was plaintiff, and the Great Western Railway of Canada defendant, when the plaintiff was successful. Last Fall the Great Western Railway closed the Erie and Niagara road, and this action was brought to require the company to re-open it. A judgment was rendered on the 5th inst., ordering the Great Western to open the road immediately, and make connections according to the spirit of their agreements, to run all the year round, and give Mr. W. A. Thomson, of Queenstown, Canada, formerly of Buffalo, his proper place as Joint Comptroller of the road, and in case the company do not do this, its contract to be rescinded. Damages were also awarded the plaintiff for the past delinquencies of the defendant.

☞ The citizens of Frederick, Md., by a vote of 797 to 80 have declared in favor of a city subscription to the capital stock of the Frederick and Pennsylvania Line Railroad Company.

Toledo, Peoria and Warsaw Railway.

The earnings of this road for the years ending December 31, 1866 and 1867, were as follows:

	1866.	1867.
From passengers	$174,131 68	$182,746 29
" freight	319,235 82	329,512 44
" mails	9,850 08	9,850 00
" express	5,633 20	7,415 86
" military	402 63	1,071 81
" rent of road	25,840 00	25,000 00
" rent of cars	9,527 83	3,221 53
" miscellaneous	17,042 86	15,644 93
	$561,663 10	$574,462 86
Expenses, viz:		
Maintaining real estate and roadway	$130,032 73	$131,854 49
Maintaining machinery	95,423 60	86,323 35
Conducting transp	135,785 20	143,790 42
	$361,241 53	$361,968 26
Earnings less expenses	$200,421 57	$212,494 60
From which deduct—		
Interest on bonds	$111,965 00	
Government taxes	5,130 78	
State and local taxes	10,630 52	
Insurance, interest, etc	4,253 64	
New York office	5,474 43	
		137,454 37
Balance		$75,040 23
Add balance from previous year		212,086 04
Total, as in General Balance Sheet		$287,126 27

This balance is justly due to the preferred shareholders, in accordance with the terms of the re-organization, guaranteeing to them 7 per cent. of the net earnings, but by their consent it has been used for the improvement and development of the property. As soon as the entire road is completed, and the construction account closed, some arrangement must be made for the settlement of this account.

The gross earnings for the year were $574,462 86; and the operating expenses, including Federal and State taxes, insurance, interest and exchange, $387,457 63—leaving as net earnings the sum of $187,005 23. In 1866, the earnings were $561,663 10; the expenses, $389,696 44; and the net earnings, $171,966 66. The proportion of operating expenses to earnings in 1867, including the above charges, was 67.44 per cent.; exclusive of these charges, 63 per cent. In 1866 the proportion was 69.38 and 65.05 respectively. The gross earnings per mile in 1867, were $5,175 34, and the net earnings, $1,684 73; in 1866 the gross earnings per mile were $5,060 02, and the net earnings, $1,549 24—an increase in gross earnings of 2.28, and in net earnings of 8.74 per cent. Of the total traffic of the road in 1867, 76.55 per cent. was local, and 23.45 per cent. through. Of the passenger traffic, 65.78 per cent. was local, and 34.22 per cent. through. The President in his report, says:

The large proportion of local business is worthy of note, furnishing as it does, a true index of the value of your property.

This business on the Western Division of your road will be in greater proportion, as the portion of the State through which it is located, is most densely settled.

The completion of the road to the Mississippi River, striking it at the important cities of Warsaw, Keokuk and Burlington, and in connection with the opening of the important line of road to the Atlantic Seaboard, *via* Union City, Columbus, and Pittsburg, will add largely to its through business.

The Western division of your road from Elvaston to Bushnell, 45½ miles, was completed and delivered to the company in December last, and payments made to the contractors of the bonds and stock to which they were entitled under their contract.

Large expenditures were made during the past year on the part of the old road between Warsaw and Elvaston; the bridges were re-built in the most substantial manner, embankments widened, new ties laid, and the track put in first rate condition.

The entire portion of the road from Warsaw to Bushnell in its construction, is not surpassed by any road in the State.

The road was opened for business on the 1st day of January, 1868, and though the season was most unfavorable, the earnings have been larger than was anticipated.

The total cost of this part of the western division amounting in first and second mortgage bonds and capital stock to $1,472,845 18, appears to the debit of construction account.

First mortgage bonds on the western division, to the amount of $141,000, have been issued to retire the bonds and past due coupons of the Mississipi and Wabash Railroad Co. in accordance with the agreement contained in the articles of consolidation. The shareholders of the above named company received an equal number of shares in the consolidated company. All these expenditures appear to the debit of construction account.

The division between Peoria and Bushnell was placed under contract at the same time as was the portion of the road west of the latter named point, payable in like manner in bonds and stock, but the contract was by mutual consent subsequently cancelled on account of this company being unable to procure the grading which had been done by the old Peoria and Hannibal Railroad, the ownership of which was being contested by the Peoria, Pekin and Jacksville Railroad Co. As there appeared to be no immediate prospect of a settlement of this litigation between the above named parties, your board of directors instructed the chief engineer of the company to make the necessary surveys for a new line between Peoria and Canton. The route that was finally adopted diverged from the bottom land of the Illinois River about 15 miles from the City of Peoria, following the valley of the La Marsh Creek, and making the distance to Canton one mile less than by the old route. The gradients are much more favorable, and the expensive truss bridge over Copperas Creek avoided, as your road in its present location crosses the branches instead of the main stream.

The line will be constructed at a less cost, and will prove more profitable as regards traffic, as it abounds in timber of an excellent quality, and bituminous coal in inexhaustible quantities.

Between Canton and Bushnell, a large portion of the prairie grading was completed by the Mississippi and Wabash Railroad Co., some years ago, as well as some part of the heavier work at Spoon River, all of which will be used on the present location.

The estimate of the engineer for the construction of the road between Peoria and Canton, 21½ miles, including grading, bridging, superstructure, station buildings, water stations and all necessary fixtures, is $362,604, and from Canton to Bushnell, 31½ miles, $523,783, making the total cost of this division $886,387.

It was deemed by your directors of such paramount importance to complete this division of the road in time for the fall business of this year, and fill up the only gap in the Great Midland Route from the Mississipi River to the Atlantic, that the board did not hesitate to put the entire work under contract, as well as to purchase the iron.

The work was commenced in October last, and has progressed as rapidly as could have been expected, considering the extreme severity of the winter. The grading, bridging, and delivery of ties is nearly completed to Canton, and from that point to Bushnell the work is so far advanced, that it will be completed by the first of July.

Track laying will be commenced at Peoria early in April, and the road to Canton opened for business by June 1st. Two thousand tons of rails are on the way from New Orleans to Peoria; the chairs and spikes have also been purchased and shipped. The remaining portion of the iron, thirty-three hundred tons, has already been shipped from England to New York, and will be forwarded to Peoria on the opening of lake navigation.

This will arrive in time to ensure the completion of the entire road by the first day of September next.

In order to raise the necessary amount of money to complete the portion of the road between Peoria and Canton this spring, the President was authorized to offer the shareholders $450,000 of the first mortgage bonds of the company, at 80 per cent. and accrued interest—receiving payment in installments as the work progressed.

The whole amount was immediately subscribed, the payments have all been made and the bonds delivered, and the work paid for as it progressed.

The statement of the sale of these bonds and of the securities now on hand and unsold, but which will be used in the completion of the road, will appear in the next annual report.

The company have on hand $575,000 of the first mortgage bonds of the western division of the road, and also $800,000 of the second mortgage bonds.

The President has been authorized by the board of directors to sell all the first mortgage bonds and $400,000 of the second mortgage bonds at 80 and 70 per cent. respectively, for the purpose of completing the road to Bushnell and for the purchase of additional rolling stock, to meet the increased business that will offer on the opening of the line for traffic.

The construction and equipment account has been increased since the last annual report by the sum of $2,109,304 45, which has been expended on the construction of the western division between Warsaw and Bushnell, for the payments of claims against the Mississippi and Wabash Railroad Co., assumed by the consolidated company, and for the exchange of stock to the holders of shares in the above named company, viz:

For settlement with sundry holders of out-standing first mortgage bonds of Mississippi and Wabash R. R. with past due coupons		$133,000 00
Henry Hill & Co., contractors for road between Elvaston and Bushnell:		
First mortgage bonds	635,743 31	
Second mortgage bonds	497,736 25	
Common stock	339,365 62	
Common stock exchanged with shareholders in Mississippi and Wabash Railroad		229,300 00
Claims against the M. & W. R. R. Co., paid in cash		18,453 51
Claim of W. N. Cline against M & W. R. R. Co., paid in first mortgage Bonds		6,000 00
Contractors on acct. work on Western Division		125,100 48
New engines, cars, etc		90,304 85
Right of way, new buildings, and side track		34,300 00
		$2,109,304 45

The construction and equipment stands charged upon the books of the company at the end of the year with $7,047,255 91. It is estimated that the total cost of construction and equipment will amount to $9,000,000, equal to $40,900 per mile, which is less than the average cost of the railroads in Illinois.

It is estimated that the business of the road, based on last year's figures, will, when completed, amount to $1,836,137 15, viz:

State line to Peoria, 111 miles.....	$574,462	86
Peoria to Warsaw, 117 miles.....	861,674	29
Add for through business.....	400,000	00
	$1,836,137	15
Deduct 65 per cent. for operating expenses.....	1,193,502	14
Net earnings.....	$642,625	01

being more than 7 per cent. on the total cost of the road.

The above amount of gross earnings is predicated on the earnings per mile per annum, being a little more than $8,300, which is far less than most of the through lines in the State; 220 miles at $8,300 per mile—$1,826,000.

The country contiguous to the line of your road west of Peoria, is known as the "Military Tract," and portions of it have been settled for thirty years. It is one continuous line of farms in the highest state of cultivation.

Your engineer in his survey states that he found but three pieces of unoccupied land.

Your road east of Peoria, runs through, comparatively speaking, a new country. A large portion of the land between El Paso and Gilman had been neglected by settlers, on account of the scarcity of timber, and the alternate sections consequently fell to the Illinois Central Co., under their land grant. The building of your road and of the Illinois Central, and the discovery of beds of bituminous coal, has caused every acre of government land to be taken up within 20 miles of these railroads, and the Illinois Central Co., have sold all their lands in this section of the country, and to actual settlers.

The board of directors would recommend that as soon as the road is finished and opened for business to Keokuk and Warsaw, that a branch of the western division be extended to Burlington. The company have the authority by its charter to build it, but your sanction is required and desired. A survey has been ordered by the President, and as soon as the route is defined, and the estimate of cost is made by the engineer, the board propose to call a special meeting of the stockholders to obtain their sanction and to devise ways and means to accomplish the work at once. A most valuable connection will be effected at Burlington with the Cedar Rapids and Burlington Railroad Co., a new road being built from Burlington to Cedar Rapids. Twenty-nine miles of the line to Wapello, on the Iowa River, is already graded, and the work between Wapello and the Washington branch of the Chicago, Rock Island and Pacific, has been put under contract and will be completed this spring. It is proposed that a close connection with this company shall be made at Burlington, and for this purpose the Common Council have been invoked to grant your company and the Cedar Rapids and Burlington Railroad Co., jointly, the right of way through the city, and donate a portion of the city accretions for depot grounds and machine shops. The distance from Peoria is 7 miles longer than by the old road via Galesburg, but the line will go through a better settled country. With this branch built your road can command all the eastern passengers and freight to three points on the Mississippi River, viz: Warsaw, Keokuk and Burlington, as it will be the short line from Baltimore, Philadelphia and New York. The distance by the consolidated Columbus, Chicago and Indiana Central Railroad Co's., lines via Logansport, and the "Pan Handle Route," being only 1,116 miles to New York, whereas via Toledo, Wabash and Western, and its connections, the distance is 1,208 miles, and via Chicago, Burlington and Quincy, the distance is 1,212 miles—a difference in favor of the "Pan Handle Route" and your road, of near 100 miles—which must control the business of Northern Missouri and Southern Iowa, as well as the U. S. Mails.

The Pennsylvania Railroad Co. have, in view of the opening of the "Great Midland Route," via the "Pan Handle Road" to the West, built during the last year, at an expense of upwards of $2,000,000, a line through Philadelphia, so as to make a close connection with the New Jersey Consolidated Co., from New York, so that passenger and freight trains can go forward on the through line, without any change of cars or detention; and the board are credibly informed that it is the intention of the Pennsylvania Co., to continue their double track from Pittsburgh, via Pan Handle and Steubenville roads, to Columbus, Ohio, which, when built, will give the "Midland Route" over the Lakes route, an immense advantage in the general freighting business and transportation of stock to and from the Western States.

The Iowa and Missouri State Line Railroad Co., running through the lower counties of Iowa, with a portion of the extreme northern counties of Missouri, commencing at Montrose on the Mississippi River, and having its terminus opposite Nebraska City, on the Missouri, are making vigorous efforts in connection with the Midland Pacific Railroad Co., owning the line between Nebraska City and Fort Kearney, via Lincoln, to obtain government aid, by land grant or otherwise, with a view of completing their road to Fort Kearney, making at that point a connection with the Union Pacific road, by the time the Union Pacific and Central Pacific shall meet in the mountains, and the great thoroughfare to the Pacific ocean. There is every prospect of their securing all the necessary assistance during this session of Congress, and that the whole work will be put under contract the coming summer.

Mr. Robinson the President of the Iowa and Missouri road, reports that more than 100 miles of his road is nearly graded and ready for the iron as soon as it can be procured; and we are informed by Mr. White, the President of the Midland Pacific, that he expects to put the division between Nebraska and Lincoln under contract in June.

Besides the great advantage which your road would derive from the large through business incidental to the opening of the short line to the Pacific coast, it would also receive an immense traffic from the business going to and coming off those roads, destined for the lakes and the Eastern States. It is in contemplation in connection with the above named companies, to build bridges over the Mississippi River at Montrose and Nauvoo, and over the Missouri, at Nebraska City, thus establishing a continous line of railway from New York to Fort Kearney and the Pacific. In view of these improvements, and to form a close connection with the Iowa and Missouri State Line road, the board would recommend that the chief engineer be instructed to survey a line of your road from La Harpe, on the western division, to Nauvoo, on the Missssippi.

The necessary means have been subscribed by the inhabitants on the line of the Peoria, and Rock Island Railroad, to grade, bridge, and furnish the ties for said road, and the work will be commenced at an early period. The road is located through one of the richest and best cultivated sections of the state, and will prove a most valuable feeder to your road.

The board of directors, in conclusion of their report, would say that the elements of prosperity in the future for your road, are beyond the views and calculation of the most sanguine, and they predict an immense and rapid increase of business, which will result most profitably to the stockholders.

The company own 21 locomotives, 16 of which are in use on the Eastern Division, and 5 on the Western Division. Four new ones have been purchased during the past year, and five additional ones have been ordered. The rolling stock consists of 8 passenger, 2 mail and express, 2 baggage, 2 baggage and smoking, 6 conductors', 199 box, 1 bridge carpenters', 1 pile driving, 1 boarding, 12 stock and 100 coal and platform cars. 18 cars have been built at the company's shops, and 15 re-built. The mileage of locomotives during the year was 297,509; and of cars, 1,960,488. The total number of passengers carried was 122,227; and the mileage of do., 3,801,993.

There were used in repairs of track 200 tons of new iron, 274½ tons of re-rolled iron, 3,229 bars of repaired iron, 3,972 new chairs, 81,450 lbs. spike, and 44,188 new cross ties.

President.—CHARLES L. FROST.

Directors.—Charles L. Frost, Zeno Secor, James W. Smith, Courtland Palmer, New York; John B. Brown, Portland, Maine; Wm. H. Cruger, H. F. Clark, Wm. F. Bryan, Peoria, Ill.; Henry Hill, Warsaw, Ill.

Vice President.—WILLIAM H. CRUGER.

Secretary & Treasurer.—THEODORE HIGBIE.

Superintendent.—H. F. CLARK.

☞ Two new trains of cars have been introduced upon the Hudson River Railroad of the latest improved patterns. Each car is supplied with Miller's patent bumper, which connects the train solidly, leaving no slack in couplings, patent ventilators, coolers, etc. Each car is of the Monitor roof pattern, and attached to each train is a new drawing-room car. These trains are to be run to and from Saratoga direct, leaving New York at 11:30 A. M., and reaching Albany from Saratoga at 10 A. M.

☞ The construction of the Vallejo and Sacramento Railroad is now progressing at the rate of two miles a day. The ties and rails are being laid by the new California track laying machine.

☞ The *Mitonian* says that the Catawissa Railroad Company have decided to extend their road to Williamsport, on the Milton side of the river, passing through McEwensville, and near Turbutville. The trains of the Catawissa now pass over the Philadelphia and Erie Railroad between Milton and Williamsport.

☞ Late advices from Arizona state that the recent surveys for a railroad prove the existence of an excellent route through the San Francisco Mountains.

Toledo, Wabash and Western Railway.

The gross income of this company for the fiscal years ending December 31, 1866 and 1867, was as follows:

	1866.	1867.
From passengers ...	$1,322,846 78	$1,213,525 43
" freight	2,209,427 35	2,364,225 40
" mail	52,000 00	52,000 00
" express.....	98,345 17	148,385 52
" miscellaneous..	34,766 92	31,217 23
	$3,717,386 22	$3,809,353 58
Expenditures, viz:		
Renewal of iron and superstructure	$241,051 79	$264,912 93
Maintenance of roadway and structures.	624,066 25	633,491 20
Maintenance of cars, engines, etc.....	556,605 78	449,469 34
General transportation expenses	1,389,462 68	1,439,008 85
	$2,811,186 50	$2,786,882 32
Leaving a net income of....	$906,199 72	$1,022,471 26

The earnings were $91,967 36 more than those of the preceding year, and the expenditures were $24,304 18 less, showing a comparative net increase of $116,271 54.

The receipts from all sources during the year were as follows:

Net income, as above	$1,022,471 26
Received from consolidated bonds .	1,410,000 00
Machinery and tools sold.....	1,840 00
Keokuk City bonds sold.....	22,100 00
Bills payable.....	15,420 00
Materials and supplies less than in 1866	23,298 99
Fuel less than in 1866.....	10,957 20
Total.....	$2,506,087 45

And the disbursements were:

Total, as above.....	$2,506,087 45

Notwithstanding we have encountered another, but we trust an exceptional year, of unexampled disasters to the crops throughout the wide extent of country traversed by our road, disasters as to some of the cereals of so general and destructive a character, as to entail a loss upon our freight traffic fully equal to a million of dollars, yet despite this adverse experience, the aggregate earnings for the year foot up largely in excess of those of any corresponding period in the history of our company.

These aggregate earnings for the year were $3,809,353 58; the entire operating expenses for the same period amounted to $2,786,882 32, leaving a net excess of $1,022,471 26. This excess, although hardly sufficient to justify the payment of a dividend, affords the highly gratifying evidence of a marked uniformity and stability in the growth and development of the traffic of our road, as well as encouraging assurances of its capability under circumstances of an ordinarily favorable character, to make liberal and satisfactory returns.

In this connection, the rapid, and perhaps I am warranted in adding, the extraordinary growth of our strictly local or domestic traffic with each returning year, should be especially referred to as a source of great satisfaction and as furnishing additional grounds for confidence in the future success and prosperity of our line. In a higher degree of cultivation and development of the productive resources of the country immediately contiguous to our road, a country confessedly the richest and most fertile in the West, we have the guaranty of a continued and unlimited expansion of this most important and substantially remunerative branch of business.

Our prospects for an unusually large traffic for the incoming year were never brighter or more promising than at the present time. It is the concurrent testimony of persons of careful and very extended observation that the growing wheat upon the line of our road is now coming forward uncommonly thick, thrifty and heavy, and with the unusual breadth of area known to be covered, we are furnished the flattering assurance of a harvest of unsurpassed abundance.

The prosperity thus predicated upon the encouraging prospects of the incoming year, I trust will be further enhanced by some important and I think practicable reductions which will be effected in several departments of our current expenditures. In the matter of renewals of bridges, also of fencing, the outlays must be materially lessened; besides, a very large saving in the fuel department should be anticipated by the substitution of coal for wood. Other reductions will no doubt be accomplished from time to time in our working expenses, and by systematic care and economy, it is believed that the aggregate of them, will be considerably less than they have hitherto been.

With a view of securing for our line the important benefits incident to the transmission of freight from points of shipment to destination promptly and without breaking bulk, we have placed quite a large number of our cars into the two joint through lines now established upon our road. It is to be hoped that experience will demonstrate the wisdom of this arrangement both as a measure of economy in the handling of freight and in acquiring large accessions to our through traffic.

During the current year we have secured a full equipment of new, convenient and elegant sleeping cars, which should tend to popularize our line with the traveling public, and contribute considerably to the growth and success of our passenger business.

It is a pleasure to chronicle another year of almost perfect exemption from accidents. No losses or damage of any moment have been sustained to the property of the company by casualty to trains or from freshets or otherwise.

Trains have been run with extraordinary promptitude and regularity, and fewer connections have been missed than in any preceding year. Our business relations with all connecting roads continue harmonious, and I trust have resulted for the mutual and permanent benefit of all.

The plan devised and accepted at the period of the organization of this company, for the absorption of the bridge of the Meredosia Bridge Co., into our line, but not carried into execution, has recently been satisfactorily consummated, thus removing the only remaining barrier to the perfect integrity of our route from the Lakes to the Mississippi River.

The construction of the iron railroad bridge over the Mississippi River at Quincy, seriously retarded by the extraordinary and protracted high waters of last year, is now being prosecuted under more favorable circumstances, and with a degree of energy, that warrants its builders in fixing the month of September next as the time when the passage of trains will be accomplished. By the completion of this great and important work, we secure safety and dispatch in the transmission of all our freight destined to the far West, and obviate the present vexatious and considerable expense incident to ferriage.

Our capital stock, both general and preferred, is unchanged since the last annual report. The funded debt is changed in two particulars: first, by the payment and cancellation of $731,000 of our maturing Sinking Fund Bonds; and secondly, by the substitution therefor, by exchange and otherwise, of Consolidated Mortgage Bonds of the company, and also by disposing of a portion of the latter bonds, for the Meredosia Bridge and other purposes properly chargeable to the capital. The arrangement made some time since for the extension of the First Mortgage Bonds, secured on the Ohio and Indiana division of the road, is now practically accomplished. It is also anticipated that during the incoming year, the balance of $269,000 of Sinking Fund Bonds will be extinguished by exchange for Consolidated Mortgage Bonds, which finally disposes of all the funded debt maturing for some time to come.

In conclusion, the experience and observation of another year has only served to strengthen my convictions and confirm my former expressed views, as to the importance and value of our great line of road, and of its ultimately becoming one of the most reliable and remunerative enterprises in our country.

The length of road operated is as follows: in Ohio, 75.5 miles; in Indiana, 166.9; Main road in Illinois, 212.4; Keokuk Branch, 41.2; Naples Branch, 4; Camp Point to Quincy (leased) 22—total length of road operated, 522 miles. Three first class locomotives have been purchased during the year; and there have been manufactured in the shops of the company, and placed upon the road, 141 box freight, 61 stock, 20 platform, 2 baggage, 30 dump, and 3 caboose cars, and three passenger cars have been altered and rebuilt. The equipment now comprises 105 locomotives, 46 passenger, 3 smoking, 24 mail and baggage, 1,173 box freight, 405 stock, 243 platform, 154 coal, 45 caboose and 30 dumping cars Number of stations, 104. Number of engine houses, 11. Weight of rail per yard, 60 lbs. During the year 32 miles of new iron have been put in the track, and 39 miles taken out, repaired and replaced. Five miles of new side track have been built, and 225,000 new cross ties laid. The number of miles run by locomotives has been 1,259,485.

Gen'l Superintendent.—GEORGE H. BURROWS.

The Tuxpan Railway.

A paper called "*The Two Republics*," published at the City of Mexico, says that a company has been organized for the construction of this road, composed of the substantial men of New York and Philadelphia; and that a scientific corps, composed of several parties, has been formed, instruments, tools, &c., procured; overseers, mechanics, clerks employed; and all were about to embark for Tuxpan. The company also proposes to establish a bank, to operate in connection; the principal one to be in New York, with branches in Mexico and Tuxpan. The following is a list of officers of the company:

President.—Luther G. Bringham, New York.

Vice President.—John B. Hall, New York.

Secretary.—Andres Cassard, New York.

Treasurer.—W. Kidder Meade, New York.

Superintendent.—Manuel B. da Cunha Reis, Mexico.

Vice Superintendent.—Alfonso Morales Montenegro, Mexico.

Railroads of the State of New York (Operated by Horse-Power).

American Railroad Journal.

Saturday, May 16, 1868.

Stock Exchange and Money Market.

Pending decisive action by the U. S. Senate, in the impeachment case, business has been quite spiritless in nearly all branches, since our last. Money has been much more abundant. The banks have made a further notable gain in the cash resources, and the Sub-Treasury coin and currency reserve has been augmented to a moderate extent. The speculative calls for aid have been less extensive, and less urgent. The mercantile demand has been only fair, for the season. Government has not marketed much gold, during the week, while it has been a free buyer of maturing Seven-thirty notes, thus helping to swell the available supply of currency in the open market. Advances have been made to large dealers in the public funds at 5; and to the Stock Exchange firms at 6 per cent., as a rule; while prime commercial paper has been readily discounted at 6½@7 per cent. per annum. The last city bank statement shows an increase of $8,127,211 in loans and discounts, $5,120,037 in specie, $90,566 in circulation, $8,070,433 in net deposits, and a decrease of $321,762 in legal tenders.

The specie reserve of the city banks is now $21,286,910, against $14,959,590 same time last year. The city bank deposits are now $199,276,568, against $200,342,832 week ending May 11, 1867. The legal tender reserve amounts to $57,541,837, against $67,906,639 same time last year. The circulation now stands at $34,205,409, against $23,595,869 same time last year. The loans are now $265,755,883, against $253,682,829 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $84,504,761 a day, against a daily average of $98,119,650 the preceding week, and $100,464,000 the week ending with April 25, 1868. The current week's exchanges average about $93,358,574 a day. The city banks, last week, lost $321,762 of legal tender, while they gained $8,070,433 in the deposit line, and $5,120,037 of their specie reserve. They increased their loans, $8,127,211; and their circulation, $90,566.

The New York Gold Exchange Bank reports for the week ending Saturday, the 9th day of May, 1868, the average amount of loans and discounts as $1,138,300; average amount of specie, $1,416,846; average amount of deposits, $2,093,328.

The Philadelphia Bank movement the past week shows an increase in loans of $438,154; an increase of $83,412 in specie; an increase in legal tenders of $175.185; an increase of $907,659 in deposits; and a decrease of $1,989 in circulation. The Bank Clearings show an increase of $196,180, and the balances, an increase of $752,143.

National Bank notes to the amount of $86,930 were issued last week, making the total issue to 1,673 banks thus far, $307,614,951, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $7,849,796, leaving, with the existing 1,639 banks, (having an aggregate capital of $420,221,210,) an actual circulation at this date, of $299,765,155. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,952,000; and for the public deposits, $38,344,950—making a total of $380,296,950. The Treasury Department last week redeemed and destroyed $433,000 of worn and mutilated fractional currency, and issued $540,297 of new. The outstanding amount of fractional currency on the 1st inst. was $32,450,489, against $32,588,690 on the 1st of April, and $32,307,947 on the 1st of March 1868.

The U. S. Sub-Treasury receipts, week ending with May 9, were $34,896,836, including $2,284,604 from customs duties; payments, $34,789,865, including $3,919,000 of coin interest; balance at the close of the week, $101,315,192, against $101,208,222, at the close of the preceding week, showing an increase of $106,970. The business of the Office during the first two days of the cur-

rent week, was as follows: Receipts on Monday, $5,445,988 including $458,985 from customs; and payments, $5,305,013; on Tuesday, receipts, $1,843,184 including $432,741 from customs, and payments, $1,550,632. The balance at the close of business on Tuesday stood at $101,748,719, against $99,866,825, a week previous; and $108,-184,237 on April 28, 1868.

The Sub-Treasury balance at the close of April was $102,495,374, against $98,161,867 at the close of March. The office issued $10,309,121 of coin certificates, in April. The aggregate amount of the certificates outstanding on the 1st inst. was $19,357,900, against $17,742,060 on the 1st of April.

Government revenues have been on a moderate scale, since our last, in both forms, of excises and customs. The excises, last week, yielded some 4½ millions, against three millions the preceding week; customs at the port of New York, $2,284,-604 and at the outports, about $750,000 (in coin) more, making the grand total income for the week equal to about $8,748,500 in currency. The total receipts of the National Treasury, from excises, thus far in the new fiscal year, which began on the 1st of July, have been about $166,000,000.

Government received from customs, through the port of San Francisco, from Jan. 1, to April 15, 1868, $2,489,547, against $2,236,045 same time last year.

Gold has been rather more confidently dealt in, by speculators and export buyers, since our last, and more firmness has been noted in the price, which has been as high as 140¾, but which closed at 139¾, on a firm though less animated and less buoyant market. The exports hence last week were unusually heavy, nearly 3¾ millions. Thus far in the current week, the shipments of specie from this port have been about a million.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $2,966,392, against $892,614 same time last year. The customs demand for Gold last week, averaged $380,767 a day; thus far, this week, it has been equal to $445,-863 a day, or equal to a weekly aggregate of $2,675,178. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $174,404 and from California, $1,127,849. The total customs revenue of the Government, in coin, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $98,314,621, against $108,650,216 same time in the preceding fiscal year. The total receipts of California gold at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $29,667,077, against $35,-087,448 same time in the preceding fiscal year, showing a decrease of $5,420,371 in 1867–'68. The exports of specie from this port, last week, were $3,686,394, against $1,777,256 same week last year. The exports of specie, hence, since July 1, 1867, have been $53,063,761, against $28,186,100 same time in 1866–'7. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $3,919,000, and since July 1, 1867, $65,603,261, against $48,196,392 same time in 1866–'7. The specie exports from San Francisco, from Jan. 1, to April 20, 1868, were $12,467,463, against $10,416,-449 same time last year.

Government has disbursed nearly 12 millions of coin interest through the local office, thus far in May.

Foreign exchange has been in less request and rather easier, though not quotably lower in price. At the close, the tendency was in favor of purchasers. Bankers' prime sixty day bills on London closed on Wednesday at 110@110¼, and on Paris to 5.16¼c.@5.12½; sight bills on London to 110⅜@110⅝, and on Paris to 5.11¼c.@5.10. The offering of produce bills has been moderate this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,434,538, against $3,235,734 same week last year; total, since July 1, 1867, $156,255,349, against $169,-847,593 same time in 1866–'67.

All issues of the public funds have been quoted quite firm in price, as a rule, since our last, on a fairly active call from home and foreign buyers, for investment purposes, chiefly for the several series of the Five-twenties, and for the Ten-forties. There has been quite a lively inquiry for bonds of the smaller denominations, which have been in very light supply, and decidedly more firmly held. Seven-thirties have been passing into the Treasury, in increasing amounts, by conversion or direct purchase. The Sub-Treasurer at this port has bought in some 2½ millions of the maturing notes, since our last. There has been little doing in the open market in Compound Interest Notes, which have not varied remarkably in price.

U. S. sixes of 1881 closed here on Wednesday at 113¾@113⅞; U. S. Five-twenties of 1862, 108¾@108⅞; U. S. Five-twenties of 1864 at 106⅞@107; U. S. Five-twenties of 1865 at 107⅛@107¼; U. S. Five-twenties of 1865, consolidated, 109⅜@109½; U. S. Five-twenties of 1867, 109⅝@109¾; U. S. Ten-forties at 103⅛@103¼, and U. S. Seven-thirties at 107⅜@107½. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	119¼	September, 1865	117¾
August, 1865	118¼	October, 1865	117¼
U. S. three per cent. certificates			100¼

Government paid off $215,400 of the matured loan of 1847–'67, in April.

Secretary McCulloch has given notice, under date May 11, that all Compound Interest Notes intended for conversion into three per cent. temporary loan certificates must either be presented to the Assistant Treasurer at New York, who has the full charge and control of the issue of such certificates, or to the Treasurer of the United States at Washington, who will issue certificates which, on presentation at the office of the Assistant Treasurer at New York, will entitle the holder to receive such certificates in exchange. Compound Interest Notes intended for redemption in lawful money must be forwarded to the Treasurer of the United States at Washington for that purpose.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 29.	May 6.	May 13.
Consols	94	94⅛	94⅜
U. S. 5-20's of 1862	70¼	70⅝	70¾
Erie	46½	46	46¾
Ill. Central	95	95¼	94⅞

Railway and miscellaneous share property has been moderately active, throughout the week, and prices on the whole, have been well supported, the market closing strong and buoyant, though without notable animation.

General business has been comparatively brisk in the breadstuff line, but at lower rates, and rather dull in most other kinds of domestic produce at easier and irregular figures. Middling upland cotton closed languidly on Wednesday at 29½@30 cents, per lb. The stock of cotton now here is estimated at about 78,000 bales. The receipts at the port this week, have averaged only about 1,100 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,083,000 bales, against 1,691,500 bales same time last year; exports, same time 1,531,000 bales, against 1,254,-000 bales same time last year; stock on hand at latest dates, 205,000 bales, against 365,000 bales same date last year. At the Live Stock markets this week, Beeves have been in request and firmer at from 15½@19c. per lb.; week's receipts, 5,161. Veal calves in moderate demand and steady at from 7@11½c. per lb.; receipts, 2,554. Sheep and lambs active and higher, ranging from 6½@10½c. per lb.; receipts, 10,736. Swine dull and heavy at from 9@10¼c. per lb., all live weight; receipts, 21,605. On and after Wednesday, May 20, the regular market days at the National Yards will be Wednesdays and Thursdays of each week. There has been less movement in foreign merchandise prices, of which have not varied remarkably. The total imports of foreign dry goods, last week, were $1,125,659, and the total amount marketed $1,342,893. The value of foreign merchandise imported last week, was $3,-091,247—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $4,216,906, against $5,052,677, same week last year; total since July 1, 1867, $205,-272,742, against $234,741,193 same time in 1866–'67. The freight market has been less active, closing heavily. For Liverpool we quote flour at 1s. 6d.@1s. 9d. by sail, and 1s. 9d.@2s. by steamer, per bbl.; grain at 4½d.@5d. by sail, and 5d.@6d. by steamer, per bushel; cotton at ⅛d.@$\frac{3}{16}$d. by sail, and ⅛@$\frac{3}{16}$ by steamer, per lb.; and heavy goods at 15s.@35s. by sail, and 20s.@40s. by steamer, per ton. Total number of vessels in port on Wednesday 503.

The New York exports, exclusive of specie, for the week ending May 12th, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$3,235,734	$3,434,538
Prev. reported	71,920,222	61,677,926
Since January 1	$75,155,956	$65,112,464

The imports for the week ending May 9th, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,351,921	$1,125,659
Gen. merchandise	3,800,756	3,091,247
Total for the week	$5,152,677	$4,216,906
Previously reported	90,277,705	81,463,497
Since January 1	$95,430,382	$85,680,403

The balance in the Sub-Treasury on Wednesday was $100,742,884 94.

New York and Oswego Midland Railroad.

A meeting of the Executive Committee was held at the office of the company in Oneida, on the 5th inst., charged with the duty of locating the line in the several localities where the same had not been before definitely fixed. A large number of delegates, representing the interests of various sections, were present, and urged the claims of their several localities. The report of the chief engineer showed a grade by the new Morrisville route of upward of 80 feet per mile, and a considerable increase in the distance, which of course necessitated the abandonment of that line.

The committee made a final determination upon all the disputed and unlocated points, with one or two exceptions, which were to have been further considered at an adjourned meeting of the committee on the 8th.

The line adopted is by way of the Stockbridge Valley to Eaton Village. Smith's Valley, Smyrna, North Norwich, Oxford and Guilford, to Sydney Plains.

Improved Drill Lathe Chucks.

We invite attention to the Advertisement in another column of the Excelsior Chuck Manufacturing Co., and at the same time would endorse their statements with reference to the superiority and acknowledged excellence of the Chuck which they are offering. They have exhibited to us numerous letters from machinists who have employed this Chuck; and from the favorable impression which it has invariably produced among them, and a careful examination on our part, we are fully convinced that it is destined to supplant all the Chucks hitherto manufactured. We do not hesitate, therefore, to assert that machinists will find it to their interest to adopt it; as, in addition to the many established advantages which are enumerated in the advertisement, drills can be adjusted with greater facility than in any other Chuck. Undoubtedly it is the best in the market, and every one using such an article should give it a trial.

Central Pacific Railroad.

The investment demand for CENTRAL PACIFIC RAILROAD FIRST MORTGAGE BONDS continues undiminished. They are now being taken as rapidly as the progress of the work entitles the company to issue them, and have a prominent position among safe, standard and profitable securities. They bear 6 per cent. gold interest, and explicitly provide for repayment IN COIN, and are offering at par and back interest from Jan. 1, in currency. Particulars can be learned on application to the General Agents.

FISK & HATCH,
Bankers and Dealers in Government Securities,
5 Nassau street.

☞ Contractors will find several Notices of interest to them in our present issue; among them one from the New York, Housatonic and Northern Railroad Co.

☞ The Indianapolis *Journal* says the style of the new company formed by the consolidation of the Cleveland, Columbus and Cincinnati Railroad Company, and the Bellefontaine Railroad Company, will be the "Cleveland, Columbus, Cincinnati and Indianapolis Railroad Company."

Railroad Earnings.—Weekly.

The earnings of the Detroit and Milwaukee Railroad for the first week in May, 1868, were $36,577 46
Corresponding week of 1867 ..... 37,280 24

Decrease $702 78

The earnings of the Chicago and Alton Railroad for the 1st week in May, 1868... $61,930 16
Corresponding period previous year .. 80,539 75

Decrease $18,609 59

The earnings of the Chicago and Rock Island Railroad for the first week in May, 1868, were $78,778 00
Corresponding week of previous year.. 64,576 00

Increase $14,202 00

Corresponding week previous year.... 18,380 00

Increase $4,883 00

Journal of Railroad Law.

RIGHT OF A COMMON CARRIER TO CLAIM FREIGHT —NEGLIGENCE OF AGENT IN STOWING GOODS— RULE OF DAMAGES.

The decision in the late case of Krohn *vs.* Oechs (48 Barb., 127,) being as applicable to carriers of freight by rail, as in vessels at sea, we publish it under our usual heading. The facts are briefly as follows:

This action was brought by the plaintiff, a common carrier, for freight on a lot of wines, olive oil, &c., from Bordeaux to New York. The defendant set up a counter claim for loss by leakage of wine from some of the casks. It was proved that the wine was properly stowed and dunnaged. That the stowage was by the defendant's men, and the port-warden proved that when he examined the cargo in this port, he found it well stowed and dunnaged. There is no evidence to show at what period of time the injury occurred. The Judge charged the jury that if the damage was caused by the negligence of the captain in placing too much weight on the casks, the defendant was entitled to counter claim the value. In the course of the trial he confined the defendant to proof of the value at the port of shipment, and excluded proof of value at the place of destination; to which the defendant excepted. The jury allowed the counter claim, and assessed the damages at the price of the wine at Bordeaux. Judgment was entered in favor of the plaintiff for $436 25, damages and costs, and the defendant appealed.

The following is the opinion of INGRAHAM, J.—There is a distinction between the cases, arising out of the inquiry at what place the loss occurred. In some of the cases, the action was for not bringing the goods from the port of departure; and in such cases the rule of damages is the difference between the value of the goods at the place of shipment, and the value at the place of destination. Such were the cases of Smith *vs.* Richardson (3 Carnes, 219,) and Medbury *vs.* The N. Y. and Erie R. R. Co., (26 Barb., 564.)

And when the goods are destroyed or lost in the foreign port, before the departure of the vessel, the rule of damages has been held to be the value at the place of shipment. (Dusar *vs.* Murgatroyd, 1 Wash., C. C. Rep., 13.) But when the loss occurs after the vessel has left the place of shipment, then the value of the goods at the place of destination, deducting the charges, furnishes the true rule of damages. In Watkinson *vs.* Laughton (8 John, 213,) damages were given for the value of the goods at the place of destination, deducting the charges. (See Van Winkle *vs.* U. S. Mail Steamship Co., 37 Barb., 122.) There is nothing in the evidence to warrant the conclusion that the loss occurred in port, before the vessel sailed, on the contrary, the port-warden testified that the casks were properly stowed and well dunnaged; that there was no undue pressure on them, and that he thought the injury had been caused after the vessel had sailed. The weight of evidence is against the supposition that the loss had occurred in *port*.

If it was a matter of doubt whether the loss occurred before, or after leaving port, it became a question for the jury to pass upon; and the evidence of value at the place of destination was material, if the jury found the injury to have occurred after sailing.

The Judge erred in excluding the evidence of value in the port of destination.

A new trial should be granted, costs to abide the event.

☞ Steps are being taken to organize the Huntingdon, Fulton and Franklin Railroad Company. This road is to extend from Mt. Union, Huntingdon County, Penn., to a point on the Cumberland Valley Railroad, and is designed to be a connecting link between Washington City and the lakes, and also to connect the Cumberland Valley Railroad with the Broad Top coal fields.

☞ The proposed concession to an English company for the building of the Vera Cruz Railroad has been condemned by the Mexican Congress.

☞ The construction of the railroad between Stamford and New Canaan is rapidly approaching completion. The rails for the road are now being unladen from barges at Stamford.

☞ The work of grading the Oregon Central Railroad is progressing at the rate of two miles a day.

☞ The contract for the construction of the Michigan Grand Trunk Railway has been let to Messrs. J. E. Young & Co.

☞ The construction of a railroad from Wilmington, Del., to Oxford, Chester County, Pa., is advocated by the Board of Trade of Wilmington.

Southwest Pacific Railroad.

The corporators of this road met at St. Louis on the 8th inst., and after the requisite amount of stock was subscribed, the board of directors were elected as follows:

A. C. Kingsland, C. D. Cragin, A. S. Dixon, G. V. Fox, W. L. Halsey, Henry E. Davies, New York; Clinton B. Fisk, St. Louis; Eli G. Parrish, of Mount Vernon, Mo.; Thomas H. Bates, Freeman Clark, W. H. Coffin, of Rochester, N. Y.; F. B. Hayes, A. Pierce, Jr., of Boston.

The Board then adjourned to meet in New York on the 18th inst., when the general officers will be elected. C. D. Cragin was elected chairman of the board.

The books for stock subscriptions will be open for public accommodation at the Bank of St. Louis, office of Ben Holliday, New York, and the office of Pierce & Bacon, Boston.

☞ The Pittsburg *Commercial* says that negotiations are pending between the Michigan Southern and Northern Indiana Railroad Co., and the Baltimore and Ohio Co., with a view to the creation of a through line from Chicago, via Toledo, Cleveland and Pittsburg, to Baltimore and Washington. The Pittsburg and Connellsville Co. located a road some time ago from Pittsburg to Youngstown, Ohio, the design of which was not then apparent. The distances to Chicago by the proposed route are as follows: Pittsburg to Youngstown, via surveys, 55 miles; Youngstown to Cleveland by Mahoning road, 67 miles; Cleveland to Toledo, 112 miles; Toledo to Chicago, 244 miles; Pittsburg to Chicago, 478 miles.

☞ The Wilmington *Commercial* says that the surveying party on the route of the Columbia and Port Deposit Railroad has reached McCall's Ferry. These men are under the control of the Pennsylvania Central, and it is said that this company is surveying the route to ascertain the estimate cost of the work by one of its own engineers.

☞ The only remaining portion of the Boston and Albany Railroad not supplied with double track is that nine miles between Chester and Becket; and on this section the excavations and grading for the second track will be completed and the rails laid before the 4th of July.

☞ The Springfield and London Railroad, with all its fixtures, was sold at Springfield, Ohio, on the 8th inst., by the U. S. Marshall to Jacob W. Pierce, of Boston, for $100,000.

☞ Monroe county has voted to subscribe $200,000, and Pocahontas county $50,000 to the stock of the Chesapeake and Ohio Railroad. Both counties are in West Virginia.

☞ Benj. D. Frost, Esq., of Boston, has been appointed Superintending Engineer of the Troy and Greenfield Railroad.

☞ The cars on the Central Pacific Railroad are now running to Reno, Nevada, 20 miles from Virginia City.

☞ The United States survey of the lakes will employ 240 men this season, principally upon Lake Superior.

☞ The new Perkiomen railroad has been completed from its junction with the Reading Railroad above Norristown to Freeland station.

☞ New surveys are being made with the view to straightening the line of the New York Central Railroad between Utica and Syracuse and the right of way for a portion of the road has been secured on satisfactory terms. The line passes through the towns of Whitestown, Westmoreland and Vernon, and the construction of the road would be a matter of great advantage to the people of these towns.

☞ The Denver *Tribune* says that the contract for the construction of the entire route of the Denver Pacific Railroad, between Denver and Cheyenne, has been awarded to T. C. Durant and Sidney Dillon. The route selected and approved runs from Cheyenne to Latham, at the mouth of the Cache-a-la-Poudre, there crossing the Platte and reaching Denver by the east side. The work is to commence immediately.

☞ A reduction of 25 per cent. has been made on the passenger and freight tariff over the Union Pacific Railroad. The reduction went into effect on the 13th instant.

Safety Railroad Switch.
MAIN TRACK UNBROKEN.
I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN,* and it is impossible for any accident to occur from the misplacement of switches.
The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.
AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*
I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.
I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

NOTICE TO R. R. CONTRACTORS.

OFFICE OF THE NEW YORK, HOUSATONIC AND NORTHERN R. R. Co., 137 BROADWAY, NEW YORK, May 14th, 1868.

SEALED PROPOSALS will be received at this office until 11 o'clock, A. M., of May 30th, 1868, for the grading, masonry, bridging, ties, track-laying and ballasting, of the whole or any part of the New York, Housatonic and Northern Railroad, from White Plains, N. Y., to Danbury, Conn., a distance of thirty-five (35) miles, divided into twenty-six (26) sections.

The Company reserve the right to reject any and all proposals not deemed for their interest to accept.

Maps, profiles and specifications may be seen, and all necessary information obtained at this office.

GEORGE W. MEAD, President.
GEO. S. AVERY, Chief Engineer.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS FOR GRADING the Railroad of the Squankum and Freehold Marl Company from Farmingdale to Freehold, about eight miles in length, will be received at the Office of the Company at FREEHOLD, N. J., until the 28th of May, 1868.

Profile and specifications may be seen, and all necessary information obtained at the Office on and after May 19th.

I. S. BUCKELEW,
Engineer.

NOTICE TO CONTRACTORS.

OFFICE ORANGE, ALEXANDRIA AND MANASSAS RAILROAD COMPANY, ALEXANDRIA, VA., April 27, 1868.

PROPOSALS will be received at the office of the company until the 14th of MAY, for the RECONSTRUCTION OF THE MANASSAS ROAD, between Timberville and Harrisonburg, in the county of Rockingham, Va. There are 14 miles of track to lay, 30,000 cross ties to be furnished, about 1,000 lineal feet of trestle bridging, and excavation to the extent of from 3,000 to 5,000 yards of solid rock, and some embankments to be made.

H. W. VANDEGRIFT.
Chief Engineer and General Sup't.

NOTICE TO R. R. CONTRACTORS.

PROPOSALS will be received until the thirtieth day of May, for the grading, masonry, bridging, ballasting and track-laying on the Bangor and Piscataquis Railroad, extending from its junction with the European and North American Railway at Oldtown, or Milford, to Dover and Foxcroft, in Piscataquis county—about forty (40) miles.

Said road will be divided into four divisions, and proposals will be received for a part or the whole of the work.

The Company reserve the right to reject any and all proposals not deemed for their interest to accept.

Profiles, Plans and Specifications may be seen previous to the day advertised for letting, by application to the President of said Railroad, at the office of Charles Hamlin, Esq., in the City of Bangor.

H. HAMLIN, President.
A. W. WILDES, Chief Engineer.

Portable Railroad.

THE ADVANTAGES OF THE PATENTED PORTable Railroad are manifold. It saves time and money; is particularly adapted for excavating, filling, constructing railroad beds, milldams, levees, etc.: working in mines, quarries, brick yards, and peat bogs. Sold or rented in 20-foot sections, from one to a thousand. Also, Cars suitable for the work to be done. Contracts for excavations, etc., promptly attended to. For particulars or pamphlet, address
A. PETELER & CO.,
New Brighton, Richmond Co., N. Y.

THE UNION PACIFIC RAILROAD COMPANY

OFFER A LIMITED AMOUNT OF THEIR

First Mortgage Bonds

AT PAR,

PRINCIPAL AND INTEREST

PAYABLE IN GOLD.

The Great Pacific Railroad Line, extending 1721 miles from Omaha, on the Missouri River, to the tide waters of the Pacific Ocean, is being built by two powerful Companies—THE UNION PACIFIC, beginning at Omaha, building West, and the Central Pacific of California, beginning at Sacramento, building East, until the two roads shall meet.

Both Companies have prosecuted the work with great vigor, the Union Pacific having already expended over

THIRTY MILLION DOLLARS,

and the Central over *Twenty Millions*, upon their respective parts of the undertaking. THE UNION PACIFIC HAVE COMPLETED 550 MILES—have iron and other materials for two hundred miles more upon the ground, and one hundred additional miles are ready for the track. They will have a much larger force employed this year than ever before, and it is expected that between

800 and 900 MILES

will be in operation during 1868. There seems to be no reasonable doubt that the distance between Omaha and Sacramento will be traversed by rail in 1870.

The GOVERNMENT GRANTS 12,800 acres of land, and its Bonds to the average amount of $28,000 per mile to aid in the construction of the line, and authorizes the issue of the First Mortgage Bonds now offered for sale, to the same amount and no more. The Government takes a *second* lien, and gives to the First Mortgage Bondholders a prior lien for their security, to which a large paid-up capital is added. The Bonds cannot be issued except as each section of twenty miles is accepted by Government commission, so that they always represent a real property.

It is universally admitted that on the completion of the Union Pacific Railroad, its through business will make it one of the most profitable in the world—but its *way* or *local* business is already several times the interest on its bonds; so that, if not another mile were built, they would be a secure investment.

THE NET EARNINGS for eight months of last year on an average of 386 miles are officially reported at **$1,069,136**, while the interest on all the bonds it could issue on that length of road for that time, reduced to currency, was only $345,856.

The Union Pacific Bonds are for $1,000 each, and have coupons attached. They have thirty years to run, and bear annual interest, payable on the first days of January and July at the Company's Office in the City of New York, at the rate of six per cent. in gold. The Principal is payable in gold at maturity. At the present rate of gold, these bonds pay an annual income on their cost of

NEARLY NINE PER CENT.,

AND IT IS BELIEVED THAT THEY WILL SOON BE AT A PREMIUM.

The Company reserve the right to advance the price of their bonds to a rate above par at any time, and will not fill any orders or receive any subscriptions on which the money has not been actually paid at the Company's Office before the time of such advance.

Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,

AND BY

John J. Cisco & Son, Bankers, No. 59 Wall St.,

And by the Company's advertised agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised agents.

MANUFACTURERS OF MONTIGNANI'S PATENT

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary

HUBBELL & VANHOESEN, Agents.

Works at

OSSINING,

Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERGNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

MERRICK & SONS,

SOUTHWARK FOUNDRY,

430 WASHINGTON AV.,

PHILADELPHIA,

MANUFACTURE

Steam Engines—High and low pressure, for land, river, and marine service; Horizontal, Beam, and Vertical. Patterns on hand for 8x10, 14x12, 18x12, Oscillating; compact and cheap.

SOLE MANUFACTURERS IN PHILADELPHIA AND CHESTER OF WILLIAM WRIGHT'S PATENT VARIABLE CUT-OFF STEAM-ENGINES.

Boilers—Plain cylinder, flue, and tubular.

Steam-Hammers, of Nasmyth & Davy patterns, with all the recent improvements.

Strahan's Drill Grinding Rest and Twist Drill-Holder.

Castings—Loam, dry, and green sand, brass, &c.

Roofs—Iron frames for covering with slate or iron—neat, durable, and economical.

Gas-Holders of every description. *Builders of Holders for the Philadelphia Gas-Works of 100 and 160 feet diameter.*

Tanks of every form, for sugar estates, refineries, oil, &c.

Gas Machinery of every description, including Retorts, Bench-castings, Holders and Frames, Purifiers, Coke and Charcoal Barrows, Gas-Valves, Governors, Hoisting Machines, &c.

Manufacturers for the American Meter Company of their Patent Dry Center Valve for changing Purifiers.

Bartol's Patent Wrought Iron Retort-lid, durable, light and cheap.

Sugar Machinery, such as Vacuum Pans and Pumps, Defecators, Bone-Black and Bag Filters, Bone-Black Burners, Washers, and Elevators, Hydraulic Elevators, Sugar and Bone-black Cars, Strike Heaters, Open Steam Trains, &c.

Sole Assignees and Manufacturers in the United States of

Weston's Patent Self-centering Self-balancing Centrifugal Sugar-Draining Machine.

Glass & Bartol's improvement on Aspinwall & Woolsey's Centrifugal Sugar-Draining Machines.

N. Rillieux's Patent Sugar-Boiling Apparatus, applicable to Beet-Root and Cane Sugar.

Having had twenty years' experience in the manufacture of Sugar Machinery for Cuba, South America, and the United States, they are prepared to contract for the design and erection of apparatus for making Sugar from Beet-Root or Cane, and for Refineries for either Sugar or Molasses.

They are also in possession of plans of the most recent improvements in machinery used in France and Germany in the manufacture of Beet-Root Sugar.

WATCHES.

TIFFANY & CO.,

550 and 552 Broadway,

Solicit attention to their Timing Watches, known as the "TIFFANY & Co., TIMERS."

These watches, for Railroad, Engineering, Racing, Gunnery, and Scientific purposes, are superior to any yet offered, as the arrangement of the stop is such as to note time to the nicety of one-fourth or one-fifth of a second, in such manner as to prevent the possibility of error in the calculation.

The following named gentlemen, having bought "Timers" and found them to be perfectly satisfactory, have kindly allowed Tiffany & Co. to refer to them:

Amasa Sprague,	Joseph McPherson,	August Belmont,
Frank Squire,	Geo. G. Haven,	B. W. Gibbs,
J. C. Griswold,	B. H. Bixby,	O. N. Cutler,
Leon. W. Jerome,	George Osgood,	S. D. Bradford,
Wm. M. Rysdyk,	W. M. Tilden,	J. V. Brokaw,
Wm. F. Sherley,	A. P. Spencer, and others.	C. A. Grymes,

Tiffany & Co., have also a full assortment of watches of all desirable sizes and styles, of the same quality and finish as the first mentioned, in addition to their usual stock of Frodsham's and Jurgensen's.

Particular care and attention given to the repairing and adjusting of fine watches.

TIFFANY & Co., 550 and 552 Broadway. House in Paris, TIFFANY, REED & Co.

BENEDICT'S TIME WATCHES TRADE MARK

Fine Jewelry & Silverware.

BENEDICT BROTHERS,

Up-Town, New Store,

American Railroad Journal.

New York, Saturday, May 23, 1868.

Baltimore and Ohio Railroad.

The regular monthly meeting of the directors of this company was held in Baltimore on the 13th inst. The President announced that at a called meeting of the shareholders on the 11th inst., at which 111,318 shares out of 177,868 shares, (being the aggregate of both the common and preferred shares of the Main Stem and Washington Branch,) were represented, and at which the State of Maryland and the City of Baltimore were represented by their directors respectively, the resolutions prepared by the finance committee, under the instructions of the board, to authorize the issue of $2,000,000 preferred stock, on which a perpetual dividend of six per cent., and no more, is to be paid, were considered and adopted unanimously.

The President then presented resolutions authorizing, in accordance with the action of the shareholders, the issue of the preferred stock stated, and the opening of books of subscription at the office of the Treasurer of the company, Camden Station.

Subscriptions are to be received for the stock at par, with accrued interest to the date of payment. The President stated that the requirements of the company would be met for some time to come by the issue of $500,000 of the preferred stock, and that applications for considerable amounts had already been made. This stock being entitled to the same immunities as the common stock of the company, is therefore free from State and Municipal taxation, and presents a most secure and desirable investment. The resolutions were unanimously adopted.

Mr. Garrett stated that since the last meeting of the board the double track between the Point of Rocks and Catoctin (two miles) had been completed, and is now regularly used. In order to open this line three tunnels, respectively 787, 563 and 53 feet, making a total length of 1,403 feet have been constructed through extremely hard and difficult rock. Although this work proved very expensive—the cost exceeding $200,000—it will doubtless prove very advantageous in materially increasing both safety and economy in working the line.

Large forces continue to be engaged in arching the tunnels on the Parkersburg Branch. This work is progressing rapidly, 1,003 feet having been arched in nine tunnels during the month of April. The total length of tunnels upon that branch is 17,870 feet; of which, on the 1st inst., 13,103 feet had been completed. The remaining 4,767 feet, it is expected, will be finished within the next five months.

A new iron bridge at Illchester has been erected, and the last bridge required upon the line. A first class iron structure is being built upon the piers on the 21st section, near New Creek. The work upon the bridges at the Ohio River and upon the other great enterprises in which the company is engaged is being vigorously prosecuted.

An encouraging feature to induce continued effort on the part of the community and the company to perfect the connections still required to increase the business of Baltimore, especially the Pittsburg and Connellsville and the Winchester and Strasburg road, is shown by the aggregate revenues of the Baltimore and Ohio Company and its present branches for the past month, which amounted to $868,452 21. At the low tariffs existing, this revenue indicates the vast volume of traffic which is being transported, and which builds up and develops all the great interests with which the company is connected.

Central Pacific Railroad.

In a recent Circular of Messrs. Fisk & Hatch, financial agents of the Central Pacific Railroad Company, it is stated that "the net earnings for the past year upon less than one hundred miles, operated under temporary disadvantages, amounted to $1,087,901, in gold, over the operating expenses; and the gross earnings for the first quarter of the current year were fifty per cent. greater than for the same period in 1867. It is estimated that the net earnings for 1868 will reach $2,500,000, which, after deducting interest payments (estimated at less than $4,000,000,) are applied to construction purposes. Beside further subscriptions to the capital stock and other resources, the company will be receiving from the United States Government its thirty-year six per cent. bonds, at the rate of $32,000 per mile, and are therefore enabled to carry forward the enterprise with the utmost confidence and vigor."

The Brooks Insulator in France.

In our issue of last July, we gave some account of the admirable improvement in telegraph insulators made by Mr. David Brooks, and we published the result of experiments made upon them, in comparison with others, by Dr. Charles M. Cresson. Since that time, the insulator, without a preliminary decease has been, where other good Americans are reported to go after that event—to Paris.

We have now received the first news of its arrival and condition, from the French press. In *L'Union*, of February 4th, we find the following statements, which it gives us great pleasure to translate and publish:

"M. de Vougy, Director-General of Telegraphs, some time since appointed a commission specially charged with the examination of telegraph insulators of the most approved construction, with a view to the adoption of the best sort for our lines.

"This commissions provided with instruments of the greatest delicacy for detecting loss of the current by the insulators, have established the great superiority of the insulator devised by Mr. David Brooks, of Philadelphia, to all its competitors, and have ordered from him a large number to make an experiment, on the large scale, upon our telegraph lines." A description is here given,

which we omit, because identical in substance with that we have already published, (Vol. IV., p. 10,) after which, as follows :

"Mr. Brooks, who is constantly engaged in connection with telegraphic constructions, and whose insulator is very well known in America, only arrived at the complete form, which we have just described, after many and continued experiments.

"It is clearly to the use of paraffine, now recognized as the first of insulating substances, that Mr. Brooks owes the success which he has obtained."

From a private letter received from a gentleman who is one of the commission mentioned above, we learn that after six months' trial, the Brooks Insulator excelled its next best rival fully one hundred times.—*Franklin Institute Journal, March*, 1868.

Michigan Southern and Northern Indiana Railroad.

The earnings of this road for the years ending March 1, 1867 and 1868, were as follows :

Compared with the previous year, the gross earnings of 1867-'68, show an increase of $74,026 25; with a decrease in operating expenses of $197,318 31—making the increase in net earnings, $271,344 56. The report says :

Earnings derived from freight show an increase of $43,349 64. This is wholly on local business, as the amount of through traffic is less than the year preceding.

The action of the Trunk lines in fixing arbitrary prices for transportation of freight between Buffalo and the seaboard, compelled the establishment of rates from Chicago to New York and Boston, which, during part of the winter, proved almost prohibitory—this has resulted in the holding at Chicago of a large amount of produce for the opening of lake navigation, while a moderate (and we think remunerative) rate would have moved the property and added considerably to the revenues of this and connecting roads.

The business of the Empire Transportation Company, a fast-freight organization, extending from Chicago to New York, Philadelphia and Baltimore, was in December last transferred to this road, and the experience of the first few months indicates that it will be to us an important auxiliary.

Passenger earnings show a decrease of $60,229 65 as compared with the previous year. It will be observed that this loss is in local traffic before harvest, as, commencing with August the number of local passengers shows an increase in each remaining month of the year. This result was expected; it will be remembered that the wheat crop of 1866 was a failure, and of course, all sources of local earnings were injuriously affected, while the crop of 1867, being good upon most of our line, the contrary result was obtained.

Since the payment of a dividend on the common stock, paid March 1st, 1865, the policy of the direction has been toward such a disposition of the earnings as would make the property valuable to those whose interest therein was of an investment character. The interest of the permanent stockholders has been kept steadily in view, and the temptation to prematurely resume the payment of dividends resisted. This resistance was not always an easy task, two influences combining to increase the difficulties of delay. The natural impatience of stockholders to realize income from their property, and the desire of parties holding stock merely on speculation to profit by the impetus a dividend might give to the market for the stock, combined to urge upon the management an early resumption of dividends.

The direction has, however, steadily maintained the policy of putting the road bed and track in good condition, increasing the strength and improving the quality of the equipment, and adding necessary depots and station accomodations. Also, of relieving the finances from the burden of floating debt and of claims that threatened the company with vexatious litigation and heavy payments. All of these objects were to be accomplished as preliminary to the payment of dividends, and, at least in so far as they involved the expenditures that might be classified as for construction, without adding to our liabilities either of stock or bonded debt. Necessarily the net earnings were drawn upon for the purpose, and to the exclusion, for the time being, of dividends upon the common stock. In pursuing the policy indicated during the past three years, after first satisfying those claims for interest, rentals, etc., which precede the common stockholders' claim for dividends, the residue of the net earnings has been applied annually to the enlargement and improvement of their property.

These expenditures for construction, so to speak, have been, during the three years, as follows :

New buildings and depot grounds	$526,484
New equipment	484,038
New track	87,950
New stone bridges	173,794
Union stock yards	100,000
	$1,372,266

The improvements enumerated have gone far towards raising the property to the desired condition of permanence and enlarged capacity, with their resulting cheapness in operating, and increase of earnings, a condition justifying the expectation of an early resumption of cash dividends with a reasonable certainty of their being regularly maintained thereafter; also warranting the expectation that the stockholders may soon have represented to them in some form the sum invested in these additions to their property. The direction, whilst under the necessity of delaying dividends, have never been insensible to the propriety of the expectations entertained by the stockholders of realizing income at the earliest practicable period and receiving the profits earned when the liabilities would bear the increase involved in the payment.

Besides the amount of earnings invested in improvements and additions to your property as previously stated, net earnings have been applied annually by the Commissioners of the Sinking Fund to the extinguishment of the bonded debt. The amount thus applied from the creation of the fund to date is $1,310,000. For this application of profits the stockholders may reasonably expect a representation when the distribution will not involve a departure from the sound financial policy which it has been and still is the aim of the management to pursue; that is to say, when the increased business of the road will warrant such an addition to the aggregate liabilities as would result from such a division of past profits.

The amount to the credit of income for these undivided profits may be properly stated as follows :

Profits invested during the past three years in construction and new property	$1,372,266
Total of Profits invested in the Sinking Fund (of which $426,000 was contributed during the past three years)	1,310,000
Amount of money not derived from sales of stock and bonds but from earnings, applied to extinguishment of guaranteed stock and guarantees during the three years	99,819
Cash on hand—clear surplus	489,977
Total	$3,272,062

Of which $2,388,062 is the accumulated surplus earnings of the past three years.

Of the burdensome claims previously referred to as pressing upon the company in March, 1865, the heaviest in amount and the one threatening the most vexatious litigation, was the ten per cent. guaranteed stock. It amounted then to nearly three millions of dollars, and with the addition of claims for back dividends, raised the aggregate to a sum exceeding four and a half

millions. During the three years past this stock has been so far extinguished that but $586,800 remains outstanding, upon only $186,200 of which are there any unsettled claims for back dividends.

Notwithstanding the decision of the Supreme Court of Massachusetts mentioned in our last report, whereby the litigant for back dividends was defeated, another guaranteed stockholder has sued the company in the New York Supreme Court on a like claim. Whatever the result of this suit may be, the amount of unsettled claims is now so small as to deprive the question of the importance it once possessed, and render its consideration of no practical value in reviewing the financial condition of the company.

The cost of the extinguishments of the guaranteed stock and of the claims thereupon, and the cost of the purchases of Detroit, Monroe and Toledo railroad stock, effected during the three years, was met mainly by sales of previously unissued bonds and common stock, principally in 1865 and 1866, as has been heretofore reported to you in detail. For amount of earnings money applied to this purpose see table above.

As the time for resuming payment of dividends is believed to be approaching, it has been thought proper to lay before the stockholders the foregoing brief summary of the financial operations since the last dividend was paid, in order that they might estimate more correctly the present condition and value and the future prospects for their property.

To this end we may add further, that during this period the amounts paid as current expenses have more than maintained the value of the property, extraordinarily large sums having been paid for this purpose. For instance, there has been laid 209 51-100 miles (20,030) of new and rerolled iron, amounting to 40 per cent. of the entire road. We have also laid 395 87-100 miles (953,824) of cross ties, or 68 per cent. of all in the track, costing nearly two millions of dollars.

Had the property been allowed to remain in the condition it was in at the beginning of the three years just closed, the surplus of $3,272,062 previously stated would have been considerably larger.

In February last the Board authorized the execution of an agreement which was entered into with the Erie Railway Company whereby that company agrees to extend its broad-guage to Toledo by the way of the Atlantic and Great Western Railway. This company agrees thereupon to carry the same guage over its line by third rail or otherwise to Chicago.

Estimates considered reliable justify the Board in believing that the profits of the increased traffic furnished by the enlarged facilities will greatly exceed the charge for interest on the cost. Therefore it is not in contemplation to apply net earnings to cover the cost of this construction, but to meet it by an increase of liabilities in some form.

Neither our inclinations nor our policy point to an alliance with either the wide or narrow guage lines so exclusive as to place us in an attitude antagonistic to the other. On the contrary we believe that our interests will be promoted by all such enlargements and additional connections as will increase the facilities for interchanges of business with both, and improve our business relations with any and all of these lines, linking our great West with the seaboard. Our interests are in harmony with the interests of all the great lines lying between our eastern termini and the seaboard, and it would be a policy alike illiberal and unwise that would discountenance connections and improvements tending to avoid the evils of breaking bulk and operating to cheapen the cost of transit.

With the local growth along our lines and the extension of our western connections to the Pacific, the future of your property, intermediate trunk line as it is, points to an aggregation of business over its rails that will defy the restrictions so narrow a policy would impose.

Of the Sinking Fund Bonds stated in our last report as on hand, nineteen remain in possession of the company, as yet unsold and unissued.

The large elevator "A" at Toledo was destroyed by fire December 21st. Contracts have been made for rebuilding it, and it is expected to be ready for use by August 1st.

The Board would again express their appreciation of the fidelity to the interests of the road exhibited by the general superintendent, chief engineer and heads of departments, and the employees generally during the year just closed. The remarkable freedom from accidents with which the trains have been run affords the best evidence of their efficiency.

The assets and liabilities of the company at the close of the past and preceding year were as follows:

AVAILABLE ASSETS.

	1867.	1868.
Uncollected earnings	$198,928 44	$187,279 91
Freight overcharges due Co	24,669 45	13,327 03

The apportionment of freight and passenger earnings of Main line and branches for the year 1867–'68, was as follows:

	Passenger.	Freight.
Through business	$741,940 58	$1,051,418 17
Main line, local	507,358 76	1,066,315 17
Air line, local	151,133 88	256,086 04
Detroit, Monroe and Toledo	190,548 10	188,292 76
Adrian and Monroe	39,076 25	64,737 99
Jackson Branch	59,049 52	46,989 30
Storage	.....	51,410 37
Totals, as above	$1,689,107 09	$2,725,249 80

The number of passengers carried eastward, was 402,998; do., westward, 449,190—total, 852,188, of which 128,110 were through, and 724,078 way. Of the through passengers, 88,618 were 1st class, 21,837 2d class, and 17,655 3d class, yielding $741,940 58. Of the way passengers, 722,629 were 1st class, 909 2d class, and 540 3d class, yielding $947,166 51. The number of miles traveled by through passengers, was 31,615,064; by way passengers, 28,777,559—total, 60,392,623; showing an increase in passengers carried of 5,488, and in the mileage of do., 2,868,729.

The number of tons of through freight moved eastward, was 194,800; do., westward, 91,652—total, 286,543, yielding, $1,201,529 62. Way freight moved eastward, 271,454; do., westward, 177,531—total, 448,985, yielding, $1,472,309 81. Total tons through and way eastward, 466,254, yielding, $1,579,981 13; do., westward, 269,184, yielding, $1,093,848 30—the total tonnage being 735,438, against 699,765 the previous year, and the revenue therefrom, as above, (exclusive of storage,) $2,673,839 43—a gain, as compared with the previous year, of $22,693 91, or 0.86 per cent. Mileage of freight eastward, 71,912,049; do., westward, 38,251,562—total, 110,163,611.

The company have 99 locomotives, 63 first class, 9 second class, 2 sleeping, 24 baggage, 5 emigrant, 1 paymaster's, 26 drovers', 22 caboose, 233 stock, 965 box, 320 platform, 1 tool, and 3 wrecking cars.

Number of miles run by passenger trains, 863,077; by freight trains, 1,308,165; by wood and gravel trains, 216,156—total, 2,387,398, an increase over the previous year of 1,205. Cost of repairs of engines per mile run, 10.16 cents.

President.—E. B. PHILLIPS.

Directors.—Jesse Hoyt, Henry Keep, Le Grand Lockwood, Albert Havemeyer, D. N. Barney, John P. Acker, Nelson Beardsley, William Williams, John S. Barry, Philo Morehous, E. B. Phillips, Albert Keep and Truman H. Hoag.

Treasurer.—LE GRAND LOCKWOOD.

Secretary.—D. P. BARHYDT.

Gen'l Sup't—CHARLES F. HATCH.

Union Pacific Railroad.

The Secretary of the Interior has submitted to the President the report of the Government Commissioners on the additional section of twenty miles of the Union Pacific Railway recently forwarded to the department, stating that the road is ready for present service and recommending the issue of bonds and patents to the company on account of said section agreeable to law. The President has accepted the report and recommendations and directed the Secretary of the Treasury to carry them into effect.

☞ Another section of twenty miles of the Union Pacific Railroad, Kansas Branch, has been completed, and commissioners have gone out to examine it. This finishes the track to the three hundred and eightieth mile post.

☞ Capt. A. W. Eichelberger has been re-elected President of the Hanover Branch Railroad Company. The stockholders have resolved to subscribe $20,000 to the stock of the Frederick and Pennsylvania Line Railroad Company.

Commerce of New York.

The foreign imports at New York for the month of April, are officially stated as follows:

	1867.	1868.
Entered for consumpt'n.	$10,800,747	$9,652,649
Do. for warehousing	13,327,839	10,780,668
Free goods	1,232,997	964,488

☞ A company has been organized in Washington Territory to build a railroad from Walla Walla to Portland.

Railroad and Steamboat Connections at Albany.

The following is a copy of an act passed by the Legislature of New York on the 4th of May, 1868, the object and intent of which is to compel railroad companies whose roads terminate at Albany or Troy, (except the Hudson River and Harlem railroads) to furnish the same facilities to passengers, baggage and freight received from or to be transported by steamboats on the Hudson River as is afforded the same if received from or to be transported by railroad:

SECTION 1. The proprietors of any steamboat, or line of steamboats, navigating the Hudson river, are hereby authorized and empowered to furnish tickets, upon being paid therefor, for the transportation of passengers from any station on the line of any railroad terminating at the city of Albany or Troy, for the conveyance of such passengers from the city of Albany or Troy to the city of New York on their said steamboats. On such tickets being furnished to any such railroad company it shall be their duty to require their ticket agent, at any station on the line of their road, to sell such tickets, and to any passenger who shall make application therefor, at a price which shall be equal to the amount of fare charged upon such road to the city of Albany or Troy, with the addition of such price as shall be fixed by the proprietor of such steamboat for the transportation of such passenger from Albany or Troy to New York.

SEC. 2. The proprietors of said steamboat, or line of steamboats, are also authorized and empowered to furnish baggage checks for the transportation of any passenger's baggage through to the city of New York by the way of their said steamboats, and on such checks being furnished to the baggage-master, at any station on the line of said railroads, it shall be his duty to check baggage on the application of any passenger through to the city of New York, which baggage, on its arrival in the city of Albany or Troy, shall be delivered up to the authorized agent of any steamboat, or line of steamboats, to be transported from the railroad to the steamboat, on which such passenger contemplates going, without the check being removed from such baggage. And said baggage shall be transported from railroad station to steamboat landings, and from steamboat landing to railroad station, by said steamboat owners, free of charge.

SEC. 3. It is hereby made the duty of every railroad company, which terminates at the city of Albany or Troy, on application being made therefor by the proprietor of any steamboat, or line of steamboats, navigating the Hudson River, to furnish them with tickets for the transportation of passengers from the city of Albany or Troy to any point on the line on their respective roads, to be sold by such steamboat proprietors in their respective offices, and to receive and transport the baggage of any passenger which shall be checked through to any point beyond the city of Albany or Troy; such tickets to be sold and paid for to the railroad or steamboat company, which shall furnish the same at the price charged by such company for the conveyance of such passenger to the place which such ticket purports to carry him. The object and intent of this act being to compel railroad companies to furnish the same facilities to passengers going to or from the city of New York by boat as is afforded those who go by the railroad.

SEC. 4. If any freight shall be delivered at any station on the line of any railroad which terminates in the city of Albany or Troy for transportation to the city of New York, which is marked to go to New York via boat, or any particular line of boats, it shall be the duty of the railroad company to whose agent such freight shall be delivered, to receive the same and transport it with all convenient speed to the city of Albany, and on its arrival, the company over whose road the same has been transported, shall forthwith cause to be notified the agent of the steamboat line by which it is directed to be sent, and shall deliver the same to such agent with the bill of charges thereon due such railroad company, for the payment of which charges the proprietor or proprietors of such steamboat line shall be responsible. But the railroad company transporting such freight shall not charge for its transportation over its road, any greater sum than they charge for carrying the same kind of freight the same distance over their road if the same were transported from Albany or Troy to New York by railroad, and any freight delivered by the authorized agent of any steamboat or steamboat company, for transportation over any railroad, which shall have been brought from New York by boat, shall be transported by such railroad company to its place of destination for the same price as it would be if brought from New York by railroad.

SEC. 5. Any railroad company in this State, whose agent or servants shall neglect or refuse to sell tickets or furnish a check, as is provided for in this act, when the same shall have been furnished them, shall be liable to the same penalty as is provided for in section thirty-seven of the act passed April second, eighteen hundred and fifty, entitled "An act to authorize the formation of railroad corporations and to regulate the same," and no fare or toll shall be collected or received from any passenger whose application for such ticket or check shall have been refused, for riding over the road of said company, and in addition thereto, the said railroad corporation shall be liable to a penalty of two hundred and fifty dollars, to be recovered in the name of the proprietor or proprietors of any steamboat or steamboat line navigating the Hudson River, in any court of competent jurisdiction, for each day they shall neglect or refuse to comply with the provisions of this act, unless such neglect or refusal is caused by a failure on the part of such steamboat proprietor or proprietors to furnish tickets and checks as herein provided for.

SEC. 6. The provisions of this act, so far as relates to the sale of tickets and furnishing of checks, shall not apply to either the Hudson River or New York and Harlem railroad companies.

SEC. 7. This act shall take effect immediately.

Liability of Railroad Companies in Pennsylvania for Injury and Loss of Life from Accidents.

An act relating to railroad companies and common carriers, defining their liabilities, and authorizing them to provide means of indemnity against loss of life and personal injury.

Be it enacted, &c., That when any person shall sustain personal injury or loss of life while lawfully engaged or employed on or about the road, works, depots and premises of a railroad company, or on or about any train or car therein or thereon, of which company such person is not an employee, the right of action and recovery in all such cases against the company shall be such only as would exist if such person were an employee. *Provided*, That this section shall not apply to passengers.

SEC. 2. That in all actions now or hereafter instituted against common carriers or companies owning, operating or using a railroad as a public highway, wherein steam or other motive power is used, to recover for loss and damage sustained and arising either from personal injuries or loss of life, and for which, by law, such carrier or corporation could be held responsible, only such compensation for loss and damage shall be recovered as the evidence shall clearly prove to have been pecuniarily suffered or sustained, not exceeding, in case of personal injury, the sum of $3,000, nor in case of loss of life the sum of $5,000.

SEC. 3. That it shall be lawful for such carrier or corporation to insure the lives and persons of passengers against loss or injury from accidental causes, and however happening, while in their charge, and for that purpose to issue and sell to such passengers applying for the same, tickets or

policies of insurance, specifying the name of the insured, the premium charged, the particular trip, or time covered by the policy, and the amount insured, not exceeding (except at the option of the said carrier or corporation) the sum of $25 for each week of disability, for a period not longer than twenty-six weeks, in case of personal injury; not more than $10,000 in case of death, and all premiums so received shall be kept separate and apart from the other receipts of said carrier or corporation, and shall not be liable for any other claim, debts or demands against such carrier or corporation than those arising out of said policies, and the amount of said premium; and the securities in which the same are invested for the benefit and protection of such policy-holders shall be reported to the Auditor-General annually as a part of the operations of such carrier or corporation as is now provided for by the act entitled "An act to require railroad companies to make uniform reports to the Auditor-General," approved April 4, 1859. Provided, nevertheless, that it shall be lawful for any such carrier or corporation, in lieu of issuing tickets as aforesaid, to keep on sale at their ticket office the policies of insurance or indemnity against personal injury or death resulting from accidental causes, issued by insurance companies incorporated for any such purposes as shall have an actual *bona fide* cash capital invested in securities approved by the Governor, State Treasurer and Auditor-General of this Commonwealth of at least $200,000. *Provided*, That a recovery upon any policy issued or sold under the provisions of this act shall be no bar to a recovery under the provisions of the second section of this act.

SEC. 3. That all acts or parts of acts inconsistent herewith, be and the same are hereby repealed, and any provisions in the acts incorporating such common carriers or corporations inconsistent herewith, shall be repealed upon the acceptance of the provisions of this act by such carriers or corporations, and upon the acceptance of the provisions hereby by any carrier or corporation, the same shall become a part of its act of incorporation.

Approved the 4th day of April, 1868.

JOHN W. GEARY, Governor.

The American Iron and Steel Interest.

A correspondent of the Philadelphia *Ledger* (D. D.) in a recent letter to that paper from Washington says:

A third effort is now being made to repeal that clause in the Pacific Railway law which requires the constructors to use American iron exclusively. Five Pacific Railway corporations have received from the National Government grants of land and loans of bonds amounting to about one hundred and twenty millions of dollars to aid the construction of their roads, on condition, among others, that none but American iron or steel shall be used.

Senator Pomeroy, President of one of the corporations made an effort in the Thirty-eighth Congress to have the clause repealed, that they might import all the iron used if it was thought expedient. Senator Sherman made a similar effort in the Thirty ninth Congress, but both failed.

Joint resolution 263, which has passed the House, and has just been referred to the Senate Pacific Railway Committee, aims at the accomplishment of the same purpose, in part. It declares that the law "shall be so construed as to make it necessary to use *American* iron only for all nails, chairs, fish-bars, bolts and spikes," leaving the corporations at liberty to import the rails and other iron for the roads for their entire rolling stock, and all their Bessemer or other steel, for any purpose, including rails.

Parties in the interest of this resolution, having thus procured, it is thought, the silence of the nail, chair and spike manufacturers by an exception in their favor, will be able to carry the day against the rolling mills that make rails and other railroad iron and the entire Bessemer steel interest this time. Next session a resolution, permitting the importation of the articles exempted now, can be introduced, and if adopted, the whole object will be accomplished by piece-meal.

Pittsburg and Connellsville Railroad.

A called meeting of the stockholders of this road was held in Pittsburg on the 16th inst., for the purpose of voting upon the adoption or rejection of the ordinance recently passed by the Baltimore City Councils, authorizing "the renewal and extension of the mortgage due the city of Baltimore by the Pittsburg and Conellsville Railroad Company, and to fund arrears of interest due thereby," together with the supplement thereto. W. O. Hugart, Esq., President of the company, after explaining the provisions of the ordinances, alluded briefly to the difficulties which had been encountered by the company, the litigations to which it had been subjected, the efforts to obtain the repeal of oppressive legislation, and the success which had crowned these efforts. He referred to the action of the Baltimore Councils, and stated that in all the efforts put forth by the company not one dollar had been expended otherwise than in a legitimate manner. He alluded in most encouraging terms to the future of the company, and stated that the work would be commenced at an early day on a financial basis that would not admit of a doubt that the entire road would be finished within two years. During the course of his remarks he also alluded to the negotiations now pending with other companies, and intimated that the only difficulty likely to arise, was from a claim by Allegheny Co., but that a proposition had already been made for its speedy settlement. After the reading of the ordinance and the supplement thereto, the following resolution was adopted unanimously:

Resolved, By the Stockholders of the Pittsburg and Connellsville Railroad Company in general meeting assembled. That the provisions of an ordinance of the Mayor and City Council of Baltimore, entitled "An Ordinance for the renewal and extension of the mortgage debt due the city of Baltimore by the Pittsburg and Connellsville Railroad Company, and to fund arreas of interest due thereby," and the supplement thereto approved on the 5th day of May, 1868, entitled a "supplement to an ordinance, passed on the 13th day of March, 1868," entitled "an ordinance for the renewal and extension of the mortgage debt due the city of Baltimore by the Pittsburg and Connellsville Railroad Company, and to fund arreas of interest due thereby," be and the same are hereby accepted, according to the tenor of the ordinances aforesaid, and that the Directors of this Company be and they are fully authorized to do whatever may be necessary to give full effect to the provisions of said ordinances, and to agree with the Trustees named in said ordinances, or with the majority of them, upon the terms, time and manner in which the bonds of the company, for four millions dollars, shall be issued, and to execute, acknowledge and deliver to the said Trustees, or to the majority of them, the deed of trust therein provided for, to be delivered to the Trustees named therein; it being, however, expressly understood that no bond shall be issued, which, in addition to the signatures of the President and Secretary, shall not be countersigned by the said parties of the second part, or a majority of them.

The Adirondack Railroad Company of this State propose to make an early extension of their road from Saratoga Springs to the St. Lawrence River or Lake Ontario. Twenty-five miles are now built and in operation from Saratoga to Luzerne.

Brooks' Patent Paraffine Insulator.

The Director General of French Telegraphs, desiring further improvements in the telegraphic material in use in that country, some time ago appointed a commission specially charged with the selection of the best kind of insulator for adaptation to the French telegraphs. Having completed their examination we learn that choice has been made of an insulator invented by Mr. David Brooks, of Philadelphia. This insulator consists of an iron hook, for holding the wire, cemented in an elongated glass vase, the latter being cemented in a hollow cast cylinder. All parts of the apparatus susceptible of absorbing paraffine, are saturated with that substance which is now known to stand first among insulating bodies. The French Government has sent to the inventor a delicate differential galvanometer of 40,000 involutions, to test the insulators he is engaged in making for their telegraph line, and specimens of all the insulators from every part of Europe offered in competition before the Commission.—*Scientific American, March* 21.

Pennsylvania Railroad.

The Philadelphia *Ledger* denies, by authority, the statement which originated in the Cincinnati papers, that this company "has recently purchased various railroads west of Pittsburg to Chicago and St. Louis." The Pennsylvania Company, it says, has not recently made any such purchase, though it has for years had control of the greater part of the roads enumerated, by holding control of the majority of their stock. Last Fall the Pennsylvania Railroad Company bought at sheriff's sale the Pittsburg and Steubenville Railroad, and now, under the consolidated title of the Pittsburg, Cincinnati and St. Louis Railroad, the Pennsylvania Railroad Company controls unbroken connection from Philadelphia to Chicago and St. Louis. The recent proposition of the company to sell new stock has not anything to do with the alleged purchase of Western Railroad connections, as some supposed on reading the announcement made in the Cincinnati papers.

Large Wire Rope.

The largest, longest and heaviest wire rope ever made in one piece, for an inclined plane, has just been completed at the works of John A. Roebling, at Trenton, N. J. It is intended for Plane No. 2 of the Lehigh Coal and Navigation Co., located at the north slope of the Wilkesbarre Mountain, in Hanover Township, Luzerne County, for the purpose of lifting coal out of the Wyoming Valley. The load hauled up each trip, consists of 10 coal cars, weighing 30 tons, laden with 55 tons of coal, making a total weight of 85 tons. Speed of rope, 9 miles per hour; inclination of plane, 14 feet 8 inches in one hundred feet. The length of this wire rope is 3,700 feet; its diameter over 2½ inches, and weight 20 tons net.

Tax on Manufactures.

In reply to the question whether those who have paid a tax as manufacturers are again required to pay on the *same goods* an additional tax as wholesale dealers, the Internal Revenue Commissioner replies, that if manufacturers sell their own goods at the *place* of manufacture they are liable for manufacturer's tax only, on such sales. But if they sell such goods at places other than the place of manufacture, they would be required in addition to the manufacturer's tax of $2 on each $1,000 of sales to include such sales with other goods which they may sell, not of their own manufacture, and pay the dealer's tax thereon.

RAILROAD AND CANAL DIVIDEND STATEMENT.

American Railroad Journal.

Saturday, May 23, 1868.

Stock Exchange and Money Market.

Money has been in better supply, during the week. The offerings toward the close have been largely in excess of the requirements of street borrowers. Lenders have found much difficulty in placing balances advantageously at recent rates. The tendency has been decidedly toward lower figures. The banks have been more liberal of aid to responsible applicants; but have been met by a rather sharp competition for custom by private capitalists, thus giving borrowers any existing advantage. The city banks, last week, made a further addition of over two millions of deposits, and of $71,258 to their legal tender; while they reported a loss of $647,768 in specie. A small increase of the cash reserve of the Sub-Treasury was also noted, on an unusually heavy business, in the line of receipts and disbursements. The Office converted $5,040,850 of 7.30 per cents into 5-20s of 1867, and exchanged $13,605,000 of the new 3 per cent. certificates of deposit for Compound Interest Notes of May 15, now due. Call loans closed on Wednesday in the open market at from 4@6, generally at 5; and choice to prime discounts at from 6@7 per cent. per annum. At even these modified figures, lenders were not able to find controlable employment for their available balances, and were consequently making liberal investments in the public funds. The banks were free buyers of National coin bearing bonds, partly on account of country correspondents, who were induced to use their surplus means, in this way, by the anticipation of an early and decided rise in values.

The specie reserve of the city banks is now $20,939,142, against $15,567,252 same time last year. The city bank deposits are now $201,313,305, against $201,436,854 week ending May 18, 1867. The legal tender reserve amounts to $57,613,095, against $63,828,501 same time last year. The circulation now stands at $34,193,249, against $33,632,301 same time last year. The loans are now $267,724,783, against $247,961,874 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $80,031,000 a day, against a daily average of $84,504,761 the preceding week, and $98,119,650 the week ending with May 2, 1868. The current week's exchanges average about $84,008,500 a day. The city banks, last week, gained $71,258 of legal tender, and $2,036,737 in the deposit line, while they lost $347,768 of their specie reserve. They increased their loans, $1,968,500; and reduced their circulation, $12,160.

The New York Gold Exchange Bank reports for the week ending Saturday, the 16th day of May, 1868, the average amount of loans and discounts as $1,164,133; average amount of specie, $1,164,031; average amount of deposits, $1,668,413.

The Philadelphia Bank movement the past week shows a decrease in loans of $277,211; a decrease of $14,253 in specie; an increase in legal tenders of $215,528; an increase of $12,467 in deposits; and an increase of $3,610 in circulation. The Bank Clearings show a decrease of $5,660,167, and the balances, an increase of $479,109.

The U. S. Sub-Treasury receipts, week ending with May 16, were $30,149,016, including $2,402,484 from customs duties; payments, $30,085,338, including $2,410,000 of coin interest; balance at the close of the week, $101,878,870, against $101,815,192, at the close of the preceding week, showing an increase of $63,678. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $8,368,970 including $414,698 from customs; and payments, $6,965,925; on Tuesday, receipts, $3,865,350 including $410,410 from customs, and payments, $4,928,578. The balance at the close of business on Tuesday stood at $100,718,749, against $101,748,719, a week previous; and $99,866,825 on May 5, 1868.

National Bank notes to the amount of $107,320 were issued last week, making the total issue to 1,673 banks thus far, $307,722,271, against $282,555,440 at the close of the fiscal year ending

June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $8,000,446, leaving, with the existing 1,639 banks, (having an aggregate capital of $420,221,210,) an actual circulation at this date, of $299,721,825. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,391,000; and for the public deposits, $38,294,950—making a total of $379,685,950. The Treasury Department last week redeemed and destroyed $397,800 of worn and mutilated fractional currency, and issued $169,218 of new. The outstanding amount of fractional currency on the 1st inst. was $32,450,489, against $32,588,690 on the 1st of April, and $32,307,947 on the 1st of March 1868.

The U. S. Sub-Treasury commenced on Friday last, May 15, exchanging new three per cent. certificates for matured May, 1865, Compound Interest Notes, the outstanding amount of which was, at date of latest official report prior to May 15, $23,927,000. Of this amount some 16 millions have already been exchanged through the U. S. Sub-Treasury, in this city, for new three per cent. certificates, and a trifling amount of currency, to adjust fractional balances, chiefly on interest account.

The Sub-Treasury balance at the close of April was $102,495,374, against $98,161,867 at the close of March. The office issued $10,309,121 of coin certificates, in April. The aggregate amount of the certificates outstanding on the 1st inst. was $19,357,900, against $17,742,060 on the 1st of April.

Government revenues have been up to a fair average, since our last. The excises, last week, yielded some four millions, against three millions the preceding week; customs at the port of New York, $2,402,484, and at the outports about $800,000 (in coin) more, making the grand total income for the week equal to about $8,480,000 in currency. The total receipts of the National Treasury, from excises, thus far in the new fiscal year, which began on the 1st of July, have been about $170,000,000.

Government received from customs, through the port of San Francisco, from Jan. 1, to April 29, 1868, $2,664,138, against $2,412,979 same time last year.

Gold has been moderately active all the week at from 139⅛@140⅛, the latest dealings having been at 139¾@139⅞ on Wednesday. The earlier operations were influenced by the conflicting dispatches, relative to affairs at the National capital. The verdict of acquittal of the President, as announced on Saturday, weakened the speculation. Subsequently, the augmenting export drain tended to strengthen the price, and the market wound up on Wednesday quite firm, and rather buoyant. The specie exports on Tuesday and Wednesday exceeded 1½ millions. Government was a seller of Gold, on most of the business days of the week.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $2,975,580, against $1,025,521 same time last year. The customs demand for Gold last week, averaged $400,414 a day; thus far, this week, it has been equal to $412,000 a day, or equal to a weekly aggregate of $2,472,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $9,188, and from California, $1,170,271. The total customs revenue of the Government, in coin, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $100,781,621, against $110,817,216 same time in the preceding fiscal year. The total receipts of California gold at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $30,837,348, against $35,087,448 same time in the preceding fiscal year, showing a decrease of $4,250,100 in 1867–'68. The exports of specie from this port, last week, were $3,150,456, against $4,174,490 same week last year. The exports of specie, hence, since July 1, 1867, have been $57,316,606, against $32,364,879 same time in 1866–'7. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,410,000, and since July 1, 1867, $68,013,261, against $50,628,392 same time in 1866–'7. The specie exports from San Francisco, from Jan. 1, to April 29, 1868, were $13,149,821, against $11,448,650 same time last year.

Government has disbursed nearly 14 millions of coin interest through the local office, thus far in May.

Foreign exchange rallied a little prior to the closing of the foreign mails on Saturday and Wednesday, but the dealings in all classes of bills were on a very moderate scale and the market wound up on Wednesday quite dull and weak. Bankers' prime sixty day bills on London closed on Wednesday at 109⅞@110⅛, and on Paris to 5.16¼c.@5.12½; sight bills on London to 110¼@110½, and on Paris to 5.11¼c.@5.10. The offering of produce bills has been fair this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,035,781, against $3,982,664 same week last year; total, since July 1, 1867, $160,291,130, against $173,830,257 same time in 1866–'67.

Government securities have advanced ¾@1¼ per cent. since our last, influenced by the increasing ease in money, the diminishing offerings of the bonds and notes in the open market, and the notable improvement in the investment demand, on both home and foreign account. Foreign buyers are purchasing with more freedom, the earlier issues of the Five-Twenties, and also of the Ten-forty five per cents, for shipment to Europe, partly in response to direct orders thence, and partly on speculation. Hence orders run mainly on 1864 and new Five-twenties, which are relatively the cheapest of the public funds. Seven-thirties have been retired by the Treasury office at the rate of nearly 1½ millions a day, since our last, either by direct purchase, or more generally by conversions. The conversions of 7-30s, through the local office, thus far in May, reach about 11 millions. The Sub-Treasurer has also retired and cancelled, during the week, about 16 millions of May 1865 compounds, now matured and past due.

U. S. sixes of 1881 closed here on Wednesday at 114¾@114⅞; U. S. Five-twenties of 1862, 109⅝@109¾; U. S. Five twenties of 1864 at 108¼@101⅜; U. S. Five-twenties of 1865 at 108⅛@108¼; U. S. Five-twenties of 1865, consolidated, 110⅛@110⅜; U. S. Five-twenties of 1867, 110⅛@110⅜; U. S. Ten-forties at 104⅛@104¼, and U. S. Seven-thirties at 107⅞@108. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

August, 1865.... 118½	October, 1865.... 117½
September, 1865.. 118	

U. S. three per cent. certificates 100¼

Government paid off $215,400 of the matured loan of 1847–'67, in April.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 6.	May 13.	May 20.
Consols	94⅛	94⅜	94¾
U. S. 5-20's of 1862....	70⅝	70¾	71⅜
Erie	46	46¼	46⅜
Ill. Central	95¼	94⅞	95⅝

Railway and miscellaneous stocks have been generally stronger, and rather more confidently sought after, since our last. The dealings on Wednesday were on a moderate scale, and prices were somewhat irregular. The speculative temper of the market is not yet very positively displayed in any direction. Fort Wayne shares have been the favorites of the *bull* interest, and have exhibited decidedly more buoyancy. Railway bonds and mortgages have been in better request for investment purposes, the six per cent. coin bearing bonds of the Central, and the Union Pacific R. R. Co.'s, (both available for the present, at par and accrued interest since Jan. 1, calculated in currency,) taking the precedence of all others. The financial agents of both companies, Messrs. Fisk & Hatch of the Central Pacific, and Messrs. John J. Cisco & Son, of the Union Pacific, report largely augmented sales of these bonds, during the week, with a continued liberal influx of orders, especially from country bank and bankers, acting as distributing agents throughout the more settled and thrifty States.

General business has shown less activity in the produce line. Cotton, breadstuffs and provisions have been quoted cheaper. Middling upland cotton which sold early in the week up to 31½@32 cents, closed tamely and heavily on Wednesday at 30½@31 cents, per lb. The stock of cotton now here is estimated at about 72,500 bales. The receipts at the port this week, have averaged only about 1,200 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,104,000 bales, against 1,710,000 bales same time last year; exports, same time 1,570,000 bales, against 1,298,000 bales same time last year; stock on hand at latest dates, 187,000 bales, against 342,500 bales same date last year. At the Live Stock markets this week, Beeves have been moderately active, closing heavily at from 15@18½c. per lb.; week's receipts, 5,831. Veal calves in fair request at from 7@12c. per lb.; receipts, 1,700. Sheep and lambs in good demand at from 6½@10½c. per b.; receipts, 10,950. Swine plenty and heavy at from 8½@10c. per lb., all live weight; receipts, 22,507. There has been more activity in groceries, especially in sugars, with less doing in other commodities. The dry goods' trade has been particularly dull, and prices have been generally depressed. The total imports of foreign dry goods, last week, were $1,332,005, and the total amount marketed $1,324,528. The value of foreign merchandise imported last week, was $4,441,246—making the grand total specie value of last week's imports of dry goods and merchandise,

equal to $5,773,251, against $3,933,315, same week last year; total since July 1, 1867, $212,003,323, against $241,165,917 same time in 1866–'67. The freight market closed with more firmness on a fairly active business. For Liverpool we quote flour at 1s. 6d.@1s. 9d. by sail, and 1s. 9d.@2s. by steamer, per bbl.; grain at 4½@5d. by sail, and 5½@6d. by steamer, per bushel; cotton at $\frac{5}{32}$@$\frac{3}{16}$d. by sail, and $\frac{5}{32}$@$\frac{3}{16}$ by steamer, per lb.; and heavy goods at 15s.@35s. by sail, and 20s.@40s. by steamer, per ton. Total number of vessels in port on Wednesday 554.

The New York exports, exclusive of specie, for the week ending May 19th, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$3,982,664	$4,035,781
Prev. reported	75,155,956	65,112,464
Since January 1	$79,138,620	$69,148,245

The imports for the week ending May 16th, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$915,820	$1,332,005
Gen. merchandise	3,017,495	4,441,246
Total for the week	$3,933,315	$5,773,251
Previously reported	95,430,382	85,680,403
Since January 1	$99,363,697	$91,453,654

The balance in the Sub-Treasury on Wednesday was $101,537,424 80.

Schweitzer Patent Bolt Company.

This company is engaged in the manufacture of Iron Bolts, with machinery invented and patented by F. Schweitzer.

By a series of ingenious automatic movements, resembling those in making bolts by hand, these machines are made to produce with great rapidity bolts of a very superior quality. The heads are all as perfect as it is possible to make them by hand or otherwise, and uniform in shape and size.

The operation of heading is performed so quickly, that there is no change in the temporation of the iron during the process, and the upsetting and heading being done by compression, the iron near the head is made stronger than it was before.

The standard bolts are made from iron of a high grade, and all of them are warranted. Contracts for bolts used in the construction of railroads, bridges, etc., will be taken at special rates, and delivered without any delay.

The Company also offer for sale Bolt Cutters of their own patent, which with a given amount of power and labor, will cut twice the number of bolts of any other machine in use.

Orders may be addressed to the Company at their Works, Greenpoint, L. I., or to H. S. Terbell, President, 39 Walker street, New York, or T. S. Young, Treasurer, 120 Chambers street, New York.

Mont Alto Railroad.

A meeting was recently held at Chambersburg, Pa., for the purpose of awakening public interest in and securing subscriptions to a proposed railroad leading from that place to Waynesboro. The new road is to be called the Mont Alto Railroad, and its objects are to furnish railway connections to the Mont Alto Iron Company, as well as to develope valuable mineral resources and provide improved facilities for travel and transportation to several of the wealthiest townships of Franklin county. It will be about nineteen miles in length.

☞ The work of construction has been commenced upon the Lebanon and Pine Grove Railroad, at Lebanon. A large force will be put upon the road in a short time.

Railroad Earnings.—Weekly.

The earnings of the Atlantic and Great Western Railway for the first week in May, 1868, were $82,137 00
Corresponding week previous year... 103,828 00

Decrease $21,691 00

The earnings of the Michigan Central Railroad for the 2d week in May, 1868, were ... $77,758 74
Corresponding week of previous year.. 73,976 17

Increase $3,782 57

The earnings of the Chicago and Rock Island Railroad for the second week in May, 1868, were $68,900 00
Corresponding week of previous year.. 60,863 00

Increase $8,037 00

The earnings of the Western Union Railroad for the 2d week in May, 1868..... $12,668 37
Corresponding week previous year.... 11,746 88

Increase..... $921 49

The earnings of the Chicago and Northwestern Railroad for the 2d week in May, 1868. $269,970 15
Corresponding week previous year .. 198,558 36

Increase $71,411 79

The earnings of the Michigan Southern and Northern Indiana Railroad for the 2d week in May, 1868, were..... $82,921 00
Corresponding week of 1867..... 83,927 00

Decrease $1,006 00

The earnings of the Chicago and Alton Railroad for the 2d week in May, 1868.. $139,409 08
Corresponding period previous year . 166,395 26

Decrease $26,986 18

The earnings of the Detroit and Milwaukee Railroad for the second week in May, 1868 were $35,883 39
Corresponding week of 1867..... 33,384 25

Increase $2,449 14

Journal of Railroad Law.

INJURY TO ANIMALS—FENCING RAILROADS—SAFETY OF PASSENGERS—SIZE OF ANIMALS OF NO IMPORTANCE—ONLY QUESTION TO BE DETERMINED IS WHETHER THEY ARE LARGE ENOUGH TO THROW THE TRAIN OFF THE TRACK.

A very interesting case (The Indianapolis, Pittsburg and Cleveland Railroad Co. *vs.* Marshall, 27 Ind., 300,) has just been decided by the Supreme Court of Indiana, the opinion in which was delivered as follows by

ELLIOT, J.—This was a suit by Marshall against the railroad company to recover the value of eleven sheep killed by a locomotive and train of cars of the company, while running on the track of the railroad, said road not being securely fenced at the place where the sheep passed upon the road, and were killed. The railroad was constructed under a special charter, granted by the General Assembly before the passage of the act of 1853, "to provide compensation to the owners of animals killed or injured by the cars," &c., "of any railroad company in this State." Trial by the Court; finding and judgment for the plaintiff for fifty-five dollars. A motion by the defendant for a new trial was overruled, as was also a motion in arrest of judgment.

The case originated before a justice of the peace, and was appealed to the Circuit Court. The railroad Company is the appellant here. There was no evidence of any negligence or want of care on the part of those having charge of the locomotive and train. The record shows that evidence was given on the trial that "locomotives and cars, while in motion, cannot be thrown off the track by running over small stock, such as sheep, or hogs; that the wheels and machinery of a train will crush through all such animals, without being impeded in any degree, and without endangering the train."

It is claimed by the appellant's counsel, that as the appellant was incorporated under a special charter, in 1848, containing no provision requiring the company to fence its roadway, or in default thereof, making it liable, without regard to the question of negligence, to compensate the owners of animals which might be killed or injured by the trains of the company, the present enactments on that subject can only be sustained, as to the appellant, as a police regulation for the protection of human life, and not for the purpose of compensating the owner of the animals so killed or injured, and hence, that the law giving compensation for animals so killed or injured on railroads not securely fenced, cannot, as against the appellant, apply to all kinds of animals, but only to those of such size as, when run upon, or over, would be liable to endanger the train, or throw the cars off the track, and thereby endanger the lives of persons traveling on such trains; that, as the evidence in this case showed that no such danger could result from the presence of sheep on the track, the finding and judgment should have been for the appellant.

This is the only question in the case. It has been repeatedly held by this Court, that the act in question (Acts 1853, p. 113,) is in the nature of a police regulation, the principal object of which is the protection of the lives of passengers. This object is sought to be secured by making railroad companies whose roads are not securely fenced, liable for all animals killed or injured thereon by their trains, without regard to the question of negligence. This absolute liability is in the nature of a penalty for failing to fence their road. It presents an inducement to railroad companies to fence, by making it their interest to do so to avoid the penalty. If it be admitted that the law can only be sustained, as against the appellant as a police regulation, and that the presence of sheep on the track could not possibly endanger the lives of passengers, still the conclusion drawn therefrom by the appellant's counsel does not legitimately follow, and cannot be sustained. As a police regulation for the preservation of human life, it was competent for the law-making power to compel railroad companies to fence their roads by the imposition of any reasonable penalty that might be deemed necessary to accomplish the object. Indeed, no valid reason is perceived why they may not be prohibited from running trains on unfenced roads, if such a prohibition were deemed necessary. The penalty imposed by the present law is, that when their roads are not securely fenced, railroad companies shall be liable to the owner for the value of animals killed, or for the injury done them without regard to the question of negligence. No distinction is made as to the kind or size of animals; all are included, or at least, all that would be kept from the roadway by a reasonable fence. In the case at bar, it is not claimed that the road at the time, was securely fenced against animals of such size as if run upon, or over, would be liable to throw trains off the track, and thereby endanger human life, and without such showing, we think the company is not in a condition to present the question as to whether more is required.

The judgment is affirmed, with costs.

Illinois Central Railroad.

The statement of this Company for the month ending April 30, 1868, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	17,241.88 for	$168,009 37
Acres Int. Fund Lands sold	360.00 for	4,480 00
Acres Free Lands sold..	2,876.24 for	41,685 74
Total sales during month of April, 1868	20,478.12 for	$214,175 11
To which add Town Lot Sales		1,430 65
Total of all	20,478.12 for	$215,605 76
Cash collected in April.		$235,412 62

TRAFFIC DEPARTMENT.

Receipts from Freight		$260,167 00
do.	Passengers	127,228 74
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources.....	70,000 00
Total Receipts in April, 1868.....		$467,754 07
Total Receipts in April, 1867.....		$420,365 53
Estimated earnings in the month of April on the D. & S. C. R. R., not included above		$70,322 68

☞ The Milwaukee *Wisconsin* says Mr. Daniel S. Wells, of that city, has taken the contract for building the extension of the Yates City and Lewiston Branch of the Chicago, Burlington and Quincy Railroad, from Lewiston south. The extension is about 40 miles in length, and will be ready for the cars by the 1st of January next.

☞ Messrs. Bradford & Renick, 71 Broadway, N. Y., have for sale hackmatack, cedar, pine, hemlock and spruce Railroad Ties in any quantity. Also every description of Northern and Southern pine, oak and spruce for Railroad Cars, Bridges, etc. See Advertisement.

FOR SALE.

OFFICE OF THE TOLEDO, PEORIA AND WARSAW RAILROAD COMPANY, No. 28 EXCHANGE PLACE, NEW YORK, May 14, 1868.

NOTICE TO THE BONDHOLDERS AND shareholders of the Toledo, Peoria and Warsaw Railroad Company of Illinois. You are hereby notified that a meeting of the bondholders and shareholders of this Company will be held in this City on the 15th day of June next at the office of the Company, between the hours of 10 and 2 o'clock, to vote upon the question of the extension of the road from La Harpe to Burlington, Iowa, and from Warsaw to Quincy, Illinois, to connect with the Government bridges at those places, and to authorize the Board to contract for the building of the same, and to issue sinking fund bonds of the Company bearing interest at eight per cent., at the rate of fifteen thousand dollars ($15,000) per mile upon such extensions or branches for said purpose, or upon any other plan that may be presented you at said meeting for the purpose of raising the necessary funds for building the extensions, and upon any other subject that may be offered for consideration at said meeting.

Per order of the Board,
CHARLES L. FROST, President.

PENNSYLVANIA RAILROAD COMPANY, Treasurer's Department.

PHILADELPHIA, May 2, 1868.

NOTICE TO STOCKHOLDERS.—The Board of Directors have this day declared a semi-annual dividend of THREE PER CENT. on the Capital Stock of the Company, payable in cash, clear of National and State taxes, and a further dividend of FIVE PER CENT., payable in Stock, on and after May 30.

Blank powers of attorney for collecting dividends may be obtained at the office of the Company, No. 238 South Third Street.

THOMAS T. FIRTH,
8t21 Treasurer.

OFFICE PENNSYLVANIA RAILROAD COMPANY, Philadelphia May 13th, 1868.

Notice to Stockholders.—In pursuance of resolutions adopted by the Board of Directors at a stated meeting held this day, notice is hereby given to the Stockholders of this Company, that they will have the privilege of subscribing, either directly or by substitution under such rules as may be prescribed therefor, for Twenty-five per cent. of additional Stock at par, in proportion to their respective interests as they stand registered on the books of the Company, May 20th, 1868.

Holders of less than four Shares will be entitled to subscribe for a full share, and those holding more shares than a multiple of four shares will be entitled to an additional share.

Subscriptions to the new Stock will be received on and after May 30th, 1868, and the privilege of subscribing will cease on the 30th day of July, 1868.

The instalments on account of the new shares shall be paid in cash, as follows:

1st. Twenty-five per cent. at the time of subscription, on or before the 30th day of July, 1868.

2d. Twenty-five per cent. on or before the 15th day of December, 1868.

3d. Twenty-five per cent. on or before the 15th day of June, 1869.

4th. Twenty-five per cent. on or before the 15th day of December, 1869, or if Stockholders should prefer the whole amount may be paid up at once, or any remaining instalments may be paid in full at the time of the payment of the second or third instalment, and each instalment paid up shall be entitled to a pro rata dividend that may be declared on full Shares.

THOMAS T. FIRTH,
8t21 Treasurer.

THE

Schweitzer Patent Bolt Comp'y,

Works at Green Point, L. I.,

Near 10th St. Ferry, NEW-YORK.

H. S. TURBELL, President; *39 Walker Street, New-York.*
THOS. S. YOUNG, Treasurer, *120 Chambers St., New York.*

We are prepared to make and deliver

IRON BOLTS,

manufactured by Automatic Machinery in such manner as to increase the strength of the Iron beneath the head by compression, and totally avoid the weakening by crystalization, as in the case of Bolts made by hand or by any slow and protracted process. These Bolts are uniform in size and shape, and superior in strength and finish to any others made.

Standard Bolts will be made of the best quality of iron, and will be warranted.

The attention of

Railroad Companies, Bridge, Car and Locomotive Builders,

and of other works requiring Bolts of the greatest strength and uniformity, is specially called to these Bolts.

Contracts for Bolts used in the construction of Railroads and their appurtenances, and all similar work not requiring the best quality of iron, will be taken at special rates.

The rapidity of production will enable the Company to fill orders of any magnitude at short notice.

The Company also offer for sale

BOLT CUTTERS

of their own patent, which, with a given amount of power and labor, will cut twice the number of Bolts of any other machine in use.

In which the compound welds between the stem and flanges, which have proved so objectionable in the old mode of manufacturing, are entirely avoided. We are prepared to furnish ALL SIZES, at terms as favorable as can be obtained elsewhere. For descriptive Lithographs, address

The UNION IRON MILLS, Pittsburg, Pa.

THE UNION PACIFIC RAILROAD COMPANY

OFFER A LIMITED AMOUNT OF THEIR

First Mortgage Bonds

AT PAR,

PRINCIPAL AND INTEREST

PAYABLE IN GOLD.

The Great Pacific Railroad Line, extending 1721 miles from Omaha, on the Missouri River, to the tide waters of the Pacific Ocean, is being built by two powerful Companies—THE UNION PACIFIC, beginning at Omaha, building West, and the Central Pacific of California, beginning at Sacramento, building East, until the two roads shall meet.

Both Companies have prosecuted the work with great vigor, the Union Pacific having already expended over

THIRTY MILLION DOLLARS,

and the Central over *Twenty Millions*, upon their respective parts of the undertaking. THE UNION PACIFIC HAVE COMPLETED 550 MILES—have iron and other materials for two hundred miles more upon the ground, and one hundred additional miles are ready for the track. They will have a much larger force employed this year than ever before, and it is expected that between

800 and 900 MILES

will be in operation during 1868. There seems to be no reasonable doubt that the distance between Omaha and Sacramento will be traversed by rail in 1870.

The GOVERNMENT GRANTS 12,800 acres of land, and its Bonds to the average amount of $28,000 per mile to aid in the construction of the line, and authorizes the issue of the First Mortgage Bonds now offered for sale, to the same amount and no more. The Government takes a *second* lien, and gives to the First Mortgage Bondholders a prior lien for their security, to which a large paid-up capital is added. The Bonds cannot be issued except as each section of twenty miles is accepted by Government commission, so that they always represent a real property.

It is universally admitted that on the completion of the Union Pacific Railroad, its through business will make it one of the most profitable in the world—but its *way* or *local* business is already several times the interest on its bonds; so that, if not another mile were built, they would be a secure investment.

THE NET EARNINGS for eight months of last year on an average of 386 miles are officially reported at **$1,069,136**, while the interest on all the bonds it could issue on that length of road for that time, reduced to currency, was only $345,856.

The Union Pacific Bonds are for $1,000 each, and have coupons attached. They have thirty years to run, and bear annual interest, payable on the first days of January and July at the Company's Office in the City of New York, at the rate of six per cent. in gold. The Principal is payable in gold at maturity. At the present rate of gold, these bonds pay an annual income on their cost of

NEARLY NINE PER CENT.,

AND IT IS BELIEVED THAT THEY WILL SOON BE AT A PREMIUM.

The Company reserve the right to advance the price of their bonds to a rate above par at any time, and will not fill any orders or receive any subscriptions on which the money has not been actually paid at the Company's Office before the time of such advance.

Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,

AND BY

John J. Cisco & Son, Bankers, No. 59 Wall St.,

And by the Company's advertised agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised agents.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN*, and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

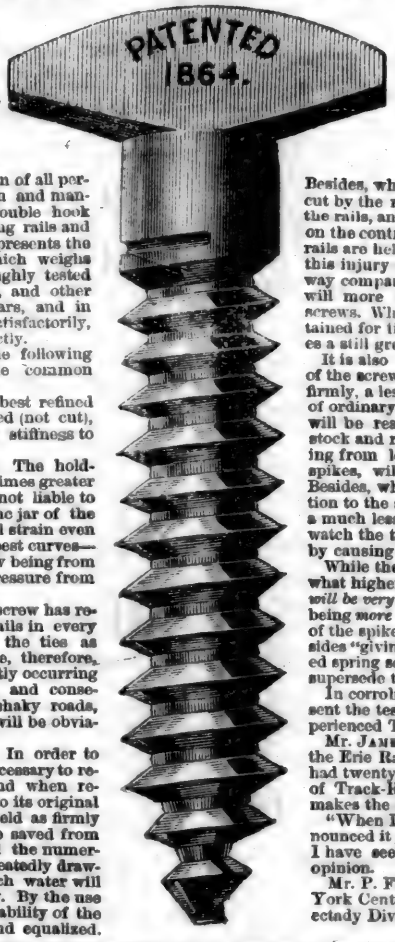
NO. 45 CLIFF STREET, NEW YORK,



MANUFACTURERS OF MONTIGNANI'S PATENT

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary

HUBBELL & VANHOESEN, Agents.

Works at

OSSINING,

Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented, Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERGNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

MERRICK & SONS,

SOUTHWARK FOUNDRY,

430 WASHINGTON AV.,

PHILADELPHIA,

MANUFACTURE

Steam Engines—High and low pressure, for land, river, and marine service; Horizontal, Beam, and Vertical. Patterns on hand for 8x10, 14x12, 18x12, Oscillating; compact and cheap.

SOLE MANUFACTURERS IN PHILADELPHIA AND CHESTER OF WILLIAM WRIGHT'S PATENT VARIABLE CUT-OFF STEAM-ENGINES.

Boilers—Plain cylinder, flue, and tubular.

Steam-Hammers, of Nasmyth & Davy patterns, with all the recent improvements.

WATCHES.

TIFFANY & CO.,

550 and 552 Broadway,

Solicit attention to their Timing Watches, known as the "TIFFANY & Co., TIMERS."

These watches, for Railroad, Engineering, Racing, Gunnery, and Scientific purposes, are superior to any yet offered, as the arrangement of the stop is such as to note time to the nicety of one-fourth or one-fifth of a second, in such manner as to prevent the possibility of error in the calculation.

The following named gentlemen, having bought "Timers" and found them to be perfectly satisfactory, have kindly allowed Tiffany & Co. to refer to them:

Amasa Sprague,	Joseph McPherson,	August Belmont,
Frank Squire,	Geo. G. Haven,	B. W. Gibbs,
J. C. Griswold,	B. H. Bixby,	O. N. Cutler,
Leon. W. Jerome,	George Osgood,	S. D. Bradford,
Wm. M. Ryedyk,	W. M. Tilden,	J. V. Brokaw,
Wm. F. Sherley,	A. P. Spencer, and others.	C. A. Grymes,

Tiffany & Co., have also a full assortment of watches of all desirable sizes and styles, of the same quality and finish as the first mentioned, in addition to their usual stock of Frodsham's and Jurgensen's.

Particular care and attention given to the repairing and adjusting of fine watches.

TIFFANY & Co., 550 and 552 Broadway. House in Paris, TIFFANY, REED & Co.

Their designs are entirely original and elegant, and their work has no superior. The use of the celebrated

BESSEMER STEEL,

for axles and tires upon all their work, is an important feature in its construction.

ANDREWS' PATENT

Smoke-Burning and Super-Heating Boilers,

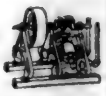
Are Economical of Fuel, and perfectly Safe.

HOISTING MACHINES,

Run without noise.

Drainage and Wrecking Pumps,

Pass Sand and Gravel without injury,



Capacity 100 to 40,000 Gallons per minute.

OSCILLATING ENGINES,

Run at great speed.

All light, compact, and durable.

Manufactured by

WM. D. ANDREWS & BRO.,

414 & 416 Water St., N. Y.

WILLARD FELT & CO.,

Stationers, Printers,

AND

BLANK BOOK MANUFACTURERS,

47 & 49 Liberty St., opp. Post Office, N. Y.

IMPORTERS & DEALERS

In Artists' and Engineers' Materials. Whatman's Drawing Paper; French, English and German roll Drawing Paper, white and tinted; Tracing Paper, in rolls and sheets; Tracing membrane; Tracing Vellum; Brown's, Hufty's and other Cross Section and Profile Papers. Profile Paper in continuous rolls; Water Colors; Lead Pencils; Field and Transit Books, &c., &c.

RICHARD B. OSBORNE,

CIVIL ENGINEER,

No. 219 South 4th St., Philadelphia,

Where Plans and Estimates of Work will be promptly attended to

Barometrical reconnoissance for Railway lines, Location and Construction of Railroads, and all duties required on Public Works in any State of the Union performed with fidelity.

Railroad Surveys from Milton, Pa., to the Ohio State Line.

PROPOSED RAILROAD ACROSS PENNSYLVANIA TO CONNECT THE RAILROADS LEADING FROM THE CITY OF NEW YORK INTO PENNSYLVANIA, WITH THE WESTERN ROADS IN OHIO.

We have received the Third Annual Report of the Chief Engineer of the Railroad Surveys from Milton to Franklin, in Pennsylvania, and to the Ohio State Line. These surveys were commenced on the Susquehanna, at the intersection of the Catawissa with the Philadelphia and Erie Railroad, twelve miles above Sunbury, the terminus of the Northern Central Railway. The line is carried upon the north side of the river to near Quinn's Run, passing the towns of Muncy, 16 miles from Milton; Montoursville, 24 miles; Williamsport, 26 miles; Linden, 35 miles; Jersey Shore, 43 miles; Charlton, 49 miles; Lock Haven, 55 miles, and Quinn's Run, 58 miles. At this point the line crosses the West Branch River, and follows up on the south side of that stream to the mouth of the Sinnemahoning, passing Tangascootac on the 62d mile, Glen Union 67th mile, and mouth of Sinnemahoning on the 93d mile. Here the river is crossed to the east side of the Sinnemahoning, and continues up this stream to a short distance below the mouth of Bennett's Branch, where the creek is crossed on the 106th mile, and the Bennett's Branch is crossed on the 109th mile. The line is then carried up that stream to its source in Sandy Ridge, which is passed on the 146th mile, by a tunnel 1,400 feet long, at an elevation of 1,456 feet above tide water. The line is then carried down the Valley of Sandy Lick Creek to Brookville, passing Shaffer's on the 151st mile, Rumbarger's on the 153d mile, Falls Creek on the 155th mile, Reynoldsville on the 162d mile, and Brookville on the 175th mile. From this point the line is carried by Clements' and Green's Runs to the head of Campbell's Run, when the divide between the waters of Red Bank and Clarion Rivers is passed; thence to Corsica on the 184th mile, and down Piney to the head of Brush Run at Waterson's road on the 189th mile. From this point to Milton the maximum grade is 26 feet per mile, and in the opposite direction 26 feet per mile for 141 miles, and from thence the maximum gradients are 40 feet per mile for 5 miles on Sandy Ridge, and 7 miles from Brookville to the Campbell's Run Summit. The line from the Waterson's road is carried down Brush Run to Piney, and down Piney to the Clarion River, passing Strattonville on the 192d mile, Clarion on the 195th mile, and Reidsburg on the 197th mile, and crosses the Clarion River on the 201st mile on the line to Franklin, thence up Canoe Run to its summit at Baums on the 213th mile, and thence down East Sandy to the Allegheny River on the 228th mile, and thence up the west side of the river to connect with the Franklin and Jamestown Railroad on the 231st mile, and with the Franklin Branch of the Atlantic and Great Western Railway at Franklin on the 232d mile from Milton.

The maximum gradients, are 40 feet per mile. The maximum curvature, is 6° per 100 feet. The total rise and fall, is 3,305 feet. The total amount of curvature, is 11,276°. The estimated cost, is $8,100,196 90.

The cost per mile for a single track of superstructure, with turnouts, sidings and water stations, with double track graded through tunnels, bridges, and heavy cuttings, is $34,914, 64. The line passes through the great mineral basin of Central Pennsylvania. For more than 100 miles the bituminous coal fields are continuous, and for 80 miles the coal can be delivered in the cars at the mines. Iron ore occurs in great abundance, associated with limestone. Petroleum occurs at the western end on the Allegheny, and it is argued that this road will become the main artery for the shipment of petroleum to the eastern seaboard, connecting with all the roads that centre in this great oil basin, it will afford the nearest and best route to the eastern market.

The route is through the lumber region of the State, and traverses the most extensive and fertile valleys of the mountains of Pennsylvania.

The connections and lateral roads are referred to at length. The Central of New Jersey and Morris and Essex, with their continuous connections, are presented with a route to the bituminous coal fields, petroleum basins, lumber regions and iron districts of the most superior character. The distance from New York to Milton, *via* New Jersey Central, Lehigh Valley, Nusquehoning and Catawissa is.....202 miles.

Do., *via* New Jersey Central, Lehigh Valley, Quaquake and Catawista.....211 "

Do., *via* New Jersey Central, Lehigh Valley, Port Clinton and Catawissa..... "

Do., *via* New Jersey Central, Lehigh Valley, Reading and Harrisburg.....252 "

Do., *via* Morris and Essex, New Jersey Central, Lehigh Navigation, Nesquehoning and Catawissa.....209 "

Do., *via* Morris and Essex, New Jersey Central, Lehigh Navigation, Quaquake and Catawissa .....218 "

Do., *via* M. & E., N. J. Central, Lehigh and Susquehanna and Catawissa ....249 "

Of the lateral roads, it is stated on the 19th mile from Milton, the Muncy Creek Railroad makes connection. This road runs to Laporte, 27 miles, where it will connect with the Sullivan and Erie Railroad, 34 miles from Towanda, or 61 miles from Muncy to Towanda.

On the 24th mile, a road is projected up the valley of the Loyalsock, 50 miles long, to connect with the Barkly coal road. On the 28th mile, at Williamsport, connection will be made with the Elmira and Williamsport Railroad, 78 miles long, which is a branch of the line from Rochester to Baltimore.

On the 45th mile will be a connection with the projected Jersey Shore, Pine Creek and States

Line Railroad. The distance from Jersey Shore to Tioga, on the Blossburg Railroad, is 79 miles.

On the 62d mile connections will be made with the Tangascootac coal roads, 12 miles to the Eagleton, 7 to the Black Heath, and 8 to the Tangascootac mines. On the 93d mile the contemplated Karthans Railroad, 25 miles long, will connect.

On the 105th mile, the Jersey Shore, Pine Creek and States Line Branch, 68 miles long, to connect with the main line at the Big Meadows. On the 109th mile connection can be made with the Philadelphia and Erie Railroad, 168 miles from Erie. On the 125th mile the great coal of the "Third Basin" will be reached by lateral roads. On the 153d mile, at Rumbarger's, the connections with Pittsburg by the Allegheny Valley Railroad Branch will probably be made, 55 miles to the Allegheny Valley road, or 252 miles from Milton to Pittsburg, with maximum gradients going from Pittsburg to Milton of 26 feet per mile. The carefully equated distances between Harrisburg and Pittsburg, *via* the Pennsylvania Railroad and this route is:

	Miles.
From Harrisburg to Pittsburg by the Pennsylvania R. R.	810
Do., by Bennett's Branch	549
From Pittsburg to Harrisburg by the Pennsylvania R. R	597
Do., by Bennett's Branch	440

On the 155th mile, at Evergreen City, the projected line from Buffalo to Pittsburg will find the best route through this part of the State. The route is remarkably natural.

Distance from here to Ridgeway, 30 miles, and to Pittsburg, 110 miles. On the 162d mile, Reynoldsville presents the greatest bituminous coal and iron veins in the State. The coal veins are 8, 10 and 11 feet in thickness, and the iron ore vein is said to be 39 feet thick.

On the 175th mile, at Brookville, several connections are contemplated. Pittsburg is but 87.5 miles from the points by a railroad location, and the line carried down the Red Bank to its mouth, and thence to the head waters of Slippery, Rock Creek, and down that stream. On the 195th mile connections will be made with the town of Clarion 2½ miles distant.

On the 201st mile the great main trunk line west, can be carried down the Clarion to the Allegheny River, 14 miles, down the Allegheny to Lewisburg, 3 miles, up the west branch of Bear Creek, 10 miles, to the summit of Slippery Rock Creek, and then down Slippery Rock Creek to its mouth, to connect with the Pittsburg, Ft. Wayne and Chicago near the Ohio State Line. The distances from New York to Chicago are as follows:

	Miles.
Via New Jersey Central, Nesquehoning, Catawissa and Bennett's Branch	901
Do., Philadelphia, Penna. Central, and Pittsburg, Ft. Wayne and Chicago	911
Do., N. J. Central, Catawissa, Bennett's Br., and Pittsburg, Ft. Wayne and Chicago	918
Do., N. J. Central, Catawissa, Bennett's Br., and Cleveland	918
Do., N. J. Central, Catawissa, Bennett's Br., and Ashtabula	927
Do., N. J. Central, P. & E. and A. & G. W.	957
Do., New York and Erie and Lake Shore	957
Do., New York and Erie and A. & G. W	984
Do., Harrisburg, Pittsburg and Columbus	974
Do., Harrisburg, P. & E. and Lake Shore	987
Do., New York Central and Lake Shore	1,000

The elevation at which the summit of the mountains is passed is stated as follows:

	Above tide.	Grades going West.	Grades going East.	Max. curvature.
Baltimore & Ohio.	2,620	116	116	18°
Pennsylvania	2,176	95	53	9° 30′
Sunbury and Erie.	2,006	102	58	8°
New York & Erie.	1,760	60	65	
Milton to Ohio line.	1,456	40	40	6°

The rise and fall in the Pennsylvania Railroad between Harrisburg and Pittsburg is.. 4,540 feet.
Do., *via* Bennett's Branch 2,930 "
Do., between Harrisburg & Lake Erie *via* Philadelphia and Erie 8,655 "
Do., do., Ashtabula *via* Bennett's Br. and Franklin 4,400 "
Do., New York and Lake Erie *via* New York and Erie 12,675 "
Do., do., *via* New York Central 11,200 "

The distance from New York to the great veins of the bituminous coal on Bennett's Branch, is 335 miles. This coal it is alleged can be delivered in New York at 1½ cents per ton per mile, or for mining and transportation less than six dollars per ton. The cars carrying anthracite coal to the lakes, can return loaded with bituminous coal for manufacturing iron, and for gas. The lumber that is now hauled a great distance to the streams will be sent by rail to its destination, and the whole country will become a vast iron manufacturing region.

It says "It should not be considered that this road is alone of local importance, whilst it claims to present unrivalled facilities for an immense amount of freights along the greater part of its line, its gradients and curves cannot fail to commend it for a first class line."

It is presented as the nearest, best, and safest route for the great through line between the east and the west, capable of being constructed to any desired capacity, and totally independent of all other lines between the points named.

The engineering has been prosecuted for three years, and great pains have been taken to perfect the line. A large portion of the road has been grubbed and cleared, and is now ready for grading.

The President's report does not appear with that of the Engineer, and we are not informed of the condition of the company's finances, or plan of obtaining funds to build the road.

The President is Reuben Winslow, Esq., of Lock Haven; and the Engineer, J. McMinn, Esq., of Williamsport, Pa.

White Mountain Railroad.

At the annual meeting of this company at Concord, N. H., on the 20th inst. the following Directors were chosen: John E. Lyon and Peter Butler of Boston, E. J. M. Hale, of Haverhill, Mass., J. P. Pitman, of Laconia, and Cyrus Eastman, of Littleton. The board organized by choosing Mr. Lyon, President, and Charles Lane, Clerk. The meeting was unanimous in opinion that immediate measures should be taken for the extension of the road.

☞ The grading has been finished on six miles of the Platteville and Calamine Railroad, in Wisconsin, and 20,000 ties are now on the ground. Cars will be running by July 4th, and soon sixteen miles of track will furnish direct communication with Milwaukee to the rich country in southwestern Wisconsin.

New York and New Haven Railroad.

The income of this company for the years ending March 31, 1867 and 1868, were as follows:

	1867.	1868.
From passengers	$1,612,638 25	$1,622,641 02
" freight	333,381 91	321,511 57
" express, etc	101,651 41	195,790 12
" mails	20,588 40	23,865 90
" other sources		54,700 54
	$2,068,260 05	$2,218,509 15

The expenses of 1867-'68, were:

Repairs of road	$241,677 47	
" bridges	14,730 92	
" buildings	29,741 34	
" engines	76,690 41	
" cars	118,608 57	
" tools, etc	7,006 27	
Fuel	101,043 15	
Oil, waste, etc.	22,226 21	
Haulage	71,943 05	
Legal expenses	26,915 02	
Damages	13,275 65	
Station labor and expenses, including loading and unloading freight	116,650 75	
General expenses	18,941 89	
Agents and clerks	44,702 07	
Train men	116,995 74	
Switch and signal men.	13,283 20	
Watchmen and porters.	17,863 85	
Rents	10,828 97	
Insurance	10,139 51	
All other expenses	4,163 58	
		1,077,427 62
Balance		$1,141,081 53
Deducting—		
Taxes	$145,212 71	
Coupon interest	64,425 00	
Loss operating Canal road	16,673 72	
		226,401 43
Net gain		$914,680 10
Less—		
Paid for new engines and cars to cover depreciation	$69,997 66	
New depots at Norwich & Stamford	44,228 62	
		114,226 28
Leaving for dividends and permanent improvements		$800,453 82

The resources for the past year and the disposition of the same have been as follows:

RESOURCES.

Cash on hand April 1st, 1867	$516,736 05
Proceeds allotted stock	1,000 00
Materials on hand April 1st, 1867	247,024 59
Earnings transportation	1,141,081 53
Total	$1,905,842 17

PAYMENTS.

Dividends, July, 1867, and January, 1868, 5 per cent. each	$600,000 00
Taxes	145,212 71
Coupon interest	64,425 00
Final settlement Schuyler fraud	109,125 70
Due from Wm. Bement, (former Treasurer)	88,255 05
Purchase of additional real estate	80,101 21
New depots, Stamford and Norwalk	44,228 62
Additional equipment to cover depreciation	69,997 66
Decrease in accounts payable	18,627 20
Retired bonds	17,000 00
Loss operating Canal road	16,763 72
Materials for coming season	274,934 71
Cash on hand April 1st, 1868	377,170 59
Total, as above	$1,905,842 17

The receipts of the past year show an increase over those of the preceding year of $150,249 10, and the transportation expenses, coupon interest, loss on Canal railroad, and taxes for the same time, show a decrease of $220,239 66. The President in his report says:

In the condensed balance sheet of last years' report it will be observed that profit and loss account stands credited with $934,587 52, but that $428,872 74 of that amount had been expended prior to that time for purposes of construction. For the purpose of simplifying the accounts and reducing construction account, profit and loss have been charged with said sum of $428,872 74, and construction has been credited with the same amount, thus making the cost of the railroad and equipment stand now on our books at the sum of $5,270,611 35, instead of $5,699,484 09, as per last year's report. There is a manifest propriety in thus reducing the cost of railroad and equipment, as during a series of years many charges have been made to construction account which ought more properly to have been carried to expenses, and more especially for the reason that it will be necessary hereafter to add considerably to the cost of the road in order to carry out the necessary additions and permanent improvements hereinafter referred to.

At the first meeting of the board of directors after the last annual meeting of the stockholders, Mr. Wm. Bement, late Treasurer, was by resolution of the Board removed from office, and was instructed to deliver forthwith all the property, moneys and effects of the company in his possession as Treasurer to Geo. B. Carhart, Esq., *pro tem.* Mr. Carhart immediately entered upon the duties of the office, and soon discovered that Mr. Bement failed to account for the moneys which had been received by him as such Treasurer, by the amount of about $88,255 05. A careful and thorough investigation of the books and accounts of the company was at once instituted, which resulted in no satisfactory explanation of the deficiency. Your directors thereupon commenced legal proceedings against Mr. Bement, which proceedings are now awaiting the action of the courts.

At the last session of the General Assembly of the State of Connecticut, a second attempt was made to secure a charter for the so-called Parallel Railroad, commencing in the town of Derby, and running thence westerly through the towns of Stratford, Bridgeport, Fairfield, Westport, Norwalk, Darien, Stamford and Greenwich to the New York State line, then to connect with another proposed railroad extending to the city of New York. The effect of such a railroad, if chartered and constructed, would of course very greatly depreciate the value of the property of your company. The application for said charter was therefore strenuously resisted, and after a long and tedious investigation the committee of the legislature who had the matter in charge reported unanimously in favor of giving the petitioners leave to withdraw.

The investigation before the legislative committee developed the fact that efforts to obtain a charter for a road parallel with the New York and New Haven Railroad, and only about half a mile distant therefrom on the average, originated not so much from any public necessity for another railroad, as from complaints in regard to the existing road.

Your directors are aware that true policy requires that all the just and reasonable demands of the public should be met in a liberal spirit, and that every facility should be extended to the traveling public consistent with a due regard for the interests of the stockholders.

While the company was laboring under the embarrassments consequent upon the fraudulent over-issue of stock by Robert Schuyler, the finances were not in such a condition as to warrant any outlays of money, except such as were absolutely necessary. Those embarrassments having been removed, and the earnings of the company having reached such a point as to justify it, true policy now requires that this road, occupying the important and commanding position which it does as the great trunk line between New York city and the New England States, should be provided with as little delay as possible, with the smoothest track, the best equipment and conveniences for transacting its business of any road in the country.

Improvements tending to this end have already been commenced, and with the approval of the stockholders will be carried forward with all reasonable dispatch. The passenger depot at New Haven has been materially improved during the past year, and new and commodious depots completed at Stamford and Norwalk. Four new first-class locomotives and fifty odd freight cars have been added to the equipment. About twenty acres of land have been purchased in New Haven, upon the southerly side of the railroad and bordering on the west side of the harbor, to be used for new shops—the present shops and grounds being entirely inadequate for keeping up the necessary repairs of the equipment. Ten additional first-class passenger cars have been ordered and are to be delivered within a few weeks. The construction of a new double track bridge, with an iron draw, across Bridgeport harbor, has been commenced and will be completed during the present season. It is proposed also to make a double track through that part of Bridgeport where there is now only a single track, and thus avoid the numerous and vexatious delays which are occnrring daily to our trains at that point.

The subject of steel rails has also received special attention, and, after a careful investigation of all the points involved, it has been determined hereafter to make all renewals of track, with steel rails only; 2,600 tons of Bessemer steel rails have been contracted for on account of renewals for the present year, and will all be in the track within a few weeks.

During the past year considerable attentiou has been given to the subject of heating and ventilating passenger cars, and has resulted in the adoption by the company of an improved method of heating invented by Wm. C. Baker. This improvement has been subjected to a thorough test on several of our cars during the last severe and trying winter, and has given perfect satisfaction to passengers and to the company. It is proposed to apply this improvement to all the passenger cars of the company by the commencement of next winter.

Several of the depots on the line of the road are now entirely too small to properly accommodate the increased business of the company; these will from time to time require to be enlarged and improved.

During the winter and early spring months the road bed is rendered very uneven by the action of the frost in many places, and the wear and tear to the rails, cars and engines is thereby very much increased. To remedy this it will be necessary to deepen many of the side ditches and to ballast a portion of the road bed with good, clean gravel.

These and other minor improvements will necessarily require a considerable outlay of capital, but will enable your officers to reduce the running expenses, add to the capacity of your road, increase the speed of your trains, and satisfy all the just and reasonable demands of the public. It is the purpose of your directors to hurry forward these improvements with all proper dispatch, feeling, as they do, that every advance made and every reasonable improvement inaugurated which adds to the comfort and convenience of the traveling public, will result in increased business to the road and add to the profits of stockholders of the company.

It would be manifestly unjust to the present stockholders to apply the earnings of the company to carrying out all these proposed improvements; it has been deemed advisable, therefore, to apply to the Legislature of Connecticut for authority to increase the capital stock of the company to an amount sufficient to meet the expenses which may be incurred by such of the proposed improvements as cannot properly be charged to current expenses.

The Legislature of the State of New York at its recent session passed a law authorizing the construction of an underground railroad, to be operated by steam, and to extend from City Hall Park, in the city of New York, to the upper part of the Island. This road is in the hands of some of the most able and enterprising men in the country, who are under a heavy pecuniary pledge to have it completed as far as Forty-second street within two years. This road will pass close to the passenger depot of this company, so that the facilities afforded to passengers traveling upon the New York and New Haven Railroad will be very much increased. With the Underground Railroad in operation, passengers can probably be transported from Forty-second street to the City Hall in about ten minutes' time. This, of course, must add materially to the business of our road, as well as to the prosperity of all the towns upon its line.

The company have 87 locomotives, 77 passenger, 24 mail and baggage, and 450 freight cars—of which there are in use on the Canal road: 6 locomotives, 6 passenger, 3 baggage and mail, and 150 freight cars. Miles run by passenger trains, 596,923; by freight and service trains, 185,765; by express freight trains, 44,835—total, 827,523. Number of passengers carried, 1,963,791; do., carried one mile, 67,095,092. Tons of freight moved, 109,025; do., moved one mile, 6,279,840. There have passed over the road during the year, 8,842 passenger, and 2,081 freight trains. During the past twelve years, 16,314,497 passengers have been transported over this road, without any accident to any train while on the N. Y. & N. H. R. R., that caused the loss of a single life or limb to any passenger so transported.

CONDENSED BALANCE SHEET.

Railroad, including the franchise, right of way, grading, masonry, bridging, fencing, superstructure, iron, station houses, shops, fixtures, machinery, engineering, interest, discount on bonds, &c....	$4,370,611	35
Loss by the Schuyler fraud (all settled)	1,772,868	60
Equipment: locomotives, cars, &c.	900,000	00
Real estate in the cities of New York and New Haven	176,346	87
Forfeited stock: allotments not taken	47,900	00
Due from Wm. Bement	88,255	05
Materials and supplies on hand	274,934	71
Cash in bank and due from agents, &c	377,170	59
	$8,008,087	26
Capital stock: 60,000 shares	$6,000,000	00
Bonds payable December 1, 1866; past due	3,000	00
Bonds payable October, 1875, interest at 6 per cent., coupons due April 1st, and October 1st, annually	1,059,500	00
Interest and dividends unpaid	88,330	00
Accounts payable: March pay rolls & balances due connecting roads	201,088	66
Profit and loss	706,168	60
	$8,008,087	26

President.—WM. D. BISHOP.

Directors.—Wm. D. Bishop, Bridgeport; George B. Carhart, George N. Miller, Abraham R. Van Nest, James J. Roosevelt, Wilson G. Hunt, New York; William W. Boardman, Ezekiel H. Trowbridge, New Haven; Jonathan Godfrey, Southport; Nathan A. Baldwin, Milford.

Treasurer.—JOHN T. SHELTON.

Secretary.—EDWARD I. SANFORD.

Superintendent.—JAMES H. HOYT.

Mont Cenis Railway.

The International Commission of the Mont Cenis Railway met at St. Michel on the 4th of May, for the purpose of making the trial trip over the new road. The train containing the members of the commission, and consisting of locomotive, tender, and three first class passenger cars, left the station at half past two o'clock in the afternoon, reached the tunnel at four o'clock, passed the night at Modena, started again at half past seven o'clock the next morning, stopping frequently by the way to inspect the works; and finally reached Susa, at the foot of the Italian slope of the Alps, by five o'clock that afternoon. The ascent and descent of the mountain grade were made in four hours and a half. The time occupied in this trial trip was, of course, much lengthened by the many stoppages and visits of inspection. Several freight trains will be run daily over the road during the next month, in order that a longer experience may secure safety for passengers; after which the regular passenger trains will begin to run each way several times a day.

Wilmington and Manchester Railroad.

The receipts from operations of this road for the fiscal years ending September 30, 1866 and 1867, have been as follows:

	1866.	1867.
From freight	$240,404 16	$255,087 87
" through pass	76,174 86	126,547 54
" way passengers	61,948 20	52,271 98
" Governm't transp.	5,319 09	5,885 50
" U. S. mail	18,494 02	17,100 00
" sales of old iron	29,719 10	6,395 73
	$432,059 43	$463,288 62

The operating expenses in 1866–'67, were:

Maintenance of way	$82.141 52	
Cars	17,272 09	
Motive power	49,285 13	
Conducting transportation	73,856 00	
General expenses	26,542 40	
Ferry	4,351 06	
	$253,448 20	
Deduct material on hand	4,300 00	
		249,148 20
Net earnings		$214,140 42

The earnings are $31,229 19 in excess of those of the previous year, while the operating expenses show a reduction of $30,367 68. The expenditures for reconstruction were $30,000, and for extraordinary, (including $7,848 32 for taxes,) $12,770 46.

Operative and reconstruction expenses the past year include not only what had already been expended, but also all debts contracted during the year. The President in his report says:

An examination of the reports and figures will show that the road has done a very good business, and has been skillfully and economically managed.

The present indebtedness of the company is a subject which merits and has received great attention. When the work of re constructing and re-equipping the road was commenced, the intention was to pay this indebtedness chiefly by the sale of bonds. Notwithstanding every effort has been made, we have not yet been able to negotiate all of our securities, and it is from this cause the company is now pressed for money. In this respect, however, the company is by no means peculiar or alone. In truth, our condition is only similar to quite all roads in the South, which were compelled to make outlays to any very considerable amount by the consequences of the late war. Railroad companies with bonds, in many instances better than our own, have been equally as unable to realize as much money as they needed from them. We feel justified in saying our experience in this respect has not been different from that met by railroad companies generally, South. The causes producing this have been beyond the control of all of us, and are chiefly political. Individuals, even in their private business, have met the same difficulties in raising money, and from much the same causes. Notwithstanding, however, all these obstacles, persistent and continued efforts were made to relieve us from embarrassment, and when we state we have at different times placed some $220,000 of our bonds and raised some $500,000 in money, you will see these exertions have not been in vain. In addition, we heve rearranged nearly all of our former bonded debt with accrued interest, covering transactions amounting to some $1,281,740 32. The present indebtedness of the company is by no means so large as to be beyond its management and control. We regard its debt as one which can be compassed without very great difficulty, though it may require some time to do so. It is true we now need money, but we know of but few corporations which are not in the same condition, and our impression is, our case is one susceptible of control and arrangement.

The following is a statement of the *actual debt* of the company:

Actual bonded debt now out		$1,550,740 32
Total floating debt, embracing that before the war, during the war, and since the war		731,767 06
Total actual debt		$2,282,507 38

The bonded debt is not troublesome. The floating debt is the one which enlists our special attention. This debt amounts, as above stated, to $731,767 06, as appears from the Treasurer's books. Of this sum $147,714 94 is in Confederate currency, and could, we think, be arranged for $15,000 in present currency. In the floating debt is also embraced $15,751 66, which will probably never be called for, as much of this sum has been standing on the books of the company since 1852, the creditors in some instances being dead and without legal representatives, and on other portions of it similar natural and legal disabilities exist. Under these circumstances we think it reasonable to state the *actual* floating debt of the company to be $568,297 46. Various modes might be suggested for its management and reduction, but as these would require much detailed explanation, it is probably best to leave the matter to the President and Directors for their control and adjustment.

The liabilities of the company are as follows:

Capital stock		$1,147,018 33
First mortgage bonds, divided as follows:		
First preference or series	$800,000	
Second preference or convertible	650,000	
Third preference	550,000	2,000,000 00
Second mortgage bonds		500,000 00
Floating debt		731,767 06
Total		$4,378,785 39

As stated above, the *bonded debt now actually* out is $1,550,740 32. The road being bonded for $2,500,000, leaves still in the hands of the company as an asset undisposed of $949,259 68. The greater portion of this sum is available to pay off the floating debt, if desirable. Our impression, however, is, the floating debt can be paid off without using this asset. The ability of the road to provide for the interest on its entire bonded debt, should it be deemed best to dispose of all its bonds, appears from the receipts and operating expenses of the year which has just closed. In the event all its bonds were sold, the interest account of the company would be $175,000 per annum. The net earnings this year were $214,140 42; it therefore appears it can manage a bonded debt of that extent on its present business. It is reasonable to expect an increase in its business, in which event the whole matter would be still more under control.

We submit in the next place the following facts and figures for your consideration:

Amount of old first mortgage bonds, due June 1st, 1866	$596,000
Interest due on same to June 1st, 1866	187,985
Amount of old second mortgage bonds, due June 1st, 1873	200,000
Interest due on same to May 1st, 1866	60,865
Amount of income bonds due March 1st, 1864	160,000
Interest due on same to Sept. 1st, 1866,	32,316
Bonds secured by pledge of W. & W. R. stock, due May 1st, 1865	75,000
Interest due on same to May 1st, 1866	13,125
Total old bonded indebtedness of the road	$1,031,000
Total interest past due on same	$294,291

This bonded indebtedness was created in the original construction of the road, and the past due interest accrued during the war, because of the impossibility of paying the coupons as they fell due, when held outside of the Southern States. To prevent confusion, you will please understand, when we state, as we do above, that the total bonded or funded debt of the company, *now actually out*, is $1,550,740 32, the above $1,325,291 is a part of, and included in it. As was reported to you at your last annual meeting, steps were taken in December, 1865, to rearrange and readjust all this old bonded debt of the company and its past due interest, and a statement was submited as to what progress had been made. We are pleased to be able to report additional progress, and to state that at present, of the original issue of $596,000 of old first mortgage bonds, all have been exchanged but $36,000; of the second mortgage bonds of $200,000, all have been exchanged but $9,000; of the issue of income bonds amounting to $160,900, all have been exchanged but $5,000; and of the bonds secured by pledge of Wilmington and Weldon Railroad stock, amounting to $75,000, all have been exchanged.

The cost of reconstructing, re-equipping and resuscitating the road up to this time has been $724,058 89. When it is remembered what condition the war left us in, and further, that there is embraced in this $724,058 89, all unsettled accounts of previous years, covering debts incurred before, during, and since the war, the amount will probably not appear large.

We are pleased to inform you that the business of the road, notwithstanding very decided reductions in both freight tariffs and passenger rates, shows a gradual increase. With certain modifications of passenger schedules, and some further extension of our through freighting arrangements, the revenue of the road can be considerably increased.

The company have 14 engines, 13 passenger, 4 mail and 1 baggage, 55 box, 61 platform, 7 shanty and 17 timber cars.

The number of through passengers carried was 23,037; do., local, 34,047.

The ordinary and extraordinary expenditures (including unpaid requisitions and bills of previous years,) for the year ending September 30, 1867, were:

Previous years	$136,086 96
Repairs of track	63,707 87
" bridges and trestles	23,696 41
" stations	35,409 87
" locomotives	23,271 69
" coaches and freight cars	18,422 71
Fuel	22,838 13
Oil, waste, etc.	6,354 31
Conductors, enginemen, firemen, etc.	43,264 95
Losses and damages	1,291 68
Ferry	4,630 46
Salaries, office expenses, printing, etc.	34,736 96
Total	$413,712 00

The following is an abstract of the Treasurer's

Exhibit, showing the business of the company for the year:

Cash on hand, Sept. 30, 1866		$2,838 72
Bills receivable "		8,814 51
Sundry balances due "		70,594 25
Sundry balances due, 1866 (C. S. currency)		73,866 20
Accounts credited profit & loss, Sept. 30, 1867		1,226 06
Earnings from transportation, as above		463,288 62
Received from sales of old rails		8,926 10
Increased liabilities this year, (including $300,740 32 interest on old bonds funded)		584,593 19
Total		$1,214,087 65
Paid on account of construction, reconstruction and equipment (including bills of previous year charged up)		$140,511 93
Expenses of road this year, etc., as above		413,712 00
Interest paid this year		146,250 05
Interest on bonds funded		300,740 32
Paid for surveys		141 50
Discount on bonds and notes sold		4,870 00
Bills receivable	$8,814 51	
Cash	10,305 61	
Sundry balances due Co.	104,533 03	
		123,653 15
Due in C. S. currency		73,806 20
Due from Florida R. R. Co.		10,402 50
		$1,214,087 65

The condition of the company from commencement to the close of the last financial year is shown in the annexed:

BALANCE SHEET.

Construction and equipment		$3,411,758 69
Paid for surveys		3,085 82
Cheraw and Darlington R. R. stock.		19,211 22
Wilmington and Weldon R. R. stock		201,500 00
Paid on account of interest		146,250 05
Interest on bonds funded		300,740 32
Bills receivable	$8,814 51	
Cash	10,305 61

" dividends 1861-'64		86,641 50
Profit and loss		811,305 62
Net earnings for the past year, after deducting all expenses of the present, and what is due to previous years		49,576 65
		$4,290,407 95

President.—HENRY M. DRANE.

Directors.—Jno. Dawson, Dr. A. J. DeRosset, O. G. Parsley, Henry Nutt, D. S. Cowan, Richard Bradley, J. Eli Gregg, Geo. J. W. McCall, Wm. E. Mills, James G. Burr.

Superintendent.—WILLIAM MCRAE.

Secretary and Treasurer.—WILLIAM A. WALKER.

Hazleton Railroad Company.

A meeting of this company was held in Philadelphia on the 22d inst., for the purpose of considering and acting upon an agreement for consolidating the company with the Lehigh Valley Railroad Company. The substance of the agreement is as follows: The directors of the Hazleton Railroad Company are to declare a cash dividend of 2½ per cent., or $1 25 a share, and the Lehigh Valley Railroad Company are then to exchange fifty-seven shares of their stock for every fifty shares of Hazleton stock, and in the like proportion for smaller amounts; that is, the Lehigh Valley Railroad Company are to pay a premium of fourteen per cent. in stock for the stock of the Hazleton Railroad Company.

By a vote of the stockholders, considering the agreement, the merging articles were agreed to; and a dividend of 2½ per cent. has been declared, payable on and after the 26th inst., on the presentation and surrender of their certificates for exchange for certificates of the Lehigh Valley Railroad Company.

Worcester and Somerset Railroad.

This road is designed to connect Newtown, Worcester Co., Md., with Westover station on the Delaware Railroad. A meeting of the friends of this project was held at Newtown on the 13th inst., and the *Gazette* of that place says that the subscriptions then obtained, united with those procured since, "secures the construction of the road beyond a doubt and an immediate organization of the company." The main purpose of the road is to attract northern and western emigration and to enhance the value of land, and subscriptions were greatly stimulated by statements in reference to tracts along the line of the Delaware Railroad which had been doubled, trebled and even quadrupled in value by its construction.

Somerset Railroad.

A meeting of the directors of this road, which is to connect with the Maine Central Railroad at Waterville, Me., was held at Anson on the 16th inst., at which all the directors were present for the organization of the company. Joel Gray was elected President, O. R. Batchelder of Solon, Clerk, and George A. Fletcher of North Anson, Treasurer. Measures were adopted for the survey of the whole line, and other measures were adopted for the purpose of filling up the subscriptions to the capital stock. The road is to be built for cash raised by subscriptions to the stock, which has a guarantee of 6 per cent. from the Maine Central Railroad Company, at a cost of $20,000 per mile. No mortgage is ever to be created, and the road not to be placed under contract until the subscription is filled to half a million of dollars.

☞ The Sheboygan and Fond du Lac Railroad is graded about thirteen miles west of Glen Bulah, and it is asserted that the cars will be running to within eight miles of Fond du Lac by the middle of July.

☞ It is expected that the track of the Boston, Hartford and Erie Railroad, between Putnam and Mechanicsville, will be ready for use in a few weeks.

☞ The Lehigh and Susquehanna coal trains made their first connection with the Central Railroad of New Jersey on the 4th inst.

Tredegar Iron Works, Richmond, Va.

We call attention to the advertisement, in another part of this issue, of the Tredegar Co., the Successors of J. R. Anderson & Co., long the proprietors of this establishment.

These Works have been in successful operation for over 30 years, manufacturing all the important articles required in the construction and maintenance of railroads, and for other important interests of the country.

The engines, both marine and stationary, built at these Works, have always taken high rank among other manufacturers. The Bar Iron, of which they have supplied large quantities to the United States Government, including the cable iron, for which they were Contractors for many years, has stood the highest tests to which any iron had been subjected, and always was considered among the best irons contracted to be furnished to the Government.

This company has lately patented and put in operation, the machinery for making the double continuous lip rolled chairs, of which they make several sizes, and those who have extensively used them and are competent judges, consider this the most perfect machinery for making chairs ever put in operation in this country, whether regard be had to the quantity manufactured, or to the perfection of the chairs. The railroad spikes furnished by this company, are manufactured on the Celebrated "Swett" machine, making a long chisel point, enlarged under the head for greater strength, entitling them to a preference over those made on other machines. In fine, all articles produced at these Works are of the best quality, and may be fully relied on as equal to any in the market.

Those in want of the products embraced in their advertisement, are invited to call at their office, No. 60 Broadway, or at the Works in Richmond, Va. The Vice President of the company, JNO. F. TANNER, Esq., who has been connected with the Works from their commencement, is in charge of the office in this city.

Cumberland Valley Railroad.

The managers of this road are busily engaged purchasing the right of way from this place, the present terminus of their road, to Williamsport, in this county. We are informed that they have been uniformly successful in securing rights of way. This extension we consider a very necessary one—one which will not only be a great source of revenue to the company, but will be of incalculable advantage to the citizens of that portion of the country through which it passes, as well as to the adjacent counties of Virginia.—*Hagerstown Free Press.*

☞ The Reading (Pa.) *Eagle*, of May 20th, says: "A corps of engineers are now running the course for a railroad up through the Monocacy Valley. They are running two courses at once—the one branching off at or near the confluence of the Lime Kiln Creek, following that valley. The contemplated road is to end near Lyon's Station, on the East Pennsylvania Railroad.

☞ The Manassas Gap Railroad is now running to Front Royal. The bridge over the South Branch of the Shenandoah is completed, the ties and rails are being laid, and remaining bridges under process of construction, and it is thought the road will be running to Newmarket in June, and its former western terminus, near Harrisonburg, by October.

American Railroad Journal.

Saturday, May 30, 1868.

Stock Exchange and Money Market.

There has been a notable accumulation of capital at this point, since our last, both at bank and in private hands, especially the latter. The demand for accommodation has not kept pace with the supply. Rates have yielded a point, and at the modified figures, lenders have not been able to find adequate temporary employment for their available balances. Loans have been made to the large dealers in the public funds at 4 per cent., as the rule, with exceptional advances as low as 3 per cent. on Wednesday. To the leading Stock Exchange firms, aid has been freely extended at 5 per cent. Very little fresh business has been transacted at any higher quotation. There has been a much more comprehensive inquiry for prime to good mercantile paper at from 6@7 per cent. per annum. The city banks have made an unexpectedly favorable exhibit in their last weekly report, which indicated a decrease of $343,504 in loans and discounts, $462,195 in specie, and $10,211 in circulation, with an increase of $1,194,215 in net deposits, and $4,619,907 in legal tenders. The banks now hold $62,233,002 of legal tender, against $50,833,660 six weeks since, or on April 18th, showing a gain of about 11½ millions. Their deposits are up to $202,507,550, against $179,851,880 on the 11th ult., showing a gain of nearly 23 millions in seven weeks, or over three millions a week. Their loans add up $267,381,279, or some 14½ millions more than they were on the 11th of April. The specie reserve is reported at $20,476,947, five weeks since it was only $14,934,547. The circulation has varied little in volume, thus far in the current calendar year. The U. S. Sub-Treasury balance was augmented $1,306,885 last week, on a very heavy business, both in the way of receipts and disbursements.

The specie reserve of the city banks is now $20,476,947, against $14,083,667 same time last year. The city bank deposits are now $202,507,550, against $193,673,345 week ending May 25, 1867. The legal tender reserve amounts to $62,233,002, against $60,562,440 same time last year. The circulation now stands at $34,183,038, against $33,697,253 same time last year. The loans are now $267,381,279, against $256,091,805 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $81,455,457 a day, against a daily average of $81,031,000 the preceding week, and $84,504,761 the week ending with May 9, 1868. The current week's exchanges average about $92,488,199 a day. The city banks, last week, gained $4,619,907 of legal tender, and $1,194,245 in the deposit line, while they lost $462,195 of their specie reserve. They reduced their loans, $343,504; and their circulation, $10,211.

The New York Gold Exchange Bank reports for the week ending Saturday, the 23d day of May, 1868, the average amount of loans and discounts as $1,092,531; average amount of specie, $1,191,233; average amount of deposits, $1,636,668.

The Philadelphia Bank movement the past week shows a decrease in loans of $31,358; a decrease of $103,223 in specie; an increase in legal tenders of $441,554; an increase of $29,776 in deposits; and an increase of $28,611 in circulation. The Bank Clearings show an increase of $2,864,883, and the balances, a decrease of $243,194.

The U. S. Sub-Treasury receipts, week ending with May 23, were $32,532,267, including $2,162,417 from customs duties; payments, $31,225,882, including $2,041,000 of coin interest; balance at the close of the week, $102,685,755, against $101,378,870, at the close of the preceding week, showing an increase of $1,306,885. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $8,035,495 including $488,604 from customs; and payments, $9,726,491; on Tuesday, receipts, $1,585,669 including $436,868 from customs, and payments, $1,280,890. The balance at the close of business on Tuesday stood at $101,299,539, against $100,713,749, a week previous; and $101,748,719 on May 12, 1868.

The U. S. Sub-Treasurer at this port, Hon. Henry H. Van Dyck, acting under orders from the Department, announces that on and after June 1, he will be prepared to receive Seven-thirty Treasury Notes, falling due June 15, and July 15, 1868, for conversion into bonds, dated either July

1, 1867, or July 1, 1868, as parties may desire. The terms of conversion will be as follows: The interest on both series of notes will be allowed up to July 1, and the bonds issued in exchange will bear interest from that date.

National Bank notes to the amount of $88,255 were issued last week, making the total issue to 1,673 banks thus far. $307,810,626, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $8,006,546, leaving, with the existing 1,639 banks, (having an aggregate capital of $420,221,210,) an actual circulation at this date, of $299,804,080. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,417,000; and for the public deposits, $38,334,950—making a total of $379,761,950. The Treasury Department last week redeemed and destroyed $391,900 of worn and mutilated fractional currency, and issued $696,248 of new. The outstanding amount of fractional currency on the 1st inst. was $32,450,489, against $32,588,690 on the 1st of April, and $32,307,947 on the 1st of March 1868.

Government revenues yielded moderately, last week, in both forms, customs and excises. The excises, last week, yielded $3,204,256, against about four millions the preceding week; customs at the port of New York, $2,162,417, and at the outports about $700,000 (in coin) more, making the grand total income for the week equal to about $7,211,750 in currency. The total receipts of the National Treasury, from excises, thus far in the new fiscal year, which began on the 1st of July, have been about $172,500,000.

Gold has been more active, since our last, and more variable in price, having sold on Tuesday as high as 140¼, and having receded again on Wednesday to 139⅝@139¾. The highest sales were made on Tuesday, under the influence of reports from Washington, adverse to decisive action in the impeachment case. The reports were speedily followed by advices of the result of voting by the High Court on two of the leading articles, informing the street of the acquittal of the President, and the practical abandonment of the prosecution. These advices operated against the inflationists of the Gold Board, leading to a depression of the premium. The market closed tame and weak on Wednesday. The exports of specie on Tuesday and Wednesday were not as large as had been anticipated, having amounted to only $1,430,000. Government has not been a seller of gold, during the week, to any considerable extent. Its coin interest disbursements have exceeded two millions.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $3,214,105, against $1,056,073 same time last year. The customs demand for Gold last week, averaged $360,400 a day; thus far, this week, it has been equal to $462,000 a day, or equal to a weekly aggregate of $2,772,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $238,525, and from California, $1,177,496. The total customs revenue of the Government, in coin, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $103,011,621, against $112,882,216 same time in the preceding fiscal year. The total receipts of California gold at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $32,014,844, against $35,656,416 same time in the preceding fiscal year, showing a decrease of $3,641,572 in 1867–'68. The exports of specie from this port, last week, were $3,947,630, against $1,583,667 same week last year. The exports of specie, hence, since July 1, 1867, have been $61,264,243, against $33,848,546 same time in 1866–'7. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,041,000, and since July 1, 1867, $70,054,261, against $52,127,392 same time in 1866–'7. The specie exports from San Francisco, from Jan. 1, to April 29, 1868, were $13,149,821, against $11,448,650 same time last year.

Government has disbursed nearly 17 millions of coin interest through the local office, thus far in May.

Foreign exchange has been in moderate supply and rather fair demand, through the week. Sterling bills have been quoted a fraction higher. Bankers' prime sixty day bills on London closed on Wednesday at 110@110¼, and on Paris to 5.16¼c.@5.12½; sight bills on London to 110⅜@110⅝, and on Paris to 5.11¼c.@5.10. The offering of produce bills has been up to a fair average this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,657,521, against $1,815,222 same week last year; total, since July 1, 1867, $163,948,651, against $175,645,479 same time in 1866–'67.

There has been unusual activity in the public funds, all through the week. The purchases of the coin bearing bonds have been on a very extensive scale, chiefly through private channels, and on home and foreign investment account. The floating supplies have been materially reduced, and prices have again advanced sharply. The later dealings on Wednesday were remarkably vigorous, indicating great firmness and buoyancy in the market. City and country banks and bankers have been purchasing in large amounts, chiefly of the later issues of the Five twenties, which have been relatively the cheapest. Foreign buyers have been taking the 1862 and 1865 (May and November) Five-twenties, as also the Ten-Forties quite liberally at the going rates. Toward the close there were fewer sellers than buyers, of all the National interest bearing obligations, as much higher prices were confidently looked for, under the stimulating influence of cheapening money both in home and foreign financial centres. London and Frankfort advices report great activity in United States securities in those markets. Seven-thirties are now being converted very freely here into new 5-20s of the 1867 issue.

U. S. sixes of 1881 closed here on Wednesday at 115⅝@115¾; U. S. Five-twenties of 1862, 111½@111⅝; U. S. Five-twenties of 1864 at 109¼@109⅜; U. S. Five-twenties of 1865 at 109½@109⅝; U. S. Five-twenties of 1865, consolidated, 111⅜@111½; U. S. Five-twenties of 1867, 111⅜@111½; U. S. Ten-forties at 105⅝@105¾, and U. S. Seven-thirties at 108⅞@109. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

August, 1865....118½	October, 1865....117½
September, 1865..118	

U. S. three per cent. certificates 100¼

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 13.	May 20.	May 27.
Consols	94⅜	94¾	95⅝
U. S. 5-20's of 1862	70¾	71⅜	72
Erie	46¾	46⅜	46
Ill. Central	94⅞	95⅝	96

Railway and miscellaneous share property was in light demand and weak in price, during the first half of the week under review, but the later dealings were on an extensive scale, at much improved, strong and buoyant prices. State and railway bonds have been in lively demand at very firm rates, including the six per cent. (coin bearing) first mortgage of the Central, and the Union Pacific Railroad Companies, in both which there has been an increase of the investment business, corresponding to the marked activity in the public funds.

General business has been less active, since our last, in the produce line, and prices of cotton, breadstuffs and provisions closed quite heavily. Middling upland cotton closed very dull and heavy on Wednesday at 29½@30 cents, per lb. The stock of cotton now here is estimated at about 68,500 bales. The receipts at the port this week, have averaged only about 900 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,118,500 bales, against 1,732,000 bales same time last year; exports, same time 1,592,500 bales, against 1,324,000 bales same time last year; stock on hand at latest dates, 165,000 bales, against 305,000 bales same date last year. At the Live Stock markets, this week, Beeves have been less active, at a shade easier prices, ranging from 15@18c. per lb.; week's receipts, 6,299. Veal calves have been in fair request at from 7@12c. per lb.; receipts, 1,577. Sheep and lambs have been moderately active, closing firmly at from 6½@10½c. per lb.; receipts, 12,232. Swine have been dull and heavy at from 8½@9¾c. per lb., all live weight; receipts, 24,693. At the auction sale of Scranton coal on Wednesday, 75,000 tons were disposed of at from $3.82½@$4.70 per ton of 2,240 lbs., delivered at Elizabethport, N. J. In general merchandise there has been much less movement, and prices of most articles have favored buyers. The total imports of foreign dry goods, last week, were $1,135,908, and the total amount marketed $1,286,547. The value of foreign merchandise imported last week, was $2,333,463—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $3,469,371, against $4,291,490, same week last year; total since July 1, 1867, $215,472,694, against $245,457,307 same time in 1866–'67. The freight market closed less firmly on a moderately active business. For Liverpool we quote flour at 1s. 6d.@1s. 9d. by sail, and 1s. 9d. by steamer, per bbl.; grain at 4d.@4½d. by sail, and 5½@6d. by steamer, per bushel; cotton at 1/16d.@3/32d. by sail, and 1/16d.@5/32 by steamer, per lb.; and heavy goods at 15s.@35s. by sail, and 17s. 6d.@35s. by steamer, per ton. Total number of vessels in port on Wednesday 555.

The balance in the Sub-Treasury on Wednesday was $100,693,689 20.

The New York exports, exclusive of specie, for the week ending May 26th, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$1,815,222	$3,657,521
Prev. reported.....	79,138,620	69,148,245
Since January 1.....	$80,953,842	$72,805,766

The imports for the week ending May 23d, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$925,729	$1,135,908
Gen. merchandise.....	3,365,761	2,333,463
Total for the week.....	$4,291,490	$3,469,371
Previously reported....	99,363,697	91,453,654
Since January 1.....	$103,655,187	$94,923,025

CENTRAL PACIFIC RAILROAD.—First Mortgage Six Per Cent. Gold Bonds, *at par and accrued interest, in currency.* These securities are based on one of the most important and productive railroad lines in the country—a line exempt from competition, and secured against ordinary contingencies by the aid of the United States Government. The completed portion of the road is earning three times the annual interest liabilities from local traffic merely. Information given and bonds for sale by

Fisk & Hatch,
Bankers and Dealers in Government Securities.
No. 5 Nassau st., New York.

Brooks' Patent Paraffine Insulator.

One of the requisites of a well equipped railway is a telegraph line, and the telegraph to be of service must be reliable in all weathers. We invite attention to the advertisement of the Brooks' Paraffine Insulator Works, in another column. Over forty thousand of these Insulators have just been sent to California to be used the greater portion by the Central Pacific Railroad Company. From the accounts in European journals of the performance of this Insulator, there can be no doubt of its merit.

☞ We take pleasure in calling the attention of bankers and all who deal in or hold railroad securities to the advertisement of Mr. William A. Guest, of No. 25 Wall street. Mr. Guest has been long and favorably known as a successful negotiator of Railroad Stocks and Bonds, and City and County bonds. He gives to this class of securities his special attention.

Clifton Iron Company.

The following is a copy of an act passed by the Legislature of New York on the 15th of April, 1868, to enable the Clifton Iron Company to transport passengers, and for other purposes:

Section 1. The Clifton Iron Company having constructed a railroad from their iron mines to the Rome, Watertown and Ogdensburg Railroad, at East De Kalb, with rails of wood, on which are operating locomotive engines and cars, is hereby authorized to extend their said road to the St. Lawrence River, with the same powers as are conferred in and by chapter two hundred and forty-seven of the laws of eighteen hundred and sixty-four, and the said company is hereby expressly exempted from the obligations and duties prescribed in and by title twelve, chapter eighteen, part one of the Revised Statutes.

Sec. 2. The said company are hereby authorized to carry freight and passengers upon said road, at a rate of speed not to exceed fifteen miles an hour, and to receive and charge fare for passengers, at a rate not to exceed five cents a mile for each passenger.

Sec. 3. This act shall take effect immediately.

Railroad Mortgages.

The following act in relation to Railroad Mortgages was passed by the New York Legislature on the 8th of May, 1868:

Section 1. It shall not be necessary to file as a chattel mortgage (any mortgage) which has been, or shall hereafter be, executed by any railroad company upon real and personal property, and which has been, or shall be, recorded as a mortgage of real estate in each county in, or through which the railroad runs.

Sec. 2. This act shall take effect immediately.

Railroad Earnings.--Weekly.

The earnings of the Toledo, Wabash and Western Railroad for the second week of May, 1868, were $61,997 63
Same week in 1867..... 80,402 64

Decrease $18,405 01

The earnings of the Chicago and Alton Railroad for the 3d week in May, 1868.... $90,823 35
Corresponding period previous year .. 83,386 69

Increase $6,986 66

The earnings of the Western Union Railroad for the 3d week in May, 1868..... $14,505 16
Corresponding week previous year.... 11,232 12

Increase..... $3,273 04

The earnings of the Marietta and Cincinnati Railroad the 3d week in May, 1868... $22,091 00
Corresponding week previous year.... 20,682 00

Increase $1,409 00

The earnings of the Michigan Central Railroad for the 3d week in May, 1868, were ... $82,203 70
Corresponding week of previous year.. 70,263 14

Increase..... $11,940 56

The earnings of the Atlantic and Great Western Railway for the second week in May, 1868, were..... $89,741 00
Corresponding week previous year... 116,818 00

Decrease $27,077 00

The earnings of the Chicago and Northwestern Railroad for the 3d week in May, 1868. $288,278 07
Corresponding week previous year .. 193,522 41

Increase $94,755 66

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week in May, 1868, were..... $100,138 00
Corresponding week of 1867 ..... 77,324 00

Increase $22,814 00

Pacific Mail New Steamship Alaska.

This new steamship, the fourth lately built for the Pacific Mail Steamship Company, is almost completed, and will shortly make her trial trip. She is a *fac simile* in size and dimensions of the Great Republic, China and Japan, and was constructed at the shipyards of Mr. Henry Steers, Greenpoint, L. I. She is 4,500 tons measurement, and will trade between New York and Aspinwall. She is built for great strength and speed, and is now getting in the last of her machinery at the Novelty Iron Works. All the heavy wrought iron has been furnished to the Novelty Iron Works by Messrs. Lazell, Perkins & Co., and made from the best of charcoal iron, under the immediate inspection of their New York agent. This work is the heaviest ever made in America, the water-wheel shafts weighing in a forged condition forty tons each. The Alaska will be fitted up in a very superb and commodious manner, and her saloons, cabins, staterooms, &c., will be similar to those of the other steamers of the Pacific Mail Steamship line.

Mexico and Vera Cruz Railroad.

In our last impression we referred to the railway works now in progress on the Puebla Branch of the Mexican Railway. We are now able to furnish a few details, which are evidences of the earnestness of the company and their determination that the road shall be built.

The principal work in hand is the erection of the Santa Cruz Bridge, which when completed will form one of the points of interest on this branch. The bridge is entirely of wrought iron and is composed of three spans of 58 feet supported on stone abutments and wrought iron piers. The line of the rails will be about 50 feet above the river. The iron girders are being rapidly put together, on the bank of the river, and when finished, and the piers are ready to receive them, they will be hauled across and securely fastened in their proper position. The work is proceeding rapidly, and it is expected that it will be finished in the next three weeks. The bridge was designed, and the working drawings made by the Contractors' Chief Engineer, Mr. Buchanan, M. I. C. E.

Preparations are also being made for the immediate erection of the Iron Bridge over the Soledad River on the Vera Cruz and Paso Del Macho section.—*Mexican Standard.*

Newark and New York Railroad.

We learn that the work is going forward very rapidly on this road, and that it is expected to be finished before the close of the present year. The excavation of Bergen Hill, about two-thirds of a mile south of Newark avenue, and the bridges over the Hackensack and Passaic Rivers are nearly completed. Much of the line of the road across the meadows has also been graded, and some of the trestle work has been laid in the lower part of Newark.

The road was begun towards the close of 1866, and was to have been finished last year. This, however, the contractors failed to do. The construction, at present, is under the supervision of of Colonel James Moore, Engineer of the New Jersey Central Railroad. The starting point from New York will be by the ferry of that road from the foot of Liberty street to Communipaw, and it will run thence a quarter of a mile upon the New Jersey Central track before branching off. After passing over the meadows, the first open thoroughfare in Newark that it will strike will be Ferry street. An embankment from fifteen to twenty-five feet high will form its grade through Newark until it reaches the depot in Broad street. Arches will be made underneath the embankment at the street crossings in Newark.

It is supposed the track will cross the line of the New Jersey Railroad, a short distance south of the Market street depot, and passing between Hamilton and Mechanics streets, reach Broad street, between the First Presbyterian Church and Fair street.

The cost of the road will be $1,000,000, or over, including the purchase of the right of way.

600 MILES
OF THE
UNION PACIFIC
RAILROAD

Are now finished and in operation. Sixty miles of track have been laid this spring, and the work along the whole line between the Atlantic and Pacific States is being pushed forward more rapidly than ever before. More than twenty thousand men are employed, and it is not impossible that the entire track, from Omaha to Sacramento, will be finished in 1869 instead of 1870. The means provided are ample, and all that energy, men and money can do to secure the completion of this

GREAT NATIONAL WORK,

at the earliest possible day, will be done.

The UNION PACIFIC RAILROAD COMPANY receive:

I.—A Government Grant of the right of way, and and all necessary timber and other materials found along the line of its operations.

II.—A Government Grant of 12,800 acres of land to the mile, taken in alternate sections on each side of its road. This is an absolute donation, and will be a source of large revenue in the future.

III.—A Government Grant of United States Thirty-year Bonds, amounting to from $16,000 to $48,000 per mile, according to the difficulties to be surmounted on the various sections to be built. The Government takes a second mortgage as security, and it is expected that not only the interest, but the principal amount may be paid in services rendered by the Company in transporting troops, mails, &c. The interest is now much more than paid in this way, besides securing a great saving in time and money to the Government.

IV.—A Government Grant of the right to issue its own FIRST MORTGAGE BONDS, to aid in building the road, to the same amount as the U. S. Bonds, issued for the same purpose, and *no more.* THE GOVERNMENT PERMITS the Trustees for the First Mortgage Bondholders to deliver the Bonds to the Company only as the road is completed, and after it has been examined by United States Commissioners and pronounced to be in all respects a first class Railroad, laid with a heavy T rail, and completely supplied with depots, stations, turnouts, car shops, locomotives, cars, &c.

V.—A Capital Stock Subscription from the stockholders, of which *over Eight Million Dollars* have been paid in upon the work already done, and which will be increased as the wants of the Company require.

VI.—Net Cash Earnings on its Way Business, that already amount to MORE THAN THE INTEREST on the First Mortgage Bonds. These earnings are no indication of the vast through business that must follow the opening of the line to the Pacific, but they certainly prove that

First Mortgage Bonds

upon such a property, costing nearly three times their amount,

Are Secure beyond any Contingency.

The Company have abundant means in their Treasury, and make no appeal to the public to purchase their bonds, as the daily subscriptions are entirely satisfactory; but they submit that, for entire security and liberal returns, there is certainly no better investment in the market.

The Union Pacific Bonds are for $1,000 each, and have coupons attached. They have thirty years to run, and bear annual interest, payable on the first days of January and July at the Company's Office in the City of New York, at the rate of six per cent. in gold. The Principal is payable in gold at maturity. At the present rate of gold, these bonds pay an annual income on their cost of

NEARLY NINE PER CENT.,

AND IT IS BELIEVED THAT THEY WILL SOON BE AT A PREMIUM.

The Company reserve the right to advance the price of their bonds to a rate above par at any time, and will not fill any orders or receive any subscriptions on which the money has not been actually paid at the Company's Office before the time of such advance.

Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,

AND BY

John J. Cisco & Son, Bankers, No. 59 Wall St.,

And by the Company's advertised agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.

MAY 25, 1868.

TREDEGAR COMPANY,

JOSEPH R. ANDERSON, President. **RICHMOND, VA.** JOHN F. TANNER, Vice-President.

The Tredegar Company of Richmond, Va., (Successor to J. R. Anderson & Co.,) continue to Manufacture at their Works, *RAILS* of any required section, including *STREET RAILS*; *PATENT ROLLED CONTINUOUS LIP CHAIRS*; *RAILROAD* and *BOAT SPIKES*; *RAILROAD AXLES*; *FISH PLATES*, with Bolts and Nuts for same; *IRONS* complete for Fink's, Bollman's, or Howe Truss Bridges; *RAILROAD CARS*; *TRUCKS* of any desired pattern ready for the Car bodies; *NAILS* and *CUT SPIKES*; *Best Charcoal BAR IRON*, of high tensile strength; *CASTINGS*, including the heaviest descriptions of Iron and Brass; *MARINE* and *STATIONARY ENGINES* of all sizes.

The great capacity of the Tredegar Iron Works—*some 30,000 tons per annum*,—their location on tide-water, in the midst of the rich Coal and Iron deposits of Virginia, their unequalled advantages for shipment by Rail, Steamer or Sail Vessel, without interruption during any part of the year, and an active experience of thirty years, enable the Proprietors to guarantee the promptest and most economical execution of orders, which are solicited from all parts of the United States. Address

TREDEGAR COMPANY, Richmond, Va.,

Or at their Office, 60 Broadway, New York.

CAR AXLE WORKS.

A. & P. ROBERTS & CO., PENCOYD IRON WORKS,

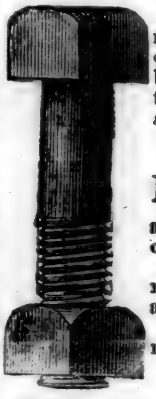
OFFICE No. 410 WALNUT STREET,

PHILADELPHIA.

Rolled or Hammered Car Axles, Bar Iron and Forgings.

THE

Schweitzer Patent Bolt Comp'y,



Works at Green Point, L. I.,

Near Greenpoint Ferry, from 10th St. & 23d St., N. Y. NEW-YORK.

H. S. TERBELL, President; *39 Walker Street, New-York.*

THOS. S. YOUNG, Treasurer, *120 Chambers St., New York.*

We are prepared to make and deliver

IRON BOLTS,

manufactured by Automatic Machinery in such manner as to *increase the strength* of the Iron beneath the head by compression, and totally avoid the weakening by crystalization, as in the case of Bolts made by hand or by any slow and protracted process. These Bolts are *uniform in size and shape, and superior in strength and finish* to any others made.

Standard Bolts will be made of the best quality of iron, and warranted.

The attention of

Railroad Companies, Bridge, Car & Locomotive Builders,

and others requiring Bolts of the *greatest strength and uniformity*, is specially called to these Bolts.

Contracts for Bolts used in the construction of Railroads and their appurtenances, and all similar work not requiring the best quality of iron, will be taken at special rates.

The *rapidity of production* will enable the Company to fill orders of any magnitude at short notice. The Company also offer for sale

BOLT CUTTERS

of their own patent, which, with a given amount of power and labor, will cut twice the number of Bolts of any other machine in use.

OFFICE OF THE TOLEDO, PEORIA AND WARSAW RAILROAD COMPANY, No. 26 EXCHANGE PLACE, NEW YORK, May 14, 1868.

NOTICE TO THE BONDHOLDERS AND shareholders of the Toledo, Peoria and Warsaw Railroad Company of Illinois. You are hereby notified that a meeting of the bondholders and shareholders of this Company will be held in this City on the 15th day of June next at the office of the Company, between the hours of 10 and 2 o'clock, to vote upon the question of the extension of the road from La Harpe to Burlington, Iowa, and from Warsaw to Quincy, Illinois, to connect with the Government bridges at those places, and to authorize the Board to contract for the building of the same, and to issue sinking fund bonds of the Company bearing interest at eight per cent., at the rate of fifteen thousand dollars ($15,000) per mile upon such extensions or branches for said purpose, or upon any other plan that may be presented you at said meeting for the purpose of raising the necessary funds for building the extensions, and upon any other subject that may be offered for consideration at said meeting.

Per order of the Board,
CHARLES L. FROST, President.

PENNSYLVANIA RAILROAD COMPANY, Treasurer's Department.
PHILADELPHIA, May 2, 1868.

NOTICE TO STOCKHOLDERS.—The Board of Directors have this day declared a semi-annual dividend of THREE PER CENT. on the Capital Stock of the Company, payable in cash, clear of National and State taxes, and a further dividend of FIVE PER CENT., payable in Stock, on and after May 30.

Blank powers of attorney for collecting dividends may be obtained at the office of the Company, No. 238 South Third Street.

THOMAS T. FIRTH,
Treasurer.
5t21

OFFICE PENNSYLVANIA RAILROAD COMPANY, Philadelphia May 13th, 1868.

Notice to Stockholders.—In pursuance of resolutions adopted by the Board of Directors at a stated meeting held this day, notice is hereby given to the Stockholders of this Company, that they will have the privilege of subscribing, either directly or by substitution under such rules as may be prescribed therefor, for Twenty-five per cent. of additional Stock at par, in proportion to their respective interests as they stand registered on the books of the Company, May 20th, 1868.

Holders of less than four Shares will be entitled to subscribe for a full share, and those holding more shares than a multiple of four shares will be entitled to an additional share.

Subscriptions to the new Stock will be received on and after May 30th, 1868, and the privilege of subscribing will cease on the 30th day of July, 1868.

The instalments on account of the new shares shall be paid in cash, as follows:

1st. Twenty-five per cent. at the time of subscription, on or before the 30th day of July, 1868.

2d. Twenty-five per cent. on or before the 15th day of December, 1868.

3d. Twenty-five per cent. on or before the 15th day of June, 1869.

4th. Twenty-five per cent. on or before the 15th day of December, 1869, or if Stockholders should prefer the whole amount may be paid up at once, or any remaining instalments may be paid in full at the time of the payment of the second or third instalment, and each instalment paid up shall be entitled to a pro rata dividend that may be declared on full Shares.

THOMAS T. FIRTH,
Treasurer.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the ***MAIN TRACK IS NEVER BROKEN,*** and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns ***The Life and Limb of all Travelers upon Railroads.***

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary

HUBBELL & VANHOESEN, Agents.

Works at

OSSINING,

Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERGNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

New York, Saturday, June 6, 1868.

Tennessee Railroads.

The Governor of Tennessee has issued a circular addressed to the "Railroads of the State," bearing date May 24, 1868, in which he says:

It is made your duty by the law of 1852, and also by the act entitled "An act to liquidate the debt of the State falling due in 1868 and 1869," passed March 13, 1868, to pay the interest on the bonds loaned you at least fifteen days before said bonds become due. The penalty for the violation of this duty is that I am to appoint a suitable person, at your expense, to take charge of your road.

I therefore warn you that the interest due from you on the 1st of July next, must be paid to the Comptroller of the State at least 15 days before that date.

He has also addressed a letter to S. Watson, Esq., of Nashville, in which he says he is opposed to any increase in the present State debt, and shall recommend to the Legislature, at its next meeting in November, an amendment of the Constitution prohibiting the issuance of any more bonds of the State than are authorized by existing laws. He shall also recommend that provision to be made for the sale of all railroads which cannot pay their interest promptly.

Selma, Rome and Dalton Railroad.

At the annual meeting of the stockholders of this road, held at Selma, Ala., on the 14th ult., the following gentlemen were elected directors for the ensuing year: F. H. Delano, John T. Agnew, David Crawford, U. A. Murdock, L. W. Lawler, D. S. Printup, Wm. Paton, J. H. Knox, C. A. Lambaum, A. G. Mabry, and J. Lapsley. F. A. Delano, Esq., was elected President of the Board. The *Messenger* says a full enterchange of views was had, and a general expression of satisfaction with the management and prospects of the road. The report of EUGENE LE HARDY, Esq., Chief Engineer, was presented, of which the following is the concluding portion:

Permit me, sir, to conclude with some remarks suggested to me by the exceptional conditions surrounding the location of this railroad; remarks which I doubt not have been made by all the friends of this enterprise, but which, notwithstanding, cannot be uttered too often.

Between New York and New Orleans the routes now nearest the "air line" between said cities are, as far as Dalton, those passing by Philadelphia, Baltimore, Washington, Lynchburg, Bristol and Knoxville. Rome, Jacksonville and Selma are very nearly on the same air line, which is an indication that the *natural route must be continued through these points*, while the route which is pretended to be the shortest, passes by Charlotte, N. C., more than one hundred miles off the air line. The distance between the two cities, New York and New Orleans, as actually run, according to Appleton's Railway Guide, by way of Chattanooga, Grand Junction and Jackson is 1,502 miles, and by way of Dalton, Selma, Meridian and Jackson is 1,472, which could be reduced to about 1,327 miles, if the line, *as will be eventually*, was made direct from Selma to New Orleans, which would prove a saving in distance of 175 miles on the former route and of 145 on the latter.

The stockholders in this company will enjoy a security for their investment for a long time to come. No other company will be able to compete with this one in distance except at the sacrifice of such a large expenditure of money in the construction of a road, not by any means justified by the distance that would be saved. If to this most important advantage already in its hands your company can make suitable arrangements with all the other companies concerned in this system, to secure to the traveler safety, speed, comfort and economy of time and money, your line and the whole system it belongs to are certain to become the favorite channel for travel and trade between the main markets of the North and the Gulf, the West Indies, Central and South America, Panama and California.

Another consideration which is of great importance to your line and its whole system, is that it will be exempted and free from those snow storms that block in winter the competing lines running by the way of the northwest and which will hereafter be one of the embarrassments in running the North Pacific Railroad now under construction.

All the belt of country traversed by your road is particularly attractive by its picturesque and varied scenery, by the splendor of its vegetation, by the richness of its soil, not only in vegetation products of all descriptions, but in its inexhaustible mineral wealth, *which only awaits this communication with the market to ensure its rapid development*. The altitude of your line ranging from 400 to 1,000 feet above the sea, and its course through valleys formed by spurs of the great chain of the Alleghany mountains are unmistakable indications of the moderation and healthfulness of its climate all the year round, and it is not extravagant to forsee or to predict that this portion of the country, when attention, by means of this road, shall have been directed to it, will become the preferred home of the rich as well as the poor, of the North as also of the South. The salubrity of the climate and mildness of the winter will offer great inducements to the wealthy and middle classes to settle in our midst, in summer to enjoy the refreshing breezes of our mountainous regions, and in winter to avoid the cold blast of a Northern climate. All this region is particularly favored with streams and abundance of water power that never freezes; timber is abundant, coal and iron, those two great powers of civilization and progress, inexhaustible. The land along the route yields most abundantly all the necessaries of life. The climate, as already stated, is temperate, mild and healthy. We find in it all the necessary conditions and elements to make it a favored land for laborers, and consequently the great manufacturing land of America, the only one on this continent capable in the future to compete with the manufactories of Europe.

A consideration, also, of some importance for the future prospect of this section of country and of your enterprise is the natural fertility of the whole of this section of country in the production of fruits and vegetables of all varieties and descriptions. If the speed of your road permit these products to reach the markets in season, attention will be attracted to their culture, which would ultimately form no small item of income to your road. From these considerations and others derived from the particularly advantageous situation of your road it is reasonable to anticipate for it, in the future not far away, not only a heavy local travel and freight, but also a heavy through travel and business, the northern ter-

minus touching as it does the main and most important markets of New York, Philadelphia and Baltimore. It is reasonable to pronounce the enterprise safe and full of prosperity, and at least it is reasonable to predict immunity and pride to the friends who have projected, and helped to construct this road. Such is the profound and sincere belief of your most obedient servant,

EUGENE LE HARDY,
Chief Engineer S. R. & D. R. R. Co.

Morris Canal and Banking Company.

We have the report of this company for the year ending February 29, 1868. From this we learn that the canal was opened about one week later than usual, and closed on the 9th of December, making the navigation season about two weeks less than the average of former years.

The income of the company from tolls and other sources during the year was		$449,652 46
And the expenses were:		
Repairs of canal & works	$167,922 15	
Operating canal	74,691 78	
Salaries, law and other expenses	$31,852 64	
Less interest	13,695 94	
	30,370 40	
Transportation expenses.	13,695 94	
		286,680 27
Balance—profits of the business		$162,972 19
Balance at credit, February 28, 1867.		96,914 30
Boat loan bonds bought and cancelled in the previous year, and erroneously charged to this account		11,000 00
Total		$270,886 49
Dividends on preferred stock		$115,056 02
Interest on bonds		65,083 51
Discount on boat loan		4,302 96
Depreciation of boat stock		2,789 07
Bad debts		2,153 52
State of New Jersey		20,410 95
Balance, February 29, 1868		61,090 56
Total, as above		$270,886 49

The usual five per cent. semi-annual dividends have been paid on the preferred stock—also, the interest falling due on all outstanding bonds of the company, and the annual payment in to the Treasury of the State required by the supplement to the charter of the company, referred to in and published with the last annual report. The amount remaining at credit of profit and loss account is $61,090 56 at the close of the fiscal year.

The current expenses of the year were $53,699 92 less than the expenses of the previous year. No very considerable reduction in current expenses can be expected until there is a further reduction in the cost of labor and materials.

The season opened with such a competition between the avenues leading from the different coal fields, that the cost of carrying coal, to tide water, was soon reduced to extremely low rates, and so continued to the end of the season.

The railroad competition, for the way trade, compelled some concessions in rates, and took from the canal a portion of that trade. The great demand, and high prices paid, for common labor drew off from the canal so many boatmen, that it was impracticable to keep all the company's boats manned and running—and the principal articles which enter into the cost of boating were very high during all the boating season. This state of things necessarily resulted in high freights and low tolls, and in a corresponding reduction in the receipts of the company.

There was a falling off from the previous year in the amount of coal received at Port Delaware of 5,584 tons by railroad, and 34,085 tons by canal, and an increase of 5,451 tons in the amount received at Port Washington, amounting in all to a reduction of 34,218 tons in the coal received into the canal from the mining regions. The falling off in the amount delivered on the line of the canal west of tide water was 6,307 tons.

The total amount of ore transported on the canal was 289,550 tons, being 615 tons less than the previous year. Of this amount 142,925 tons crossed the Delaware River into the Lehigh Valley, and 61,958 tons were transhipped to the Warren Railroad at Port Washington—leaving 83,667 tons belonging strictly to the trade of the canal.

The gross amount transported on the canal was 822,741 tons, being 66,479 tons, (about 7¼ per cent.) less than the gross tonnage of the previous year.

The average distance traveled by the loaded boats was greater last year than the year before, making the difference in tons carried one mile less than six per cent. in favor of the previous year.

All the railroads and canals engaged in the Anthracite coal trade are constantly enlarging and improving their works with a view to reducing the cost of carrying. Under these conditions it cannot be expected that the Morris Canal can retain its share of the coal trade without corresponding enlargements and improvements.

During the last year the expenditures for this account were as follows:

For extensions and improvements at Jersey City		$53,098 84
Extension of tracks and shoots at Port Delaware		22,892 37
Boat account		20,513 11
General improvement account		7,424 05
		$103,928 37
Credit:		
By sale of house and lot in Jersey City	$5,306 25	
By sale of lands formerly taken in settlement of land damages	5,000 00	
By sale of freight line fixtures	1,157 50	$11,463 75
		$92,464 62

In the year 1860, a plan was adopted for lengthening the locks on the canal ten feet, for the purpose of eventually increasing the length and carrying capacity of the boats for that part of the trade, which is done entirely on the line of the Morris Canal. This work was to be done from time to time, by the Supervisors, whenever a lock required general repairs. In pursuance of that policy, seventeen locks have been so lengthened, leaving fifteen locks yet to be done. It is estimated that this improvement can be completed by an expenditure of about thirty thousand dollars, and that it will increase the tonnage of the boats about fifteen per cent., and correspondingly reduce the cost of transportation on so much of the trade as comes to the canal by rail.

A further enlargement of the capacity of the boats can be effected by increasing the depth of water in the canal. The most of this work can be done during the season of navigation by dredging. There are two of "Osgoods Patent Under-water Excavators," already in use deepening the water and raising the banks.

The cost of the canal and its works, as will be seen by the general statement, is $3,362,220 75; the total amount of stock and bonds outstanding is $3,249,260; showing the cost of the works to be $112,960 75 more than the means provided therefor. The only available resource at present to meet this floating debt is $18,000 of the second mortgage bonds remaining unsold. It is therefore evident that some additional provision must be made for meeting this liability and continuing the improvements to which reference has already been made; otherwise the same must be provided for from the current earnings.

There has been sold during the year $14,000, of the second mortgage bonds, and $48,922 50 of the boat loan bonds. The trustees have purchased and cancelled $14,000 of the boat loan bonds, as required by the terms of the Trust Deed.

In pursuance of the concurrence and approbation of the action of the directors, by the stockholders, as expressed in a resolution adopted at the last annual meeting, the agreement contemplated in the first section of the supplement to the charter, approved March 14, 1867, has been executed and delivered to the Governor of the State.

The question of improving the submerged lands embraced within the bounds of the state grant, has received the earnest attention of the directors and officers of the company. The rapid changes which have taken place in the ownership of shore property in the immediate vicinity, during the past year, indicate that the time is not far distant when this property will be needed for commercial purposes.

GENERAL STATEMENT.

Cost of canal and appurtenances		$3,362,220 75
Assets:		
Cash	$18,074 30	
Bills receivable, individual acccount, etc.	39,180 94	
Materials	11,427 96	
		68,683 20
Total		$,430,903 95
Capital stock:		
Consolidated		$1,025,000 00
Preferred		1,175,000 00
Mortgage bonds		782,250 00
Boat loan		267,010 00
Liabilities:		
Individual accounts, etc.	$29,621 92	
Bills payable	86,918 50	
Dividends and coupons unclaimed	4,012 97	
		120,553 39
Profit and loss—surplus		61,090 56
Total, as above		$3,430,903 95

President and Engineer.—WILLIAM H. TALCOTT.
Vice President.—JACOB F. RANDOLPH.
Secretary.—JOHN ROGERS.

Worthington Valley and Manchester R. R.

A correspondent of the Baltimore *Sun*, writing from Manchester, Carroll Co., Md., under date of May 25, says: "The great drawback to the town and surrounding country is the want of railroad facilities between here and Baltimore. This want, I am glad to say, is now about being supplied by the building of the Worthington Valley and Manchester Railroad. The preliminary surveys, under the charge of Robert Irwin, Son & Co., are in progress. The corps of engineers is under the control of Wm. Glen, Esq., a gentleman of untiring energy and much experience in his profession. The corps reached here on Friday afternoon, having surveyed the route known as the Dover line, starting at Cockeysville, on the Northern Central Railway; another line, starting at the Ashland Iron Works, on said road, known as the Black Rock route, will be commenced on Monday next. The report of the engineer is looked for with much interest. The friends of the enterprise are quite enthusiastic, and are confident that the means to build the road will be forthcoming, and completed at an early day."

☞ The Dubuque *Herald* says that the officers of the Iowa Falls and Sioux City Railroad Company have refused to accept the land grant upon the terms and conditions imposed by the General Assembly, viz., reserving to the State the authority to regulate the freight and passenger rates, and, therefore the road will not be extended through to the Missouri as was expected.

Sioux City and St. Paul Railway.

This company have concluded a contract with the Minnesota Valley Railroad Company, by which the latter agrees to complete the line from Sioux City to the Minnesota State line, within three years from the 1st of July. The latter company is the middle link of the chain of railroads extending from Sioux City to Lake Superior—the first link being the Sioux City and St. Paul, which extends from Sioux City to the State line; then the Minnesota Valley Railroad extends from the Iowa line to St. Paul, the third being the Lake Superior and Minnesota Railroad, extending from St. Paul to Lake Superior. This last road now has a large force at work, and will be completed inside of two years. The M. V. R. R. is now completed about seventy miles out from St. Paul, and by fall will reach Mankato, one hundred and seventy miles from Sioux City. The importance of this transfer, to Sioux City and Northwest Iowa, can hardly be over estimated. Nothing of equal benefit, if the road is built in the time named, has ever occurred since the settlement of the country.—*Sioux City Journal.*

Connecticut River Railroad.

The earnings of this road for the years ending November 30, 1866 and 1867, were as follows:

Earnings:	1866.	1867.
From passengers	$277,890 40	$282,769 53
" freight	311,202 16	305,929 42

Surplus, Nov. 30	181,581 53	192,055 18
Total, as above	$397,846 78	$396,536 80

Compared with the previous year the gross earnings of 1867 show an increase of $12,022 13, with an increase in operating expenses of $22,933 51. The total expenditure shows an increase of only $6,793 88. The surplus shows an increase of $10,473 65. The report says:

No change has been made during the year in our construction account. The expenditures for improvements in the road and equipment, exceeding in the aggregate $72,000, are all charged against the income.

About $2,750 has been expended towards the enlargement of our facilities for business at the Springfield station.

At Northampton the new passenger house has been completed, at a cost of $18,400, additional lands for aqueduct and depot purposes have cost about $6,400, and a further sum of $2,800 has been expended in grading for new tracks and the erection of a coal shed.

Material improvements have been made in the alignment of the road by the substitution of straight lines for several reverse curves near the Smith's Ferry station, at a cost exceeding $3,000.

The fitting up of a new station, situated two miles below Northampton and to be known as "Mt. Tom," has thus far called for an expenditure of $2,000. One of the leading objects in establishing a station at this point is the accommodation of visitors to Mt. Tom and Mt. Holyoke. Upon the urgent request of interested parties we commenced stopping the passenger trains here on signal in the month of July, and, to our surprise, four thousand passengers were taken up and set down in the succeeding four months.

In pursuance of legislative authority obtained in 1866, a side walk has been constructed on the outside of the covered bridge over the Connecticut River between Willimansett and Holyoke, at a cost of about $2,500. It is believed that the authorized tolls will net a sufficient sum to justify the cost.

The equipment of the road has been kept good by repairs and renewals, six platform and two house cars having been entirely rebuilt. Independently of repairs, we have built at the shops and put into service twenty-five platform and fifteen house freight cars and three baggage, express and post office cars, costing in the aggregate $37,000.

The track repairs have absorbed 21,000 cross ties, 310 kegs of spikes and 513 tons of new rails, besides requiring the mending of 2,028 bars at the rail-welding shop. The steel rails laid down in 1865 and 1866 are giving entire satisfaction. None have been added the past year because of the extravagant prices charged for them. It is to be hoped that the manufacture of steel rails in this country will ere long produce something like equality between supply and demand and thus establish prices upon a reasonable basis.

It is the policy of the directors to constantly improve the road and equipment and to have its facilities for business always equal to the demand upon them. The second track from Springfield to Chicopee, constructed last year, has proved to be of great value in securing regularity and dispatch in the arrival and departure of our short trains. The extension of this track to stations further North should be kept constantly in view as a work to be accomplished within a limited period.

An arrangement was entered into with the Vermont and Massachusetts Railroad Company, near the end of the year, by which we are for the next six years to haul the trains of the Connecticut River line over the track of that company between South Vernon and Brattleboro, they retaining the receipts of the business and paying us a monthly stipend for the service. This arrangement obviates the frequent delays at South Vernon to which our passengers were formerly subjected and is a source of wide-spread public satisfaction.

An arrangement made with the same company in 1851, by which we have occupied about one mile of their track and they one mile of ours below the Greenfield station, was terminated in October at their request, consequent upon the practical extension of their road West, by the opening of a section of the Troy and Greenfield Railroad.

The capital stock of the company has been increased during the year by the issue and sale of five hundred shares at an average rate of five per cent. premium, making the total capital $1,700,000. The bonded debt is $250,000, maturing in 1878. The sinking fund provided for its payment at maturity, and to which an annual contribution of $8,000 is made from the earnings of the road, now amounts, principal and interest, to $65,669 34.

The company have 14 locomotives. Miles run with passenger trains, 139,658; with freight, etc., trains, 119,092—total, 258,750. Number of passengers carried, 730,602; do. carried one mile, 9,021,492. Tons of freight carried, 198,036; do., carried one mile, 5,073,551. Earnings per mile of road, $12,099 32. Gross earnings per mile run, $2 43. Net earnings per mile run, 83.9 cents. Per centage of expenses to earnings, 64 per cent.

BALANCE SHEET, Nov. 30, 1867.

President.—DANIEL L. HARRIS.

Directors.—Ignatius Sargent, I. M. Spelman, Edward A. Dana, Chester W. Chapin, Sylvanus Adams, J. H. Butler, Henry W. Clapp, Roland Mather.

Treasurer.—SETH HUNT.

Auditor.—ELIPHALET WILLIAMS.

Superintendent.—W. B. BRINSMADE.

Manassas Gap Railroad.

This road has been for some time in operation to Front Royal, 51 miles from its junction with the Orange and Alexandria Railroad. On the 1st of June it was to have been opened to Strasburg, 61 miles; and by the 20th of June it is confidently expected that the track will have been relaid and the road put in good order as far as Mount Jackson, 85 miles. From that place to near Harrisonburg, its former western terminus, the completion of the road has been put under contract to reliable parties, to be finished by the first of October next.

Costa Rica Railroad.

We learn from Costa Rica that the Interoceanic Railroad contract has fallen through on account of the contractors failing to fulfill their obligations, although the Government has more than fulfilled its portion of the contract, having sent an agent a second time to the States to push on the commencement of the work; established the port of Lemon on the Atlantic and set on foot different undertakings to facilitate communication with the interior for the benefit of the construction of the railroad, and in fact done everything possible to assist in the progress of the road, but the President says everything has proved fruitless, and the Government is now in hopes of concluding a more favorable contract with another company.

☞ The city of Portland has voted, 2,432 to 556, in favor of subscribing $750,000 to the stock of the Portland and Ogdensburg Railroad. This is in lieu of the $700,000 authorized last year.

Debt of North Carolina.

The following is a copy of the ordinance of the Constitutional Convention of North Carolina providing for the payment of the interest on the public debt:

SECTION 1. *Be it ordained by the people of North Carolina, in Convention assembled, and it is hereby ordained by the authority of the same,* That the first General Assembly that shall be convened under the provisions of the Constitution framed by this body, be, and the same is hereby, directed to make the following provisions for the payment of the interest upon the public debt:

SEC. 2. It shall provide for the payment in cash of the interest falling due on and after the 1st day of January, 1869, upon that portion of the bonds of the State which are dated prior to May 20, 1861.

SEC. 3. It shall provide for the payment in cash of the interest falling due on and after the 1st day of July, 1869, upon that portion of the bonds of the State which are dated on and after Jan. 1, 1866.

SEC. 4. It shall provide for funding all such coupons upon the above specified classes of bonds as are now due, or which may become due prior to the time when the payment of interest shall be resumed as above directed. And for such purpose the General Assembly shall authorize the issue of bonds of the State, bearing 6 per cent. interest, which shall be given at par in exchange for such coupons as are now due, or may become due prior to the time when such resumption of payment of interest shall take place.

SEC. 5. This ordinance shall be in force and take effect from and after its passage.

Passed March 14, 1868.

Railways in Canada.

On the 1st of May there were 260 miles of railway in process of construction in the Dominion of Canada, divided as follows:

NEW BRUNSWICK.

	Miles
European and North American Railway, Western Extension Branch, St. John to Maine Boundary	81
Do. Eastern Extension, from Moncton to the Nova Scotia Province line	37
Do. Fredericton Branch, from Fredericton to its junction with the Western Extension	21
New Brunswick and Canada Railway, Woodstock Branch	17
Do. St. Stephen's Branch	19
Total, New Brunswick	175

NOVA SCOTIA.

Windsor and Annapolis Railway	85
Total	260

Oshkosh and Omro Railroad.

Col. Dorrance writes that having visited Mr. Mitchell, the President of the Milwaukee and St. Paul Railroad, that gentleman informed him "that the company, having passed resolutions to extend their road to Oshkosh via Omro, would faithfully fulfill their pledge on the terms agreed upon, namely: donation of $50,000, the right of way and station grounds." Milwaukee and Oshkosh each having voted—the former $25,000 and the latter $30,000—for the above named object, there can be no doubt that the road will be commenced as soon as $50,000 is secured to the company.—*Mil. Wis.*

☞ At a meeting of the stockholders of the Illinois Central Railroad Company at Chicago, on the 27th ult., Jonathan Sturgis, A. S. Hewitt, Wm. Tracy, W. H. Osborn, and George Bliss were elected directors. The contract with the Dubuque and Sioux City Co., was agreed to; and a stock dividend of 8 per cent., declared.

Pittsburg, Fort Wayne and Chicago Railway.

The earnings and expenses of this road for the years ending December 31, 1864, 1865, 1866 and 1867, have been as follows:

Earnings:	1864.	1865.	1866.	1867.
From freight	$4,148,503 00	$4,739,067 88	$4,707,582 12	$4,483,616 42

The earnings and expenses for 1856 are for five months only, viz., from August 1, to December 31.

The amount of capital, bonds, and debt at the close of each year since the consolidation has been as follows:

	Shares.	Bonds.	Floating Debt.	Total.
1857	$5,258,937 66	$7,371,000 00	$1,418,922 09	$14,048,759 75
1858	5,288,950 27	8,453,000 00	889,159 88	14,631,110 15
1859	5,351,761 84	8,289,500 00	1,916,517 04	15,557,777 88
1860	5,481,869 32	9,306,485 00	1,612,754 22	16,401,108 54
1861	5,480,865 54	9,660,825 00	1,860,430 87	17,002,121 41
1862	5,709,591 61	12,935,173 00		18,644,764 61
1863	6,164,531 89	12,935,173 00		19,099,704 89
1864	8,181,126 00	12,657,000 00		20,838,126 00
1865	9,312,442 00	12,573,500 00		21,885,942 00
1866	9,940,987 95	12,568,500 00		22,509,487 95
1867	11,500,000 00	12,563,000 00		24,063,000 00

In the floating debt are included coupons past due and unpaid—1858, $9,341; 1859, $252,150; 1860, $912,677, and in 1861, $1,519,212.

Debt of Massachusetts.

The State of Massachusetts will pay interest, in gold, on $15,000 5 per cents, and $85,000 6 per cents; also the principal, in gold, of both sums, which matured June 1st, and $100,000 of temporary loan, payable in currency. In this connection we annex a statement of the entire indebtedness of Massachusetts, from official sources:

5 per cent. bonds, due 1870@1880, inclusive		$867,000
5 per cent. bonds, due 1883		1,088,000
5 per cent. bonds, due 1894		4,379,500
5 per cent. bonds, due 1894 (£826,600 @$4 84)		4,000,744
6 per cent. bonds, due 1870@1878, inclusive		3,823,000
Principal and interest payable in gold.	$14,158,244	
6 per cents, due 1871–'86, 5 20s, currency	*3,505,000	
		$17,663,244
TROY AND GREENFIELD RAILROAD LOANS.		
5 per cts., due 1890–'94	$1,166,500	
5 per cts., due 1888–'90 (£114,500@$4 84)	554,180	
5 per cts., due 1888 £610,000@$4 84	2,952,400	
		4,673,080
Principal & interest in gold.	$4,673,080	
State indebtedness		$22,336,324
LOANS TO RAILROADS.		
Western, 5 per cts., (£764,900@$4 84)	$3,702,116†	
Eastern, 5 per cts., due 1868 @1871	275,000	
Norwich and Worcester 6 per cts., due 1877	400,000	
		4,377,116
Total debts and liabilities		$26,713,440

The loans to the three railroads are amply secured, and the State has sinking funds of over $10,000,000 toward the redemption of its own liabilities. The Troy and Greenfield loans are assumed as State indebtedness, but the premium on the last loan of $2,952,400 will as a sinking fund redeem a large part of that loan at maturity. The State has temporary debt maturing this year and next, to the amount of $1,412,240 92, but the balance of the last loan, $1,600,000, not yet paid in, will more than offset it, therefore it is not included in the aggregate debt. Although the debt of the State is large, the ample sinking funds makes its financial condition a very healthy one.

* This is the only currency loan. All others payable in gold, principal and interest.

† This loan matures Oct. 1, 1868, to April 1, 1871.

☞ A meeting of the stockholders of the Cape May and Millville Railroad Company, to ratify a lease of the road by the West Jersey Company, by virtue of which the stockholders are to receive six per cent. on their stock, and the road become virtually a part of the West Jersey road, was held at Cape Island recently. This is but another step on the part of the companies to advance the interests of that section of the State, and cannot fail to enhance the value of real estate in South Jersey.

☞ The new station at Lyndonville, on the Connecticut and Passumpsic Rivers Railroad, was opened to the public on the 18th ult. It is the finest on the road and among the finest in the State.

American Railroad Journal.

Saturday, June 6, 1868.

Stock Exchange and Money Market.

Money has been very freely offered all through the week to responsible street borrowers at from 3@5 per cent. on call. The banks have been generally claiming 5 per cent., and failing to place their accumulating means at this figure, they have been investing large sums in the public funds, which pay better, in the way of interest, at even the advanced prices now current for the National funded obligations. Private capitalists have been meeting the speculative inquiry at 4@5 per cent. on railway collaterals, and 3@4 per cent. on Government securities. Nearly all the prominent dealers in the public funds have had ample means placed at their disposal at 3, and in some exceptional instances, as low as 2 per cent. per annum. The discount market has been comparatively tame. The offerings of strictly prime to good paper have been quite moderate, and have met a ready market at from 5@7 per cent. per annum. The Sub-Treasury reduced its cash reserve, last week, very materially, the decrease having been a little over eight millions. The city banks made a further addition of nearly 3½ millions to their legal tender reserve, and nearly 2¼ millions to their deposits; while reporting a loss of over 2½ millions of specie. Their loans were augmented about $800,000.

The specie reserve of the city banks is now $17,861,088, against $14,617,060 same time last year. The city bank deposits are now $204,746,964, against $190,386,143 week ending June 1, 1867. The legal tender reserve amounts to $65,633,753, against $58,459,827 same time last year. The circulation now stands at $34,145,606, against $33,747,039 same time last year. The loans are now $268,177,490, against $252,791,514 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $102,336,875 a day, against a daily average of $81,455,457 the preceding week, and $81,031,000 the week ending with May 16, 1868. The current week's exchanges average about $116,685,754 a day. The city banks, last week, gained $3,400,751 of legal tender, and $2,239,414 in the deposit line, while they lost $2,615,859 of their specie reserve. They increased their loans, $796,211; and reduced their circulation, $37,432.

The New York Gold Exchange Bank reports for the week ending Saturday, the 30th day of May, 1868, the average amount of loans and discounts as $947,594; average amount of specie, $878,073; average amount of deposits, $1,074,013.

The Philadelphia Bank movement the past week shows an increase in loans of $99,224; a decrease of $40,931 in specie; an increase in legal tenders of $361,766; an increase of $574,160 in deposits; and a decrease of $34,389 in circulation. The Bank Clearings show a decrease of $1,667,446, and the balances, an increase of $23,887.

The U. S. Sub-Treasury receipts, week ending with May 30, were $42,162,953, including $2,240,981 from customs duties; payments, $50,170,722, including $53,000 of coin interest; balance at the close of the week, $94,677,986, against $102,685,755, at the close of the preceding week, showing a decrease of $8,007,768. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $757,427 including $318,000 from customs; and payments, $760,058; on Tuesday, receipts, $1,055,863 including $434,000 from customs, and payments, $540,279. The balance at the close of business on Tuesday stood at $95,190,938, against $101,299,539, a week previous; and $100,713,749 on May 19, 1868. The total receipts of the office in May, were $147,695,206, including $10,009,176 from customs; total payments, $155,512,593, including $17,053,377 of coin interest, and $90,431 of currency interest. The balance at the close of the month, was $7,817,387 less than at the beginning of the month. The conversions of maturing Seven-thirties into new Five-twenties at the office last week were unusually heavy, having amounted to over 36 millions all told. The coin certificates issued by the office, during May, reached $8,178,750; and the new three per cent. certificates, $21,670,000. The customs receipts of the office in May, were $479,479 more than in May of last year.

National Bank notes to the amount of $199,520 were issued last week, making the total issue to 1,678 banks thus far, $308,010,046, against

$282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $8,215,446, leaving, with the existing 1,639 banks, (having an aggregate capital of $420,221,210,) an actual circulation at this date, of $299,794,600. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,472,400; and for the public deposits, $38,289,950—making a total of $379,762,350. The Treasury Department last week redeemed and destroyed $335,100 of worn and mutilated fractional currency, and issued $419,000 of new. The outstanding amount of fractional currency on the 1st inst. was $32,450,489, against $32,588,690 on the 1st of April, and $32,807,947 on the 1st of March 1868.

Government revennes have been up to a moderate average, since our last. The excises, last week, yielded some four millions, against $3,204,250 the preceding week; customs at the port of New York, $2,240,981, and at the outports about $750,000 (in coin) more, making the grand total income for the week equal to about $8,200,000 in currency. The total receipts of the National Treasury, from excises, thus far in the new fiscal year, which began on the 1st of July, have been about $176,000,000. The latest official estimates of the total income from excises for the whole of the current fiscal year, ending with the 30th of the present month of June, are $190,686,426, and from customs, $165,208,374; other sources, about 50 millions; grand aggregate $405,794,459, against estimated expenditures of $379,178,067 all told.

Gold has been in rather more speculative demand, since our last, and the price has rallied again to 140⅛, which was the latest quotations on Wednesday. The Customs inquiry has been light, averaging less than $400,000 a day. The export call has been fair. The shipments on Tuesday and Wednesday of the current week amounted to $1,902,658.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $3,262,373, against $1,056,573 same time last year. The customs demand for Gold last week, averaged $373,497 a day; thus far, this week, it has been equal to $376,000 a day, or equal to a weekly aggregate of $2,256,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $48,268, and from California, $827,040. The total customs revenue of the Government, in coin, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $105,323,794, against $114,897,903 same time in the preceding fiscal year. The total receipts of California gold at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $32,841,844, against $35,656,416 same time in the preceding fiscal year, showing a decrease of $2,814,532 in 1867–'68. The exports of specie from this port, last week, were $4,211,723, against $777,143 same week last year. The exports of specie, hence, since July 1, 1867, have been $65,475,996, against $84,622,689 same time in 1866–'7. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $53,000, and since July 1, 1867, $71,705,637, against $58,015,310 same time in 1866–'7. The specie exports from San Francisco, from Jan. 1, to May 15, 1868, were $13,743,698, against $13,611,035 same time last year.

Government has disbursed $17,053,377 of coin interest through the local office, thus far in May.

The demand for foreign exchange has been on a moderate scale, but as the offerings of prime bills have been light, prices have been well supported, particularly for sterling bills, which have been most in request, and least freely offered. Bankers' prime sixty day bills on London closed on Wednesday at 109⅞@110¼, and on Paris to 5.16¼c.@5.12½; sight bills on London to 110⅜@110⅝, and on Paris to 5.11¼c.@5.10. The offering of produce bills has been less extensive this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,692,824, against $2,437,899 same week last year; total, since July 1, 1867, $166,641,475, against $178,083,378 same time in 1866–'67.

Government securities have been generally in very brisk demand, on home and foreign investment account, since our last, and a further marked improvement in prices has been established. The week's dealings have been unprecedentedly heavy, as far as regards the street and Board business. The main run has been on the Five-twenties and Ten-forties. The Five-twenties of 1862 and 1867 have been particularly active, closing very strong and buoyant.

U. S. sixes of 1881 closed here on Wednesday at 116⅝@116⅞; U. S. Five-twenties of 1862, 112¼@112½; U. S. Five-twenties of 1864 at 110½@110⅝; U. S. Five-twenties of 1865 at 110½@110⅝; U. S. Five-twenties of 1865, consolidated, 113⅛@113⅜; U. S. Five-twenties of 1867, 113½@113⅝; U. S. Ten-forties at 106@106¼, and U. S. Seven-thirties at 109⅞@110⅛. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

August, 1865....118¼	October, 1865....117¼
September, 1865..117¾	
U. S. three per cent. certificates	100¼

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 20.	May 27.	June 3.
Consols.....	94¾	95⅝	96½
U. S. 5-20's of 1862....	71⅜	72	72⅝
Erie.....	46⅜	46	46
Ill. Central.....	95⅝	96	97½

General business has been less active in the line of domestic produce, though prices have favored buyers in most instances. Middling upland cotton closed tamely on Wednesday at 31 cents, per lb. The stock of cotton now here is estimated at about 66,000 bales. The receipts at the port this week, have averaged only about 800 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,135,000 bales, against 1,743,000 bales same time last year; exports, same time 1,615,000 bales, against 1,345,000 bales same time last year; stock on hand at latest dates, 150,000 bales, against 290,000 bales same date last year. At the Live Stock markets, this week, Beeves have been more sought after at firmer prices, ranging from 15½@18½c. per lb.; week's receipts, 4,348. Veal calves have been in moderate demand at from 6@11½c. per lb.; receipts, $2,384 Sheep and lambs have been much more abundant, and have been in less request at reduced figures, ranging from 4½@8c. per lb.; receipts, $19,681. Swine have been plenty and heavy at from 8¼@9⅜c. per lb., all live weight; receipts, $23,601. Foreign merchandise has been in light demand, as a rule, but held with considerable firmness. The total imports of foreign dry goods, last week, were $1,185,203, and the total amount marketed $1,014,089. The value of foreign merchandise imported last week, was $5,635,567—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $6,820,770, against $5,950,715, same week last year; total since July 1, 1867, $222,293,464, against $251,408,022 same time in 1866–'67. The freight market closed heavily on a less active business. For Liverpool we quote flour at 1s. 6d.@1s. 9d. by sail, and 1s. 9d. by steamer, per bbl.; grain at 3½d.@4d. by sail, and 5@5½d. by steamer, per bushel; cotton at ⅛d. by sail, and 1/16d.@5/32 by steamer, per lb.; and heavy goods at 15s.@30s. by sail, and 15s.@35s. by steamer, per ton. Total number of vessels in port on Wednesday 524.

The New York exports, exclusive of specie, for the week ending June 2d, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$2,437,899	$2,692,824
Prev. reported.....	80,953,842	72,805,766
Since January 1.....	$83,391,741	$75,498,590

The imports for the week ending May 30th, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,232,567	$1,185,203
Gen. merchandise..... ..	4,718,148	5,635,567
Total for the week.....	$5,950,715	$6,820,770
Previously reported....	103,655,187	94,923,025
Since January 1.....	$109,605,902	$101,743,795

The balance in the Sub-Treasury on Wednesday was $93,037,528 64.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Georgia 7s, 96; Jersey City W. L., 96; Brooklyn 6s, W. L., 97¼; Pacific R. R., 7s, guar. by Mo., 98½; Hannibal and St. Joseph R. Northern (N. H.) Railroad.

At the recent annual meeting of the stockholders of this company at Concord, the old board of Directors was re-elected, as follows: Onslow Stearns of Concord, John A. Burnham of Boston, George W. Nesmith of Franklin, Uriel Crocker of Boston, Josiah Minot of Concord, Joseph W. Clark of Boston, and George A. Kettal of Boston. Resolutions were adopted authorizing the Directors to agree to a union of the Contocook River and Concord and Claremont Railroad with the Sugar River Railroad, as provided in the act of incorporation of the last named road; and authorizing the Directors to apply any moneys received by them on account of the above mentioned roads, toward the extension of the railroad from Bradford to Claremont. The action of the Directors in settlement of the account of the trustees for the bondholders of the Sullivan County Railroad, was ratified.

☞ The Oxford (Pa.) *Press* states that the work of grading the lower section of the Columbia and Port Deposit Railroad is being pushed on rapidly, and will be ready for the rails and ties in a few months.

Mont Cenis Railway.

Mr. Brunlees, the engineer of this enterprise, writes under date of May 11th, that there is no truth in the statement that a new supposed difficulty is likely to delay the opening of the road. He says: "From a recent examination of the whole line I can testify that the central rail is as perfect as the day it was laid down, notwithstanding that during the last eight months some of the engines have been constantly running. Moreover, any one acquainted with Fell's system ought to know that the horizontal wheels of the engines are made wide to allow for the play in the springs, and without flanges, so that there is not the least risk of tearing up the centre rail. No time can be fixed for the opening until the official report of the Commissioners is received, and this is daily expected."

Great Russian Railway.

This company has held a meeting at St. Petersburg with reference to the proposed acquisition of the St. Petersburg and Moscow line. It was decided, by 1,087 votes to 5, to proceed with the necessary negotiations for the acquisition of the line, it being always understood that the original rights of the Great Russian shareholders, as defined by the statutes of November 3, 1861, should remain intact.

☞ The Indo-European Telegraph Co., which was organized about the middle of April, for the construction of a line to India through Russia and Persia, have obtained the whole of their proposed capital of 450,000*l*. The Russian Government are stated to have placed a war steamer at the disposal of the company for three months, to take soundings for the cable in the Black Sea. Meanwhile the Persian portion of the line will be commenced, and is expected to be completed within twelve months.

☞ Columbus, Chicago and Indiana Railway Company are prepared to pay all arrearages of interest on the first mortgage bonds of the Chicago and Great Eastern road, and the arrearages on the first mortgage and sinking fund bonds of the Cincinnati and Chicago Air Line road, adding interest from the maturity of each coupon, and deducting Government tax. The office of the company is at No. 57 Broadway.

☞ A meeting of the Worthington Valley and Manchester Railroad Company was held at Dover, Baltimore County, Md., the 16th ult., when the following places were designated to open books and solicit subscriptions to build said road: Ashland, Mantua Mills, Dover, Davisville, Benson's Mill, Lawson's Mill, Zoucksville, Hampstead and Manchester.

☞ There are now three hundred men at work on the Dubuque and Sioux City Railroad between Iowa Falls and Fort Dodge. One-half the work is now done, and by the middle of July next the grading, bridging, etc., will be complete and ready for the rail.

☞ The St. Louis *Dispatch* says that all the iron necessary to complete the North Missouri Railroad to Kansas City and the Iowa State Line has been purchased. The road will be finished to both points by the middle of October.

Railroad Earnings.—Weekly.

The earnings of the Atlantic and Great Western Railway for the third week in May, 1868, were..... $99,300 00
Corresponding week previous year... 117,668 00

Decrease..... $18,368 00

The earnings of the Chicago and Northwestern Railroad for the 4th week in May, 1868. $423,827 85
Corresponding week previous year .. 323,344 88

Increase..... $100,482 97

The earnings of the Michigan Southern and Northern Indiana Railroad for the 4th week in May, 1868, were..... $118,848 00
Corresponding week of 1867..... 116,326 00

Increase..... $2,522 00

☞ Surveys for a new railroad from Freehold to Farmingdale are being made. The road will do a marl, freight, and passenger business, and will afford railroad communication from Long Branch to Jersey City, the route being over the Raritan and Delaware Bay, Freehold and Squankum, Freehold and Jamesburg, and United Companies' roads.

☞ The Hudson *Star* says that the grading on the Tomah and St. Croix Railroad to Black River Falls, a distance of about thirty miles, is entirely completed; the iron is purchased and it is expected to have the track laid, and a construction train running within the next three months.

☞ The board of directors of the Kent Co. Railroad Company have elected the following officers: President, T. W. Eliason, Esq.; Treasurer, R. Hynson, Esq.; Secretary, Charles T. Westcott, Esq.

☞ The Colebrookdale Railroad is to be commenced at once, the contract for grading from Pottstown to Mount Pleasant, a distance of fourteen miles, having been awarded to George Rice, of Pottstown. The Lehigh Valley *News* says the line is soon to be extended to Hosensack Gap, five miles beyond Mount Pleasant, so as to connect with the Perkiomen Railroad, and thus to become a through route from Pottstown to Allentown, and thence through the Lehigh Valley to New York.

☞ The Pan Handle Road (O.,) Holliday's Cave, (Western Va.,) and the Steubenville and Indiana (Ohio) Railroads have consolidated under the name of the Pittsburg, Cincinnati and St. Louis Railroad Company. The capital is $10,000,000. The central office is to be at Steubenville, Ohio.

☞ The Doylestown *Democrat* says that the Plymouth Railroad will be completed by the middle of September. The new road will be about ten miles long, and will connect the Norristown Railroad, at Conshohocken, with some point on the North Pennsylvania Railroad.

☞ The annual meeting of the stockholders of the Paterson and Newark Railroad was held in Newark on the 1st inst. Messrs. T. B. Peddie, Andrew Derron, R. S. Gould, Wm. L. Catherwood and Geo. T. Howell, were elected Directors.

☞ The route of a proposed railroad from Philadelphia to New Hope is being surveyed.

Journal of Railroad Law.

CATTLE RUNNING AT LARGE—COMMON LAW LIABILITY OF RAILROADS.

The facts in the case of the Michigan Southern and Northern Indiana Railroad Company *vs.* Fisher, (27 Ind., 96,) which has just been decided in the Supreme Court of Indiana, clearly appear in the opinion of the Court, delivered by

GREGORY, J.—Fisher sued the railroad company for killing his cow through the "fault, misconduct and negligence" of the employees, servants and agents of the defendant, by striking and running over her with a locomotive and train of cars running on the defendant's road.

This suit was commenced before a Justice of the peace, and was tried in the Court below on appeal. The Court found for the plaintiff. The defendant moved for a new trial, on the ground that the verdict was not sustained by the evidence, and that the same was contrary to law. The Court overruled the motion, to which the defendant excepted. The evidence is in the record. The cow was running at large, she was killed by a train on the defendant's road, about one and a half miles west of Ligonier at a road crossing; the cattle were accustomed to cross the railroad there, it was a crossing on a public highway, it was snowing at the time, and the wind was blowing hard, making it difficult to hear or see at any considerable distance; no whistle or bell was sounded, and the train was running about one-fourth faster than usual.

The Board of Commissioners under authority of the Revised Statutes, made an order allowing cows, &c., to run at large.

In the absence of an order of the Board of County Commissioners, the common law rule obtains in this State, that the owner of cattle is bound to keep them on his own premises, and that if he permits them to roam at large, on the land of others, he is a wrong-doer. The Lafayette and Indianapolis Railroad Co. *vs.* Shriner, 6 Ind., 141. But this was not the rule in the early settlement of this State. It was not then applicable to our circumstances. And as some portions of the State are yet sparsely settled, the Legislature has placed it in the power of the County Commissioners to change this rule of the common law. But when such an order is made, it imposes no greater obligation on the owner of other property, in the lawful use thereof, than rested upon him at the common law. This question was very fully considered by this Court in Durham *vs.* Musselman, 2 Blackf., 96, and the ruling in that case meets our approbation.

In the case in judgment, the railroad company was in the lawful use of its own property, in such a manner, that the injury complained of was not the natural or probable consequence of the act, and therefore the company is not liable to one who permitted his cow to run at large.

The judgment below is reversed, with costs, and the cause remanded, with directions to grant a new trial, and for further proceedings.

☞ The Council Bluffs and St. Joseph's road is expected to be completed by the 1st of July next to St. Joseph, which, by rail to Weston and Kansas City, and by the Pacific Railroad to St. Louis, will give a short and expeditious route from St. Louis to Omaha.

Revenue and Expenditures of the United States.

From the statement of revenue and expenditure, and the estimates thereof, made in the House of Representatives on the 1st inst., by the Chairman of the Ways and Means Committee, it appears that the actual expenditure for the current fiscal year has been:

For nine months..... $280,678,066
3 months to July 1, 1868, estimated. 98,500,000

Total for the year..... $379,178,066

Of this $149,418,383 is for interest on the public debt, $123,858,496 for the War Department, $51,554,175 for the civil list, $25,613,673 for the navy, and $28,733,337 for interior, pensions and Indians.

The revenue for the same year is as follows:

Six months (received)..... $299,194,459
Three months, to July 1, (estimated) 106,600,000

Total..... $405,794,459

This amount of revenue for the fiscal year ending June 30, 1868, actual and estimated, is made up thus:

Customs (coin).....	$165,208,374 37
Lands.....	1,166,337 31
Internal revenue.....	190,686,426 44
Direct tax.....	1,713,960 46
Miscellaneous.....	47,019,360 71
Total.....	$405,794,459 29

Next year's expenditure (ending June 30, 1869,) is thus stated:

Interest on the public debt.....	$129,678,078
Bounties as estimated.....	40,500,000
Purchase of Alaska (coin).....	7,200,000
All other.....	150,273,866
Total for the year.....	$327,651,000

Against which revenue is estimated as follows:

Customs (coin).....	$165,000,000
Internal revenue.....	190,000,000
Other revenue.....	31,000,000
Total revenue, 1868–'69.....	$406,560,000

According to these figures the coin revenue will be some 35 millions in excess of the interest on the public debt, leaving 23 millions of coin revenue (besides the Alaska purchase money) available for the purchase of the principal during the year. This is equal to the amount required under the sinking fund provision in the fifth section of the act of February 25, 1862.

The estimated currency revenue, on the other hand, exceeds the currency expenditure by an amount sufficient to provide for the remainder of the currency debt.

☞ Work on the Indianapolis and Vincennes Railroad is progressing rapidly, and a portion of the Cairo and Vincennes Railroad, lying between Vincennes and Carmi, has been put under contract.

☞ The Union Pacific Railroad has been completed and opened for business six hundred miles west from Omaha. Sixty miles have been built this season. The company have a larger force of laborers at work than ever before.

600 MILES

OF THE

UNION PACIFIC
RAILROAD

Are now finished and in operation. Sixty miles of track have been laid this spring, and the work along the whole line between the Atlantic and Pacific States is being pushed forward more rapidly than ever before. More than twenty thousand men are employed, and it is not impossible that the entire track, from Omaha to Sacramento, will be finished in 1869 instead of 1870. The means provided are ample and all that energy, men and money can do to secure the completion of this

GREAT NATIONAL WORK,

at the earliest possible day, will be done.

The UNION PACIFIC RAILROAD COMPANY receive:

I.—**A Government Grant** of the right of way, and all necessary timber and other materials found along the line of its operations.

II.—**A Government Grant** of 12,800 acres of land to the mile, taken in alternate sections on each side of its road. This is an absolute donation, and will be a source of large revenue in the future.

III.—**A Government Grant** of United States Thirty-year Bonds, amounting to from $16,000 to $48,000 per mile, according to the difficulties to be surmounted on the various sections to be built. The Government takes a second mortgage as security, and it is expected that not only the interest, but the principal amount may be paid in services rendered by the Company in transporting troops, mails, &c. The interest is now much more than paid in this way, besides securing a great saving in time and money to the Government.

IV.—**A Government Grant** of the right to issue its own FIRST MORTGAGE BONDS, to aid in building the road, to the same amount as the U. S. Bonds, issued for the same purpose, and *no more*. THE GOVERNMENT PERMITS the Trustees for the First Mortgage Bondholders to deliver the Bonds to the Company only as the road is completed, and after it has been examined by United States Commissioners and pronounced to be in all respects a first class Railroad, laid with a heavy T rail, and completely supplied with depots, stations, turnouts, car shops, locomotives, cars, &c.

V.—**A Capital Stock Subscription** from the stockholders, of which *over Eight Million Dollars* have been paid in upon the work already done, and which will be increased as the wants of the Company require.

VI.—**Net Cash Earnings** on its Way Business, that already amount to MORE THAN THE INTEREST on the First Mortgage Bonds. These earnings are no indication of the vast through business that must follow the opening of the line to the Pacific, but they certainly prove that

First Mortgage Bonds

upon such a property, costing nearly three times their amount,

Are Secure beyond any Contingency.

The Company have abundant means in their Treasury, and make no appeal to the public to purchase their bonds, as the daily subscriptions are entirely satisfactory; but they submit that, for entire security and liberal returns, there is certainly no better investment in the market.

The Union Pacific Bonds are for $1,000 each, and have coupons attached. They have thirty years to run, and bear annual interest, payable on the first days of January and July at the Company's Office in the City of New York, at the rate of six per cent. in gold. The Principal is payable in gold at maturity. At the present rate of gold, these bonds pay an annual income on their cost of

NEARLY NINE PER CENT.,

AND IT IS BELIEVED THAT THEY WILL SOON BE AT A PREMIUM.

The Company reserve the right to advance the price of their bonds to a rate above par at any time, and will not fill any orders or receive any subscriptions on which the money has not been actually paid at the Company's Office before the time of such advance.

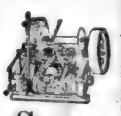
Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,

AND BY

John J. Cisco & Son, Bankers, No. 59 Wall St.,

And by the Company's advertised agents throughout the United States.



Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.

OFFICE OF THE TOLEDO, PEORIA AND WARSAW RAILROAD COMPANY, No. 26 EXCHANGE PLACE, NEW YORK, May 14, 1868.

NOTICE TO THE BONDHOLDERS AND shareholders of the Toledo, Peoria and Warsaw Railroad Company of Illinois. You are hereby notified that a meeting of the bondholders and shareholders of this Company will be held in this City on the 15th day of June next at the office of the Company, between the hours of 10 and 2 o'clock, to vote upon the question of the extension of the road from La Harpe to Burlington, Iowa, and from Warsaw to Quincy, Illinois, to connect with the Government bridges at those places, and to authorize the Board to contract for the building of the same, and to issue sinking fund bonds of the Company bearing interest at eight per cent., at the rate of fifteen thousand dollars ($15,000) per mile upon such extensions or branches for said purpose, or upon any other plan that may be presented you at said meeting for the purpose of raising the necessary funds for building the extensions, and upon any other subject that may be offered for consideration at said meeting.

Per order of the Board,
CHARLES L. FROST, President.

PENNSYLVANIA RAILROAD COMPANY, Treasurer's Department.
PHILADELPHIA, May 2, 1868.

NOTICE TO STOCKHOLDERS.—The Board of Directors have this day declared a semi-annual dividend of THREE PER CENT. on the Capital Stock of the Company, payable in cash, clear of National and State taxes, and a further dividend of FIVE PER CENT., payable in Stock, on and after May 30.

Blank powers of attorney for collecting dividends may be obtained at the office of the Company, No. 238 South Third Street.

THOMAS T. FIRTH,
Treasurer.
8t21

OFFICE PENNSYLVANIA RAILROAD COMPANY, Philadelphia May 13th, 1868.

Notice to Stockholders.—In pursuance of resolutions adopted by the Board of Directors at a stated meeting held this day, notice is hereby given to the Stockholders of this Company, that they will have the privilege of subscribing, either directly or by substitution under such rules as may be prescribed therefor, for Twenty-five per cent. of additional Stock at par, in proportion to their respective interests as they stand registered on the books of the Company, May 20th, 1868.

Holders of less than four Shares will be entitled to subscribe for a full share, and those holding more shares than a multiple of four shares will be entitled to an additional share.

Subscriptions to the new Stock will be received on and after May 30th, 1868, and the privilege of subscribing will cease on the 30th day of July, 1868.

The instalments on account of the new shares shall be paid in cash, as follows:

1st. Twenty-five per cent. at the time of subscription, on or before the 30th day of July, 1868.

2d. Twenty-five per cent. on or before the 15th day of December, 1868.

3d. Twenty-five per cent. on or before the 15th day of June, 1869.

4th. Twenty-five per cent. on or before the 15th day of December, 1869, or if Stockholders should prefer the whole amount may be paid up at once, or any remaining instalments may be paid in full at the time of the payment of the second or third instalment, and each instalment paid up shall be entitled to a pro rata dividend that may be declared on full Shares.

THOMAS T. FIRTH,
Treasurer.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the ***MAIN TRACK IS NEVER BROKEN,*** and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns ***The Life and Limb of all Travelers upon Railroads.***

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

MANUFACTURERS OF MONTIGNANI'S PATENT

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary

HUBBELL & VANHOESEN, Agents.

Works at

OSSINING,

Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERGNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

MERRICK & SONS,

SOUTHWARK FOUNDRY,

430 WASHINGTON AV.,

PHILADELPHIA,

MANUFACTURE

Steam Engines—High and low pressure, for land, river, and marine service; Horizontal, Beam, and Vertical. Patterns on hand for 8x10, 14x12, 18x12, Oscillating; compact and cheap.

SOLE MANUFACTURERS IN PHILADELPHIA AND CHESTER OF WILLIAM WRIGHT'S PATENT VARIABLE CUT-OFF STEAM-ENGINES.

Boilers—Plain cylinder, flue, and tubular.

Steam-Hammers, of Nasmyth & Davy patterns, with all the recent improvements.

Strahan's Drill Grinding Rest and Twist Drill-Holder.

Castings—Loam, dry, and green sand, brass, &c.

Roofs—Iron frames for covering with slate or iron—neat, durable, and economical.

Gas-Holders of every description. *Builders of Holders for the Philadelphia Gas-Works of 100 and 160 feet diameter.*

Tanks of every form, for sugar estates, refineries, oil, &c.

Gas Machinery of every description, including Retorts, Bench-castings, Holders and Frames, Purifiers, Coke and Charcoal Barrows, Gas-Valves, Governors, Hoisting Machines, &c.

Manufacturers for the American Meter Company of their Patent Dry Center Valve for changing Purifiers.

Bartol's Patent Wrought Iron Retort-lid, durable, light and cheap.

Sugar Machinery, such as Vacuum Pans and Pumps, Defecators, Bone-Black and Bag Filters, Bone-Black Burners, Washers, and Elevators, Hydraulic Elevators, Sugar and Bone-black Cars, Strike Heaters, Open Steam Trains, &c.

Sole Assignees and Manufacturers in the United States of

Weston's Patent Self-centering Self-balancing Centrifugal Sugar-Draining Machine.

Glass & Bartol's improvement on Aspinwall & Woolsey's Centrifugal Sugar-Draining Machines.

N. Rillieux's Patent Sugar-Boiling Apparatus, applicable to Beet-Root and Cane Sugar.

Having had twenty years' experience in the manufacture of Sugar Machinery for Cuba, South America, and the United States, they are prepared to contract for the design and erection of apparatus for making Sugar from Beet-Root or Cane, and for Refineries for either Sugar or Molasses.

They are also in possession of plans of the most recent improvements in machinery used in France and Germany in the manufacture of Beet-Root Sugar.

H. S. TERBELL, President; *39 Walker Street, New-York.*

THOS. S. YOUNG, Treasurer, *120 Chambers St., New York.*

We are prepared to make and deliver

IRON BOLTS,

manufactured by Automatic Machinery in such manner as to *increase the strength* of the Iron beneath the head by compression, and totally avoid the weakening by crystalization, as in the case of Bolts made by hand or by any slow and protracted process. These Bolts are *uniform in size and shape, and superior in strength and finish* to any others made.

Standard Bolts will be made of the best quality of iron, and warranted.

The attention of

Railroad Companies, Bridge, Car & Locomotive Builders,

and others requiring Bolts of the *greatest strength and uniformity*, is specially called to these Bolts.

Contracts for Bolts used in the construction of Railroads and their appurtenances, and all similar work not requiring the best quality of iron, will be taken at special rates.

The *rapidity of production* will enable the Company to fill orders of any magnitude at short notice. The Company also offer for sale

BOLT CUTTERS

of their own patent, which, with a given amount of power and labor, will cut twice the number of Bolts of any other machine in use.

American Railroad Journal.

New York, Saturday, June 13, 1868.

A New Work on Railroads.

We acknowledge a valuable contribution to railroad literature in a volume by Mr. HENRY V. POOR, entitled "A Manual of the Railroads of the United States." The work presents full exhibits of the organization, route, length, cost, earnings and expenses of each road in the country, (about 600 in all,) with elaborate statements of stock, debts, revenue, tonnage, traffic, &c., &c., of all the leading lines, and covering periods of six to seven years. To the body of the work is an appendix, showing the amount and various classes of the debt of the United States for eight years, commencing with 1860; also elaborate statements of the financial condition and debts of the several States.

The work is introduced by a sketch of the rise and progress of internal improvements in this country, from the canal first undertaken to connect the Mohawk with the waters flowing into Lake Ontario, to the present time, with the dates of the opening of the more important lines of railroad, by means of which the great railroad system of the country has been rendered so vast and complete.

From the opening of the first railroad in 1830 to the close of 1835, 1,098 miles of line, but of the rudest structure, were opened. The progress of these works since that period is shown in the following statement copied from page 19 of the Manual:

Year.	Miles in operation.	Annual increase of mileage.
1835	1,098	...
1836	1,273	175
1837	1,497	224
1838	1,913	416
1839	2,302	389
1840	2,818	516
1841	3,535	717
1842	4,026	491
1843	4,185	159
1844	4,377	192
1845	4,633	256
1846	4,930	297
1847	5,599	669
1848	5,996	397
1849	7,365	1,369
1850	9,021	1,656
1851	10,982	1,961
1852	12,908	1,926
1853	15,360	2,452
1854	16,720	1,360
1855	18,374	1,654
1856	22,017	3,643
1857	24,508	2,491
1858	26,968	2,460
1859	28,789	1,821
1860	30,635	1,846
1861	31,256	621
1862	32,120	864
1863	33,170	1,050
1864	33,908	738
1865	35,185	1,277
1866	37,017	1,832
1867	39,244	2,227

The least number of miles opened in any one year was 159 miles, in 1843; the greatest in 1856, when 3,643 were opened. In the first year of the war, the mileage constructed fell off to 621 miles.

From the opening of the first railroad, in 1830, to the acquisition of California, in 1848, a period of 19 years, 5,996 miles of line were constructed, being an average of 316 annually. From the date of that event up to the breaking out of the Civil War, a period of 12 years, 24,639 miles were constructed—being an annual average of 2,051 miles. From the last date to the present, 8,587 miles have been opened in a period of seven years, or 1,227 miles annually. The mileage opened the past year exceeds the average of that from 1849 to 1861.

The progress of the traffic of the railroads of the country has been quite as astounding as has been that of their mileage. Mr. POOR, in his work, estimates upon what appears to be the most reliable data, that the tonnage of the railroads the past year equalled 78,568,000 tons! At an estimated value of $100 per ton, the value of this tonnage equalled $7,856,800,000. As marvellous as these results seem, the rapidity with which the tonnage increased is still more marvellous. From the tables contained in the book, it is demonstrable that the tonnage of the railroads of the United States has doubled since 1860. Such increase, Mr. POOR remarks, "explains the wonderful strength displayed by the United States in the recent gigantic Civil War, and the equally wonderful recuperation of the country since the return of peace. Such increase demonstrates the entire capacity of the Nation to bear almost without feeling them, all its financial burdens. From the present time the population of the country will increase at the rate of 1,000,000 annually. The increase of their productive power is probably in three-fold ratio to that of the population. Within ten years, the value of the internal commerce of the country borne upon railroads will equal $15,000,000,000. With such a commerce, and with a corresponding wealth, the present burdens, great as they now are, will sink into insignificance and cease to be felt."

The earnings of all the railroads of the United States, the past year are shown to equal $340,000,000, a sum very nearly equaling 25 per cent of their total cost—a sum which equals just about $10 per head of our population. Their net earnings have equalled about 7 per cent. of their cost.

We can give only a brief sketch of the work, as the matter is so stated as not to allow condensation. The author has rendered a most valuable service to the great interest we have so long represented, and we commend the work to the attention of those who desire to possess in a com-

pact form a description of our railroads, with statements of their financial condition, and the marvellous results they have achieved. *

Chicago, Rock Island and Pacific Railroad.

Pursuant to adjournment, a meeting of the eastern stockholders of this company was held at the Sherman House, Chicago, at 11 o'clock A. M., on the 5th inst., M. C. Goudy, Esq., in the Chair. The minutes of last meeting were read and approved. The committee appointed at the previous meeting to report a detailed list of stockholders represented in the meeting, entitled to vote, submitted a list comprising 73,503 shares. The meeting then adjourned to meet at the office of the company at the depot at 2:30 P. M., the same day.

At the afternoon session the eastern stockholders were joined by J. F. Tracy, E. Cooke, G. L. Davenport, J. L. Coffin, A. Kimball, Benj. F. Allen, and E. A. McNair. It was voted that the meeting proceed to elect directors for the ensuing year. A ballot for a Board of Directors then took place, with the following result: J. F. Tracy, Chicago; E. Cooke, Davenport; W. F. Coolbaugh, Chicago; W. H. Appleton, New York; B. F. Allen, Desmoines; David Dows, New York; F. H. Tows, New York; George L. Davenport, Davenport; Robert A. Forsyth, New York; Wilson G. Hunt, New York; Oliver Charlick, New York; David Crawford, Jr., New York; N. B. Curtis, Peoria.

The following resolutions were offered, and unanimously adopted:

Whereas, On the 4th day of June, 1868, the Board of Directors of the Chicago, Rock Island and Pacific Railroad Company consisted of John F. Tracy, William F. Coolbaugh, Ebenezer Cook, F. H. Tows, B. F. Allen, George L. Davenport, A. Kimball, Edward A. McNair, John L. Coffin, Oliver Charlick, David Crawford, Jr., N. B. Curtis, and Robert A. Forsyth; and

Whereas, On said day the said A. Kimball, Edward A. McNair and John L. Coffin expressed a desire to resign their positions in said Board, and a committee representing the stockholders composing the meeting suggested that W. H. Appleton, Wilson G. Hunt and David Dows would be proper persons to fill the vacancies thus created; and,

Whereas, At a meeting of said Board of Directors, held at the office of said company in the City of Chicago, on the 5th day of June, 1868, A. Kimball resigned his position as a member of said Board and W. H. Appleton was elected to fill the vacancy thus created; and E. A. McNair resigned his position as a member of said Board, and David Dows was elected to fill the vacancy thus created; and John L. Coffin resigned his position as a member of said Board, and Wilson G. Hunt was elected to fill the vacancy thus created; and,

Whereas, A vote shows that John F. Tracy, W. H. Appleton, Wilson G. Hunt, David Dows, Wm. E. Coolbaugh, Ebenezer Cooke, F. H. Tows, B. F. Allen, Geo. L. Davenport, Oliver Charlick, David Crawford, Jr., N. B. Curtis and Robert A. Forsyth are the unanimous choice of the holders of stock represented in this meeting for Directors of said company for the year ending on the first Wednesday in June 1869; therefore,

Resolved, That the said persons last above mentioned are chosen and declared to be the Board of Directors of the said company for the year ensuing; and,

Whereas, The shareholders here present, representing the majority of the capital stock, desiring to terminate all doubts as to their policy and objects, hereby

Resolve, That the issue and sale of 49,000 shares of the capital stock under the resolution passed by the executive committee on the 13th of September last, be and is hereby confirmed and approved, and further ordered that the directors are hereby instructed to complete the line to Council Bluffs with the least possible delay consistent with the economical prosecution of the work.

Resolved, That the best interests of the company require the immediate dismissal of all suits against it and its present or former officers, or any of them, on account of the additional issue of the 49,000 shares of stock, and that all injunctions and orders for a receiver should be immediately discharged, and the Board of Directors be requested to take such measures as will in their judgment most speedily accomplish these ends, and, so far as may be necessary, to defend and save harmless the present or former officers of the company, or any of them, from all liability on account of the issue and sale of said shares of stock, the Board of Directors are hereby directed and the company undertakes so to do.

Resolved, That a majority of the stockholders of this company, represented at this meeting, do not object to the provisions of the law of Iowa passed at the last session of the Legislature, except so far as the same relates to freights and tariffs, but on account of the last-named provisions we are constrained to dissent from said act.

Resolved, that the interests of this company require that the transfer books be opened and kept in the City of New York as soon as it can be legally done.

On motion, the meeting then adjourned *sine die*.

Previous to the afternoon meeting of the stockholders the Board of Directors convened in the Superintendent's room. President Tracy occupied the chair.

A. Kimball resigned his position of director, and W. H. Appleton was elected to fill the vacancy.

The resignation of Mr. Kimball created a vacancy in the Executive Committee, and W. H. Appleton was elected to fill it.

E. A. McNair then tendered his resignation as a director, and, on motion, David Dows was elected to fill the vacancy thus created.

John L. Coffin resigned his position as director, and Wilson G. Hunt was elected to fill the vacancy.

The following are the names and places of residence of the officers of the company:

President—John F. Tracy, of Chicago.

Secretary—Ebenezer Cooke, of Davenport.

Assistant Secretary—Francis H. Tows, of New York.

Treasurer—William F. Coolbaugh, of Chicago.

Executive Committee—John F. Tracy, William F. Coolbaugh, W. H. Appleton, Ebenezer Cooke and B. F. Allen.

Grand River Valley Railroad.

Grand Rapids, Michigan, has voted almost unanimously to loan the Grand River Valley R.R. Co., $100,000 to aid in the construction of the road. Track laying has commenced at Rives Junction on the Jackson, Lansing and Saginaw Railroad. Half a mile of iron was put down the first day and properly ballasted. The track will be ballasted as much as possible as fast as the iron is laid. The officers of the company think that the road will be opened to Eaton Rapids by the 4th of July.

☞ The Camden and Amboy Railroad Company have ordered a thousand tons of steel rails from Sheffield, England, which are now in process of delivery. More than a mile of these rails was laid near Bordentown, on this road, about a year ago. These show no signs of wear as yet.

North Pennsylvania Railroad.

The earnings of this company in the fiscal years ending October 31, 1866 and 1867, were:

	1866.	1867.
From passengers	$330,059 46	$344,573 61
" coal	217,608 49	162,073 17
" pig iron	82,019 73	45,083 22
" through lumber	21,770 96	18,313 28
" local freight	190,503 84	209,624 20
" through freight	90,466 96	98,742 79
" mails	3,215 00	3,215 00
" rents, etc.	12,683 98	10,431 60
	$898,328 42	$892,056 87
Expenses, viz:		
Maintenance of way	$145,202 95	$127,186 35
Motive power	146,555 36	144,382 68
Maintenance of cars	50,765 29	63,240 75
Conducting transp	144,357 90	152,199 93
General expenses	32,831 92	27,831 13
	$519,713 42	$514,840 84
Net earnings	$378,615 00	$377,216 03
From which deduct—		
Coupons	$186,000 00	$190,060 00
Interest on scrip	14,747 10	11,899 51
Ground rents and interest on mortgages	9,087 73	9,087 73
U. S. and State taxes	23,881 38	22,228 91
	$233,716 21	$233,276 15
Less interest earned	3,884 75	6,516 88
	$229,831 46	$226,759 27
Balance to profit and loss	$148,783 54	$150,456 76

Compared with the fiscal year ending October 31, 1866, the gross earnings show a decrease of $6,271 55, with a decrease in expenses of $4,872 58—making a decrease in net earnings of $1,398 97. The profits, after deducting all expenses, renewals, repairs, interest and taxes, show an increase of $1,673 22. The proportion of expenses to earnings is 57.71 per cent.

A dividend of five per cent. has been declared payable in scrip, bearing no interest, and convertible, on and after May 1, into the 7 per cent. mortgage bonds of the company, in sums of $500.

The amount paid for construction during the fiscal year has been as follows: new sidings, $5,354 86; water stations, $3,808 40; passenger and freight stations, $6,966 64; engine house at Berks street, $2,229 66; passenger house at Berks street, $18,244 67; fencing, etc., $2,562 11—total, $39,165 84.

The payments on account of equipment, were $57,994 93, and include $15,983 for one ten-wheeled coal burning freight engine, having steel tires, but without tender, and $25,134 05 for four first class double saloon passenger cars, and one passenger and mail car, and $16,877 88 for new freight and road cars, including one milk car. The Superintendent in his report says:

The most important improvement made upon the line in the past year is the new station house at Bethlehem, which has been brought into use since the fiscal year closed. It was first occupied on the 18th of November, 1867. This building, which is a first class passenger station house, 100 feet by 44, is very well constructed and conveniently arranged. It is both lighted with gas and supplied with water. It has been erected at the joint expense of the North Pennsylvania and Lehigh Valley Railroad Companies, with a public room for the use of both roads, and separate offices for each. The building is of brick, with a slate roof, and the floors and the spacious platforms are made very solid, by being filled in with cinder between the joists,

This improvement has been long needed, and its completion has given great satisfaction to the itizens of Bethlehem.

At several of the way stations considerable improvements have been made to accommodate the constantly increasing way business of the road.

Enterprising and energetic parties are erecting blast furnaces for smelting iron ore, at Edge Hill and at Hellertown, which will hereafter furnish a large amount of tonnage.

In the month of September, 1867, the Lehigh Coal and Navigation Company completed their railroad bridge across the Lehigh at Bethlehem, to connect with our road; and on the 25th of November, the first coal train from Mauch Chunk, by their new railroad, passed over the bridge. It is expected that passenger trains will be put on in February.

The Lehigh and Lackawanna Railroad was opened for use a short time ago, from Bethlehem to Bath and to Chapman, a distance of about fourteen miles, and our road is already receiving some new business from that source.

As is shown by the tabular statements, the passenger business upon the North Pennsylvania Railroad has been unusually good in the past year, and yet about two-thirds of the *net* earnings have been derived from freight. The growth of the local business is one of the most encouraging features of the trade.

698,359 passengers were carried; of whom 21,960 were through passengers carried to the Lehigh Valley Railroad, 22,267 were received from that road, and 654,132 were local passengers. The whole travel of the year was equal to 225,714 through passengers; and the through travel, carried in connection with the Lehigh Valley Railroad, was less than twenty per cent. of it. To and from Mauch Chunk, 5,615 passengers were carried; to and from Wilkesbarre, 6,321; Easton, 8,166; Allentown, 12,569; and to and from way stations on the Lehigh Valley Railroad, 10,178. A small number went to other points. The aggregate increase of this class of travel in the year was only 2,486 passengers, while the increase in the total number of passengers carried was 45,051.

In the past year great facilities have been given to the travel between Philadelphia and Wilkesbarre. Since the 8th day of May last, morning and evening trains, making close connections, have been run in both directions; very comfortable cars have been run through without change, and the line has been extensively advertised. The result thus far has been that the travel has increased from 5,232 passengers in 1866, to 6,321 in 1867; being an increase of 1,089 passengers, or about one passenger per train. These facts are not stated to disparage the through travel, or to argue against proper efforts for its accommodation, but to show in a striking light that the main strength of the North Pennsylvania Railroad is in local business, of which it is not likely to be deprived by any future competition. The distance from Allentown to Philadelphia, by the proposed Perkiomen Railroad, will be more than nine miles longer than by our line.

The connection with the Connecting Railway at Tioga street was brought into use a short time ago, and it is found to be of considerable service in delivering coal by steam power, which would otherwise have to be hauled by mule teams.

The milk business continues to increase, and in the last year it exceeded two millions of gallons, and paid nearly forty thousand dollars.

Great efforts have been made in the past season to give the public ample accommodations, both for the passenger and freight business, and the aggregate traffic in both branches is larger than in any former year.

Additions to the rolling stock have been made since the fiscal year closed; consisting of two very superior coal burning passenger engines, twenty-five eight-wheeled box cars and a number of platform cars.

The 23 locomotives in use on the road during the year ran 343,023 miles, viz: with passenger trains, 209,144; with freight trains, 133,879; at an average cost for passengers of 23.2, and for freight 26.2 per mile. Number of passengers carried, 698,359; do., carried one mile, 12,188,701, equal to 225,714 through passengers. Tons of freight moved one mile, 13,691,447.

Fishkill Railroad.

The following is a copy of an act passed by the New York Legislature on the 29th of April, 1868, authorizing the construction of a railroad from the end of the Long Wharf, on the Hudson River, in the town of Fishkill, Dutchess county, to Matteawan, in said town:

SECTION 1. All persons who shall become stockholders, pursuant to this act, shall be, and they are hereby constituted a body politic and corporate by the name of the "Fishkill Railroad Company," for the purpose of constructing, and they are hereby authorized to construct and lay a railroad track or tracks, with the necessary turnouts, commencing at the west end of the "Long Dock," at the Hudson River, in the town of Fishkill, Dutchess county, and running thence to the depot of the Hudson River Railroad Company, and also to Matteawan, with the right to extend the same to Fishkill village, to run through and upon such streets and roads as may be necessary, by restoring the same to their original state of usefulness.

SEC 2. Nicholas H. Strippel, Homer A. Nelson, Augustus Hughson, James G. Powers, Richard Kenworthy, John J. Monell, Joseph Howland, D. W. Gitchell, John P. De Wint, Walter Breet, John B. Schenck, John Faulkner and Willard H. Mase, when they shall become stockholders in said company, shall constitute the first board of directors, who shall hold their office until after the first annual election.

SEC. 3. The capital stock of the said company shall not exceed the sum of thirty-five thousand dollars, divided into shares of fifty dollars each; the directors hereinbefore named, shall be commissioners, whose duty it shall be to open books to receive subscriptions, to the capital stock of said company, and to receive such subscriptions and issue stock in accordance with the rules which they may adopt.

SEC. 4. Such railroad shall be constructed on the most approved plan for the construction of street railroads, and the track of such road shall be laid flush with the surface of the street, and shall conform to the grade thereof, and the said company shall keep the surface of the street inside the rails, and for one foot outside thereof, in good and proper order and repair.

SEC. 5. The cars on said railroad shall be drawn by horses, and shall be drawn as often as the public interest may require, and shall be completed within two years, and the powers and privileges hereby granted are limited to fifty years.

SEC. 6. No greater amount than ten cents shall be charged for riding the whole length of said road.

SEC. 7 The said company shall possess all the powers and privileges conferred upon railroad companies by the general railroad act, passed April second, eighteen hundred and fifty, and the further organization and regulation of said railroad company shall be subject to all the provisions of the said general railroad act, not inconsistent herewith, excepting the following sections, and any amendments thereof, namely: sections one, two, three, four, twenty-seven, thirty-four, thirty-seven, thirty-eight, thirty-nine, fortieth, and forty-fourth. The said corporation shall make an annual report to the State engineer and surveyor of its business and affairs, in such manner and form as required by law.

European and North American Railway.

Subscriptions have been invited by Messrs. J. S. Morgan & Co., for 411,000*l.* first mortgage six per cent. bonds of the European and North American Railway Company. The line is from St. John, the principal port of the British province of New Brunswick, to the frontier of the State of Maine, where it will come into connection with the entire railway system of the United States and Canada, while in like manner it will form the connecting link between St. John and Halifax, Nova Scotia, and thus command a share of the general traffic between Europe and the whole of the American continent. The length is 88 miles, and the company have been subsidized by the Government of New Brunswick to the extent of $10,000 per mile, or an aggregate sum of $880,000, the city of St. John at the same time in its corporate capacity subscribing $800,000 on the stock, a total of $1,680,000 being thus provided of the entire capital of $3,520,000 for which the undertaking is to be completed. It is stated that more than 65 miles of the permanent way are finished, and that the remainder is in course of rapid execution by contractors of high character, on whom stringent conditions have been imposed by the provincial authorities. The line is to be opened on the 1st of January next, and the estimates made by the Government engineer of New Brunswick show a net revenue of 80,000*l.*, being 56,000*l.* in excess of the 24,000*l.* required for the interest on the bonds. The bonds are to be secured by a first mortgage under a deed from the company to Mr. S. L. Tilley, Minister of Customs for the Dominion of Canada, and Mr. J. E. Thomson, President of the Pennsylvania Railway, and a sinking fund of 10 per cent. of the net profits of the line after the payment of the interest is to be annually applied for their redemption. The price of issue is to be 75 (or 73½, reckoning 1½ per cent. interest to be paid on the 1st of July,) and the instalments are to extend to the 1st of September next.—*London Times.*

☞ Surveys for the Glen Cove Branch Railroad have been commenced. It will run from Glen Cove, through Locust Valley, to Oyster Bay.

Imports of Dry Goods.

Chicago and Northwestern Railway.

The Ninth Annual Meeting of the Stockholders of this Company for the election of Directors was held in Chicago on the 4th inst., Perry H. Smith, Esq., in the Chair. After the reading of a Communication from Hon. Wm. B. Ogden, President of the Company, James H. Howe, Albert Keep and E. B. Redfield were appointed tellers to conduct the election. After the ballots were deposited, the Chairman of the Board of Inspectors reported that the whole number of votes cast was 299,588. Each of the following persons received the whole vote cast, and they therefore constitute the Board of Directors for the ensuing year: Henry Keep, H. Henry Baxter, M. L. Sykes, Jr., John M. Burke, Samuel Sloan, Benj. Nathan, James H. Benedict, George S. Scott, John Bloodgood, E. P. James, S. M. Gurnee and Russell Sage, of New York; John B. Turner, H. H. Ferry, P. H. Smith and G. L. Dunlap, of Chicago, and Alex. Mitchell, of Milwaukee.

At a subsequent meeting of the Directors Henry Keep, Esq., of New York, was elected President.

The following is a copy of the Communication of Mr. Ogden:

To the Stock and Bondholders of the Chicago and Northwestern Railway Company, assembled at their annual meeting for the election of Directors, at Chicago.

The time has happily arrived when the Chicago and Northwestern Railway Company, after long years of faithful effort on the part of those hitherto connected with its creation, organization, development and administration, has emerged from its earlier condition of poverty and embarassment, which for want of means and equipment, and lack of power and ability properly to do and control its ever increasing business, limited for a time its usefulness to the country, and disabled it from making adequate returns to its stockholders, until, at length, chiefly through its own earnings and the wise and necessary application of them, it has, from very insignificant beginnings and after many trials, become one of the broadest and firmest foundations, and most favorably situated and connected railway institutions of the country; already among the largest in earnings, and with a future promise of traffic and income scarcely excelled perhaps by any.

The original conception of the enterprize was to connect Chicago with Lake Superior on the North, and with St. Paul on the Northwest. For its full realization it needs only the construction of the section between Fort Edward and Escanaba, wisely deferred until the development of the Peninsula Division should demonstrate its utility, as it has now done; and the completion of the Northwest connection with St. Paul and the railroads radiating from it, including the Northern Pacific Railroad, by finishing the short Trempeleau link connecting with the Winona and St. Peter, and by forming proper relations, if practicable, with existing lines, always preferable to new construction so long as adequate to the wants of the country and available on just terms.

To this original plan was added, in 1864, the Western line, by consolidation with the Galena, and the subsequent completion of the route to Omaha, forming the earliest and best connection with the Union Pacific Railroad, which is rapidly spanning the continent, and now extends, a continuous line of railroad west from Chicago, 1,100 miles—a distance greater on the west than the distance from Chicago, east, to New York or Boston. This was done by a new and revised agreement and lease, which was, by some millions, more favorable to this company, at the same time that it expedited many years the completion of that connection, and made possible the rapid extension of the Pacific Railroad.

The foundations have now been substantially laid, and the work principally done, to render this company, with its lines resting on Lake Superior on the north, St. Paul on the northwest, and the Missouri on the west, a complete institution; and giving to it capacity to serve the public with efficiency, and to its proprietors the safety incident to very long lines, not easily repeated, from the excessive and improvident competition which the physical conformation of a prairie country admits of, and which too often endangers railway investments.

Thus has been covered the ground necessary to secure permanently to the Chicago and Northwestern Railway Company a business and an ability to control and conduct it with the greatest economy to the country, and with satisfactory advantage to itself, that it is not now, perhaps, or likely hereafter to be, enjoyed by other railway organizations of the country, and which, if wisely and timely secured and accomplished, will continue hereafter, as in the past, to steadily and rapidly increase its present liberal earnings, until, with a continance of proper care and management, they will be likely, in a short period of years, to be enlarged to nearly or quite double the amount to which the course of policy adopted by the past management, and thus far steadily pursued by them, so far at least as the stock and bondholders could be brought to understand and approve, the wisdom of that policy has already advanced them.

My connection with the enterprises, which are now embraced in the Chicago and Northwestern Railway Company, commenced in 1847, when thoroughly impressed with the importance and necessity of railway communications to the growth of the country, I was induced to accept the Presidency of the Galena and Chicago Union Railroad Company, which first undertook the construction of a railway from Chicago into any of the tributary regions of the Northwest.

When, after about four years' service, I resigned that trust, and left that enterprise in a course of successful progress, with its stock at a high premium, I supposed I had terminated forever my relations to such undertakings. In 1853, however, on account of the bankruptcy of the company which had begun to construct the railroad from Chicago to Janesville and Fond du Lac, afterwards forming the line of the original Chicago and Northwestern Railway Company, I was induced to accept the Presidency of that company for the purpose of rescuing the enterprise and carrying it forward to more complete development. I have followed its fortunes since, and during the period of railway revulsion in 1857, became heavily involved in liabilities for it, which it took years of effort to fully pay and discharge; and I have often been called upon subsequently to make large advances for its benefit.

In all this period, of now twenty-one years' duration, and comprising the best business portion of my life, my single governing motive has been the physical and industrial development and progress of the Northwest; though in aiming at this object, I have always endeavored to protect, preserve, and make adequately remunerative, as far as possible, the capital of those who have invested their money in these great and most beneficial public works. I have contemplated these enterprises only in their public aspects, and not as sources of profit to myself. Bearing freely the burden incident to their creation, without salary, and often without full remuneration of actual expenses, and without ever having speculated in their stocks or in any property connected with them, I have shared in the transcendent blessings which they have showered so prodigally upon all the Northwest, only in common with my fellow-citizens, by the aided prosperity of all our business and the enhanced value of all our property.

On the reorganization of 1859, under statutory enactments for that purpose, it was provided that the bondholders should have the right to vote at all corporate meetings, in the same manner as stockholders. The object of this expedient was, by enabling the bondholders to control the ad-

ministration of the property for the time being, to make it safe for them to restore and preserve the interests of the stockholders, which, by the mortgage foreclosure at that time, were legally extinguished; and enable their stock, then without appreciable value, to become vitalized by the future growth and prosperity of the enterprise. Until 1864, the bondholders exercised a large, perhaps controlling, influence in the management, but always in complete harmony and co-operation with the stockholders, and always recognizing the legal and moral obligation of directors to represent, with judicial impartiality, all classes of interests.

Nothing can better illustrate the liberal and provident care of the interest of the holders of the common stock (about 4,000,000 of which was saved from total extinction on the reorganization; and 6,000,000 of which was issued for equalization in the Galena consolidation) than the results we now experience. The growth of earnings in the year just closing is $2,448,757 19; of the year previous, $1,917,895 17; and in the year still previous, $1,423,090 53; making in all $5,789,742 89. This has been accomplished during a period following the close of the war when the earnings of most railroads have not largely increased, in a small degree by the addition of the 150 miles of the Iowa line from Cedar Rapids to Omaha, and the acquisition of the Chicago and Milwaukee Railway, but chiefly by successive and immense additions of equipment upon the lines in use three years ago. It was foreseen, as stated in the report of last year, that as the equipment forms less than one-fourth of the investment in the whole railway, and as aditional equipment, if fully employed, would yield, at least, fifty per cent. a year net income, the policy adopted and systematically pursued, of boldly continuing new investments in equipments for the purpose of bringing into productive use the unemployed capacity of the permanent way, would enable the company to earn income on all its stocks, as, with continued good manangement, it will henceforth be able to do.

The progress and succession of this enterprise is sufficiently and gratifyingly indicated in the change that has been already affected in the increased public confidence and estimation of its present and future value. During the early years of its poverty and lesser importance and earnings, when it taxed the efforts and purses of its managers and friends severely to sustain and advance it to the position and eminence to which they then felt assured it was entitled and would soon occupy, the public were slow to discover and appreciate its elements of future greatness or to give it the degree of confidence to which it was then actually entitled. Now, it not only commands the attention of capital, which seeks investments in its stocks and securities with avidity and advantage, and at materially advancing prices, but a growing interest in its affairs, and an increasing disposition to be identified with its management is also manifested, until its administration, instead of being a burden to be borne from public motives, as in the past, has become an object of desire and ambition.

Some, among the most valuable and useful members of the board of directors of this company, who have been longest associated with its management, have desired, for some years past, to withdraw from their labors in connection with it, and will avail themselves of the present occasion and of the prosperous condition of the company to do so, gratified at being able to leave the administration of its affairs with those who may be selected by the proper representatives of its securities.

The position I have held so long, and the duties it imposed, it had been my cherished and announced determination to relinquish at an earlier day, but the unsettled state of the country just at the close of the war, and my solicitude for the connection with the Union Pacific Railroad at Omaha induced me for the time to delay doing so.

Proposing now to close all my official relations with the Chicago and Northwestern Railway Company, for whose welfare and progress I have watched and labored so long and with so much interest and hope, which interest I shall continue to cherish in the kindest spirit toward all connected with it, and with undiminished hope and confidence in its still increasing prosperity, growth and usefulness; I desire, in conclusion, to express my great obligations and indebtedness personally, and the indebtedness of the company for its progress and success to the earnest, laborious and self-sacrificing efforts of the able board of directors with whom it has been my good fortune and happiness to have been so long and pleasantly associated. And like expressions of acknowledgement of obligations and indebtedness on the part of the company, the board of directors and myself are equally and eminently due to all the able and faithful officers and employes of the company, who have been associated with and accomplished so much for it, and so many of whom have given the best years of their lives in undivided efforts to promote its welfare.

Nor would I willingly forego this opportunity to express my obligations and the obligations of this company to the people along its various lines of the road for their early, liberal and continued support of its measures and interests, or my regret at severing the intimate and ever agreeable and interesting relations to them, which have grown out of my connections with this enterprise,

WM. B. OGDEN.

NEW YORK, June 1, 1868.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 31st May, inclusive, during the years 1867 and 1868, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1867...	3,200	59,500	432,100	19,500
1868...	61,000	3,486,100	2,646,100	326,200
Inc..	57,800	3,426,600	2,214,100	306,700

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows an increase of 743,120 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of May, in the years indicated:

	1866.	1867.	1868.
Canal opened—	May 1.	May 6.	May 6.
Flour, bbls.	21,700	8,200	61,000
Wheat, bushels..	169,800	59,500	3,486,100
Corn, bushels...	1,384,200	432,000	2,646,100
Barley, bushels.	40,700	19,500	326,200
Oats, bushels...	570,700	193,900	1,532,300
Rye, bushels....	55,600	14,600	140,000
Malt, bushels...	40,100	28,500	112,000
Beef, bbls.....	100	.....	700
Pork, bbls.....	3	4	100
Bacon, lbs.....	.....	.....	.....
Butter, lbs.....	100	200	2,100
Lard, lbs.....	5,600	.....	14,300
Cheese, lbs.....	39,700	4,800	261,300
Wool, lbs.....	86,400	4,500	1,600

The receipts for 1868 include what was delivered from the Erie Canal between April 20, and May 1, and which was frozen on the canal during the Winter.

☞ We learn from Peru that Mr. Henry Meiggs has made a contract for $12,000,000 to build a railroad from Arequipa to the coast, and has already commenced to contract for materials.

☞ A new railroad between Swedesborough and Woodbury, Gloucester County, N. J., is soon to be completed.

Finances of Ohio.

From the Report of the Commissioners of the Sinking Fund, we learn that the total funded debt of the State, Nov. 15, 1867, was... $11,031,941 53

The redemptions during the six months ending May 15, 1868, were:

Foreign loan of 1860 ..	$12,650 67	
Foreign Union loan of 1868	35,450 00	
Domestic Union loan of 1868....	24,964 13	
		73,064 80
Outstanding May 15, 1868....		$10,958,876 86

The existing funded debt of the State consists of the following loans:

FOREIGN DEBT—PAYABLE IN NEW YORK.

Loan payable after Dec. 31, 1860, not bearing interest.....	$8,270 00
Loan (Union) payable July 1, 1868, bearing 6 per cent. interest	158,316 00
Loan payable after Dec. 30, 1870, bearing 6 per cent. interest	2,183,531 93
Loan payable after Dec. 31, 1875, bearing 6 per cent. interest	1,600,000 00
Loan payable after June 30, 1881, bearing 6 per cent. interest	4,095,309 47
Loan payable after Dec. 31, 1886, bearing 6 per cent. interest	2,400,000 00
	$10,445,427 40

DOMESTIC DEBT—PAYABLE AT COLUMBUS.

Stock of 1849, not bearing interest	$1,765 00	
National road bonds, not bearing interest.....	60 36	
Union loan of 1868, bearing 6 per cent. interest 111,624 00		
Union loan of 1871, bearing 6 per cent. interest 400,000 00		
		513,449 36
Total funded debt, as above..		$10,958,876 76

The receipts into the State Treasury and the disbursements therefrom, were as follows:

RECEIPTS.

Balance in the Treasury, Nov. 15, 1867....	$378,222 59
Taxes....	733,915 32
School lands....	25,689 88
Surplus revenue....	4,423 92
Agricultural College land scrip	1,556 40
Ohio University lands....	673 34
Canal lands....	180 00
Buttles' estate....	998 75
Returned from New York	22,705 69
Total receipts	$1,168,365 89

DISBURSEMENTS.

Principal of foreign debt.	$33,271 84	
Principal on Union loan.	60,414 13	
Interest on foreign debt.	310,366 26	
Interest on irreducible debt 202,605 49		
Interest on Union loan..	24,311 42	
Expenses of Home office	1,933 00	
Expenses of New York office....	812 08	
Expenses of Fund Commissioners....	750 00	
		634,793 72
Balance in the Treasury, May 15, 1868		$533,527 17

☞ The engineers have just finished the location of the Columbia and Port Deposit Railroad. Messrs. Cameron, McElroy, Duffie and one other gentleman have taken the contract to build the road.
